Section 124(a) of P.L. 100-485, added new paragraph (3) to Section 453(e). This new paragraph requires the Secretary of Labor to enter into an agreement with the Secretary of Health and Human Services. Under this agreement, the FPLS will be given prompt access to wage and unemployment compensation claims information and data maintained by or for the Department of Labor or SESAs. Under Section 124(c)(2), the Secretaries of Labor and Health and Human Services must enter into this agreement within 90 days following the date of the enactment of P.L. 100-485.

Section 124(b)(1) of P.L. 100-485 added new subsection (h)(1) to Section 303, SSA, to require the State agency charged with the administration of the State UC law (i.e., the SESA) to give the FPLS prompt access to wage and UC claims information useful in locating an absent parent or the parent's employer for purposes of administering the child support enforcement provisions of Title IV, SSA. Under this provision, the actions the SESAs are required to take may be provided for in the agreement between the Secretaries of Labor and Health and Human Services.

The information covered by Section 303(h)(1) includes any wage and UC claims information that might be useful in locating an absent parent or the parent's employer for purposes of carrying out the child support enforcement program under Title IV, SSA. Under the agreement required by Section 453(e)(3), a SESA will be required to grant access to information that it has or that is maintained for it by another agency. SESAs are not, however, required to obtain additional information for the use of the FPLS.

Granted funds under Title III may not be used to pay any costs of administration of Section 303(h). As noted in the Conference Report (H.R. Rep. No. 998, 100th Cong., 2d Sess. 103), "[c]urrent law provides for the Department of HHS to reimburse the costs incurred by States and Federal agencies in providing information to the Federal Parent Locator Service." Therefore, any administrative costs incurred by SESAs that are associated with Sections 303(h) and 453(e) will be borne by the Department of Health and Human Services.

Further details regarding the agreement between the Secretaries of Labor and Health and Human Services, the implementation of Section 303(h), and the method of billing and reimbursing costs of administration will be issued at a later date.

Subsection 124(b)(1) also added new Section 303(h)(2), SSA, requiring denial of administrative grants to any State upon the finding of the Secretary, after reasonable notice and opportunity for hearing to the SESA, that there is a failure to comply substantially with the requirements of new Section 303(h)(1). Finally, Section 124(b)(2) of P.L. 100-485 amended Section 304(a)(2), SSA, to provide for judicial review whenever the Secretary makes an adverse finding under Section 303(h)(2).

b. Safeguards on Granting Access. Section 303(a)(1), SSA, has been interpreted to require that sufficient safeguards exist to ensure that any disclosed wage and UC claim information be used only for the purposes for which it is disclosed. Section 303(h) requires disclosure only for purposes of "carrying out the child support enforcement program under title IV." Therefore, the Department interprets Sections 303(a)(1) and 303(h)(1) as requiring the States to establish sufficient safeguards, including such safeguards as the Department of Labor may require, to assure that access to the information is restricted to the FPLS and that the information given the FPLS is used only for the purposes specified under Section 303(h)(1).

c. Amendments to State Law. Most State laws now permit information in the SESA's records to be disclosed to public officials in the performance of their public duties. In addition, Section 303(f), SSA, requires SESAs to provide information for purposes of the income and eligibility verification system created by Section 1137, SSA. SESAs will need to

review State laws to determine whether existing provisions provide sufficient authority to grant access to the FPLS or whether an amendment to State law is needed. If an amendment is necessary, State law should be amended by the effective date discussed in Section 3 of this attachment.

3. Effective Date. New Section 303(h)(2) requires that SESAs must substantially comply with the requirements of Section 303(h)(1) as a condition for receiving administrative grants under Section 302(a) of the SSA. Section 124(c)(1) of P.L. 100-485 specifies that the amendments made to Section 303(h):

> . . . shall become effective on the first day of the first calendar quarter which begins one year or more after the date of the enactment of this Act.

Since P.L. 100-485 was enacted on October 13, 1988, the requirements of Section 303(h)(1) become a condition for receiving administrative grants on January 1, 1990. This means the State law must provide for granting the FPLS prompt access to wage and UC claims information as provided by any agreement between the Secretaries of Labor and Health and Human Services by January 1, 1990.

TEXT, EXPLANATION AND INTERPRETATION OF AMENDMENTS MADE TO THE SOCIAL SECURITY ACT BY SECTION 904(c) OF P.L. 100-628, THE STEWART B. McKINNEY HOMELESS ASSISTANCE AMENDMENTS ACT OF 1988

1. Text of Amendments to the Social Security Act Made by Section 904(c) of P.L. 100-628.

a. Amendment to Section 303, SSA. Section 904(c)(1)(A) of P.L. 100-628 amended Section 303, SSA, by adding the following new subsection:

> (i)(1) The State agency charged with the administration of the State law--
>
> (A) shall disclose, upon request and on a reimbursable basis, only to officers and employees of the Department of Housing and Urban Development and to representatives of a public housing agency, any of the following information contained in the records of such State agency with respect to individuals applying for or participating in any housing assistance program administered by the Department who have signed an appropriate consent form approved by the Secretary of Housing and Urban Development--
>
> (i) wage information, and
>
> (ii) whether an individual is receiving, has received, or has made application for, unemployment compensation, and the amount of any such compensation being received (or to be received) by such individual, and
>
> (B) shall establish such safeguards as are necessary (as determined by the Secretary of Labor in regulations) to ensure that information disclosed under subparagraph (A) is used only for purposes of determining an individual's eligibility for benefits, or the amount of benefits, under a housing assistance program of the Department of Housing and Urban Development.
>
> (2) The Secretary of Labor shall prescribe regulations governing how often and in what form information may be disclosed under paragraph (1)(A).
>
> (3) Whenever the Secretary of Labor, after reasonable notice and opportunity for hearing to the State agency charged with the administration of the State law, finds that there is a failure to comply substantially with the requirements of paragraph (1), the Secretary of Labor shall notify such State agency that further payments will not be made to the State until he or she is satisfied

that there is no longer any such failure. Until the Secretary of Labor is so satisfied, he or she shall make no future certification to the Secretary of the Treasury with respect to such State.

(4) For purposes of this subsection, the term 'public housing agency' means any agency described in section 3(b)(6) of the United States Housing Act of 1937.

(5) The provisions of this subsection shall cease to be effective beginning on October 1, 1994.

b. Companion Amendment to Section 304(a)(2), SSA. Section 904(c)(1)(B) of P.L. 100-628 amended Section 304(a)(2), SSA, by striking "(e), or (h)" and inserting "(e), (h), or (i)".

2. Discussion.

a. In General. The Department of Housing and Urban Development (HUD) administers various housing assistance programs for low-income families. Section 904 of P.L. 100-628 creates requirements to assist in preventing fraud and abuse in HUD programs, including a requirement that program applicants and participants consent to permit HUD or a public housing agency to request certain information from State Employment Security Agencies (SESAs). The amendments made by Section 904(c)(1) require the SESA to provide these entities such information.

Specifically, Section 904(c)(1)(A) of P.L. 100-628 added new subsection (i)(1) to Section 303, SSA, to require the State agency charged with the administration of the State UC law (i.e., the SESA) to disclose, under certain conditions, to officers and employees of HUD and to representatives of a public housing agency certain information contained in the SESA's records.

"Public housing agency" is defined in new Section 303(i)(4) as "any agency described in Section 3(b)(6) of the United States Housing Act of 1937." Section 3(b)(6), 42 U.S.C. 1437a(b)(6), defines "public housing agency" as:

> . . . any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of low-income housing.

SESAs are required to disclose information to HUD and other public housing agencies only upon request and only with

respect to individuals applying for or participating in any housing assistance program administered by HUD. In certain instances, private owners of residences are responsible for determining eligibility for or level of benefits. The requirements of Section 303(i)(1) do not require disclosure to such owners. Indeed, as stated in the Conference Report (H.R. Rep. No. 1089, 100th Cong., 2d Sess. 91), "[t]he wage and UI information may not be released to private owners." In addition, before a SESA may release any information under Section 303(i) regarding an individual who is applying for or participating in a HUD housing assistance program, the individual must sign a consent form, approved by the Secretary of HUD, which permits the release of such information.

Under Section 303(i)(1)(A), the SESA is required only to disclose "information contained in the records of" the SESA. Because a SESA is required only to disclose information in its records, it is not required to obtain additional information for the use of HUD or other public housing agencies.

Under Section 303(i)(1)(A)(i), the information to be disclosed from SESA records includes "wage information." "Wage information" is not defined in Section 303(h). For purposes of the income and eligibility verification system required under Section 303(f), SSA, the Department has defined "wage information" contained in SESA records at 20 CFR 603.2(b):

> "Wage information" means information about wages as defined in the State's unemployment compensation law and includes the Social Security Number (or number, if more than one) and quarterly wages of an employee, and the name, address, State, and (when known) Federal employer identification number of an employer reporting wages under a State unemployment compensation law . . . .[1]

The Department adopts this definition of "wage information" for purposes of Section 303(i)(1). However, if HUD or any public housing agency does not require any of this wage information to verify entitlement for HUD-assisted housing

---

[1] The remainder of 20 CFR 603.2(b) addresses States where wage information is not required to be reported to the SESA. It is not applicable to Section 303(i)(1)(A) which only requires disclosure of information contained in the SESA's records.

programs, then the SESA should limit disclosure to the information required. In addition, a SESA is required under Section 303(i)(1)(A)(ii) to provide information in its records as to whether an individual is receiving, has received, or has made application for, unemployment compensation, and the amount of any compensation being received, or to be received, by the individual.

Granted funds under Title III may not be used to pay any costs of administration of Section 303(i). Section 303(i)(1)(A) specifically requires that SESAs shall disclose information upon "a reimbursable basis." Because granted funds may not be used for this purpose, the Department interprets Section 303(i), SSA, as requiring the SESAs to collect from HUD and any other requesting public housing agency all costs incurred in administering Section 303(i). These costs include start-up and continuing costs.

A written agreement between the SESA and HUD and any other requesting public housing agency is needed and should include specific terms regarding the information supplied by the SESA, the costs covered and charges to be made for all information, billing and payment arrangements (including advance payment), handling of errors, and adjustment of prices. SESAs may undertake activities under Section 303(i)(1) only after agreements for reimbursement of all costs have been made.

Section 904(c)(1)(A) also added new Section 303(i)(2) requiring the Secretary of Labor to prescribe regulations governing how often and in what form information may disclosed under Section 303(i)(1)(A). Further information on the required agreements and the proposed regulations will be issued at a later date.

Section 904(c)(1)(A) also added new Section 303(i)(3), SSA, requiring the denial of administrative grants to any State upon the finding of the Secretary, after reasonable notice and opportunity for hearing, that the State agency failed to comply substantially with the requirements of new Section 303(i)(1). New Section 303(i)(5) specifies that the provisions of Section 303(i) cease to be effective beginning on October 1, 1994. Section 904(c)(1)(B) of P.L. 100-628 amended Section 304(a)(2), SSA, to provide for judicial review whenever the Secretary makes an adverse finding under Section 303(i)(3).

Finally, Section 904(c)(2) created new provisions, not amending any existing law, which provide protections for the

subjects of the disclosed information by limiting the use of this information by requiring verification before action is taken against these individuals and by imposing penalties for improperly requesting, obtaining, or disclosing this information. (See Section 2.b of this attachment and Attachment III.)

b. Safeguards on Disclosing Information. New Section 303(i)(1)(B), SSA, requires the SESA to establish necessary safeguards to ensure that information disclosed is used only for purposes of determining the individual's eligibility for benefits, or the amount of benefits, under a HUD housing assistance program. The Secretary of Labor is to prescribe regulations on such safeguards as are necessary. Until such regulations are issued, SESAs will assure compliance with Section 303(i)(1)(B) by following the confidentiality protection provisions of 20 CFR 603.7 pertaining to the income eligibility and verification program. In addition, until such regulations are issued, as a condition of disclosure, HUD and other requesting public housing agencies must agree to comply with provisions of 20 CFR 603.7 (with a more stringent requirement noted below) pertaining to requesting agencies.

Section 904(c)(2) of P.L. 100-628 provides for limitations on the use of data obtained by the requesting agencies. Section 904(c)(3) provides for penalties for improper use of information. Although SESAs will not be actively involved in the administration of these sections, SESAs should be aware of the limitations on use of wage and UC information. These limitations should be included in any agreement between the SESA and HUD or other requesting public housing agencies.

Information received under Section 303(i)(1)(A) from SESAs may be redisclosed only under the limited conditions associated with administration of Section 303(i)(1)(a) and Section 904(c) of P.L. 100-628. Under 20 CFR 603.7(b)(3), agencies requesting information under the income and eligibility verification system may redisclose information to other requesting agencies as defined in 20 CFR 603.2(d). However, HUD and other public housing agencies may only redisclose information to public officials whose duties fall within the scope of Section 904(c). In this regard, SESAs should be aware that, under Section 904(c)(2)(A)(ii), the private owners responsible for verifying the individual's eligibility for or level of benefits under a HUD housing assistance program may only be informed by the recipient of the disclosed information

that the individual's eligibility for or level of benefits is uncertain and that the owner should independently verify the individual's income information.

Repeated violations of the statutory, regulatory or other reasonable safeguards required under Section 303(i) and Section 904(c) will constitute cause for the SESA to terminate any agreements. SESAs should report suspected violations of Section 904(c) to the appropriate authorities.

The text of Sections 904(c)(2) and (3) is contained in Attachment III.

c. Amendments to State Law. Most State laws now permit information in the SESA's records to be disclosed to public officials in the performance of their duties. In addition, Section 303(f), SSA, requires SESAs to provide information for purposes of the income and eligibility verification system created by Section 1137, SSA. SESAs will need to review State laws to determine whether existing provisions provide sufficient authority to disclose information to HUD or other public housing agencies, or whether an amendment to State law is needed. If an amendment is necessary, State law should be amended by the effective date discussed in Section 3 of this attachment.

3. Effective Date. New Section 303(i)(3), SSA, requires that SESAs must comply substantially with the requirements of Section 303(i)(1) as a condition for receiving administrative grants under Section 302(a), SSA. Section 904(d)(1) of P.L. 100-628 specifies that the provisions of Section 904, including new Section 303(i), "shall take effect on September 30, 1989." States are, therefore, expected to have provisions of State law permitting the disclosure required by Section 303(i)(1), SSA, by September 30, 1989. However, Section 904(d)(3) provides for a grace period for certain States:

> (3) REQUIREMENTS FOR STATE AGENCIES.--In the case of any State the legislature of which has not been in session for at least 30 calendar days (whether or not consecutive) between the date of the enactment of this Act and September 30, 1989, the amendments made by subsection (c)(1) shall take effect 30 calendar days after the first day on which such legislature is in session on or after September 30, 1989.

If the "State . . . legislature . . . has not been in session for at least 30 calendar days (whether or not consecutive)"

between the date of enactment, which is November 7, 1988, and September 30, 1989, then the State qualifies for a grace period. "Session" is not defined; however, the language "whether or not consecutive" indicates that the term means legislative days on which the legislative body assembles for the purpose of transacting business. Therefore, for purposes of Section 904(d)(3), "session" is interpreted as meaning a legislative day as recorded in the legislative record of the State legislature. These "sessions" include legislative days in regular, budgetary, special and any other sessions of the State legislature. If the State legislature has not met in such a "session" 30 times between the effective date of P.L. 100-628, which is November 7, 1988, and September 30, 1989, then the State qualifies for a grace period.

This grace period expires 30 calendar days "after the first day on which the legislature is in session on or after September 30, 1989." The same definition of "session" applies for determining the first day on which the legislature is in session after September 30, 1989. Therefore, the grace period will expire 30 calendar days after the first legislative day the legislature assembles after September 30, 1989.

For example, if the legislature does not meet in 30 sessions between the date of enactment of P.L. 100-628, which is November 7, 1988, and September 30, 1989, then the requirements of Section 303(i)(1) are effective 30 days after the first day the legislature meets in session after September 30, 1989. In another example, if a State legislature has not met in 30 sessions between November 7, 1988, and September 30, 1989, but does meet in a "session" October 1, 1989, then the grace period expires 30 days after this date, or October 31, 1989.

Based on information available to the Department, it is anticipated that only the Commonwealth of Kentucky will qualify for this grace period. This is because all other States will likely have legislatures which meet in session for at least 30 calendar days (whether or not consecutive) between the date of enactment of P.L. 100-628, which is November 7, 1988, and September 30, 1989.

Under certain circumstances, States may, at their option, implement the disclosure requirements of Section 303(i)(1) prior to September 30, 1989. Section 904(d)(2) provides for this optional early implementation:

(3) OPTIONAL EARLY IMPLEMENTATION.--At the initiative of a State or an agency of the State, and with the approval of the Secretary of Labor, the amendments made by subsection (c)(1) may be made effective in such State on any date before September 30, 1989, which is more than 90 days after the date of the enactment of this section.

Under Section 904(d)(2), early implementation is permitted only on a date which is "more than 90 days after the date of the enactment" of P.L. 100-628. As the date of enactment of P.L. 100-628 is November 7, 1988, States may implement the requirements of Section 303(i)(1) no earlier than February 6, 1989. Early implementation may be made only with the approval of the Secretary of Labor.

TEXT OF SECTIONS 904(c)(2) AND (3) OF P.L. 100-628, THE STEWART B. McKINNEY HOMELESS ASSISTANCE AMENDMENTS ACT OF 1988

(2) APPLICANT AND PARTICIPANT PROTECTIONS.--(A) In order to protect applicants for, and recipients of, benefits under the programs of the Department of Housing and Urban Development from the improper use of information obtained pursuant to the requirements of section 303(i) of the Social Security Act from the State agency charged with the administration of the State unemployment compensation law, officers and employees of the Department of Housing and Urban Development and representatives of public housing agencies may only use such information--

(i) to verify an applicant's or participant's eligibility for or level of benefits; or

(ii) in the case of an owner responsible for determining eligibility for or level of benefits, to inform such owner that an applicant's or participant's eligibility for or level of benefits is uncertain and to request such owner to verify such applicant's or participant's income information.

(B) No Federal, State, or local agency, or public housing agency, or owner responsible for determining eligibility for or level of benefits receiving such information may terminate, deny, suspend, or reduce any benefits of an applicant or participant until such agency or owner has taken appropriate steps to independently verify information relating to--

(i) the amount of the wages or unemployment compensation involved,

(ii) whether such applicant or participant actually has (or had) access to such wages or benefits for his or her own use, and

(iii) the period or periods when, or with respect to which, the applicant or participant actually received such wages or benefits.

(C) Such applicant or participant shall be informed by the agency or owner of the findings made by the agency or owner on the basis of such verified information, and shall be given an opportunity to contest such findings, in the same manner as applies to other information and findings relating to eligibility factors under the program.

(3) PENALTY.--(A) Any person who knowingly and willfully requests or obtains any information concerning an applicant or participant pursuant to the authority contained in section 303(i) of the Social Security Act

under false pretenses, or any person who knowingly and willfully discloses any such information in any manner to any individual not entitled under any law to receive it, shall be guilty of a misdemeanor and fined not more than $5,000. The term "person" as used in this paragraph shall include an officer or employee of the Department of Housing and Urban Development, an officer or employee of any public housing agency, and any owner responsible for determining eligibility for or level of benefits (or employee thereof).

(B) Any applicant or participant affected by (i) a negligent or knowing disclosure of information referred to in this section or in section 303(i) of the Social Security Act about such person by an officer or employee of any public housing agency or owner (or employee thereof), which disclosure is not authorized by this section, such section 303(i), or any regulation implementing this section or such section 303(i), or (ii) any other negligent or knowing action that is inconsistent with this section, such section 303(i), or any such implementing regulation may bring a civil action for damages and such other relief as may be appropriate against any officer or employee of any public housing agency or owner (or employee thereof) responsible for any such unauthorized action. The district court of the United States in the district in which the affected applicant or participant resides, in which such unauthorized action occurred, or in which the applicant or participant alleged to be responsible for any such unauthorized action resides, shall have jurisdiction in such matters. Appropriate relief that may be ordered by such district courts shall include reasonable attorney's fees and other litigation costs.

**DEPARTMENT OF LABOR**

**Federal-State Unemployment Compensation Program; Procedures for Release of Benefits Quality Control Data**

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Notice of Procedures for Release of Benefits Quality Control Data for Unemployment Insurance Program.

**SUMMARY:** On May 17, 1988, a notice was published in the **Federal Register** at 53 FR 17515 inviting comments on proposed procedures and format to release benefits Quality Control (QC) data for the Unemployment Insurance (UI) program. Based on the comments received, the Department has revised the proposed procedures and format. This notice announces the final procedures and format to be used.

**EFFECTIVE DATE:** March 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Charles L. Atkinson, Director, Office of Quality Control, Employment and Training Administration, Unemployment Insurance Service, U.S. Department of Labor, Room S-4015, Frances Perkins Building, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone (202) 535-0220 (this is not a toll-free number).

**SUPPLEMENTARY INFORMATION:**

**Background**

The benefits QC program is based on a statistical sample of weeks compensated by State Employment Security Agencies (SESAs). From the information gathered by in-depth reviews of these samples, the performance of a State's UI benefits system is evaluated in terms of weeks and dollars that were properly or improperly paid.

The regulation to establish the QC program for the Federal-State UI system was published in the **Federal Register** at 52 FR 33520 on September 3, 1987, with an effective date of October 5, 1987. Section 602.21(g) of the regulation provides that each State shall:

> Release the results of the QC program at the same time each year, providing calendar year results using a standardized format to present the data as prescribed by the Department; States will have the opportunity to release this information prior to any release by the Department.

On September 4, 1987, the Department published a notice in the **Federal Register** at 52 FR 33784 which requested public comment on issues relating to the format, method, and timing of the release. Based upon responses received from interested parties, the Department published another notice in the **Federal Register** at 53 FR 17515 on May 17, 1988, proposing procedures and format for displaying QC data and inviting comments on them.

**Discussion of Responses**

The Department received comments from 36 organizations and interested parties. The majority of comments were from SESA's. Comments were also received from public interest groups and the Department's Regional Offices. All comments were given careful consideration in developing the final procedures and format. The comments about the publication of data in general fell into six major areas. Following are a summary of the comments and the Department's responses:

*1. General Comments Concerning the Release of QC Data*

Twelve respondents said that the QC data should not be published in the **Federal Register**. To release UI QC data en masse in a standard format would invite comparisons among States. It was suggested that data be made available State-by-State, upon request. The Department has considered these comments and has modified the approach in response to them. The Federal release of QC data will be through established channels, with an announcement published in the **Federal Register** that these UI performance data are available. SESAs will release the required data through normal SESA public release mechanisms and announce to the public that the data are available upon request. The Department recognizes that State-by-State comparisons would be inappropriate. The Federal report containing the data will be introduced with a description of how the data should be used and provide a caution against State-by-State comparisons. Presentation will be in alphabetical order and will show rates of proper payments, overpayments, and underpayments.

Thirteen respondents said that the statistical and report generating software is unable to produce analyses that are accurate to the degree required by the proposed format. The Department agrees that the QC software was inadequate and required revisions. Changes have been made to overcome the technical problems, in most instances.

Six respondents said that at the proposed level of detail there would be several instances where it will be impossible to make reliable estimates due to the low number of cases that fall into the category. The Department concurs and has revised the format to eliminate categories from the report for which rates would not have been determined with sufficient precision. There should be sufficient data to make accurate estimates for the remaining categories in most instances; however, if not, it will be apparent from the confidence intervals.

Five respondents said that the Department should not release the data unless a State fails to release the data. The Department's position is that there are compelling reasons for compiling the data for Departmental uses and public consumption. This will be accomplished by publication of a digest of States' QC results which will be disseminated through normal channels (Department and SESAs). An announcement of the availability of the data will be published in the **Federal Register**, and as required by law, the data will be made available to other parties upon request.

Thirteen respondents objected to the States having only five working days to verify the Department's figures. Recognizing the legitimacy of this concern, the Department has increased the response time to 21 calendar days.

*2. Total Dollar Amount of Benefits Paid*

Three respondents said that the amount of benefits paid should be identified by type along with an explanation as to the claimants who receive the different types of payments. Two respondents felt that it would be more appropriate to indicate the amount of benefits paid for the cases sampled and indicate the percentage that this represents of the total UI dollars paid. Another respondent said that there needs to be additional information about the number of claims paid, the number of claims investigated during the report period, and the number of claims properly or improperly paid. The Department will encourage SESAs to include this information in their release if they wish to do so. The composite Federal report will not go into the level of detail.

*3. Proper Payment Rates*

There were three comments concerning the capability of the existing software to calculate the proper payment rates in terms of dollars paid when both overpayments and underpayments are coded for the same case and the inability of the software to net out the total. The Department has recognized this and decided not to net overpayments and underpayments. The software will estimate overpayments and underpayments separately.

One respondent stated that it was unfair to allow States that issued formal warnings in lieu of disqualifications to count these cases as proper. The Department recognizes that formal warnings create a special problem for calculating rates. Cases in which there are formal warnings will be included in the calculations for proper payments; however, footnotes will explain that in these States proper payment rates would have been lower had formal warnings not be included in the calculations.

*4. Improper Payment Rates*

Three respondents objected to including cases that were technically correct due to finality rules. The Department has included payments that were coded "technically proper due to finality rules" as improper payments because they were improper when made and, had they been so identified earlier, would have been corrected and would not be "technically proper".

Two respondents stated that the improper payment rates could not be accurately calculated for those cases having more than one error. Changes in the QC software released by the Department in November 1988 take into account the effects of cases with more than one improper payment issue. For a small percentage of cases, the exact impact of multiple error issues cannot be determined with the existing data elements. However, the Department has concluded that this effect on overall dollar improper payment rates is not significant.

One respondent said that a simpler report structure should be implemented to aid interested parties in correctly interpreting improper payment rates. The Department concurs and has revised the format accordingly.

One respondent said that if it can be calculated properly, the percentages of dollars overpaid and underpaid should be included in the report. The Department concurs; these rates will be included.

One respondent said that rates of cases containing errors should be reported, in addition to rates for dollars paid in error. The Department's position is that this would provide misleading information because many payments coded as improper have minor errors that represent only a fraction of the payments.

One respondent stated that the number of dollars paid should not be projected to the total population. The Department disagrees as this is the reason for investigating a statistically valid sample.

*5. Percentage of Dollars Improperly Paid—by Responsibility*

Ten respondents stated that this section would double count errors where there are multiple responsibility errors. Seven respondents said that the combined headings were confusing and should be lumped into one "shared responsibility" category. Four respondents said that the software would be unable to calculate multiple responsibility accurately. Two respondents felt the shared responsibility definitions were confusing. One respondent said that the proposed format did not discuss how the amount of dollars that should have been paid would be calculated. The Department concurs and has removed this section from the report.

*6. Percentage of Dollars Improperly Paid—by Cause*

There were ten separate comments concerning aspects of the reporting of dollars improperly paid by cause with suggestions for revision. As with dollars improperly paid by responsibility, this section has also been dropped.

*Policy Decisions*

Based upon the comments discussed above and upon discussions held within the Department, the procedures and format for releasing benefits QC data have been modified. The applications for SESAs and the Department follow:

*1. State Release of Data*

Each State will release the required data annually through established channels for disseminating State performance data. An announcement must be made to the general public that the data is available. In accordance with established State procedures, the data must be provided to those who normally receive performance/evaluation data and to anyone else who requests it.

The publication of data must include, at a minimun, the total dollars paid in benefits by the SESA in the calendar year (the population), the number of cases completed for QC investigations (the sample size), and rates with the bounds of the confidence interval for proper payments, overpayments, and underpayments. For purposes of the annual report, these categories are defined as:

a. *Total Dollars Paid in the Population.* The amount of benefits paid during weeks which end in the calendar year for the programs included in QC (UK, UCFE, UCX). These payments form the universe from which samples are selected.

b. *Sample Size.* The number of completed QC cases from batches with week ending dates in the calendar year.

c. *Proper Payment Rates.* The estimated total of dollars paid properly is shown as a percentage of total dollars paid in the population. These include amounts of payments coded as proper as defined in section 3d(1) of the Error Classification chapter in ET Handbook No. 395. It also includes from section 3d(2) those dollars paid properly, part of which were from claims paid improperly; e.g., $120 payment with $10 overpayment = $110 paid properly.

Additionally, the following payments classified as improper in section 3d(2) are included in the proper payment rate:

—Subsection (a)14: Pertains to issuance of "formal warning" to claimant, rather than denial of payment.

—Subsections (a)16 and (b)23: Pertain to overpayments and underpayments established as a result of the QC investigations which, upon appeal, were officially modified by a higher SESA authority, but the QC unit disagrees with this modification.

d. *Overpayment Rates.* The percentage of dollars overpaid is obtained from those payments coded under section 3d(2)(a) of the Error Classification chapter, but excludes codes 14 and 16.

3. *Underpayment Rates.* The percentage of dollars underpaid is obtained from those payments coded under section 3d(2)(b) of the Error Classification chapter, but excludes code 23.

Because the QC system accepts coding for up to three errors per case, in cases with multiple errors, the total dollars affected (for up to three errors per case) will be used in the computations of overpayments, as long as the amount originally paid is not exceeded. (For example, assume a weekly payment of $120 was found to have two errors. The first was a missed separation issue that should have disqualified the claimant; this amounts to an overpayment of $120. The second was unreported earnings during the key week resulting in an overpayment of $30. The total dollars used in computing the improper payment would be limited to $120.) If both an overpayment and an underpayment occur in a single case, the dollar amount overpaid will be used, up to the amount originaly paid, and the total dollars underpaid will be used to estimate the underpayment rate, which will be expressed as a percentage of total dollars paid in the population.

The upper and lower bounds of the ninety-five percent confidence intervals will be shown for each rate as plus or

VOL
54
ISS
45
MR
9
1989
UMI

minus a dollar amount. The State may include additional data, narrative explanations, and plans for program improvement.

If a State fails to release data in accordance with the above-stated procedures, the Department, in its annual review of State QC operations as specified in 20 CFR, Part 602, § 602.31, will take appropriate action which could lead to the application of proceedings as specified in 20 CFR, Part 602, §602.42.

*2. Federal Release of Data*

The Department will publish a report in digest form of States' Quality Control data. The report will be transmitted through normal channels to components of the Department and to the SESAs. Concurrently, the Department will announce the availability of this data through a notice published in the **Federal Register** and make all the data available to anyone who requests it. The report published by the Department will display the total dollars paid in the population, the number of cases sampled, and rates for proper payments, overpayments, and underpayments for each State. The upper and lower bounds of the ninety-five percent confidence interval will be shown together with each rate. Footnotes will designate those States whose proper payment rates would be lower were it not for application of "formal warning" provisions. Footnotes will also designate those States that had minor data deficiencies. Major deficiencies will result in an entry in the report identifying the deficiency in the data.

The report will contain an introduction with explanations of how the data should be interpreted and caution about inappropriate comparisons of data among States. The data will be presented alphabetically by State in order to discourage rankings and comparisons.

The rates will be calculated by the Department and transmitted to the States for review prior to publication. States will be given a minimum of 21 calendar days to inform the Department if they disagree with the calculations. States may also submit optional narratives for inclusion in the report during this specified period of time. The Department will issue more detailed instructions through official directives.

Signed at Washington, DC, this 28th day of February 1989.

Robert T. Jones,

*Assistant Secretary of Labor.*

**DEPARTMENT OF DEFENSE**

**GENERAL SERVICES ADMINISTRATION**

**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION**

**48 CFR Parts 15, 42, and 52**

**Federal Acquisition Regulation (FAR); Indirect Cost Rate Proposals**

**AGENCIES:** Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Proposed rule.

**SUMMARY:** The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering changes to Federal Acquisition Regulation (FAR) 15.804–4(i), 42.705–1, 42.705–2, and the clause at 52.216–13 to emphasize responsibilities regarding certification of final indirect cost rate proposals.

**DATE:** Comments should be submitted to the FAR Secretariat at the address shown below on or before May 8, 1989, to be considered in the formulation of a final rule.

**ADDRESS:** Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 89–14 in all correspondence related to this issue.

**FOR FURTHER INFORMATION CONTACT:** Margaret A. Willis, FAR Secretariat, Room 4041, GS Building, Washington, DC 20405, (202) 523–4755.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

The proposed rule will add submission of final, indirect cost-rate proposals as an example of a situation when the authority to require certification in accordance with the Truth in Negotiations Act should be exercised. This example was not incorporated into the Federal Acquisition Regulation because it was thought to be redundant. However, to eliminate questions that have arisen because of elimination of the example and to acknowledge that it is now and always has been authorized, it is now being specifically emphasized.

A review of the coverage of final, indirect rate settlements at FAR 42.705 indentified ambiguities with regard to the need for contractor certification of data.

Proposed coverage revises FAR 15.804–4(i) to clarify that certification of final indirect rate proposals is required. Revised coverage is also proposed to FAR 42.705–1 and –2 to reference 15.804–4. The clause at 52.216–13 has been amended to make it consistent with a similar clause at 52.216–7.

**B. Regulatory Flexibility Act**

The proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq., because most contracts awarded as a result of negotiations are awarded to large businesses. Furthermore, the proposed revisions merely illustrate the nature of records Government auditors have access to and do not change existing requirements. An initial regulatory flexibility analysis has therefore not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected FAR Subpart will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite FAR Case 88–610 in correspondence.

**C. Paperwork Reduction Act**

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed rule changes no recordkeeping or information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

**List of Subjects in 48 CFR Parts 15, 42, and 52**

Government procurement.

Dated: February 27, 1989.

**Harry S. Rosinski,**

*Acting Director, Office of Federal Acquisition and Regulatory Policy.*

Therefore, 48 CFR Parts 15, 42, and 52 are amended as set forth below:

1. The authority citation for 48 CFR Parts 15, 42, and 52 continues to read as follows:

**Authority:** 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

**PART 15—CONTRACT BY NEGOTIATION**

2. Section 15.804–4 is amended by adding paragraph (i) to read as follows:

**15.804–4 Certification of Current Cost or Pricing Data.**

* * * * *

(i) The data in support of a contractor's final indirect rate submission are cost or pricing data which must be certified.

**PART 42—CONTRACT ADMINISTRATION**

3. Section 42.705–1 is amended by redesignating existing paragraphs (b)(5)(ii) through (iv) as (b)(5)(iii) through (v); and by adding new paragraph (b)(5)(ii) to read as follows:

**42.705–1 Contracting officer determination procedure.**

* * * * *

(b) * * *

(5) * * *

(ii) Obtain from the contractor a Certificate of Current Cost or Pricing Data, as required by 15.804–4(i);

* * * * *

4. Section 42.705–2 is amended by revising paragraph (b)(2)(ii) to read as follows:

**42.705–2 Auditor determination procedure.**

* * * * *

(b) * * *

(2) * * *

(ii) Obtain from the contractor a Certificate of Current Cost or Pricing Data, as required by 15.804–4(i);

* * * * *

**PART 52—SOLICIATION PROVISIONS AND CONTRACT CLAUSES**

**52.216–13 [Amended]**

5. Section 52.216–13 is amended by removing the fourth sentence from paragraph (c)(2) of the clause.

# The Federal Register

**Regulations** appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations** (CFR) comprising approximately 193 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

## Superintendent of Documents Subscription Order Form

Order Processing Code
*6463

*Charge your order. It's easy!* VISA

Charge orders may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday-Friday (except holidays)

☐ **YES,** please send me the following indicated subscriptions:

- **Federal Register**
  - **Paper:**
    ___$340 for one year
    ___$170 for six-months
  - **24 x Microfiche Format:**
    ___$195 for one year
    ___$97.50 for six-months
  - **Magnetic tape:**
    ___$37,500 for one year
    ___$18,750 for six-months
- **Code of Federal Regulations**
  - **Paper**
    ___$620 for one year
  - **24 x Microfiche Format:**
    ___$188 Current year (as issued)
    ___$115 previous year's full set (single shipment)
  - **Magnetic tape:**
    ___$21,750 for one year

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

**THE FEDERAL REGISTER**

**WHAT IT IS AND HOW TO USE IT**

**FOR:** Any person who uses the Federal Register and Code of Federal Regulations.

**WHO:** The Office of the Federal Register.

**WHAT:** Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

**WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

**PHILADELPHIA, PA**

**WHEN:** March 30, at 1:00 p.m.
**WHERE:** 841 Chesnut Street, Room 706, Philadelphia, Pa
**RESERVATIONS:** Call the Philadelphia Federal Information Center
Philadelphia: 215–597–1799
New Jersey: 800–366–4499

**WASHINGTON, DC**

**WHEN:** April 11, at 9:00 a.m.
**WHERE:** Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
**RESERVATIONS:** 202–523–5240

**SALT LAKE CITY, UT**

**WHEN:** April 12, at 9:00 a.m.
**WHERE:** State Office Building Auditorium, Capitol Hill, Salt Lake City, UT

# Rules and Regulations

Federal Register
Vol. 54, No. 46
Friday, March 10, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## OFFICE OF PERSONNEL MANAGEMENT

### 5 CFR Part 831

### Retirement; Alternative Forms of Annuity

**AGENCY:** Office of Personnel Management.

**ACTION:** Final rules.

**SUMMARY:** The Office of Personnel Management (OPM) is adopting as final its interim rules to implement section 204 of the Federal Employees Retirement System Act of 1986, which requires OPM to offer alternative forms of annuity to employees retiring under the Civil Service Retirement System, and section 6001 of Pub. L. 100–203 (enacted December 22, 1987), which affects the manner of payment to certain annuitants who elect an alternative form of annuity. These rules specify what types of benefits will be offered, and how OPM will administer them.

**EFFECTIVE DATE:** April 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Robert Rosenblatt, (202) 632–4682.

**SUPPLEMENTARY INFORMATION:** OPM published interim rules to implement the alternative annuity provisions on November 28, 1986 (51 FR 42987), and amended interim rules to implement Pub. L. 100–203 on April 8, 1988 (53 FR 11633). Thirteen timely responses to our requests for comments were received.

Eight commenters objected to the prescribed method of determining the reduction in annuity rate for those who elect an alternative form of annuity. They felt that the method was unfair because it results in a greater reduction for older employees, and those whose retirement contributions are greater. Those objections arise from a misunderstanding of the intent of the law.

Congress did not intend the alternative annuity provisions to increase, in the long term, the overall level of benefits paid by the retirement system. For that reason, the law requires that the alternative benefit payable, including the lump-sum payment, be "actuarially equivalent" to the annuity that would have been paid had the alternative benefit not been elected.

Simply stated, the law requires the Civil Service Retirement System to recoup the lump-sum payment during the annuitant's expected lifetime, by reducing the rate of annuity payable, based on mortality tables and assumptions about interest and inflation rates.

Four commenters felt that the assumptions about interest rates and inflation that partly determine present values, were inappropriate because they do not reflect recent conditions. However, economic assumptions that are reasonably predictive of actuarial costs and liabilities must be based not only on recent economic conditions, but on long term historical data.

One commenter objected to § 831.2205(b) on the grounds that a 30-day comment period was inadequate after notice of proposed adjustments in present value factors. The commenter believed that such a notice should be in the form of a proposed rulemaking with a 60-day comment period. OPM believes that a 30-day notice is sufficient when changes in present value factors result only from changes in the data affecting them—interest and inflation rates, and changes in mortality rates. Of course, a proposed rulemaking would be appropriate if OPM were to change the basic formula, defined in § 831.2202, that determines present value factors.

One commenter stated that OPM's method of determining present value was unfair because it differed from the IRS actuarial tables used in computing the nontaxable portion of an annuity. There is no legal basis for equating the alternative annuity factors with IRS's actuarial tables. As noted above, the law (5 U.S.C. 8343a) expressly requires actuarial equivalence of the alternative annuity with the annuity that would otherwise have been paid to civil service annuitants. The data used to determine present values is, therefore, specific to the class of civil service annuitants affected by the alternative annuity provision (i.e. nondisabled annuitants).

One commenter felt that revised § 831.2204 incorrectly interpreted the statute by prohibiting an application for disability retirement following an election of an alternative form of annuity. The commenter believes that an annuitant should be able to apply for disability retirement within one year after retiring, and be allowed to repay the lump-sum credit when disability retirement is approved. However, 5 U.S.C. 8343a precludes such an arrangement. That provision requires that an annuitant who elects an alternative form of annuity elects that benefit "instead of any other benefits" under the retirement system.

Based on two of the comments, a definition of "lump-sum credit" has been added to § 831.2202 to clarify that the term has the same meaning as in 5 U.S.C. 8331(8).

Section 831.2204 has been revised to correct a reference.

Section 831.2206 has been revised to make clear that a deemed deposit or redeposit includes any interest owed by the employee under 5 U.S.C. 8334.

Section 831.2208 has been added to clarify the entitlements of annuitants who, after reemployment, become entitled to a redetermined annuity, and who then elect an alternative form of annuity. The added section provides that the reduction in the redetermined annuity is the sum of (1) the reduction, if any, that was made at the time of the annuitant's fist retirement, indexed for COLA's, plus (2) a reduction based on the additional lump-sum credit accumulated during the reemployment, using the appropriate present value factor for the annuitant's age when the redetermined annuity begins. If the annuitant did not elect an alternative form of annuity at the time of his or her first retirement, the redetermined annuity would be reduced in the same manner as for a new retiree. However, any lump-sum credit attributable to service performed before the annuitant's first retirement would be diminished by any annuity payments received between retirement and reemployment. Consistent with section 8344(a)(B) of title 5, United States Code, the lump-sum credit would not be diminished *during* reemployment (except reemployment, such as a period of nonduty under an intermittent appointment, during which

VOL 54 ISS 46 MR 10 1989 UMI

the Retirement Fund is not reimbursed by the employing agency in accordance with section 8344(a)).

Section 831.2208 also affirms that any reduction of annuity because of an alternative annuity election is permanent, even if the annuitant does not elect, or is not eligible to elect, an alternative form of annuity after qualifying for a redetermined annuity. For example, an employee who retires, elects an alternative annuity and, after reemployment, retires for disability would not be eligible to elect an alternative form of annuity (§ 831.2203(a)); however, the redetermined annuity would still be reduced by the prior alternative annuity reduction, increased by COLA's.

**E.O. 12291, Federal Regulation**

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

**Regulatory Flexibility Act**

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation will only affect Federal agencies and retirement payments to retired Government employees.

**List of Subjects in 5 CFR Part 831**

Administrative practice and procedure, Claims, Disability benefits, Firefighters, Government employees, Income taxes, Intergovernmental relations, Law enforcement officers, Pensions, Retirement.

U.S. Office of Personnel Management
**Constance Horner,**
*Director.*

Accordingly, OPM is adopting its interim rules published at 51 FR 42987 on November 28, 1986, and 53 FR 11633 on April 8, 1988, as final rules with the following changes:

**PART 831—RETIREMENT**

**Subpart V—Alternative Forms of Annuities**

1. The authority citation for Subpart V of Part 831 continues to read as follows:

**Authority:** 5 U.S.C. 8343a.

2. In § 831.2202, a new definition is added in alphabetical order to read as follows:

**§ 831.2202 Definitions.**

* * * * *

"Lump-sum credit" has the same meaning as in 5 U.S.C. 8331(8).

* * * * *

**§ 831.2204 [Amended]**

3. In § 831.2204(a), the reference "§ 831.2206" is removed and the reference "§ 831.2205" is added in its place.

4. Section 831.2206 is revised to read as follows:

**§ 831.2206 Election to pay deposit or redeposit for civilian service.**

(a) If an employee or Member who elects an alternative form of annuity owes a deposit or redeposit for civilian service, and elects to pay that deposit or redeposit before the date of final adjudication, OPM will compute the annuity as if the deposit or redeposit had been made and will deem that deposit or redeposit to be included in the lump-sum credit for the purpose of computing the reduction in annuity under § 831.2205.

(b) The amount of a deposit or redeposit deemed paid under paragraph (a) of this section will include any interest owed by the employee or Member under 5 U.S.C. 8334.

5. Section 831.2208 is added to Subpart V to read as follows:

**§ 831.2208 Redetermined annuity after reemployment.**

(a) For purposes of this section, "lump-sum credit" does not include—

(1) The amount by which the lump-sum credit attributable to service performed before the annuitant's first retirement was reduced by annuity payments that were not reimbursed by the employing agency under section 8344(a) of title 5, United States Code, or

(2) Any part of the lump-sum credit attributable to service performed before the annuitant's first retirement that has already been paid to the annuitant pursuant to an election or an alternative form of annuity.

(b) An annuitant who meets the requirements for a redetermined annuity under Subpart H, and who meets all requirements of § 831.2203, may elect an alternative form of annuity.

(c) To compute the beginning rate of the redetermined annuity payable to an annuitant who elects an alternative form of annuity, OPM will first compute the monthly rate payable under subchapter III of chapter 83 of title 5, United States Code, including all reductions provided under the subchapter other than those in section 8343a. That monthly rate is then reduced by the sum of—

(1)(i) Any reduction that was computed under § 831.2205 at the time of the annuitant's prior retirement, increased by—

(ii) All cost-of-living adjustments under section 8340 of title 5, United States Code that applied to the annuitant before the commencing date of the redetermined annuity, and

(2) An amount equal to the annuitant's lump-sum credit, divided by the present value factor for the annuitant's attained age on the date the redetermined annuity commences.

(d) The beginning rate of a redetermined annuity payable to an annuitant who does not elect, or is not eligible to elect, an alternative form of annuity will be reduced in accordance with paragraph (c)(1) of this section.

BILLING CODE 6325-01-M

---

**DEPARTMENT OF AGRICULTURE**

**Agricultural Marketing Service**

**7 CFR Part 907**

**[Navel Orange Reg. 691]**

**Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** Regulation 691 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period March 10 through March 16, 1989. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

**DATES:** Regulation 691 (§ 907.991) is effective for the period March 10, 1989, through March 16, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5120.

**SUPPLEMENTARY INFORMATION:** This final rule is issued under Marketing Order 907 (7 CFR Part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small business will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 125 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1988-89 adopted by the Navel Orange Administrative Committee (Committee). The Committee met publicly on March 7, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended by a nine to two vote a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the market for navel oranges has slightly improved.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

**List of Subjects in 7 CFR Part 907**

Arizona, California, Marketing agreements and orders, Navel, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 907 is amended as follows:

**PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA**

1. The authority citation for 7 CFR Part 907 continues to read as follows:

**Authority:** Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 907.991 is added to read as follows:

**Note:** This section will not appear in the Code of Federal Regulations.

**§ 907.991 Navel Orange Regulation 691.**

The quantity of navel oranges grown in California and Arizona which may be handled during the period March 10, 1989, through March 16, 1989, is established as follows:

(a) District 1: 1,452,000 cartons;
(b) District 2: 196,000 cartons;
(c) District 3: unlimited cartons;
(d) District 4: unlimited cartons.

Dated: March 8, 1989.

**Robert C. Keeney,**
*Deputy Director, Fruit and Vegetable Division.*

---

**7 CFR Part 910**

**[Lemon Reg. 656]**

**Lemons Grown in California and Arizona; Limitation of Handling**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** Regulation 656 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 340,000 cartons during the period March 12 through March 18, 1989. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

**DATES:** Regulation 656 (§ 910.956) is effective for the period March 12 through March 18, 1989.

**FOR FURTHER INFORMATION CONTACT:** Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

**SUPPLEMENTARY INFORMATION:** This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 85 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and approximately 2500 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

This regulation is issued under Marketing Order No. 910, as amended [7 CFR Part 910] regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that

VOL 54 ISS 46 MR 10 1989 UMI

this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1988–89. The Committee met publicly on March 7, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and, by a 7 to 4 vote, recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that demand for lemons is good.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

**List of subjects in 7 CFR Part 910**

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

**PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA**

1. The authority citation for 7 CFR Part 910 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.956 is added to read as follows:

**Note:** This section will not appear in the Code of Federal Regulations.

**§ 910.956 Lemon Regulation 658.**

The quantity of lemons grown in California and Arizona which may be handled during the period March 12, 1989, through March 18, 1989, is established at 340,000 cartons.

Dated: March 8, 1989.

BILLING CODE 3410–02–M

## NUCLEAR REGULATORY COMMISSION

**10 CFR Part 9**

**Freedom of Information Act; Appeal Authority for Deputy Executive Director**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Final rule.

**SUMMARY:** The Nuclear Regulatory Commission is amending its regulations to reflect the recent reorganization within the Office of the Executive Director for Operations. This amendment will permit a Deputy Executive Director to respond to appeals in lieu of the Executive Director for Operations.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Donnie H. Grimsley, Director, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Telephone: (301) 492-7211.

**SUPPLEMENTARY INFORMATION:** On January 9, 1989, the Nuclear Regulatory Commission (NRC) announced organizational changes within the Office of the Executive Director for Operations. In the reorganization, the Commission appointed a second Deputy Executive Director and assigned specific areas of responsibility to the two deputies. Both Deputy Executive Directors report to the Executive Director for Operations. The NRC is amending portions of its regulations to specify that in lieu of the Executive Director for Operations, a Deputy Executive Director is authorized to respond to an appeal of a denial of a Freedom of Information Act request.

Because these are amendments dealing with agency practice and procedure, the notice and comment provisions of the Administrative Procedure Act do not apply pursuant to 5 U.S.C. 553(b)(A). The amendments are effective upon publication in the **Federal Register**. Good cause exists to dispense with the usual 30-day delay in the effective date, because these amendments are of a minor and administrative nature, dealing with the agency's reorganization.

**Environmental Impact: Categorical Exclusion**

The NRC had determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

**Paperwork Reduction Act Statement**

This final rule contains no information collection requirements and therefore is not subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

**List of Subjects in 10 CFR Part 9**

Freedom of Information, Penalty, Privacy, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is adopting the following amendments to 10 CFR Part 9.

**PART 9—PUBLIC RECORDS**

1. The authority citation for Part 9 continues to read as follows:

**Authority:** Sec. 161, 68 Stat. 948, as amended (42 U.S.C. 2201); sec. 201, 68 Stat. 1242, as amended (42 U.S.C. 5841).

2. In § 9.29, the introductory text of paragraph (c)(1), paragraphs (c)(2), (c)(3) and (d) are revised to read as follows:

**§ 9.29 Appeal from initial determinations.**

* * * * *

(c)(1) If the appeal of the denial of the request for agency records is upheld in whole or in part, the Executive Director for Operations, or a Deputy Executive Director, or the Secretary of the Commission shall notify the requester of the denial, specifying—

* * * * *

(2) If, on appeal, the denial of a request for waiver or reduction of fees for locating and reproducing agency records is upheld in whole or in part, the Executive Director for Operations or a Deputy Executive Director shall notify the person making the request of his decision to sustain the denial, including a statement explaining why the request does not meet the requirements of § 9.41.

(3) The Executive Director for Operations, or a Deputy Executive Director, or the Secretary of the Commission shall inform the requester that the denial is a final agency action and that judicial review is available in a district court of the United States in the district in which the requester resides or has a principal place of business, in which the agency records are situated, or in the District of Columbia.

(d) The Executive Director for Operations, or a Deputy Executive Director, or the Secretary of the Commission shall furnish copies of all

appeals and written determination on appeals to the Director, Division of Freedom of Information and Publications Services.

* * * * *

Dated at Rockville, Maryland, this 27th day of February 1989.

For the Nuclear Regulatory Commission.

**Victor Stello, Jr.,**

*Executive Director for Operations.*

BILLING CODE 7590–01–M

## FEDERAL RESERVE SYSTEM

**12 CFR Part 265**

**[Docket No. R–0662]**

**Rules Regarding Delegation of Authority**

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Final rule.

**SUMMARY:** The Board is adding a new paragraph to its Rules Regarding Delegation of Authority to delegate to each Federal Reserve Bank, after consultation with the Board's General Counsel, the authority to decide not to disapprove requests for director interlocks pursuant to section 205(8) of the Depository Institution Management Interlocks Act (12 U.S.C. 3204(8)) for diversified savings and loan holding companies.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** J. Virgil Mattingly, General Counsel (202) 452–3430, or Thomas M. Corsi, Attorney, Legal Division (202) 452–3275. For the hearing impaired *only*, Telecommunications Device for the Deaf (TDD), Earnestine Hill or Dorothea Thompson, (202) 452–3544, Board of Governors of the Federal Reserve System, Washington, DC 20551.

**SUPPLEMENTARY INFORMATION:**

**Regulatory Flexibility Act Analysis**

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601 *et seq.*), the Board certifies that the proposed amendment will not have a significant economic impact on a substantial number of small entities. The proposed amendment does not have particular effect on small entities.

**Public Comment**

The provisions of section 553 of Title 5, United States Code, relating to notice, public participation, and deferred effective date have not been followed in connection with the adoption of this amendment because the change to be effected is procedural in nature and does not constitute a substantive rule subject to the requirements of that section. The Board's expanded rule making procedures have not been followed for the same reason.

**List of Subjects in 12 CFR Part 265**

Authority, Delegations (Government agencies), Banks, Banking, Federal Reserve System.

For the reasons set forth above, 12 CFR Part 265 is amended as follows:

**PART 265—RULES REGARDING DELEGATION OF AUTHORITY**

1. The authority citation for Part 265 continues to read as follows:

**Authority:** Section 11(k), 38 Stat. 261 and 80 Stat. 1314; 12 U.S.C. 248(k).

2. A new paragraph (f)(49) is added to § 265.2 to read as follows:

**§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.**

* * * * *

(f) * * *

(49) Under the provisions of § 205(8) of the Depository Institution Management Interlocks Act (12 U.S.C. 3204(8)), after consultation with the General Counsel of the Board, to decide not to disapprove notices to establish director interlocks with diversified savings and loan holding companies.

By order of the Board of Governors of the Federal Reserve System, March 6, 1989.

**William W. Wiles,**

*Secretary of the Board.*

BILLING CODE 6210–01–M

## DEPARTMENT OF TRANSPORTATION

**Federal Aviation Administration**

**14 CFR Part 39**

**[Docket No. 88–CE–02–AD; Amendment 39–6153]**

**Airworthiness Directives; Fairchild Aircraft Corporation Models SA26–T, SA26–AT, SA226–T, SA226–T(B), SA226–AT, SA226–TC, SA227–TT, SA227–AT, and SA227–AC Airplanes**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new Airworthiness Directive (AD) applicable to Fairchild (previously Swearingen) Models SA26–T, SA26–AT, SA226–T, SA226–T(B), SA226–AT, SA226–TC, SA227–TT, SA227–AT, and SA227–AC airplanes which supersedes AD 88–22–04, Amendment 39–6048. AD 88–22–04 required the inspection of acrylic windows for cracks and the replacement of cracked windows on SA26, SA226, and SA227 series airplanes. This new AD is needed to extend the inspections to cabin windows on two additional models, and to clarify the crack limits, compliance instructions, and serial number effectivity.

**EFFECTIVE DATE:** April 10, 1989.

Compliance: As prescribed in the body of the AD.

**ADDRESSES:** Fairchild Aircraft Corporation Service Bulletin Nos. 26–68, dated April 28, 1989; 26–56–10–038, revised October 29, 1984; 26–56–20–042, dated November 28, 1988; 226–56–001 and 227–56–001, both revised January 5, 1984; 226–56–002, revised July 29, 1983; 227–56–002, issued January 5, 1984; and 226–56–003 and 227–56–003, both dated September 13, 1984, applicable to this ADO, may be obtained from the Fairchild Aircraft Corporation, P.O. Box 790490, San Antonio, Texas 78279–0490. This information may also be examined at the Rules Docket, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

**FOR FURTHER INFORMATION CONTACT:** Michele M. Owsley, Airplane Certification Branch, ASW–150, DOT/FAA, Southwest Region, Fort Worth, Texas 76193–0150; Telephone (817) 624–5161.

**SUPPLEMENTARY INFORMATION:** AD 88–22–04, Amendment 39–6048, requires inspection of acrylic windows for cracks and replacement of cracked windows in certain Fairchild SA26, SA226, and SA227 series airplanes. At the time AD 88–22–04 was issued, no service information existed for inspecting the Model SA26–T and SA26–AT cabin windows. Fairchild has recently issued Service Bulletin (SB) 26–56–20–042 to provide these instructions. In addition, the instructions in AD 88–22–04 appear to conflict with the referenced service bulletins when cracks do not exceed 0.30 inches. The FAA has determined that it is acceptable to operate within the service bulletin criteria for these small cracks. In addition, after the issuance of AD 88–22–04, Fairchild revised the Airframe Airworthiness Limitations Manual, ST–UN–M001, SA227 Series, Reissue B, dated December 6, 1988, to include the requirements of this AD. This new AD formally identifies this document revision as part of the airworthiness requirements for those airplanes.

VOL 54 ISS 46 MR 10 1989 UMI

Since the FAA has determined that the unsafe condition described herein is likely to exist or develop in other airplanes of the same type design, a new AD is being issued, superseding AD 88–22–04, which requires initial and repetitive inspections of the cockpit and cabin windows in all Fairchild SA26, SA226, and SA227 series airplanes. If cracks are found which exceed the service bulletin limits but which do not exceed the limits specified in the AD, the airplane may continue to operate unpressurized provided the cracked window is reinspected periodically and the crack limits are not exceeded. Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not major under section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "**ADDRESSES**" at the location identified.

**List of Subjects in 14 CFR Part 39**

Air transportation, Aircraft, Aviation safety, Safety.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA amends § 39.13 of Part 39 of the FAR as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

**§ 39.13 [Amended]**

2. By superseding AD 88–22–04, Amendment 39–6048, with the following new AD:

**Fairchild Aircraft Corporation:** Applies to Models SA26–T, SA26–AT, SA226–T, SA226–T(B), SA226–AT, SA226–TC, SA227–AT, and SA227–AC airplanes (all serial numbers) certificated in any category.

Compliance: Required as indicated unless already accomplished per the requirements of AD 88–22–04.

To prevent failure of the cockpit and cabin windows, accomplish the following:

(a) Within the next 50 hours' time-in-service (TIS) after the effective date of this AD, unless accomplished within the previous 2500 hours TIS, and thereafter at intervals not to exceed 2500 hours TIS from the last inspection, visually inspect all cockpit acrylic windows in accordance with applicable Fairchild Aircraft Corporation Service Bulletins 26–68, dated April 28, 1969; 26–56–10–036, revised October 29, 1984; 226–56–003 or 227–56–003, both dated September 13, 1984, as applicable; and visually inspect all cabin windows in accordance with Fairchild Aircraft Corporation Service Bulletins 26–56–20–042 (SA26–T and SA26–AT) dated November 28, 1988; 226–56–001 (SA226–T and SA226–T(B)), revised January 5, 1984; 227–56–001 (SA227–TT), revised January 5, 1984; 226–56–002 (SA226–AT and SA226–TC), revised July 29, 1983; 227–56–002 (SA227–AT and SA227–AC), dated January 5, 1984.

**Note 1.**—The compliance times for the SA227 Series airplanes are also shown in the Airframe Airworthiness Limitations Manual, ST–UN–M001, Reissue B, dated December 6, 1988.

(1) If cracks are found in any given window which exceed 4.3 inches in combined total length, prior to further flight, replace the window with a serviceable window.

**Note 2.**—The FAA recommends, but does not require, that the cabin window modification be accomplished when the cabin windows are replaced.

(2) If cracks are found in any given window which exceed the applicable service bulletin limits but do not exceed 4.3 inches in combined total length and replacement parts are not available, the airplane may continue to operate provided:

(A) The cracked window is reinspected for crack growth thereafter at intervals not to exceed every 250 hours TIS. If the combined total length of the cracks exceeds 4.3 inches, prior to further flight replace the window with a serviceable window.

(B) Fabricate and install on the instrument panel, as near as possible to the pressurization controls and in clear view of the pilot, the following placard using letters of 0.10 inch minimum height: "AIRPLANE MUST BE OPERATED UNPRESSURIZED", and operate the airplane in accordance with this limitation.

(C) Place a copy of this AD in the limitations section of the Pilots Operating Handbook or the FAA Approved Airplane Flight Manual and observe the specified limitation.

(b) The placard, the 250 hour TIS reinspections, and the limitations specified in paragraphs (a)(2)(A), (a)(2)(B), and (a)(2)(C) above, may be removed and the airplane pressurized in the normal manner when all of the cracked windows have been replaced.

(c) The intervals between the inspections required by this AD may be adjusted up to 10 percent of the specified interval to allow accomplishing these inspections concurrent with other scheduled maintenance on the airplane.

(d) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(e) An equivalent means of compliance with this AD may be used if approved by the Manager, Airplane Certification Branch, DOT/FAA, Southwest Region, Fort Worth, Texas 76193–0150; Telephone (817) 624–5150. All persons affected by this directive may obtain copies of the documents referred to herein upon request to the Fairchild Aircraft Corporation, P.O. Box 790490, San Antonio, Texas 78279–0490; or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64105.

This amendment supersedes AD 88–22–04, Amendment 39–6048.

This amendment becomes effective on April 10, 1989.

Issued in Kansas City, Missouri, February 28, 1989.

**Barry D. Clements,**

*Manager, Small Airplane Directorate, Aircraft Certification Service.*

**14 CFR Part 71**

**[Airspace Docket No. 88–AWP–22]**

**Revision of Vacaville, CA, Transition Area**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action revises the transition area at Vacaville, CA. This will provide controlled airspace for aircraft executing instrument procedures to the Nut Tree Airport.

**EFFECTIVE DATE:** 0901 u.t.c. May 8, 1989.

**FOR FURTHER INFORMATION CONTACT:** Daniel K. Martin, Airspace and Procedures Specialist, Airspace and Procedures Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (213) 297–0166.

**SUPPLEMENTARY INFORMATION:**

**History**

On December 28, 1988, the FAA proposed in amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the transition area at Vacaville, CA (53 FR 52427). This action will provide controlled airspace for aircraft executing instrument approach procedures at the Nut Tree Airport. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations revises the Vacaville, CA, transition area to provide controlled airspace for aircraft executing instrument approach procedures to the Nut Tree Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Transition areas.

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49, U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. Section 71.181 is amended as follows:

**Vacaville, CA [Revised]**

That airspace extending upward from 700 feet above the surface within a 3-mile radius of Nut Tree Airport, CA, (lat. 38°22'16" N., long. 121°57'33" W.), and within 2.5 miles each side of the Sacramento VORTAC 259° radial, extending from the 3-mile radius area to 13 miles W of the VORTAC and within 3 miles each side of the 017° bearing (001°T) of the Nut Tree Airport extending from the 3-mile radius area to 10 miles north northeast of the airport.

Issued in Los Angeles, California, on February 21, 1989.

**Jacqueline L. Smith,**

*Manager, Air Traffic Division, Western-Pacific Region.*

**DEPARTMENT OF THE INTERIOR**

**Office of Surface Mining Reclamation and Enforcement**

**30 CFR Part 934**

**North Dakota; Permanent Regulatory Program**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Final rule; approval of amendment.

**SUMMARY:** OSMRE is announcing the approval, with certain exceptions, of proposed modifications submitted by the State of North Dakota as an amendment (Amendment X) to its permanent regulatory program (hereinafter referred to as the North Dakota program) approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of a policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Postmining Vegetation Assessments" (hereinafter referred to as the policy document or the guidelines). SMCRA requires consistency of State and Federal standards. This final rule will allow the State to bring its program into conformance with the Federal standards.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jerry R. Ennis, Director, Casper Field Office, Office of Surface Mining Reclamation and Enforcement, 100 East B Street, Room 2128, Casper, Wyoming 82601–1918; Telephone: (307) 261–5776.

**SUPPLEMENTARY INFORMATION:**

I. Background on the North Dakota Program.
II. Submission of Amendment.
III. Director's Findings.
IV. Summary and Disposition of Comments.
V. Director's Decision.
VI. Procedural Determinations.

**I. Background on the North Dakota Program**

On December 15, 1980, the Secretary of the Interior conditionally approved the North Dakota program. Information pertinent to the general background of the State program approval process and the North Dakota program submission, including the Secretary's findings, disposition of comments and conditional approval, can be found in the December 15, 1980, **Federal Register** (45 FR 82214). Subsequent actions concerning the conditions of approval and proposed program amendments are identified at 30 CFR 934.12, 934.15 and 934.16.

**II. Submission of Amendment**

On June 1, 1988, North Dakota submitted proposed Amendment X (Administrative Record No. ND–F–01), which clarifies and expands the permanent program requirements concerning revegetation. The July 12, 1988, **Federal Register** (53 FR 26280) announced receipt of the proposed amendment and invited public comment on its adequacy. Since no one requested a public hearing, none was held. The public comment period closed on August 13, 1988. No substantive comments were received.

**III. Director's Findings**

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, are the Director's findings concerning proposed Amendment X.

*1. General*

The Federal regulations at 30 CFR 816.116(a)(1) require that each regulatory authority select revegetation success standards and statistically valid techniques for determining revegetation success and include them in its approved regulatory program. North Dakota developed this policy document to satisfy this requirement. The document does not replace or change any existing State rules; rather, it supplements and clarifies these rules.

As required by 30 CFR 816.116(a)(2), the success standards prescribed by the document include criteria representative of unmined lands in the area being reclaimed, using parameters relevant to

VOL 54 ISS 46 MR 10 1989 UMI

the approved postmining land use. The standards, criteria and parameters also reflect the cover, species composition and soil stabilization requirements of 30 CFR 816.111, as required by 30 CFR 816.116(a). Standards must be included in all permit applications. Permittees and permit applicants may propose standards other than those contained in this policy document, but any such alternatives must first undergo review and approval via the program amendment process, as specified in both the policy document and the preamble to 30 CFR 816.116(a)(1) (48 FR 40150, September 2, 1983).

As required by 30 CFR 816.116(a)(1), the policy document also specifies the procedures to be used for sampling, measuring and analyzing vegetation parameters. Use of these procedures will ensure consistent, objective collection and analysis of vegetation data. The document allows the use of alternative sampling and analysis procedures if prior approval is obtained from the State. The Director notes that under 30 CFR 816.116(a)(1), as explained in the preamble cited in the preceding paragraph, such approval must occur via the program amendment process.

For the reasons set forth above, the Director finds that, except as discussed in the following findings, the standards and procedures contained in the policy document satisfy the requirements of 30 CFR 816.116(a) and are no less effective than the revegetation success requirements of 30 CFR 816.111 and 816.116.

*2. Countable Trees and Shrubs*

Chapter II, Section F of the policy document establishes revegetation success standards for land devoted to woody plants. In determining the success of such plantings, the document and the underlying State rules at NDAC 69-05.2-22-07.4(d) and NDAC 69-05.2-22-08.2(b) allow the counting of all trees and shrubs in place two or more years. While the corresponding Federal regulation at 30 CFR 816.116(b)(3)(ii) likewise requires that, at the time of final bond release, all countable trees and shrubs have been in place no less than two growing seasons, it also requires that at least 80 percent of the trees and shrubs counted to determine revegetation success have been in place for 60 percent of the revegetation responsibility period. Since, in North Dakota, the minimum responsibility period is 10 years, the Federal rule requires that 80 percent of all countable trees and shrubs have been in place at least 6 years.

Therefore, the Director finds that the policy document and the State rules are less effective than the Federal regulations to the extent that they allow trees and shrubs counted for purposes of determining revegetation success to be in place fewer than six years. He is requiring that North Dakota revise all pertinent program documents to specify that at least 80 percent of the trees and shrubs counted in determining the revegetation success of woody plants be in place for at least 60 percent of the 10-year period of revegetation responsibility. By letter dated November 10, 1988, North Dakota agreed to do so.

*3. Ground Cover*

Section F of Chapter II of the policy document requires that comparisons of actual ground cover measurements from the reclaimed area with the corresponding success standard be valid at the 80 percent statistical confidence level. This conflicts with both North Dakota rule NDAC 69-05.2-22-07.4(d)(2) and the Federal regulation at 30 CFR 816.116(a)(2), which require that such comparisons be valid at the 90 percent statistical confidence level. Therefore, the Director finds that the policy document is less effective than the Federal regulations and he is requiring that the minimum acceptable confidence level for ground cover comparisons be increased from 80 percent to 90 percent, using a one-tailed test. By letter dated November 10, 1988, North Dakota agreed to make the change, noting that the difference resulted from a typographical error. In the interim, since policy statements cannot supersede regulations, the State will use the confidence level prescribed in its rules rather than the one specified in the policy document.

*4. Woody Plant Stocking*

The State rules at NDAC 69-05.2-22-07.4(d)(1) and Sections F and G of Chapter II of the policy document require that evaluations of the success of woody plant stocking be valid at the 80 percent statistical confidence level. This conflicts with the Federal regulations at 30 CFR 816.116(a)(2), which require use of the 90 percent statistical confidence level.

Therefore, the Director finds that the guidelines and the State rules are less effective than the Federal regulations, and he is requiring that North Dakota revise the policy document and NDAC 69-05.2-22-07.4(d)(1) to raise the minimum required statistical confidence level from 80 percent to 90 percent. By letter dated November 10, 1988, North Dakota agreed to make this change.

*5. Revegetation Success Measurement Period*

Sections F and G of Chapter II of the policy document establish revegetation success standards and related requirements for woodlands and fish and wildlife habitat. For final bond release on woodland areas, natural woodland replacement or simulation areas, shelterbelts and fish and wildlife habitat, these sections, like the underlying State rule at NDAC 69-05.2-22-07.4(d), only require that the success standards be met for the last year of the 10-year revegetation responsibility period. The corresponding Federal regulation at 30 CFR 816.116(c)(3) requires that all success standards be met for at least the last two consecutive years of the 10-year revegetation responsibility period. Therefore, the Director finds that the policy document and State rules are less effective than the Federal regulation and he is requiring that the State revise NDAC 69-05.2-22.07.4(d) and the policy document to require that the revegetation success standards be met for at least the last two consecutive years of the 10-year revegetation responsibility period. By letter dated November 10, 1988, North Dakota agreed to do so.

*6. Revegetation Success Standards for Shelterbelts*

Chapter II, Section F of the policy document does not include standards for woody plant stocking or vegetative ground cover for non-replacement shelterbelts, although it does establish standards for replacement shelterbelts. The underlying State rules at NDAC 69-05.2-22-02, 69-05.2-22-07 and 69-05.2-22-08 also do not include stocking or ground cover standards for shelterbelts. Since the Federal regulations at 30 CFR 816.116 (a)(1) and (b)(3) require that the regulatory authority establish tree and shrub stocking and vegetative ground cover success standards for shelterbelts, the Director finds that the policy document and State rules are less effective than the Federal regulations; he is requiring that North Dakota revise them accordingly. By letter dated November 10, 1988, the State agreed to do so. North Dakota will also need to specify that woody plants used to determine the success of shelterbelts must meet time-in-place requirements no less effective than those contained in 30 CFR 816.116(b)(3)(ii).

*7. Revegetation Success Standards for Fish and Wildlife Habitat*

(a) *Ground cover.* Section G of Chapter II of the policy document, like the State rule at NDAC 69-05.2-22-07.4(d)(2), requires the ground cover of fish and wildlife habitat to be 70 percent of the approved success standard. However, the Federal regulation at 30 CFR 816.116(a)(2) requires that the measured cover be at least 90 percent of the approved standard to be judged successful. Therefore, the Director finds that the North Dakota policy document and rules are less effective than the Federal regulations, and he is requiring that the State amend its program to require that permittees establish ground cover equal to at least 90 percent of the approved success standard. By letter dated November 10, 1988, North Dakota agreed to do so.

(b) *Use of annual grains.* The policy document recognizes four types of fish and wildlife habitat (woodlands, grasslands, wetlands and annual grain croplands) and establishes separate revegetation requirements and success standards for each. Neither the underlying State rule (NDAC 69-05.2-22-07.4(d)) nor the corresponding Federal rule (30 CFR 816.116(b)(3)) specifically recognizes the use of annual grain crops on lands approved for use as fish and wildlife habitat. However, the Federal rule at 30 CFR 701.5 defines "fish and wildlife habitat" as "land dedicated wholly or partially to the production, protection *or management* of species of fish and wildlife" (emphasis added). The State definition of the same term at NDAC 69-05.2-01-02.34 is virtually identical. As North Dakota documents in this amendment submission, lands actively managed for wildlife habitat frequently include annual grain food plots, especially where waterfowl and upland game birds are target species. Therefore, the Director finds that addition of annual grain cropland as a fish and wildlife land use subcategory is not inconsistent with Federal or State regulations.

However, prior to approving a reclamation plan proposing an annual grain cropland component for a fish and wildlife habitat postmining land use, the regulatory authority would have to find that active management was likely to continue past bond release and that the cropland component was therefore an appropriate postmining land use consistent with the State definition. Furthermore, under NDAC 69-05.2-22-02.6, the applicant for a fish and wildlife habitat postmining land use must consult with State wildlife and land management agencies and must arrange and distribute plantings in accordance with their recommendations. Also, the policy document requires a demonstration that the tracts selected for annual grains are capable of supporting crops and that such crops are capable of controlling erosion. These restrictions should prevent both the excessive use of annual grain croplands and their development on inappropriate sites.

For final bond release on these tracts, the policy document requires data demonstrating that the standing grain crop or residual cover is at least 10 inches high and that it is adequate to control erosion. The height requirement conforms to U.S. Soil Conservation Service recommendations for wildlife plantings. State bond release inspections must be conducted during late fall or early winter to verify this data. Since there are no generally accepted productivity standards for wildlife food plots and since North Dakota requires that the residual cover of such plots be of sufficient height to provide shelter to wildlife and adequate in extent to control erosion, the Director finds that the annual grain crop success standards contained in the policy document are consistent with 30 CFR 816.97(g) (1) and (2) and 816.116(b)(3). The cited Federal rules require that plant species be selected on the basis of their nutritional and cover values, that State wildlife agencies be involved in determining planting arrangements and that vegetative ground cover not be less than that required to achieve the postmining land use. North Dakota's rules and policy document meet these requirements.

The Federal rule at 30 CFR 816.97(g)(3) also requires that plant species be selected on the basis of their ability to support and enhance fish and wildlife habitat after the release of performance bonds. As previously discussed, where the approved postmining land use involves active management for fish and wildlife habitat, wildlife food plots are a recognized part of that management and would be expected to continue after bond release. Therefore, the Director finds that North Dakota's provisions are also consistent with 30 CFR 816.97(g)(3).

*8. Consultation and Approval by State Forestry and Wildlife Agencies*

The Federal regulations at 30 CFR 816.116(b)(3) require that revegetation success on lands reclaimed to fish and wildlife habitat, recreation, shelterbelt or forest uses be determined on the basis of tree and shrub stocking and vegetative ground cover. Subparagraph (b)(3)(i) requires that revegetation success standards for these types of land uses be specified by the regulatory authority on the basis of local and regional conditions after consultation with, and approval by, the State agencies responsible for the administration of forestry and wildlife programs. Consultation and approval may occur on either a program-wide or a permit-specific basis.

North Dakota has consulted with State forestry and wildlife agencies in developing the standards and procedures contained in this document; however, it has not obtained their approval, nor does the State program provide for permit-specific consultation and approval.

Therefore, the policy document and State rules do not meet the requirements of, and are less effective than, the cited Federal regulations. Accordingly, the Director is requiring that North Dakota either obtain the concurrence of State forestry and wildlife agencies in the standards established in its rules and this policy document or amend its program to require that such concurrence be obtained on a permit-specific basis for lands with a fish and wildlife habitat, recreation, shelterbelt or woodland postmining land use. By letter dated November 10, 1988, North Dakota agreed to do so.

*9. Augmentation and Normal Conservation Practices*

(a) *Augmentation practices.* Appendix A of the policy document defines the revegetation responsibility period and specifies what management practices are acceptable during this period. Both the policy document and the corresponding Federal rule at 30 CFR 816.116(c)(4) distinguish between augmentation practices, which start or restart the liability period, and normal conservation practices, which may be accomplished without restarting the liability period. However, the policy document further defines augmentation practices as those practices that reestablish or replace vegetation or make temporary improvements to obtain bond release. This definition is less effective than the Federal rules at 30 CFR 800.40 and 816.116(c)(4) in that the Federal rules do not allow bond release based on temporary improvements nor do they limit augmentation practices to those which reestablish or replace vegetation. Under 30 CFR 816.116(c)(4), as explained in the preamble, a practice must be considered augmentative if it exceeds "the usual or expected state, form, amount or degree of management performed habitually or customarily to prevent exploitation, destruction or neglect of the resource and maintain a prescribed level of use or productivity on similar unmined lands" in the surrounding area (53 FR 34641, September 7, 1988). Therefore, the Director is requiring that North Dakota

VOL 54 ISS 46 MR 10 1989 UMI

amend its definition of augmentation practices to be consistent with the Federal rule.

(b) *Normal conservation practices.* Appendix A lists the following activities as normal conservation practices: (1) Pest management and repair of pest damage; (2) repair and management of minor erosion features affecting only small areas; (3) fertilization and irrigation of cropland and hayland, if fertilization and irrigation are part of a long-term management plan to be continued following bond release; (4) irrigation during the first year following seeding or planting to assist in establishment of vegetation; (5) use of green manure, strip-cropping or minimum tillage on croplands, including plowing hayland every 4–5 years to reestablish the stand; (6) burning, mowing and grazing native grasslands and tame pasturelands; (7) when necessary, fertilizing or applying herbicides to grasslands or pasturelands to manipulate cool season/warm season grass ratios; (8) occasional haying or burning of fish and wildlife habitat; and (9) controlling weeds, watering, delaying understory vegetation establishment, pruning, thinning and limited replacement of dead trees and shrubs in woodlands and shelterbelts. Appendix A further states that, because the distinction between normal conservation practices and augmentation practices is not always clear, the State will review management practices on a site-specific basis to determine if they are normal conservation practices that do not affect the liability period.

The Federal regulations at 30 CFR 816.116(c)(4) allow States to approve selective husbandry practices on reclaimed lands without extending the liability period if the practices meet certain criteria and are approved by the Director of OSMRE through the State program amendment process. These practices cannot include augmented seeding, fertilization or irrigation. In addition, they must be expected to continue as part of the postmining land use or, if discontinued after the liability period expires, must not reduce the probability of permanent revegetation success. Also, the practice must be a normal husbandry practice in the region for that type of land use.

Using the explanation and documentation contained in the North Dakota submission and other reference materials, OSMRE's technical review found that the activities listed in Appendix A are standard management practices on unmined lands in North Dakota and that they therefore qualify as normal husbandry practices under the Federal rule. Irrigation during the first year of the liability period is acceptable since North Dakota does not allow measurements taken during that year or the following year to be used in final determinations of revegetation success and it is unlikely that future years will show any carryover effect. Appendix A does not limit the extent to which the replanting of woody plants may be considered a normal conservation practice; however, the Director finds that adoption of time-in-place requirements for woody plants, as required in Findings 2 and 6, will adequately circumscribe this practice.

Appendix A and the corresponding State rule at NDAC 69-05.2-22-07.2 fail to specify the point at which the seeding of cropland or the fertilization or irrigation of any land ceases to be normal husbandry and becomes augmentation. However, Section 38-14.1-24(17) of the North Dakota Century Code requires that revegetation success on disturbed lands be evaluated by comparison with similar unmined lands in the surrounding area having equivalent historical management practices. By implication, therefore, the North Dakota statute, like the Federal rule at 30 CFR 816.116(c)(4), limits the type, frequency, extent and intensity of all management practices used on reclaimed lands during the responsibility period to that historically used on similar unmined lands in the surrounding area with the same use. Also, to ensure the validity of comparisons, management practices used on reclaimed areas must be equivalent to those used on reference or control areas. For example, permittees would not be allowed to fertilize reclaimed lands at rates in excess of those used on similar unmined lands under similar management without restarting the liability period, even if soil tests indicate that the mined land requires a higher rate of fertilization to achieve yields comparable to those of the unmined land.

### IV. Summary and Disposition of Comments

The Director solicited public comment on the proposed amendment in the July 12, 1988, **Federal Register** (53 FR 26280). No comments were received. Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(11)(i), comments were also solicited from various Federal agencies. No substantive comments were received.

### V. Director's Decision

The Director, based on the above findings, is approving proposed Amendment X as submitted by North Dakota on June 1, 1988. The Federal regulations at 30 CFR Part 934 are being amended to implement this decision. This final rule is being made effective immediately to encourage States to bring their programs into performance with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

The Director also is requiring that North Dakota further amend its program to:

(1) As discussed in Finding 2, require that at least 80 percent of trees and shrubs counted to determine revegetation success on reclaimed lands have been in place for at least 60 percent of the 10-year revegetation responsibility period.

(2) As discussed in Findings 3 and 4, require that evaluations of revegetation success be valid at the 90 percent confidence level.

(3) As discussed in Finding 5, require that revegetation success standards be met for at least the last two consecutive years of the 10-year revegetation responsibility period.

(4) As discussed in Finding 6, include tree and shrub stocking and vegetative ground cover success standards for all types of shelterbelts and clarify that the trees and shrubs used must meet time-in-place requirements.

(5) As discussed in Finding 7(a), require that ground cover on lands reclaimed to fish and wildlife habitat equal at least 90 percent of the approved success standard.

(6) As discussed in Finding 8, obtain or require the concurrence of the appropriate State forestry and wildlife agencies with the revegetation success standards for land reclaimed for fish and wildlife habitat, recreation, shelterbelt or woodland uses.

(7) As discussed in Finding 9(a), revise the definition of augmentation practices to be consistent with the Federal rule.

### VI. Procedural Determinations

*Compliance With the National Environmental Policy Act*

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

*Compliance With Executive Order 12291 and the Regulatory Flexibility Act*

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for

actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a regulatory impact analysis and regulatory review by OMB.

The Department of the Interior has determined that, for purposes of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), this rule will not have a significant economic effect on a substantial number of small entities. This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal regulations will be met by the State.

*Paperwork Reduction Act*

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

**List of Subjects in 30 CFR Part 934**

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: March 3, 1989.

**Robert H. Gentile,**

*Director, Office of Surface Mining Reclamation and Enforcement.*

For the reasons set forth in the preamble, Title 30, Chapter VII, Subchapter T of the Code of Federal Regulations is amended as set forth below:

## PART 934—NORTH DAKOTA

1. The authority citation for Part 934 continues to read as follows:

**Authority:** 30 U.S.C. 1201 *et seq.*

2. Section 934.15 is amended by adding a new paragraph (k) to read as follows:

**§ 934.15 Approval of regulatory program amendments.**

* * * * *

(k) The following amendment to the North Dakota regulatory program, as submitted to OSMRE on June 1, 1988, is approved effective March 10, 1989, provided North Dakota adopts the amendment in a form identical to that submitted to and reviewed by OSMRE: Amendment X, which consists of a policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments." This document specifies the standards and procedures to be used by mine operators and the regulatory authority in determinations of revegetation success for bond release purposes.

3. Section 934.16 is amended by designating the existing text as paragraph (a) and by adding paragraphs (b) through (i) to read as follows:

**§ 934.16 Required regulatory program amendments.**

* * * * *

(b) By June 8, 1989, North Dakota shall submit proposed revisions to NDAC 69-05.2-22-07.4(d), NDAC 69-05.2-22-08.2(b) and the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" or otherwise propose to amend its program to require that at least 80 percent of the trees and shrubs counted to determine revegetation success have been in place for at least 60 percent of the 10-year period of revegetation responsibility.

(c) By June 8, 1989, North Dakota shall revise the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" to require that evaluations of ground cover success be valid at the 90 percent confidence level.

(d) By June 8, 1989, North Dakota shall submit proposed revisions to NDAC 69-05.2-22-07.4(d)(2) and the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" or otherwise propose to amend its program to require that evaluations of the success of woody plant stocking be valid at the 90 percent confidence level.

(e) By June 8, 1989, North Dakota shall submit proposed revisions to NDAC 69-05.22-07.4(d) and the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" or otherwise propose to amend its program to require that revegetation success standards be met for at least the last two consecutive years of the revegetation responsibility period.

(f) By June 8, 1989, North Dakota shall submit proposed revisions to NDAC 69-05.2-22-02, 69-05.2-22-07 and 69-05.2-22-08 and the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" or otherwise propose to amend its program to include tree and shrub stocking and vegetative ground cover success standards for all types of shelterbelts and clarify that trees and shrubs must meet time-in-place requirements no less effective than those established in 30 CFR 816.116(b)(3)(ii).

(g) By June 8, 1989, North Dakota shall submit proposed revisions to NDAC 69-05.2-22-07.4(d)(2) and the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" or otherwise propose to amend its program to require that vegetative ground cover on lands reclaimed to fish and wildlife habitat equal at least 90 percent of the success standard.

(h) By June 8, 1989, North Dakota shall submit documentation that it has obtained the concurrence of the appropriate State forestry and wildlife agencies with the revegetation success standards for lands reclaimed to fish and wildlife habitat, recreation, shelterbelt or woodland uses, or shall submit proposed revisions to NDAC 69-05.2-22-07 and the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" or otherwise propose to amend its program to require such concurrence on a permit-specific basis.

(i) By June 8, 1989, North Dakota shall submit proposed revisions to the policy document entitled "Standards for Evaluation of Revegetation Success and Recommended Procedures for Pre- and Post-mining Vegetation Assessments" to alter the definition of augmentation practices to be consistent with 30 CFR 816.116(c)(4).

## ENVIRONMENTAL PROTECTION AGENCY

**40 CFR Part 52**

**[A-1-FRL-3529-3]**

### Approval and Promulgation of Air Quality Implementation Plans; Rhode Island; Reasonably Available Control Technology for Tech Industries

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA is approving a State Implementation Plan (SIP) revision submitted by the State of RI. This revision defines and imposes reasonably available control technology (RACT) on Tech Industries located in Woonsocket, Rhode Island. This revision is necessary to limit volatile organic compound (VOC) emissions from this source. The

VOL 54 ISS 46 MR 10 1989 UMI

effect of this action is to approve a source-specific RACT determination made by the State in accordance with commitments specified in its Ozone Attainment Plan approved by EPA on July 6, 1983 (48 FR 31026).

This action is being taken in accordance with Section 110 of the Clean Air Act.

**EFFECTIVE DATE:** This rule will become effective on April 10, 1989.

**ADDRESSES:** Copies of the documents relevant to this action are available for public inspection during normal business hours at the Environmental Protection Agency, Region I, JFK Federal Building, Rm. 2311, Boston, MA 02203; Division of Air and Hazardous Materials, 211 Promenade Street, Providence, RI 02908; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and the office of the Federal Register, 1100 L Street, NW., Room 8301, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Robert C. Judge, (617) 565-3248; FTS 835-3248.

**SUPPLEMENTARY INFORMATION:** On July 14, 1988 (53 FR 26609), EPA published a Notice of Proposed Rulemaking (NPR) to approve an administrative consent agreement between the Rhode Island Department of Environmental Management (DEM) and Tech Industries (Tech). The consent agreement establishes and imposes RACT to control VOC emissions from Tech. RACT must be defined for Tech under Rhode Island SIP Regulation No. 15, subsection 15.8, "Miscellaneous Facilities Emitting 100 tons/year or more."

On May 25, 1988, EPA called for revisions to the Rhode Island Ozone Attainment Plan because of persistent violations of the ozone National Ambient Air Quality Standard (NAAQS) in Rhode Island. As such, the State is required to begin the planning process and revise its demonstration of attainment. However, this revision will not affect Rhode Island's ability to demonstrate attainment in the future since the revision strengthens the State's federally-approved SIP. This revision simply makes an emission limit for an unregulated VOC emitting source part of Rhode Island's federally enforceable SIP, as required by the State's 1982 Ozone Attainment Plan.

The version of the consent agreement originally submitted to EPA on May 6, 1987, contained language which could have allowed Tech to bubble to meet the RACT emission limit. As discussed in the NPR, the DEM's request for parallel processing stated that language which could allow Tech to bubble would not be included in the final consent agreement submitted as a formal SIP revision request. On January 4, 1988, the DEM submitted an addendum to the consent agreement which removed the language which could have been used by Tech to meet RACT on a facility-wide daily basis. The consent agreement we are approving requires that Tech meet its RACT emission limit on each line on a continuous basis.

The revision and the rationale for EPA's action were explained in the NPR and will not be restated here. No public comments were received on the NPR.

### Final Action

EPA is approving the consent agreement submitted by the DEM as a SIP revision request for Tech in Woonsocket, RI. The consent agreement requires Tech to meet a RACT emission limit of 3.5 pounds VOC/gallon of coating (minus water) on a solids applied basis.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 9, 1989. This action may not be challenged later in proceedings to enforce requirements. (See section 307(b)(2).)

Part 52 of Chapter I, Title 40 of the Code of Federal Register is amended as follows:

## PART 52—[AMENDED]

### Subpart OO—Rhode Island

1. The authority citation for Part 52 continues to read as follows:

**Authority:** 42 U.S.C. 7401–7642.

2. Section 52.2070 is amended by adding paragraph (c)(32) to read as follows:

**§ 52.2070 Identification of plan.**

* * * * *

(c) * * *

(32) Revisions submitted on May 6, 1987, October 15, 1987, and January 4, 1988 by the Rhode Island Department of Environmental Management consisting of an administrative consent agreement which defines and imposes RACT to control volatile organic compound emissions from Tech Industries in Woonsocket, Rhode Island.

(i) Incorporation by reference

(A) An administrative consent agreement (86–12–AP), except for Provisions 7 and 8, between the Rhode Island Department of Environmental Management and Tech Industries effective June 12, 1986.

(B) An addendum to the administrative consent agreement (86–12–AP) between the Rhode Island Department of Environmental Management and Tech Industries. The addendum was effective November 24, 1987.

(C) Letters dated May 6, 1987; October 15, 1987; and January 4, 1988 submitted to the Environmental Protection Agency by the Rhode Island Department of Environmental Management.

3. In § 52.2081, the Table 52.2081 is amended by adding the following entry to the end of No. 15. The date approved by EPA and the **Federal Register** citation will be the publication date and citation of today's document.

**§ 52.2081 EPA approved Rhode Island State Regulations.**

BILLING CODE 6560-50-M

## 40 CFR Part 52

**[A-1-FRL-3527-8]**

### Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; Miscellaneous Amendments to the SIP

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA is approving parts and is taking no action on other parts of State Implementation Plan (SIP) revisions submitted by the Commonwealth of Massachusetts. These revision involve regulatory amendments and additions to SIP regulations for new source review, gasoline marketing, monitoring and reporting, and surface coating. EPA is approving those parts of the revisions relating to new source review, gasoline marketing facilities, and monitoring and reporting regulations. EPA is taking no action at this time on those parts of the revisions concerning the surface coating regulations.

These revisions are administrative and/or procedural in nature, and do not effect air quality or the ability of the Commonwealth of Massachusetts to attain and maintain the National Ambient Air Quality Standards (NAAQS). The intended effect of this action is to approve revisions made by the Commonwealth of Massachusetts in accordance with section 110 of the Clean Air Act.

**EFFECTIVE DATE:** This rule will become effective on April 10, 1989.

**ADDRESSES:** Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building, Room 2313, Boston, MA 02203; the Department of Environmental Quality Engineering, Division of Air Quality Control, One Winter Street, 8th Floor, Boston, MA 02108; and Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** Lorenzo Thantu (617) 565-3250; FTS 835-3250.

**SUPPLEMENTARY INFORMATION:** On July 22, 1988 (53 FR 27716), EPA published a Notice of Proposed Rulemaking (NPR) for revisions to the Commonwealth of Massachusetts SIP. The NPR proposed to approve the SIP revisions for regulatory amendments to new source review regulations 310 CMR 7.02(2)(b) 4, 5, and 6; gasoline marketing facilities regulations 310 CMR 7.02(12)(b)(3) and 7.02(12)(d); and monitoring and reporting regulation 310 CMR 7.14. The NPR also proposed to approve the amendments to surface coating regulation 310 CMR 7.18 with the understanding that the Commonwealth of Massachusetts would further amend the regulations in accordance with requirements outlined in that NPR. The NPR stated that those requirements had to be incorporated and adopted by the Commonwealth before EPA could promulgate final approval of the revisions to 310 CMR 7.18.

However, EPA is taking no action on the DEQE's amendments to the surface coating regulation 310 CMR 7.18 at this time. The DEQE intends to further amend 310 CMR 7.18 at a later date as part of its Phase I commitments of the Post '87 Ozone Nonattainment requirements. Phase I commitments include correcting deficiencies and inconsistencies in the existing federally approved VOC regulations in response to EPA's May 25, 1988 call for revisions to Massachusetts' Ozone Attainment Plan. The surface coating amendments being discussed here fall under the Phase I commitments.

Therefore, EPA is approving the DEQE's amendments to regulations 310 CMR 7.02(2)(b) 4, 5, and 6; 310 CMR 7.02(12)(b)(3) and 7.02(12)(d); and 310 CMR 7.14; and is taking no action on the DEQE's amendments on regulation 310 CMR 7.18 at this time. A more detailed description of these revisions and EPA's rationale for approving them were provided in the NPR and will not be restated here.

### Public Comment

A comment letter was received on the DEQE's amendment of the surface coating regulations for automobiles and miscellaneous metal parts and products. EPA will respond to this comment at the time it takes action on the relevant revisions.

### Final Action

EPA is approving the Commonwealth of Massachusetts State Implementation plan revisions for regulatory amendments to Regulations 310 CMR 7.02(2)(b) 4, 5, 6; 7.02(12)(d); and 7.14.

EPA is taking no action on the amendments to Regulation 310 CMR 7.18 at this time with the understanding that the Commonwealth of Massachusetts intends to further amend this regulation and EPA will take action on the amendments in a separate rulemaking at a latter date.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under section 307(b)(1) of the act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from date of publication). This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

### List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide.

**Note.—Incorporation by reference of the State Implementation Plan for the Commonwealth of Massachusetts was approved by the Director of the Federal Register on July 1, 1982.**

BILLING CODE 6560-50-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

**Office of Child Support and Enforcement**

**45 CFR Part 306**

**Medical Support Enforcement**

**AGENCY:** Family Support Administration, Office of Child Support Enforcement (OCSE).

Program: OCSE—Medical Support Enforcement.

**ACTION:** Rule-related notice to the public of approved provisions.

**SUMMARY:** Final rule for medical support enforcement was effective when published in the **Federal Register** on September 16, 1988 (53 FR 36014), except for the information collection requirements in § 306.51 (b)(3) and (b)(5) which were pending OMB approval. OMB approved these information collection requirements on December 20, 1988 under OMB control number 0970–0070. This notice informs the public that the provisions of § 306.51 (b)(3) and (b)(5) are now in effect.

**EFFECTIVE DATE:** March 10, 1989.

**FOR FURTHER INFORMATION CONTACT:** Andrew J. Hagen, Policy Branch, OCSE, (202) 252–5375.

**SUPPLEMENTARY INFORMATION:** The medical support enforcement final rule, published on September 16, 1988 (53 FR 36014), included information collection requirements in § 306.51 (b)(3) and (b)(5). The final rule document specified that the effective date for the final rule was the September 16, 1988 publication date, except for the provisions of § 306.51 (b)(3) and (b)(5), which were pending OMB approval.

The final rule at 45 CFR 306.51 (b)(3) requires all State IV–D agencies to develop written criteria to identify cases not included under paragraphs (b)(1) and (b)(2) with a high potential for obtaining medical support based on evidence that health insurance may be available to the absent parent at a reasonable cost and facts, as defined by State law, regulation, procedure or other directive, which are sufficient to warrant modification of the existing support order to include health insurance coverage for a dependent child(ren).

The final rule at 45 CFR 306.51(b)(5) requires IV–D agencies to provide the custodial parent with health insurance policy information when the absent parent secures coverage for the dependent child(ren). This includes any information available to the IV–D agency about the health insurance policy which would permit a claim to be filed or, in the case of HMO's and PPO's, services to be provided.

OMB approved the information collection requirements in § 306.51 (b)(3) and (b)(5) on December 20, 1988. The OMB control number is 0970–0070. We are informing the public that the provisions of § 306.51 (b)(3) and (b)(5) are now in effect.

Dated: February 28, 1989.

**Wayne A. Stanton,**

*Director, Office of Child Support Enforcement.*

[FR Doc. 89-5282 Filed 3-9-89; 8:45 am]

BILLING CODE 4150-04-M

## GENERAL SERVICES ADMINISTRATION

**48 CFR Parts 505 and 553**

**[APD 2800.12 CHGE 83]**

**General Services Administration Acquisition Regulation; Congressional Notification of Contract Awards**

**AGENCY:** Office of Acquisition Policy, GSA.

**ACTION:** Final rule.

**SUMMARY:** The General Services Administration Acquisition Regulation (GSAR), Chapter 5 (APD 2800.12), is amended to delete §§ 505.301 and 505.302 that unnecessarily repeat the Federal Acquisition Regulation (FAR); to revise §§ 505.303 and 505.403 to update office titles and symbols; to revise § 505.303–70 to modify the reporting requirements and procedures for notifying Congress of proposed substantial awards; and to delete § 553.370–2932 that illustrated the GSA Form 2932, Proposed Substantial Contract Awards. The GSA Form 2932 has been canceled.

**EFFECTIVE DATE:** March 27, 1989.

**FOR FURTHER INFORMATION CONTACT:** Ms. Ida Ustad, Office of GSA Acquisition Policy and Regulations (VP), (202) 566–1224.

**SUPPLEMENTARY INFORMATION:**

**Background**

This rule was not published in the **Federal Register** for public comment because it provides internal operating procedures for GSA contracting activities and has no impact on contractors or offerors.

Impact: The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule. The rule simply amends the GSAR to provide internal operating procedures. Therefore, no regulatory flexibility analysis has been prepared. The rule does not contain any information collection requirements that require OMB approval under the Paperwork Reduction Act.

**List of Subjects in 48 CFR Parts 505 and 553**

Government procurement.

1. The authority citation for 48 CFR Parts 505 and 553 continues to read as follows:

**Authority:** 40 U.S.C. 486(c).

**PART 505—PUBLICIZING CONTRACT ACTIONS**

**505.301 [Removed]**

2. Section 505.301 is removed.

**505.302 [Removed]**

3. Section 505.302 is removed.

4. Section 505.303 is revised to read as follows:

**505.303 Announcement of contract awards.**

By complying with 505.303–70 contracting officers automatically fulfill the reporting requirements of FAR 5.303(a).

5. Section 505.303–70 is revised to read as follows:

**505.303–70 Notification of proposed substantial awards and awards involving Congressional interest.**

(a) *Applicability.* The notification procedures in paragraph (b) of this section, apply only to proposed awards involving:

(1) A contract with the Small Business Administration (the 8(a) program).

(2) A supply contract exceeding or estimated to exceed $500,000 (except for (i) motor vehicles, (ii) products whose points of origin are not readily identifiable or (iii) products involving foreign production points).

(3) A design (Architect/Engineer) contract or construction contract exceeding or estimated to exceed $500,000.

(4) Any other contract, or class of contracts, in excess of $25,000 for which a Member of Congress has specifically requested notification of award.

(b) *Notification procedures.* (1) The Office of Congressional Affairs (S) will notify the heads of contracting activities in writing with the names of Members of Congress who wish to be notified of any or all contract awards in excess of $25,000 to contractors located within their district or State, as applicable. Upon such notification, the contracting activities will facsimile or hand deliver applicable notices of award to S. A copy of the submittal should be provided to the regional Congressional liaison office.

(2) Except for submittals hand delivered to S, the submittal must be made by facsimile transmission and, in the case of proposed 8(a) awards, on GSA Form 2677, Minority Contract Fact Sheet. Except for contracts awarded under unusual and compelling urgency, notification to S must be made 48 hours in advance of award. Notification to S of awards made under unusual and compelling urgency must be made at the same time notification is made to the contractor. If the 48 hour timeframe for advance notification to S cannot be met, the Contracting Director must notify S by telephone.

(3) The notification to S must contain:

(i) Identification of the type of contract and contractor using the following codes:

(A) *DQ* for definite quantity contract.

(B) *SC* for schedule contract.

(C) *TC* for indefinite delivery contract other than schedule.

(D) *S* for small business concern.

(E) *SD* for small disadvantaged business concern.

(F) *O* for other than a small business concern.

(G) *NLS* for not labor surplus area.

(H) *LS* for labor surplus area.

(ii) The company name and address (including county and Congressional district) and the dollar value for each production point. When there are multiple production points and specific items, and their points of production are not shown, or when the number of production points exceed 10, write "multiple" and indicate immediately after, in parentheses, the total number of production points.

(iii) The quantity and unit, in parentheses, for definite quantity awards by production point. Indicate the name of the receiving agency next to the applicable quantity and identify the requirement or portion thereof for overseas use.

(iv) A point-of-contact name (where available) and telephone number for each award recipient and each point of production.

(v) A statement when Congressional Interest is involved.

Congressional interest: *(Name of Congressman/Senator)*
*(Indicate State/District)*
*(Describe interest)*

(vi) The contracing officer's name and telephone number for each award.

(4) The notification to S will contain sensitive preaward information and should be labeled accordingly. S and regional Congressional liaison offices

BEST COPY AVAILABLE

VOL 54 ISS 46 MR 10 1989 UMI

will be responsible for the security of such information and will establish procedures governing the release of such information before official notification of award. Unless otherwise authorized by the contracting officer, the release of such information prior to award shall be limited to Members of Congress and their staff.

(c) *Release of awards.* (1) Release of notifications which require priority processing as determined by the Associate Administrator for Congressional Affairs will be accomplished at the time and date specified.

(2) Unless notified to the contrary, contracting activities may release awards of the type described in paragraphs (a) and (b) of this section, or information pertinent thereto, upon the expiration of two full workdays (48 hours) after the time and date of notification to S established either by the facsimile transmission or hand delivery.

6. Section 505.403 is revised to read as follows:

**505.403 Requests from Members of Congress.**

When responding to a Congressional inquiry would result in disclosure of classified material, confidential business information, or information prejudicial to a competitive acquisition, the contracting officials shall consult with assigned legal counsel, refer the proposed reply to the head of the contracting activity (HCA), and inform the Office of Congressional Affairs of the action taken.

**PART 553—FORMS**

**553.370-2832 [Removed]**

7. Section 553.370-2832 is removed.

Dated: March 1, 1989.

**Richard H. Hopf III,**

*Associate Administrator for Acquisition Policy.*

[FR Doc. 89-5599 Filed 3-9-89; 8:45 am]

BILLING CODE 6820-61-M

---

**DEPARTMENT OF THE INTERIOR**

**Fish and Wildlife Service**

**50 CFR Part 17**

**Endangered and Threatened Wildlife and Plants; Endangered Status for Sarracenia rubra ssp. alabamensis**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Final rule.

**SUMMARY:** The Service determines a plant, *Sarracenia rubra* ssp. *alabamensis* (Alabama canebrake pitcher-plant), to be an endangered species under the authority contained in the Endangered Species Act (Act) of 1973, as amended. *Sarracenia rubra* ssp. *alabamensis* is currently known from only 12 sites in 3 central Alabama counties. However, only four of these are of significant size and two sites are imminently threatened. Over 50 percent of this species' populations have been lost through habitat destruction, succession (due to fire exclusion), over-collecting, and adverse land use practices. Extant populations continue to be degraded by these factors. This action will extend the Act's protection to *Sarracenia rubra* ssp. *alabamensis*.

**EFFECTIVE DATE:** April 10, 1989.

**ADDRESSES:** The complete file for this rule is available for public inspection, by appointment, during normal business hours at the Jackson Field Office, U.S. Fish and Wildlife Service, Jackson Mall Office Center, Suite 316, 300 Woodrow Wilson Avenue, Jackson, Mississippi 39213.

**FOR FURTHER INFORMATION CONTACT:** Ms. Cary Norquist at the above address (601/965-4900 or FTS 490-4900).

**SUPPLEMENTARY INFORMATION:**

## Background

*Sarracenia rubra* ssp. *alabamensis*, a member of the pitcher-plant family, is a carnivorous herb arising from a rhizome. This species produces two types of pitchers (hollow leaves) and occasional phyllodia (flattened leaves) each season. Spring pitchers, appearing with flowers, are 20–50 centimeters (cm) (7.87–19.7 inches) in length and recurved; the summer pitchers are larger (20–70 cm (7.87–27.6 inches)) and erect. Flowers are maroon in color and borne singly on scapes up to 60 cm (2 feet) tall. The fruit is a capsule. Flowering occurs from late April through early June (Case and Case 1974 and 1976; Kral 1983; McDaniel 1986; McDaniel and Troup 1982).

*Sarracenia rubra* ssp. *alabamensis* is endemic to a three county area in central Alabama. The first collections of this species were made during the early 1900's by Pollard and Maxon (McDaniel and Troup 1982) and Harper (1918, 1922). However, Case and Case (1974) were the first to formally recognize these plants as a distinct taxon.

There has been considerable disagreement regarding the proper taxonomic disposition of this taxon and the *Sarracenia rubra* complex in general. The taxonomic history of *Sarracenia rubra* ssp. *alabamensis* has been discussed in detail by various authors (Case and Case 1976, McDaniel 1986, McDaniel and Troup 1982). *Sarracenia rubra* ssp. *alabamensis* was given no recognition within *Sarracenia rubra* by Bell (1949). In other studies it has been referred to as a regional variant (McDaniel 1986, 1971), a subspecies (Schnell 1977, 1979), and a species (Case and Case 1974, 1976; McDaniel 1986). According to Case and Case (1976) and McDaniel (1986), confusion regarding its taxonomic validity stems from the presence of alleged "intermediates" which are actually ecologically induced variants or introgressed hybrids. Hybridization has been well documented in *Sarracenia* species (Bell 1952, Bell and Case 1956, McDaniel 1971).

Detailed comparisons of *Sarracenia rubra* ssp. *alabamensis* with other members of the *Sarracenia rubra* complex (*Sarracenia rubra* ssp. *jonesii*, *Sarracenia rubra* ssp. *wherryi*, *Sarracenia rubra* ssp. *gulfensis*, *Sarracenia rubra* ssp. *rubra*) are given by Case and Case (1976), Schnell (1977), and McDaniel (1986). Leaf shape is accepted as the most significant diagnostic character in *Sarracenia* (Bell 1949; Case and Case 1976; McDaniel 1971, 1986; Schnell 1977). Authors agree that *Sarracenia rubra* ssp. *alabamensis*' distinctiveness is best displayed in its large summer pitchers which are distinctively shaped, puberulent, yellow-green in color and inconspicuously veined and aerolate in the upper portion (Case and Case 1974, 1976; McDaniel 1986; Schnell 1977). *Sarracenia rubra* ssp. *alabamensis* and other members of the *Sarracenia rubra* complex maintain their morphological distinction when grown under standardized conditions (Case and Case 1976, Schnell 1977).

*Sarracenia rubra* ssp. *alabamensis* occurs in sandhill seeps, swamps, and bogs along the fall-line of central Alabama. Soils are acidic, highly saturated, deep peaty sands or clays. Historically, *Sarracenia rubra* ssp. *alabamensis* occurred in open boggy areas with little woody competition (Case and Case 1974, Harper 1922). However, due to fire exclusion, much of this habitat has become invaded by woody vegetation. Populations which have survived in these areas are weak and declining due to increased competition and shading. Other remaining habitat has been adversely modified by changes in land use, particularly increased agricultural usage, and are now located in pastures or on rights-of-way.

This pitcher-plant grows in full sun or light shade in association with cinnamon fern (*Osmunda cinnamomea*),

pipeworts (*Eriocaulon* sp.), orchids (*Calopogon, Cleistes, Pogonia*), yellow-eyed grasses (*Xyris* sp.), beak rushes (*Rhynchospora* sp.), sundews (*Drosera* sp.), and butterworts (*Pinguicula* sp.). Woody associates may include cane (*Arundinaria tecta*), bamboo-vine (*Smilax laurifolia*), sweet bay (*Magnolia virginiana*), alder (*Alnus* sp.), red maple (*Acer rubrum*), poison sumac (*Rhus vernix*), and wax myrtle (*Myrica* sp.).

*Sarracenia rubra* ssp. *alabamensis* has been reported from 28 sites in central Alabama; however, 16 of these populations have been destroyed through habitat destruction, herbicide application, over-collecting, and/or succession (due to fire exclusion). Extensive searches of suitable habitat for additional populations have been conducted for over 20 years by F. Case (personal communication 1987), McDaniel and Troup (1982) and many others. Currently, *Sarracenia rubra* ssp. *alabamensis* is known to exist at only 12 sites in central Alabama including 5 populations in Autauga County, 5 in Chilton County, and 2 in Elmore County. Only 4 populations are of significant size, having from 70 to 300 plants. Of the remaining sites, 2 have limited populations (25–50 individuals) and 6 have poor populations (2–20 individuals). As previously discussed, most populations occur in impacted areas, resulting in individuals often being lost due to adverse land use practices. All sites are on privately-owned lands.

Federal actions involving *Sarracenia rubra* ssp. *alabamensis* began with section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94-51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the report of the Smithsonian Institution as a petition within the context of section 4(c)(2), now Section 4(b)(3)(a), of the Act and of its intention thereby to review the status of those plants. On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to section 4 of the Act. *Sarracenia ruba* ssp. *alabamensis* was included in the Smithsonian petition and the 1976 proposal. General comments received in relation to the 1976 proposal were summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909).

The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the June 16, 1976, proposal, along with four other proposals that had expired. *Sarracenia rubra* ssp. *alabamensis* was included as a category 1 species in a revised list of plants under review for threatened or endangered classification published in the December 15, 1980, **Federal Register** (45 FR 82480). Category 1 comprises taxa for which the Service presently has sufficient biological information to support their being proposed to be listed as endangered or threatened species.

On November 28, 1983, the Service published a supplement to the notice of review for native plants in the **Federal Register** (48 FR 53640); the plant notice was again revised September 27, 1985 (50 FR 39526). *Sarracenia rubra* ssp. *alabamensis* was included as a category 2 species in the 1983 supplement and the 1985 revised notice. Category 2 species are those for which listing as endangered or threatened species may be warranted but for which substantial data on biological vulnerability and threats are not currently known or on file to support a proposed rule. Data obtained over the last few years now support its reelevation to category 1 and listing as endangered. The data demonstrate a limited distribution and continuing threats to the species.

Section 4(b)(3) of the Endangered Species Act, as amended in 1982, requires the Secretary to make certain findings on pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 Amendments further requires that all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. This was the case for *Sarracenia rubra* ssp. *alabamensis* because of the acceptance of the 1975 Smithsonian report as a petition. In October of 1983, 1984, 1985, 1986, and 1987, the Service found that the petitioned listing of *Sarracenia rubra* ssp. *alabamensis* was warranted, but that listing this species was precluded due to other higher priority listing actions. On April 21, 1988, the Service published in the **Federal Register** (53 FR 13230), a proposal to list *Sarracenia rubra* ssp. *alabamensis* as an endangered species. The Service now determines *Sarracenia rubra* ssp. *alabamensis* to be an endangered species with the publication of this final rule.

## Summary of Comments and Recommendations

In the April 21, 1988, proposed rule and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice inviting public comment was published in the "Montgomery Advertiser" (Montgomery, Alabama) on May 9, 1988.

Two comments were received and both were supportive of the listing, including one from a conservation organization and one from a private individual. The conservation organization noted that this species receives some legal protection under the Convention on International Trade in Endangered Species of Wild Fauna and Flora which had not been addressed under "Summary of Factors * * *," Factor D. The individual supplied additional distributional and threat information, which has been incorporated into the appropriate sections of the rule. In addition, he expressed his discontent with its listing as a subspecies, instead of as a full species. There is disagreement regarding the exact taxonomic rank of this species (see "Background"). In the most recent peer-reviewed journal, this species was presented as *Sarracenia rubra* ssp. *alabamensis*. If formally redescribed as a full species, as recommended by McDaniel (1986), an editorial change will be made to the List of Endangered and Threatened Wildlife and Plants, to reflect this nomenclatural change.

## Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Sarracenia rubra* ssp. *alabamensis* should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Sarracenia rubra* Walt. ssp. *alabamensis* (Case and Case)

VOL 54 ISS 46 MR 10 1989 UMI

Schnell (Alabama canebrake pitcher-plant) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* *Sarracenia rubra* ssp. *alabamensis* occurs in small, localized colonies at only 12 sites in central Alabama (see "Background" for more detailed distributional information). Most of the species' habitat has been destroyed or adversely modified through clearing and drainage for agricultural usage (e.g., pastureland, row crops). The intensive pressure from agricultural utilization of the habitat is evident in the fact that half of the extant populations occur in converted pastureland. Use of habitat as unimproved pasture may benefit plants by eliminating competing vegetagion (Folkerts 1976), as long as the drainage is unaffected and the area is not overgrazed. However, with overgrazing, the soils become highly compacted and the plants are more likely to be trampled by cattle. One site supporting a vigorous population is imminently threatened by attempts to drain the area and convert it to pastureland. Many of the hillside bogs have served as sites for the construction of farm ponds. One of the largest populations known for *Sarracenia rubra* ssp. *alabamensis* has declined from several hundred plants to less than 20 individuals due to direct destruction and soil moisture alterations associated with the construction of one such farm pond (Gibson *in litt.*). All populations in agricultural sites have been degraded and several have lost individuals from such agricultural practices as outlined above.

Gravel mining poses a threat to this species and its habitat due to the gravel subsurface of many of the bogs. One area containing *Sarracenia rubra* ssp. *alabamensis* is presently an active mining site, and one of the four largest extant populations is imminently threatened by plans for such an operation.

A number of populations were once located near railroad rights-of-way in Elmore and Autauga Counties, Alabama. Herbicide spraying along the rights-of-way contributed to the loss of many of these populations (R. Troup personal communication 1987) and poses a threat to extant populations on rights-of-way.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Like many carnivorous plants, *Sarracenia rubra* ssp. *alabamensis* is vulnerable to over-collection by commercial plant dealers and hobbyists. Taking is a well-documented threat to this species (F. Case personal communication 1987, Folkerts 1976, Gibson *in litt.*, Kral 1983, McDaniel and Troup 1982, Troup personal communication 1987) and has contributed to the destruction of several historical populations and significantly degraded many existing populations. In 1975, a collector ran an advertisement in a local newspaper offering a $20 reward for locational information and additional fees for collecting specimens.

C. *Disease or predation.* Although cattle have been known to feed on pitcher plants (Folkerts 1976), predation is not considered to be a significant threat to this species. *Sarracenia rubra* ssp. *alabamensis* is not known to be threatened by disease.

D. *The inadequacy of existing regulation mechanisms.* A measure of protection is provided for this species due to its inclusion in Appendix I of CITES. Such legislation restricts international trade of wild-collected plants, unless such would specifically contribute to its survival in the wild. There are no other State or Federal laws protecting this species or its habitat. The Act would provide protection (see "Available Conservation Measures" below) and encourage active management for this species.

E. *Other natural or manmade factors affecting its continued existence.* This species occurs in a specialized habitat type which evolved under the influence of periodic fires. Suppression of these naturally occurring fires from this habitat has resulted in succession and eventual elimination of plants through shading and overcrowding. As discussed in the "Background" section, much of this species' habitat has been degraded through succession. The loss of as many as five populations has been attributed to this factor (F. Case personal communciation 1987, McDaniel and Troup 1982, R. Troup personal communication 1987) and many existing populations face a similar fate. Plants in sites which have been without fire for a period are weak and rarely flowering. Conservation of this species will require active site management through prescribed fire and hand-clearing. The water table is believed to have been significantly lowered in this species' general range, thereby reducing the number of seeps which are suitable habitat for this species. In addition, this lowered water table permits the encroachment of competitors in those seeps which support populations (Case personal communication). The relatively recent invasion of Japanese honeysuckle (*Lonicera japonica*) into this species' habitat (Case and Case 1974, Folkerts 1976, Kral 1983) is considered to be a significant threat.

This pitcher plant is vulnerable due to its restricted range and limited amount of suitable habitat. Local extinction through natural causes is possible at those sites supporting few individuals.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the prefered action is to list *Sarracenia rubra* ssp. *alabamensis* as an endangered species. Over 50 percent of the species' populations have been destroyed and remaining populations are imminently threatened, including two of the four remaining sites that support large, vigorous populations. No sites are protected. *Sarracenia rubra* ssp. *alabamensis* is in danger of extinction throughout all or significant portions of its range, and is thus an endangered species as defined by the Act. Critical habitat is not being designated for the reasons discussed below.

### Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for the species at this time. As discussed under Factor B in the "Summary of Factors Affecting the Species," *Sarracenia rubra* ssp. *alabamensis* is threatened by taking. Publication of critical habitat descriptions would make this species even more vulnerable, as violations of the protective regulations are difficult to enforce against. Confidentiality of locations is considered a key factor in its protection. The major landowners have been contacted and informed of the locations and importance of protecting this species and its habitat. Protection of this species' habitat will be addressed through the recovery process and through the section 7 jeopardy standard. Therefore, it would not be prudent to determine critical habitat for this species at this time.

### Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried our for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may adversely affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

All presently known populations of this pitcher plant are on private land. Currently, no activities to be authorized, funded, or carried out by Federal agencies are known that would affect this species.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. In addition, for listed plants the 1988 amendments (Pub. L. 100-478) to the Act prohibit their malicious damage or destruction on Federal lands, and their removal, cutting, digging up, or damaging or destroying in knowing violation of any State law or regulation, including State criminal trespass law. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, P.O. Box 27329, Central Station, Washington, DC 20038-7329 (202/343-4955).

On June 6, 1981, *Sarracenia rubra* ssp. *alabamensis* was included in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The effect of this listing is that both export and import permits are required before international shipment may occur. Such shipment is strictly regulated by CITES member nations to prevent it from being detrimental to the survival of the species, and cannot be allowed if it is for primarily commercial purposes. If plants are certified as artificially propagated, however, international shipment requires only export documents under CITES, and commercial shipments may be allowed.

### National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

# Proposed Rules

Federal Register
Vol. 54, No. 46
Friday, March 10, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### 7 CFR Part 928

[Docket No. FV-89-006]

### Papayas Grown in Hawaii; Proposal to Reapportion Membership on the Papaya Administrative Committee and Establish Public Member Nomination Procedures

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This proposed rule would reapportion the membership on the Papaya Administrative Committee (PAC) to bring grower and handler membership into more appropriate balance. The proposal would reduce the number of grower members representing District 2 from two to one to reflect reduced production in that district. In addition, the proposal would add a public member to the committee and establish eligibility requirements and nomination procedures for that member in order to add public input to committee deliberations. The proposal would also restrict any one grower organization from having more than two members and alternates on the committee in an effort to provide a wider range of viewpoints on the committee. This proposal was unanimously recommended by the PAC established under Marketing Order 928.

**DATE:** Comments must be received by April 10, 1989.

**ADDRESS:** Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

**FOR FURTHER INFORMATION CONTACT:** Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, D.C. 20090-6456; telephone 202-475-3862.

**SUPPLEMENTARY INFORMATION:** This rule is proposed under Marketing Order No. 928 [7 CFR Part 928; 53 FR 863, January 14, 1988], regulating the handling of papayas grown in Hawaii. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601-674], hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulations 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 122 handlers of papayas regulated under this marketing order, and approximately 344 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the papaya handlers and producers in Hawaii may be classified as small entities.

Pursuant to § 928.20 of the order, the PAC currently consists of 13 members. Each member has an alternate. Ten of the members are growers, and three are handlers. Seven grower members represent District 1, two grower members represent District 2, and one grower member represents District 3. Each grower organization is permitted to have up to three members on the committee. The three handler members are nominated from the production area at large.

Section 928.20 also allows the number of grower and handler members and alternate members on the committee and the composition of the committee between growers and handlers to be changed as provided in paragraph (o) of § 928.31. This section also provides that the committee may be increased by one public member and alternate member, to be nominated by the committee and selected by the Secretary. In addition, the committee, with the approval of the Secretary, may prescribe the qualifications of, and the nominating procedure for, the public member and alternate. Paragraph (o) of § 928.31 also authorizes the committee, with the approval of the Secretary, to redefine the districts into which the production area is divided, and reapportion membership on the committee. Any such changes are required to reflect, insofar as practicable, structural changes within the industry and shifts in papaya production within the production area.

Originally, the marketing order provided for a committee on 13 members which were allocated among four districts. In 1985, a rule was put into effect to redesignate the area into three districts [50 FR 1439]. Committee membership was also reapportioned to provide for the current allocation. In 1988, the marketing order was amended to reflect these changes, to authorize and provide for the appointment of a public member and alternate, and to authorize changes to be made in the composition and size of the committee [53 FR 863].

The first proposed change would revise § 928.120 to reallocate three of the seven grower member positions in District 1 as handler positions. This would increase the number of handler positions on the committee from three to six. The six handler members would be nominated from the production area at large. The committee indicated that more marketing expertise is needed in committee deliberations and that the current handler membership is inadequate to meet these needs. The unanimous recommendation indicates that District 1 growers believe that they will be adequately represented with four

VOL
54
ISS
46
MR
10
1989
UMI

members. Furthermore, the six major handlers in the industry are actually six packinghouses which to a considerable extent, represent the interests of various grower groups which utilize the packing facilities.

The second proposed change would amend § 928.120 to reduce from two to one the number of grower members representing District 2 which is comprised of the county of Kauai which consists of the islands of Kauai and Niihau; the county of Maui which consists of the islands of Maui, Molokai, Lanai, and Kahoolawe; and Kalawao County. Total production of papayas in this area in 1988 was 67,500,000 pounds. Production in District 2 has declined from 6.7 million pounds in 1984 to 1.8 million pounds in 1988 as a result of weather and disease problems and the abandonment of substantial papaya plantings on the island of Maui. Production in Districts 1 and 3 has remained relatively stable during this period of time. Further district 2 currently only accounts for approximately 2.7 percent of the total production in this area. Therefore, rather than increase the represenation of Districts 1 and 3, the committee has proposed to reduce the representation of District 2.

The third proposed change which would occur if this proposal is adopted is the addition of a public member and alternate to the committee. This change was recommended by the committee in order to provide valuable consumer input in committee deliberations. The qualifications and nomination procedures for the public member would be prescribed in a new § 928.122.

The public member and alternate member would be nominated by the PAC and should serve a two-year term to coincide with the term of office of the grower and handler members of the committee. To qualify to be nominated, public member and alternate member candidates would be expected to certify that they would be able to devote sufficient time to attend committee activities regularly and to familiarize themselves with the background and economics of the papaya industry. The public member and alternate member would be residents of the production area and not represent any agricultural interest. The public member and alternate would not be allowed to have a financial interest in, or be associated with, the production, processing, financing, or marketing of papayas. These proposed requirements are intended to ensure that a public member from the production area is nominated who would have sufficient time to devote to committee activities, would fairly represent consumer interests, and would not be influenced by any factions within the industry.

The fourth and final proposed change would reduce the number of grower and alternate members any one grower organization is permitted to have on the committee from three to two. This would allow more grower organizations to become involved in committee decision-making and provide a wider range of viewpoints on the committee. Representation from many grower segments is desirable to assure that there will be full discussion on all matters and that all views are expressed before decisions are made.

Based on this proposal, the PAC would consist of six grower members, six handler members, and one public member and their respective alternates. With the reduction of one grower position in District 2, the committee size would remain at 13 members.

This proposed action is intended to provide for additional handler and public input and equitable and balanced representation on the committee. This proposed action would not impose any additional costs on producers or handlers. Furthermore, this action would increase the effectiveness of the committee and benefit growers and handlers.

The additional information collection requirements resulting from the proposed addition of a public member to the committee will be submitted to the Office of Mangement and Budget for approval under the Paperwork Reduction Act of 1980, 44 U.S.C., Chapter 35, upon receipt of the public member questionnaire from the committee.

Based on the above, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

**Lists of Subjects in 7 CFR Part 928**

Marketing agreements and orders, papayas, Hawaii.

For the reasons set forth in the preamble, 7 CFR Part 928 is proposed to be amended as follows:

**PART 928—PAPAYAS GROWN IN HAWAII**

1. The authority citation for 7 CFR Part 928 continues to read follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 928.120 is revised to read as follows:

**§ 928.120 Committee reapportionment.**

The Papaya Administrative Committee shall consist of 13 member and alternate members. Six of the members shall represent growers, and six shall represent handlers. Four grower members and their alternates shall represent District 1, one grower member and alternate shall represent District 2, and one grower member and alternate shall represent District 3. No grower organization shall have more than two members on the committee. The six handler members shall be nominated from the production area at large. One voting public member and alternate shall also be included on the committee. The eligibility requirements and nomination procedures for the public member and alternate are specified in § 928.122.

3. A new § 928.122 is added to read as follows:

**§ 928.122 Public member eligibility requirements and nomination procedures.**

(a) The public member and alternate member shall be nominated by the Papaya Administrative Committee and shall serve a two-year term which coincides with the term of the grower and handler members of the committee.

(b) Public member and alternate member candidates should be able to devote sufficient time to attend committee activities regularly and to familiarize themselves with the background and economics of the payaya industry.

(c) The public member and alternate member shall be residents of the production area.

(d) Public member and alternate member candidates shall not represent an agricultural interest and shall not have a financial interest in, or be associated with, the production, processing, financing, or marketing of papayas.

Dated: March 7, 1989.

**7 CFR Part 946**

**[Docket No. FV–89–027]**

**Washington Potatoes; Expenses and Assessment Rate**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This proposed rule would authorize expenditures and establish an assessment rate under Marketing Order 946 for the 1989–90 fiscal year. Authorization of this budget will allow the State of Washington Potato Committee to incur expenses reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

**DATE:** Comments must be received by March 20, 1989.

**ADDRESS:** Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456. Comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

**FOR FURTHER INFORMATION CONTACT:** Todd A. Delello, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–475–5610.

**SUPPLEMENTARY INFORMATION:**

This rule is proposed under Marketing Agreement No. 113 and Marketing Order No. 946 (7 CFR Part 946) regulating the handling of potatoes grown in the State of Washington. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 50 handlers of Washington potatoes under this marketing order, and approximately 490 Washington potato producers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agriculture service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

The marketing order requires that the assessment rate for a particular fiscal year apply to all assessable potatoes handled from the beginning of such year. An annual budget of expenses is prepared by the committee and submitted to the Department of Agriculture for approval. The members of the committee are handlers and producers of potatoes. They are familiar with the committee's needs and with the costs for goods, services and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing anticipated expenses by expected shipments of potatoes. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses. A recommended budget and rate of assessment is usually acted upon by the committee before the season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approval must be expedited so that the committee will have funds to pay its expenses.

The State of Washington Potato Committee met on February 17, 1989, and unanimously recommended a budget for the 1989–90 fiscal period of $35,000 and an assessment rate of $.004 per hundredweight of potatoes. The proposed budget is $2,000 more than last year's, reflecting increases of $1,000 for salaries, $100 for the committee's financial audit, and $900 for compliance audits. All other budget categories remain the same.

The 1989–90 recommended assessment rate of $.004 per hundredweight of potatoes is the same as the rate of the previous fiscal period. Anticipated fresh market shipments of 7 million hundredweight would yield $28,000 in assessment income. This, along with $7,000 from the reserve, would be adequate to cover budgeted expenses. Reserves are expected to amount to $10,000 at the end of the 1989–90 fiscal period and would be carried over into the next fiscal period.

While this proposed action would impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed onto producers. However, these costs would be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Based on the foregoing, it is found and determined that a comment period of less than 30 days is appropriate because the budget and assessment rate approval for this program needs to be expedited. The committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis.

**List of Subjects in 7 CFR Part 946**

Marketing agreements and orders, potatoes (Washington).

For the reasons set forth in the preamble, it is proposed that § 946.242 be added as follows:

**PART 946—POTATOES GROWN IN STATE OF WASHINGTON**

1. The authority citation for 7 CFR Part 946 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 946.242 is added to read as follows:

**§ 946.242 Expenses and assessment rate.**

Expenses of $35,000 by the State of Washington Potato Committee are authorized, and an assessment rate of $.004 per hundredweight of assessable potatoes is established for the fiscal period ending June 30, 1990. Unexpended funds may be carried over as a reserve.

Dated: March 7, 1989.

**William J. Doyle,**

## Raisins Produced From Grapes Grown in California; Proposed Suspension of a Provision Regarding Desirable Carryout Levels and Establishment of a Formula to Calculate Desirable Carryout Levels Under the California Raisin Marketing Order's Rules and Regulations

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This proposed rule invites comments on suspending, for an indefinite period, an order provision relating to desirable carryout levels for certain varietal types of raisins regulated under the marketing order for raisins produced from grapes grown in California. This rule also invites comments on the establishment of a formula to calculate new desirable carryout levels to become part of the order's administrative rules and regulations. The suspension of the desirable carryout level would allow the Raisin Administrative Committee (Committee), the agency responsible for local administration of the order, to adopt a formula to calculate the desirable carryout levels used in the Committee's annual marketing policy deliberations for all varietal types of raisins.

**DATE:** Comments must be received by April 10, 1989.

**ADDRESS:** Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456. Three copies of the written material shall be submitted, and they will be made available for public inspection in the Office of the Docket Clerk during regular business hours. The comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

**FOR FURTHER INFORMATION CONTACT:** Patricia A. Petrella, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5120.

**SUPPLEMENTARY INFORMATION:**

This proposed rule is issued under Marketing Agreement and Order No. 989 [7 CFR Part 989], both as amended, regulating the handling of raisins produced from grapes grown in California and the provisions of the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act. The agreement and order are effective under the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation No. 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 23 handlers of raisins who are subject to regulation under the raisin marketing order, and approximately 5,000 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California raisins may be classified as small entities.

This action would not have a significant economic impact on small producers or handlers. The suspension of the desirable carryout levels and establishment of a formula to calculate new desirable carryout levels should allow greater flexibility in marketing consistent with recent market trends. Also, when the desirable carryout levels are increased, the free tonnage percentage would correspondingly increase, allowing more raisins to be available for immediate sale. Producers are usually paid at the time of delivery to handlers for the free tonnage portion of the crop. The reserve portion of the crop must be held by handlers for the account of the Committee to be sold in specified outlets throughout the crop year. Payments to equity holders (producers) from reserve sales are made periodically throughout the crop year. Therefore, an increase in the desirable carryout levels would provide returns to producers earlier in the season on more free tonnage raisins.

This proposed rule invites comments on the suspension of the desirable carryout levels specified in § 989.54(a) of the order and the establishment of a formula to calculate new desirable carryout levels as part of the order's administrative rules and regulations. These actions were unanimously recommended by the Committee at its December 7, 1988, meeting.

Section 989.54(a) of the order currently specifies the desirable carryout levels for certain varietal types of raisins. The desirable carryout level is the amount of tonnage from the prior crop year that is considered necessary for the industry to have available during the first part of each crop year to meet market needs, while waiting for the next crop to be harvested. Under current order provisions, the desirable carryout level for Natural (sun-dried) Seedless raisins is 60,000 tons. In 1984, the order was amended to increase the desirable carryout level by 5,000 tons each crop year from 45,000 tons, until it reached 60,000 tons (49 FR 48194, December 11, 1984). The Committee reached the 60,000 ton ceiling last season. The desirable carryout levels for Dipped Seedless and Oleate and Related Seedless raisins are also specified in § 989.54(a), at 1,500 tons.

The Committee has determined that the current desirable carryout levels for Natural (sun-dried) Seedless and Dipped Seedless raisins specified in the order are too low and that higher levels would be more appropriate because they would allow handlers to have adequate inventory to meet shipment needs during the early months of the crop year. The Committee has also determined that the desirable carryout level for the Oleate and Related Seedless varietal type is too high and the specified tonnage in § 989.54(a) should be suspended regarding this varietal type since the specified tonnage no longer reflects the actual tonnage needed during the beginning of the season. Thus, the Committee has recommended that the two sentences in § 989.54(a) relating to desirable carryout levels for these varietal types of raisins be suspended indefinitely.

In addition, the Committee recommended that a formula to calculate desirable carryout levels be established in the order's rules and regulations. The Committee has recommended that total shipments for these raisin varietal types from August, September, and October (the first three months of the crop year) of the prior crop year be used to establish the desirable carryout levels each season. If prior shipments in a particular crop year are limited due to adverse crop conditions, the Committee may select the shipments during the August through October period of one of the three years preceding the prior crop year. The Committee has indicated that this formula method would be an appropriate procedure for determining desirable carryout levels, since it would better reflect changes in each season's marketing conditions.

The Committee has indicated that shipment levels during the beginning of the crop year (the three-month period of August, September, and October) have increased from 57,266 tons in 1982 to 95,323 tons in 1988 for Natural (sun-dried) Seedless raisins. The Natural (sun-dried) Seedless raisin variety comprises about 90 percent of the industry's annual raisin crop. If the new formula were in effect for the current season, the desirable carryout level would be increased by 35,323 tons for Natural (sun-dried) Seedless raisins, to 95,323 tons. The proposed formula would also be likely to result in an increase in carryout levels for the Dipped Seedless varietal type because shipments of this varietal type during the first three months of the crop year have increased in recent years. Shipments of the Natural (sun-dried) Seedless variety during the first three months of the crop year totaled 63,410 tons in 1986; 67,668 tons in 1987; and 95,323 tons in 1988.

Shipment levels of the Oleate and Related Seedless varietal type, on the other hand, have been below the 1,500 ton level specified in the order. Shipments of this variety during the first three months of the crop year totaled 840 tons in 1986; 922 tons in 1987; and 114 tons in 1988. Therefore, the proposed formula to calculate the desirable carryout levels for this varietal type would result in a desirable carryout figure that would more closely reflect the shipments during the August through October period.

The Committee also intends to use this formula to calculate desirable carryout levels for all varietal types listed under § 989.110 of the rules and regulations. The desirable carryout levels of the varietal types that are not currently specified under § 989.54(a) (Golden Seedless, Muscats, Sultanas, Zante Currants, Monukka, and Other Seedless raisins) are determined by the Committee each crop year based on the marketing conditions from the prior year and anticipated marketing conditions for the upcoming year. The Committee has determined that the formula method would be more appropriate in determining the desirable carryout levels for these varietal types.

Based on the above, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

**List of Subjects in 7 CFR Part 989**

California, Grapes, Marketing agreements and orders, Raisins.

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 989 be amended as follows:

### PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 989 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674.

2. Section 989.54 is amended in paragraph (a) to read as follows:

**§ 989.54 Marketing policy.**

In § 989.54(a) the sentences, "The desirable carryout shall be increased from 45,000 to 60,000 tons for Natural (sun-dried) Seedless raisins at a rate of 5,000 tons per year for the three crop years following the effective date of this amended subpart. The desirable carryout for Dipped Seedless raisins shall be 1,500 tons, and for Oleate and Related Seedless raisins 1,500 tons.", are suspended indefinitely.

### Subpart—Administrative Rules and Regulations

3. A new § 989.154 is added to read as follows:

**§ 989.154 Desirable carryout levels.**

The desirable carryout levels to be used in computing and announcing a crop year's marketing policy shall be equal to the shipments of free tonnage to all outlets for each varietal type during the period August through October of the prior crop year, converted to a natural condition basis: *Provided*, That if the prior year's shipments were limited because of crop conditions, the Committee may select the shipments during the August through October period of one of the three years preceding the prior crop year.

Dated: March 7, 1989.

**J. Patrick Boyle,**

*Administrator.*

## Milk in the Eastern Colorado Marketing Area; Notice of Proposed Suspension of Certain Provisions of the Order

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed suspension of rule.

**SUMMARY:** This notice invites written comments on a proposal to suspend for the months of March through August 1989 provisions of the Eastern Colorado Federal milk order. Provisions proposed to be suspended relate to the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. Suspension of the provisions was requested by a cooperative association representing producers supplying the market in order to prevent uneconomic movements of milk.

**DATE:** Comments are due on or before March 17, 1989.

**ADDRESS:** Comments (two copies) should be filed with the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456.

**FOR FURTHER INFORMATION CONTACT:** Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–7183.

**SUPPLEMENTARY INFORMATION:** The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This proposed rule has been reviewed under Executive Order 12291 and Department Regulation 1512–1 and has been determined to be a "non-major" rule under the criteria contained therein.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the suspension of the following provisions

VOL 54 ISS 46 MR 10 1989 UMI

of the order regulating the handling of milk in the Eastern Colorado marketing area is begin considered for the months of March through August 1989:

In the second sentence of § 1137.12(a)(1), the words "30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of" and "distributing".

All persons who want to send written data, views or arguments about the proposed suspension should send two copies of them to the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include March 1989 in the suspension period.

The comments that are sent will be made available for public inspection in the Dairy Division office during normal business hours (7 CFR 1.27(b)).

**Statement of Consideration**

Mid-America Dairymen, Inc. (Mid-Am), an association of producers that supplies some of the market's fluid milk needs and handles some of the market's reserve milk supplies, rquested the suspension. The suspension would relax for the months of March through August 1989 the limit on the amount of producer milk that a cooperative association may divert from pool plants to nonpool plants.

The order provides that a cooperative may divert a quantity of milk not in excess of 30 percent of the cooperative association's member milk received at pool distributing plants during the months of March, April, May, June, July and December, and up to 20 percent in other months. Suspension of the requested language would allow up to 80 percent of a cooperative's member milk supply to be diverted to nonpool plants and remain eligible to share in the marketwide pool.

Mid-Am states that the volume of producer milk pooled on the Eastern Colorado order in 1988 was 5.8 percent higher than in 1987, while producer milk used in Class I rose only 1.9 percent over the same period. As a result, according to Mid-Am, there are ample supplies of locally produced milk to meet the fluid requirements of Eastern Colorado distributing plants.

Mid-Am states that member producer milk produced in Kansas and Nebraska would have to be shipped to Eastern Colorado pool distributing plants each month in order to qualify Mid-Am producers historically associated with the Eastern Colorado market for continued pool status. Such movements, according to Mid-Am, would require uneconomic and inefficient hauling of producer milk. Without the requested suspension, the cooperative expects to incur substantial unnecessary costs for the movement of its milk solely for the purpose of pooling the milk of its members currently associated with the Eastern Colorado market.

**List of Subjects in 7 CFR Part 1137**

Milk marketing orders, Milk, Dairy products.

The authority citation for 7 CFR Part 1137 continues to read as follows:

Authority: (Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Signed at Washington, DC, on: March 7, 1989.

J. Patrick Boyle,

**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**14 CFR Parts 21 and 23**

**[Docket No. 064CE, Notice No. SC-23-ACE-48]**

**Special Conditions; Caproni Model C22J Series Airplane**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed special conditions.

**SUMMARY:** This notice proposes special conditions for the Caproni Vizzola Costruzioni Aeronautiche, S.p.A. Model C22J Series Airplane. The Caproni Model C22J airplane will have novel or unusual design features when compared to the state of technology envisaged in the airworthiness standards for normal, utility, acrobatic, and commuter category airplanes. These novel and unusual design features include the use of advanced composite materials, pressurized fuel tanks, and electronic engine control system protection from lightning and high energy radio frequency, for which the regulations do not contain adequate or appropriate airworthiness standards. This notice contains the additional safety standards which the Administrator considers necessary to establish a level of safety equivalent to that provided by the current airworthiness standards.

**DATE:** Comments must be received on or before July 10, 1989.

**ADDRESS:** Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, ACE-7, Attention: Rules Docket Clerk, Docket No. 064CE, Room No. 1558, 601 East 12th Street, Kansas City, Missouri 64106. All comments must be marked: Docket No. 064CE. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

**FOR FURTHER INFORMATION CONTACT:** Ervin Dvorak, Aerospace Engineer, Standards Office (ACE-110), Small Airplane Directorate, Aircraft Certification Service, Central Region, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; telephone (816) 426-5688.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested persons are invited to participate in the making of these special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking further rulemaking action on this proposal. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 064CE. The postcard will be date stamped and returned to the commenter. The proposals contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested parties. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Type Certification Basis**

The type certification basis for the Caproni Model C22J airplane is as follows: Part 21 of the Federal Aviation Regulations (FAR), § 21.29; Part 23 of the FAR, effective February 1, 1965, including amendments 23-1 through 23-33; Part 36 of the FAR, effective December 1, 1969, as amended by amendments 36-1 through the amendment effective on the date of type certification; SFAR 27 effective February 1, 1974, as amended by amendments 27-2 through 27-5; exemptions, if any; and the special conditions that may result from this proposal.

**Background**

On July 8, 1983, Caproni Vizzola Costruzioni Aeronautiche, S.p.A. Vizzola Ticino (Varese), Italy, filed an application to the FAA Brussel's Office for U.S. type certification for its Model C22J airplane. They made a new application for U.S. type certificate on October 29, 1986. The Caproni Model C22J airplane is a small, two-place, twin-engine jet airplane with a maximum takeoff weight (with tip tanks) of 2,767 pounds. Two Microturbo TRS-18 turbojet engines are installed side-by-side in the fuselage aft of the cockpit. The airplane is fully aerobatic and has a maximum operating altitude of 25,000 feet.

**Discussion**

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane. Special conditions, as appropriate, are issued in accordance with § 11.49, after public notice as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis, as provided by § 21.17(a)(2).

The proposed type design of the Caproni Model C22J airplane contains a number of novel or unusual design features not envisaged by the applicable Part 23 airworthiness standards. Special conditions are considered necessary because the airworthiness standards of Part 23 do not contain adequate or appropriate safety standards for the novel or unusual design features of the Model C22J airplane.

**Landing Gear**

The Model C22J airplane landing gear and forward fuselage are made of composite material. This material and its assembly is completely different from the typical material in landing gear and airframe structure that have been predominant since the early 1940's. Composite materials of the type used on the Model C22J airplane are generally not susceptible to initiation of fatigue cracks by the application of repetitive loads, but are susceptible to damage in the form of cracks, breaks, and delaminations from intrinsic and discrete sources growing under application of repetitive loads. Because of this and other factors, the FAA has determined that the fatigue requirements of Part 23 are inadequate to assure that composite material structure can withstand the repeated loads of variable magnitude expected in service.

The use of composite materials and extensive bonding of these materials in landing gear and airframe structure is a novel and unusual design feature with respect to the type of airplane construction envisaged by the existing airworthiness standards of Part 23. Because the requirements of Part 23 do not require the level of substantiation necessary for composite material structure, a special condition is proposed to include the necessary airworthiness standards as a part of the type certification basis for the Model C22J airplane. This special condition is proposed to ensure that a level of safety exists for airplanes made from bonded composite materials equivalent to those existing Part 23 airplanes.

The proposed special conditions will require composite structural components critical to safe flight be evaluated by damage tolerance criteria. When damage tolerance is shown to be impractical, the proposed special conditions are worded to permit approval, based on safe-life testing. The damage tolerance consideration includes principle structural elements, such as the forward fuselage, since failure of this structure could have catastrophic results. Metal detail designs may continue to be evaluated to the fatigue requirements of § 23.572.

Damage tolerance criteria for composite structure, in combination with the existing material requirements of Part 23, such as §§ 23.603 and 23.613, will provide a level of safety for the composite material airframe structure used in the Model C22J airplane equivalent to that required by the airworthiness standards of Part 23.

The lack of adequate service experience with composite material structures in airplanes type certificated to the airworthiness standards of Part 23, the unusual mechanical properties characteristics, and the experience with composite material structural bonding, to date, necessitate proposing special conditions to assure an appropriate level of safety for the Model C22J landing gear structure. These proposed special conditions are intended to require: (1) Accounting for environmental effects, i.e., temperature and humidity on material mechanical properties in all structural substantiation analyses and tests; (2) limit load residual strength with impact damage from discrete sources; (3) ability to carry ultimate load with realistic intrinsic and discrete impact damage at the threshold of detectability; and (4) design features to prevent disbonds greater than the disbonds for which limit load capability has been shown. Proof testing of each production component to limit load and reliance on manufacturing quality control procedures between limit and ultimate load may be used in lieu of design features provided each bonded joint is subjected to its critical design limit load during the proof testing. Acceptable non-destructive testing techniques do not yet exist in state-of-the-art composite technology to reliably identify weak bonds. However, proof testing of each production article may be discontinued if such tests are developed and accepted by the FAA.

Because the composite material and bonding may require preventive maintenance and inspection procedures different from those commonly utilized for existing landing gear structure, the proposed special conditions require that instructions for continued airworthiness be established in addition to those required by § 23.1529.

**Lightning Protection**

The regulations incorporated by reference include standards for protection from damage to the structure of the airplane by lightning (§ 23.867) and from ignition of fuel vapor (§ 23.954). These standards do not provide the level of safety for the electronic system that is inherently provided by traditional designs which utilize mechanical means to connect the engine to the flight deck. Electronic systems need additional protection when installed in composite airframe structure, which provides less shielding. For airplanes employing the use of composite materials, the lightning produced voltages and currents could increase substantially and additional protecting design features should be installed.

The Model C22J airplane with the Microturbo TRS-18 turbojet engines is being designed with the propulsion systems using only electrical interfaces for critical functions such as crew inputs to engines. These systems can be susceptible to disruption to both the command/response signals and the operational mode as a result of direct lightning strike attachment or electrical and magnetic interference. To ensure that a level of safety is achieved equivalent to that of existing aircraft, a special condition is being proposed which requires that these components be designed and installed to preclude component damage and interruption of function due to both direct and indirect effects of lightning.

VOL 54 ISS 46 MR 10 1989 UMI

**Protection From Unwanted Effect of High Energy Radio Frequency (RF) Fields**

Airplane designs which utilize metal skins and mechanical command and control means have traditionally been less susceptible to the effects of RF energy from ground-based transmitters. There is a trend toward increased use of composite structures that do not provide the RF shielding normally provided by metal skins and electrical and electronic command systems to perform critical airplane functions such as engine control. Therefore, the effective measures against the effects of high energy radio frequency fields must be provided for by the design and installation of these systems. The primary factors that have contributed to this increased concern are: (1) The increasing use of sensitive electronics that perform critical and essential functions; (2) the reduced electromagnetic shielding afforded airplane systems by advanced technology airframe materials; (3) the adverse service experience of military airplanes which use these technologies; and (4) the number and power of radio frequency emitters increases and expected future increases.

In showing compliance with the regulations for protection against hazards caused by the exposure to high energy radio frequency fields, electrical and electronics systems which perform critical and essential functions must be considered. The hazards addressed include those which would result in a catastrophic failure condition to the airplane. Failures that would be a hazard to the airplane, but not catastrophic, are considered under § 23.1309. To prevent this occurrence, airplane systems which perform critical functions must be designed and installed to ensure that the operation and operational capabilities of these critical functions are not adversely affected when the airplane is exposed to high energy radio fields. Airplane systems which perform essential functions must be protected to ensure that essential functions can be recovered after the airplane has been exposed to the high energy radio frequency fields. Manual mode reversion is considered an acceptable method of retaining the essential functions. Reliance on redundancy as a means of protection against the effects of external RF fields is generally insufficient since all elements of a redundant system are likely to be exposed to the fields concurrently.

No universally accepted guidance to define the maximum energy level in which civilian airplane system installations must be capable of operating safely has been established. At this time, the FAA and other airworthiness authorities are working to establish an agreed level of RF energy level representative of that to which the airplane will be exposed in service. These special conditions require that the airplane be evaluated under an interim standard for the protection of the electronic system and its associated wiring harness.

**Electronic Engine Control System**

The applicable airworthiness requirements for the engine installation do not contain adequate standards by which to determine an acceptable level of safety for an electronic engine control system installed on a Part 23 airplane. Therefore, special conditions are required to establish that the overall electronic engine control system exhibits an acceptable level of system integrity and reliability equivalent to a hydromechanical system meeting current airworthiness standards.

**Pressurized Fuel Tanks**

The applicable airworthiness requirements for the pressurized fuel tanks installations do not contain adequate standards by which to determine an acceptable level of safety on a Part 23 airplane. Therefore, special conditions are required which are based on § 25.965(d) pressurized fuel tanks requirements.

**Federalism Implications**

The regulations proposed herein would not have substantiated direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

**Conclusion**

In view of the design features discussed above, the following special conditions are proposed under the provisions of § 21.16 to provide a level of safety equivalent to that intended by the regulations incorporated by reference. This action is not a rule of general applicability and affects only the model/series of airplane identified in these special conditions.

**List of Subjects in 14 CFR Parts 21 and 23**

Aircraft, Air transportation, Aviation safety, Safety.

The authority citation for these special conditions is as follows:

**Authority:** Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 21.16 and 21.17; and 14 CFR 11.28 and 11.49.

**The Proposed Special Conditions**

Accordingly, the Federal Aviation Administration proposes the following special conditions as a part of the type certification basis for the Caproni Model C22J airplanes:

*1. Evaluation of Composite Structures (Forward Fuselage and Landing Gear)*

In lieu of complying with § 23.572, and in addition to the requirements of §§ 23.603, 23.613, and 23.723, the landing gear and forward fuselage composite structure must be evaluated to damage tolerance criteria prescribed in paragraphs (a) through (h) of this special condition, unless shown to be impractical. In cases shown to be impractical, the aforementioned structure must be evaluated in accordance with criteria of paragraphs (a) and (i) of this special condition. Where bonded joints are used, the structure must also be evaluated in accordance with the residual strength criteria in paragraph (g) of this special condition.

(a) It must be demonstrated by tests, or by analysis supported by tests, that the structure is capable of carrying ultimate load with impact damage. The level of impact damage considered need not be more than the established threshold of detectability considering the inspection Procedures employed.

(b) The growth rate of damage that may occur from fatigue, corrosion, intrinsic effects, manufacturing defects; e.g., bond defects, or damage from discrete sources under repeated loads expected in service; i.e., between the time at which damage becomes initially detectable and the time at which the extent of damage reaches the value selected by the applicant for residual strength demonstration, must be established by tests or by analysis supported by tests.

(c) The damage growth, between initial detectability and the value selected for residual strength demonstrations, factored to obtain inspection intervals, must permit development of an inspection program suitable for application by operation and maintenance personnel.

(d) Instructions for continued airworthiness for the structure must be established consistent with the results of the damage tolerance evaluations. Inspection intervals must be set so that after the damage initially becomes detectable by the inspection method specified, the damage will be detected before it exceeds the extent of damage for which residual strength is demonstrated.

(e) Loads spectra, load truncation, and the locations and types of damage considered in the damage tolerance evaluations must be documented in test proposals.

(f) The structure must be shown by residual strength tests, or analysis supported by residual strength tests, to be able to withstand critical limit flight and landing loads considered as ultimate loads, with the extent of damage consistent with the results of the damage tolerance evaluations.

(g) In lieu of a non-destructive inspection technique which assures ultimate strength of each bonded joint, the limit load capacity of each bonded joint critical to safe flight must be substantiated by either of the following methods used singly or in combination:

(1) The maximum disbonds of each bonded joint consistent with the capability to withstand the loads in paragraph (f) of this special condition must be determined by analysis, tests, or both. Disbonds of each bonded joint greater than this must be prevented by design features.

(2) Proof testing must be conducted on each production article which will apply the critical bonded joint.

(h) The effects of material variability and environmental conditions must be accounted for in the damage tolerance evaluations and in the residual strength tests; e.g., exposure to temperature, humidity, erosion, ultraviolet radiation, and/or chemicals, on the strength and durability properties of the composite materials must be accounted for in the damage tolerance evaluations and in the residual strength tests.

(i) For those structures where damage tolerance method is shown to be impractical, the strength of such landing gear must be demonstrated by tests, or analysis supported by tests, to be able to withstand the repeated loads of variable magnitude expected in service. Impact damage in composite material components which may occur must be considered in the demonstration. The impact damage level considered must be consistent with detectability by the inspection procedures employed.

*2. Protection of Systems from Lightning and High Energy Radio Frequency (RF) Fields*

(a) Each system which performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these critical functions are not adversely affected when the airplane is exposed to: (1) lightning and (2) high energy radio frequency fields external to the airplane.

(b) Each essential function of the system must be protected to ensure that the essential function can be recovered after the airplane has been exposed to: (1) lightning and (2) high energy radio frequency fields external to the airplane.

(c) For the purposes of the above, the following definitions apply:

(1) Critical Functions. Functions whose failure would contribute to or cause a failure condition which would prevent the continued safe flight and landing of the airplane.

(2) Essential Functions. Functions whose failure would contribute to or would cause a hazardous failure condition which would significantly impact the safety of the airplane or the ability of the flight crew to cope with adverse operating conditions.

*3. Electronic Engine Controls*

In addition to the requirements of §§ 23.901(b) and 23.903(c), the components of the electronic engine control system for each engine, both airframe and engine furnished, that affect thrust in either the forward or reverse direction and are required for continued safe operation, must have the level of integrity and reliability of a hydromechanical system meeting current airworthiness standards.

*4. Pressurized Fuel Tanks*

In addition to the requirements of § 23.965, it must be shown by analysis or tests that the pressurized fuel tanks can withstand the maximum pressure likely to occur on the ground or in flight.

Issued in Kansas City, Missouri, on February 22, 1989.

**Barry D. Clements,**

*Manager, Small Airplane Directorate, Aircraft Certification Service.*

**14 CFR Parts 21 and 25**

**[Docket No. NM-36, Notice No. SC-89-1-NM]**

**Special Conditions: Airbus Industrie Model A320 Series Airplane**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed special conditions.

**SUMMARY:** This notice proposes a special condition for the Airbus Industrie Model A320 series airplane. This airplane will have non-traditional computerized Airplane Flight Manual (AFM) performance presentation features when compared to the manner in which AFM performance is now presented in chart form in compliance with the transport category airplane airworthiness standards of the Federal Aviation Regulations (FAR). This notice contains the additional standards which the Administrator considers necessary to establish a level of AFM preparation and usage equivalent to that established by the FAR.

**DATE:** Comments must be received on or before April 10, 1989.

**ADDRESSES:** Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, Attention: Rules Docket (ANM-7), Docket No. NM-36, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; or delivered in duplicate to the Office of the Assistant Chief Counsel at the above address. Comments must be marked: Docket No. NM-36. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

**FOR FURTHER INFORMATION CONTACT:** Bill Boxwell, Flight Test and Systems Branch, ANM-111, Transport Airplane Directorate, Aircraft Certification Service, FAA, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; telephone (206) 431-2111.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested persons are invited to participate in the making of this special condition by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before further rulemaking action on this proposal is taken. The proposal contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested parties. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. NM-36." The postcard will be date/time stamped and returned to the commenter.

**Background**

On December 15, 1988, the FAA issued Type Certificate A28NM to Airbus Industrie, I Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France, for type certification of their Model A320-111 and Model A320-211 series airplanes. Subsequently, Airbus requested a change to the A320 type design to include non-traditional computerized Airplane Flight Manual (AFM) performance presentation features.

The Model A320 series airplane is a short to medium-range, twinturbofan, transport category airplane with a seating capacity of 120 to 179 passengers, a maximum takeoff weight

VOL 54 ISS 46 MR 10 1989 UMI

of 158,730 pounds, and a maximum operating altitude of 39,000 feet.

The manufacturer proposes to eliminate the traditional AFM takeoff performance charts and replace them with reference to a computer program, or programs, and corresponding data files which would yield the same information. The computer program proposal is ground-based and not related to onboard processing or uplinking. If the proposal is adopted, existing relevant regulations, e.g., § 25.1587(b) of the FAR, would not provide adequate standards, since the required takeoff performance information would not be in a directly usable form in the AFM itself.

Under the provisions of § 21.101 of the FAR, Airbus Industrie must show that the Model A320, as modified to incorporate the computer program, continues to meet the applicable provisions of the regulations incorporated by reference in Type Certificate A28NM, or the applicable regulations in effect on the date of application for the change. The regulations incorporated by reference in the type certificate are commonly referred to as the "original type certification basis." The certification basis for the A320 consists of Part 25 of the FAR, as amended by Amendments 25–1 through 25–58, and Special Conditions 25–ANM–23.

If the Administrator finds that the applicable airworthiness regulations (i.e., Part 25 as amended) do not contain adequate or appropriate standards for the Model A320 because of a novel or unusual AFM feature, special conditions are prescribed under the provisions of § 21.16 to establish a level of AFM preparation and usage equivalent to that established in the regulations.

Special conditions, as appropriate, are issued in accordance with § 11.49 of the FAR after public notice, as required by §§ 11.28 and 11.29(b), and become part of the type certification basis in accordance with § 21.17(a)(2).

**Novel or Unusual AFM Presentation Features**

The Model A320 series airplane will incorporate the following novel or unusual AFM features:

Even though operators of large transport category airplanes have used performance analyses programs to determine regulatory compliant performance, the approved AFM charts have been available to represent the official minimum certified performance level of the airplane, as required by regulation. The current process includes engineering review and approval of the charts themselves as part of the type certification process. The availability of the charts to airplane operators and FAA operations personnel for establishing the acceptability of alternate ground-based computer performance analyses has apparently been a satisfactory means of providing information concerning the minimum performance level of the airplane.

Airbus Industrie proposes elimination of the takeoff performance charts within the AFM, and instead proposes to show compliance with the intent of the applicable requirements of Part 25 concerning the AFM by cross-referencing (in the AFM) to equivalent results via certified performance computer programs and data files. Airbus Industrie states that, in fact, the results would be the exact digital images of the otherwise-provided AFM chart. The operators could generate equivalent "AFM charts" with appropriate interpolation/reading programs, in addition to running analysis or gross weight optimization programs.

Airbus Industrie intends at this time to still provide traditional enroute climb (driftdown) and landing performance charts in the AFM.

**Discussion**

In current operational practice, neither flightcrews nor dispatchers use the AFM on a day-to-day basis for determining limiting takeoff weights, field lengths, and speeds. Airline operations departments routinely reformat AFM source data into more usable schemes for specific airports, runways, etc. AFM charts are reviewed for accuracy and completeness, as part of the normal type certification process, prior to TC issuance. These data form the master source of performance data which are used by all parties to validate other data presentations. Federal Aviation Administration AFM master book libraries have been available to the public and other government agencies, such as NTSB and airport operators; therefore, the equivalent of current operational practice must continue if charts are to be removed from the A320 AFM.

Applicants who plan to implement computer programs and data files as a replacement for the performance charts in the AFM are expected to obtain approval from the FAA using the following process:

a. All initial-release, individual takeoff performance entities (for a particular airplane/engine combination) must be produced for the FAA in hard copy chart form (or table if appropriate) and included in a report. The report must be FAA approved prior to or concurrent with the AFM initial release in question, and will be filed as part of the FAA AFM master book for the public record. Tabular presentations should be limited to simple relationships, and graphical presentations should be used when relationships, trends, or important variations in parameters need to be visualized. Subsequent performance changes (e.g. same engine, but new rating) need not be produced in chart form, but the FAA certification office must have the capability to read and list the computerized performance modules referenced as AFM performance.

b. The report with hard-copy performance must have organization and identifiers to clearly relate specific charts to the performance determination process.

c. The report should present performance data with the same completeness, clarity, and legibility as typical AFM charts.

d. The applicant is responsible for ensuring that the FAA certification office is provided with the equipment specification to use the computer files and any required initial instruction on use of these files.

e. The applicant's total performance presentation to the air carrier must be such to allow that carrier to comply with §§ 91.183(a)(5) and 121.141.

*Conclusion:* This action affects only certain novel or unusual AFM features on one model series of airplanes. It is not a rule of general applicability, and it affects only the manufacturer who applied to the FAA for approval of these features on the airplane.

**List of Subjects in 14 CFR Parts 21 and 25**

Air transportation, Aircraft, Aviation safety, Safety.

**The Proposed Special Conditions**

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for the Airbus Industrie Model A320 series airplane.

**PARTS 21 and 25—[AMENDED]**

1. The authority citation for these special conditions is as follows:

**Authority:** 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2); 42 U.S.C. 1857f–10, 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) (Rev. Pub. L. 97–449, January 12, 1983).

2. Replacement of Airplane Flight Manual Takeoff Performance Charts with Reference to Equivalent Computer Programs and Data Files. In lieu of the AFM performance charts provided to comply with § 25.1587(b) of the FAR, the following special conditions apply:

a. The system must provide performance information, complying with the applicable requirements of Part 25 of the FAR concerning AFM regulations.

b. Interpolation, reading intervals, or round-off conditions must not result in any more significant variation than for current chart reading.

c. Two-way performance interrogation (ability to switch independent and dependent variables) must be provided as appropriate.

d. All notes and associated conditions must be consistently applied in performance calculations and clearly labeled on data file/analysis printouts.

e. Approved data must be clearly marked and segregated from unapproved (e.g., advisory) data.

f. Improper extrapolations or solutions outside of certified performance bounds must be precluded.

g. Program performance output must be compatible with Configuration Deviation List (CDL) or Master Minimum Equipment List (MMEL) applications.

h. Suitable program usage documentation must be available to all users, including FAA certification and operations personnel.

i. Special performance charts such as thrust setting, stall speeds, stabilizer trim setting, and position error corrections must not be included in the computer-for-chart replacement process.

j. The program must be protected from inadvertent alteration, or deliberate alteration outside of an FAA-approved revision process.

k. All computerized performance software programs must be properly identified by a reference number which must be revised for each change in the data.

l. The program documentation must also identify the computer operating system for which the software is intended.

Issued in Seattle, Washington, on February 27, 1989.

**Steven B. Wallace,**

*Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.*

[FR Doc. 5546 Filed 3-9-89; 8:45 am]

BILLING CODE 4910-13-M

**14 CFR Part 39**

**[Docket No. 89–ANE–04]**

**Airworthiness Directives: GQ Parachutes Ltd, Type 350 Parachute Assemblies (P/Ns MRI GQ 1277, MRI GQ 1304 and MRI GQ 1325), 850 Parachute Assemblies (P/Ns MRI GQ 1284, MRI GQ 1315 and MRI GQ 1330) and 4.8m SAC Parachutes (P/Ns MRI GQ 1308 and MRI GQ D 22918/2)**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This notice proposes to adopt an airworthiness directive (AD) that would require inspection, cleaning and strength testing as required of each net mesh panel on certain GQ parachute assemblies. The proposed AD is needed to detect the presence and removal if necessary, of acid contamination in the canopy mesh panels. The presence acid could result in weakening of the canopy fabric and subsequent failure of the canopy during use.

**DATE:** Comments must be received on or before April 4, 1989.

**ADDRESSES:** Comments on the proposal may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–ANE–04, 12 New England Executive Park, Burlington, Massachusetts 01803; or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: Docket No. 89–ANE–04.

Comments may be inspected at the New England Region, Office of the Assistant Chief Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

The applicable service bulletin may be obtained from GQ Parachutes Ltd, Portugal Road, Woking, Surrey, GU21 5JE England.

A copy of the service bulletin is contained in Rules Docket No. 89–ANE–04, at the Federal Aviation Administration, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, Massachusetts 01803.

**FOR FURTHER INFORMATION CONTACT:** Terry Fahr, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7103.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket at the address given above, for examination by interested persons. A report summarizing each FAA-public contract, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 89–ANE–04." The postcard will be date/time stamped and returned to the commenter.

The FAA has determined that certain GQ Parachutes Ltd parachutes may contain mesh panels that have been improperly treated with a chemical finish, which could result in weakening of the adjacent canopy material and subsequent failure of the parachute during operation. Since this condition is likely to exist or develop on other GQ Parachutes Ltd parachutes of the same type design, the proposed AD would require inspection, cleaning and strength testing as required of each net mesh panel in GQ Parachutes Ltd Type 350 Parachute Assemblies (P/Ns MRI GQ 1277, MRI GQ 1304 and MRI GQ 1325), 850 Parachute Assemblies (P/Ns MRI GQ 1284, MRI GQ 1315 and MRI GQ 1330) and 4.8m SAC Parachutes (P/Ns MRI GQ 1308 and MRI GQ D 22918/2) in accordance with GQ Parachutes Ltd Service Bulletin No. 25–01, dated January 18, 1989.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the

VOL 54 ISS 46 MR 10 1989 UMI

various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

**Conclusion**

The FAA has determined that this proposed regulation involves approximately 50 parachute assemblies, with the inspection, cleaning and testing to be done by GQ Parachutes Ltd. at no cost to the owner. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 39**

Aviation safety, Incorporation by reference.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me by the Administrator, the FAA proposes to amend Part 39 of the Federal Aviation Regulations (FAR) as follows:

**PART 39—[AMENDED]**

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding to § 39.13 the following new AD:

**GQ Parachutes Ltd:** Applies to Type 350 Parachute Assemblies (P/Ns MRI GQ 1277, MRI GQ 1304 and MRI GQ 1325), 850 Parachute Assemblies (MRI GQ 1294, MRI GQ 1314 and MRI GQ 1330) and 4.8m SAC Parachutes (P/Ns MRI GQ 1308 and MRI GQ D 22918/2).

Compliance is required as indicated unless already accomplished.

To prevent the use of FAA approved canopies which may contain understrength material, accomplish the following prior to next use after the effective date of this AD:

(a) Perform an acid test on each net mesh panel, in accordance with page 11 of GQ Parachutes Ltd Service Bulletin (SB) No. 25-01, dated January 18, 1989. Those canopies found to be free of acid contamination may be approved for return to service.

(b) For those canopies found to have acid contamination, perform the acid neutralization, pH test and tensile test, in accordance with pages 5 and 6 of GQ Parachutes Ltd, (SB) No. 25-01, dated January 18, 1989. Those canopies having a pH value greater than 5.5 and a minimum tensile strength of 180 N/25mm (40.5 lbs/in.) may be approved for return to service. For those canopies found to have a pH value of 5.5 or less and/or a tensile strength less than 180 N/25mm (40.5 lbs/in.), remove or obliterate the TSO-C23c marking.

(c) In lieu of compliance with paragraphs (a) and (b) above, the TSO-C23c markings may be removed or obliterated and the parachute must not be used as an approved parachute.

(d) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, the Manager, Boston Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, may adjust the compliance times specified in this AD or approve an equivalent means of compliance with this AD.

The FAA will request the approval of the Federal Register to incorporate by reference the manufacturer's service bulletin identified and described in this document.

Issued in Burlington, Massachusetts, on February 13, 1989.

**Jack A. Sain,**

**14 CFR Part 71**

**[Airspace Docket No. 89-ASO-2]**

**Proposed Amendment to Control Zones, Huntsville, AL; Savannah, GA; Lexington, KY; and Knoxville, TN**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to amend the effective hours of the Huntsville, AL; Savannah, GA; Lexington, KY; and Knoxville, TN, control zones from full-time to part-time. The National Weather Service (NWS) is reducing operating hours at each of these locations; hence, around-the-clock hourly and special weather observations will no longer be available. Generally, the NWS offices will be closed between 10 p.m. and 6 a.m. local time; however, the hours will vary according to location and date. Since designation of the control zones is dependent on the availability of weather observations, actual dates/times of operation of the control zones will be announced in advance by Notice to Airmen (NOTAM) and thereafter as published in the airport/facility directory.

**DATES:** Comments must be received on or before: April 28, 1989.

**ADDRESSES:** Send comments on the proposal in triplicate to: Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 89-ASO-2, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

**FOR FURTHER INFORMATION CONTACT:** James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ASO-2." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal

Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to change the designation of the Huntsville, AL; Savannah, GA; Lexington, KY; and Knoxville, TN, control zones from full-time to part-time. This action is necessary due to reduction of operating hours by the National Weather Service Offices at these locations. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in FAA Order 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation safety, Control zone.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.171 [Amended]**

2. Section § 71.171 is amended as follows:

**Huntsville, AL [Amended]**

**Savannah, GA [Amended]**

**Lexington, KY [Amended]**

**Knoxville, TN [Amended]**

Add the following sentences to the existing descriptions: "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the airport/facility directory."

Issued in East Point, Georgia, on February 23, 1989.

**William D. Wood,**

*Acting Manager, Air Traffic Division, Southern Region.*

**[Airspace Docket No. 88-ASW-60]**

**Proposed Establishment of Restricted Areas R-6316 Eagle Pass, TX; R-6317 El Sauz, TX; R-6318 Marfa, TX; and Proposed Alteration of VOR Federal Airway V-13; TX**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to establish Restricted Areas R-6316 located near Eagle Pass, TX; R-6317 located near El Sauz, TX; and R-6318 located near Marfa, TX; and to alter the description of Federal Airway V-13 located in the vicinity of El Sauz, TX. This action would provide for the deployment of a tethered aerostat-borne radar-system at each restricted area at the request of the United States Customs Service. This action would allow the Customs Service to provide surveillance of airspace from ground level to an altitude of 15,000 feet mean sea level and detect low altitude suspect aircraft attempting to penetrate the airspace.

**DATE:** Comments must be received on or before April 24, 1989.

**ADDRESSES:** Send comments on the proposal in triplicate to: Director, FAA, Southwest Region, Attention: Manager, Air Traffic Division, Docket No. 88-ASW-60, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

**FOR FURTHER INFORMATION CONTACT:** Jesse B. Bogan Jr., Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9255.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, aeronautical, economic and energy aspects of the proposals. Send comments on environmental and land use aspects to: Department of Treasury, U.S. Customs Service, Mr. Robert O. Holliday, Director, Research and Development Division, 1301 Constitution Avenue, NW., Washington, DC 20229; (202) 566-5371. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88-ASW-60." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA

VOL 54 ISS 46 MR 10 1989 UMI

personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

**The Proposals**

The FAA is considering amendments to Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to establish Restricted Areas R–6316 located near Eagle Pass, TX; R–6317 located near El Saux, TX; and R–6318 located near Marfa, TX; and to alter VOR Federal Airway V–13 located in the vicinity of El Saux, TX. The U.S. Customs Service would deploy a tethered aerostat-borne radar system at each location with the capability of detecting low altitude suspect aircraft attempting to penetrate the airspace. The system would increase the probability of the interception and interdiction of suspect aircraft and provide low altitude radar coverage for the Customs Service. In order to achieve the aim of the Customs Service, it would be necessary to restrict airspace from the surface to 15,000 feet MSL, within a 3-statute-mile radius of a point on the Laughlin VORTAC 156°T(146°M) radial, 64 miles from the VORTAC, for R–6316; from the surface to 15,000 feet MSL, within a 3-statute-mile radius of a point on the McAllen VOR 307°T(296°M) radial, 39 miles from the VOR, for R–6317; and from the surface to 15,000 feet MSL, within a 2-statute-mile radius of a point on the Marfa VOR 292°T(281°M) radial, 21 miles from the VOR, for R–6318. R–6316, R–6317, and R–6318 would also be added to the Continental Control Area. Sections 71.123, 71.151 and 73.63 of Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) were republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Parts 71 and 73**

Aviation safety, Continental control area, Restricted areas, VOR Federal airways.

**The Proposed Amendment**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) as follows:

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

1. The authority citation for Part 71 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

**§ 71.123 [Amended]**

2. Section 71.123 is amended as follows:

**V–13 [Amended]**

By removing the words "From Laredo, TX, via INT Laredo 156° and McAllen, TX, 306° radials; McAllen;" and by substituting the words "From McAllen, TX, via"

**§ 71.151 [Amended]**

3. Section 71.151 is amended as follows:

**R–6316 Eagle Pass, TX [New]**

**R–6317 El Saux, TX [New]**

**R–6318 Marfa, TX [New]**

**PART 73—SPECIAL USE AIRSPACE**

4. The authority citation for Part 73 continues to read as follows:

**Authority:** 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

**§ 73.63 [Amended]**

5. Section 73.63 is amended as follows:

**R–6316 Eagle Pass, TX [New]**

Boundaries. A 3-mile radius centered at lat. 28°23'08" N., long. 100°17'10" W.
Designated altitudes. Surface to 15,000 feet MSL.

**Maritime Administration**

**46 CFR Part 221**

**[Docket No. R–124]**

**RIN 2133–AA73**

**Approval of Vessel Charters to Noncitizens**

**AGENCY:** Maritime Administration, Department of Transportation.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Maritime Administration (MARAD) is proposing to amend its regulations governing required approval for certain transactions involving the transfer to a noncitizen of U.S.-documented vessels owned by citizens of the United States. This rulemaking would grant general approval for a type of vessel charter involving drilling contracts for the employment of mobile offshore drilling units (MODUs). Such general approval would be granted to drilling contracts (a form of transfer), for a period not to exceed two years, where the MODU owner is a citizen of the United States and the other party is a noncitizen affiliate of the owner or the person making the vessel available for charter.

**DATES:** MARAD will consider all written comments by interested persons received on or before April 24, 1989. Those submitting comments that wish to receive acknowledgment that MARAD has received the comments should include a stamped, self-addressed postcard.

**ADDRESS:** Send comments (the original plus five copies are requested but not required) to the Secretary, Maritime Administration, Room 7300, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. All comments will be made available during normal business hours in Room 7300.

**FOR FURTHER INFORMATION CONTACT:** Jessie Fernanders, Vessel Transfer and Disposal Officer, Maritime Administration, 400 Seventh Street, SW., Washington, DC 20590.

**SUPPLEMENTARY INFORMATION:** Section 9 of the Shipping Act, 1916, (46 App. U.S.C. 808) makes it unlawful, without the approval of the Maritime Administrator, to sell, mortgage, lease, charter, deliver, or in any manner transfer to a noncitizen, any interest in or control of a documented vessel owned by a citizen of the United States, or place a documented vessel under foreign registry or operate that vessel under the authority of a foreign country. As amended by Pub. L. 100–710, section 9 contains exceptions to the requirements for approval of all transfers to noncitizens of interests in documented vessels with respect to vessels operated only as a fishing vessel, fish processing vessel, fish tender vessel or a vessel operated only for pleasure (46 CFR 221.15(b)). By its regulations at 46 CFR Part 221, MARAD has granted administrative general approval for charters of documented vessels by citizens to noncitizens for a period not to exceed six months. This general approval is specifically inapplicable to all bareboat charters or subcharters, other than with respect to vessel types that are exempt from transfer approval under § 221.15(b). A bareboat charter is one where the charterer takes possession of the vessel and exercises direct control over the actual operation of the vessel.

In response to a petition for rulemaking submitted by the International Association of Drilling Contractors (IADC), MARAD issued an Advance Notice of Proposed Rulemaking (ANPRM) on November 2, 1988 (53 FR 44208). The ANPRM solicited comments, due by January 3, 1989, on the IADC proposal that MARAD grant general approval for bareboat charters and subchapters of mobile offshore drilling units (MODUs) by citizens of the United States to affiliates which are noncitizens. The IADC represents offshore and onshore drilling and well-servicing companies that it claims are responsible for producing over 90 percent of all onshore and offshore wells drilled around the world since March 31, 1987. IADC membership includes drilling and well-servicing contractors, oil and gas producing firms, and associate member companies.

Petitioner alleged that amendment to MARAD's regulations should provide approval for intra-company charters and subcharters, irrespective of duration, to ensure that American offshore drilling companies obtain their fair share of overseas drilling contracts. Petitioner stated that MARAD general approval of intra-company charters to noncitizen affiliates is needed because such charters are an integral part of doing business abroad in the offshore drilling industry, and much of the new offshore drilling activity now occurs outside of the United States and its contiguous waters. It projected that future opportunities will continue to be concentrated in foreign countries. Petitioner stated that while MARAD has routinely approved applications for intra-company charters of MODUs, approval can take at least several weeks and as much as one month. A necessary response time on solicitations for foreign drilling contracts is often very short, typically 14 days. Offerors that must wait for MARAD approval to execute a charter or drilling contract are at a disadvantage in competing with foreign competitors that do not need to get approval. Petitioner stated that many drilling contracts and related bareboat charters are of short duration and require the shortest response time.

The IADC proposed amendment also would require the vessel owner or owner's representative to file a copy of the charter with MARAD not later than 20 days after the beginning of the charter period.

The proposed amendments in the ANPRM were to the regulations at 46 CFR Part 221 that existed prior to MARAD's publication of an interim final rule, on February 2, 1989, (54 FR 5382). MARAD issued that rulemaking to conform its regulations to reflect significant changes in the law contained in Pub. L. 100–170, which became effective on January 1, 1989. The IADC proposed amendment provided for MARAD general approval of charters of a documented MODU by a citizen to a noncitizen affiliate, as defined, without time limitation.

MARAD received five comments in response to the ANPRM. Generally favorable comments were received from two offshore drilling operators, a trade association representing offshore drilling operators and other maritime interests, and a law firm representing an offshore drilling operator. Another law firm representing an operator of ocean-going tug barges in the coastwise trade opposed the "generic extension of this approval authority" by MARAD. That commenter submitted that it is important to examine vessel transfers subject to section 9 under rigorous case-by-case review to learn whether the transfer would be compatible with national interests, including national defense. It stated that there is not a demonstrated need for such an amendment of the MARAD regulations governing transfers of documented vessels to noncitizens. In proposing these amendments, MARAD has determined that the vessel transfers that are contemplated are compatible with national interests.

One offshore drilling operator suggested a further amendment to require that a MARAD general approval be granted for a period not to exceed two years, and only for drilling contracts that assure that the U.S. citizen owner retains control of the marine operations, noting that the majority of drilling contracts give the operator the right to take over drilling operations. Those provisions are incorporated in this NPRM. The same commenter also would eliminate the requirement in the ANPRM that the vessel owner or owner's representative file with MARAD a copy of the charter within twenty days after the beginning of a charter period, and would substitute the requirement for filing a written notice of the charter and its expected commencement and termination dates. Another offshore drilling operator opposed the requirement for submitting a copy of the charter as being unnecessary paperwork. A similar requirement is now applicable to charters, not to exceed six months, pursuant to provision of § 221.17(c). There have been no protests from those now subject to this requirement, which has existed since 1986. Consistent with that provision, a time period of thirty days is now being proposed, rather than the twenty days provided for in the ANPRM.

The law firm representing an offshore drilling operator noted that under Pub. L. 100–710, transfers to noncitizens of a documented vessel do not requite MARAD approval if the owner is not a citizen of the United States. That

BEST COPY AVAILABLE

VOL 54 ISS 46 MR 10 1989 UMI

commenter would require that the noncitizen affiliate be related to either the owner or the entity making the vessel available for charter, and that provision is being incorporated in this NPRM.

**Analysis of Regulatory Impact**

This rulemaking has been reviewed under Executive Order 12291, and it has been determined that this is not a major rule. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies, or geographic regions. Furthermore, it will not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rulemaking does not involve any change in important Departmental policies and is considered nonsignificant under Department of Transportation Regulatory policies and procedures (DOT Order 2100.5). The economic impact should be minimal, and further regulatory evaluation is not necessary. Moreover, the Maritime Administrator certifies that this amendment will not have a significant economic impact on a substantial number of small entities.

This rulemaking does not significantly affect the environment. An environmental impact statement is not required under the National Environmental Policy Act of 1969. It has also been reviewed under Executive Order 12612, Federalism, and it has been determined that it does not have sufficient implications for federalism to warrant preparation of a Federalism Assessment.

Finally, this rulemaking contains a reporting requirement that has been previously approved by the Office of Management and Budget (Approval No. 2133–0006).

MARAD has reviewed the comments received in response to the ANPRM, with recognition of the changes in the regulations at 46 CFR Part 221 that has been effected by the interim final rule published on February 2, 1989, in implementation of Pub. L. 100–710. This notice of proposed rulemaking would add a new paragraph "(f) *Drilling Contracts*" to § 221.17, which would give MARAD general approval for drilling contracts relating to any documented MODU, not to exceed two years in duration, where the MODU owner is a citizen of the United States and the other contracting partner (charterer) is a noncitizen.

**List of Subjects in 46 CFR Part 221**

Maritime Administration, maritime carriers.

Accordingly, it is proposed to amend the regulations at 46 CFR Part 221 as follows:

**PART 221—[AMENDED]**

1. The authority citation for 46 CFR Part 221 continues to read as follows:

Authority: Secs. 2, 9, 37, 41 and 43, Shipping Act 1916, as amended and sec. 204(b) and 708, Merchant Marine Act 1936 as amended (46 App. U.S.C. 802, 803, 808, 835, 839, 841a, 1114(b), 1195); 49 CFR 1.66.

2. Section 221.17 is amended to add a new paragraph (f) to read as follows:

**§ 221.17 [Amended]**

* * * * *

(f) *Drilling Contracts.* The Maritime Administrator hereby approves drilling contracts relating to any documented mobile offshore drilling unit (MODU), for a period not to exceed two years, where the owner of the MODU is a citizen of the United States and the other party to the drilling contract is noncitizen affiliate of the owner or the person making the vessel available for charter.

(1) "Drilling contract," for purposes of this paragraph, means a contract for the drilling of oil or gas wells, by the terms of which the owner of the MODU or its affiliate maintains control of the marine operations of the MODU at all times during the contract period.

(2) "Affiliate," for purposes of this paragraph means a corporation, partnership, or other legal entity that owns or controls, is owned or controlled by, or is under common ownership or control with the owner or entity making the vessel available for charter.

(3) "Control," for purposes of this paragraph only, means the possession, direct or indirect, or the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting securities, by contract, or otherwise. Assertion of control in a drilling contract shall be accepted as *prima facie* evidence of control.

By Order of the Maritime Administrator.

Date: March 6, 1989.

**James E. Saari,**

*Secretary, Maritime Administration.*

BILLING CODE 4910–81–M

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Part 73**

**[MM Docket No. 89–48, RM–6502]**

**Radio Broadcasting Services; Gray, GA**

**AGENCY:** Federal Communications Commission.

**ACTION:** Proposed rule.

**SUMMARY:** The Commission requests comments on a petition by Donald W. Earnhart seeking the allotment of Channel 243A to Gray, Georgia, as the community's first local FM service. Channel 243A can be allotted to Gray in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for this allotment are North Latitude 33–00–36 and West Longitude 83–32–06.

**DATES:** Comments must be filed on or before April 27, 1989, and reply comments on or before May 12, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Donald W. Earnhart, P.O. Box 3878, Jackson, GA 30233 (Petitioner) and Larry G. Fuss, P.O. Box 4010, Opelika, AL 36803 (Consultant to petitioner).

**FOR FURTHER INFORMATION CONTACT:** Nancy J. Walls, Mass Media Bureau, (202) 634–6530.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 89–48 , adopted February 14, 1989, and released March 6, 1989. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW. Suite 140, Washington, DC. 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Forest Service

### West Moyie Timber Sales; Environmental Impact Statement

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The notice is hereby given that the Forest Service is gathering information in order to prepare an Environmental Impact Statement (EIS) for a proposal to harvest timber and build roads in the west slopes of the Moyie River drainage. The drainage is located approximately 12 air miles northeast of Bonners Ferry, Idaho. Part of the proposed timber harvest and road construction are proposed within the Hellroaring Roadless Area (No. 01128). These management activities would be administered by the Bonners Ferry Ranger District of the Idaho Panhandle National Forests in Boundary County, Idaho.

This EIS will tier to the Forest Plan (September 1987) which provides the overall guidance (Goals, Objectives, Standards and Guidelines, and Management Area direction) in achieving the desired future condition for this area. The purpose and goal for the proposed action is to help satisfy short-term demands for timber and maintain a continuous supply of timber in the future, and to provide for increased big game winter range.

The Forest Service also serves notice that the agency is seeking information and comments from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparing the Draft EIS. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Identification of additional reasonable alternatives.
5. Identification of potential environmental effects of the alternatives.
6. Determination of potential cooperating agencies and task assignments.

The agency invites written comments and suggestions on the issues and management opportunities in the area being analyzed.

**DATE:** Comments concerning the scope of the analysis must be received by April 15, 1989.

**ADDRESSES:** Send written comments to District Ranger, Bonners Ferry Ranger District, Route 4, Box 4860, Bonners Ferry, ID 83805.

**FOR FURTHER INFORMATION CONTACT:** Questions about the proposed action and environmental impact statement should be directed to Allen Chrisman, Timber Management Assistant, Bonners Ferry Ranger District, Idaho Panhandle National Forests, Route 4, Box 4860, Bonners Ferry, ID 83805. Phone: (208) 267-5561.

**SUPPLEMENTARY INFORMATION:** Management activities under consideration would occur in an area encompassing approximately 18,600 acres of National Forest lands on the Bonners Ferry Ranger District. Included in the area of analysis are all or portions of the following: sections 2-4, 9-11, and 14-16, T63N, R2E; sections 2-11, 14-18, 20-23, 26-29, and 32-35, T64N, R2E; sections 1, 12, and 13, T64N, R1E; and sections 21 and 27-35, T65N, R2E, BM, Boundary County, State of Idaho. The Forest Plan provides the overall guidance for management activities in the potentially affected area through its Goals, Objectives, Standards and Guidelines, and Management Area direction. The potentially affected area is within the following Management Areas:

**Management Area 1**

Consists of lands designated for timber production. The management goal is to manage those lands suitable for timber production for the long-term growth and production of commercially valuable wood products, as well as provide for soil and water protection, wildlife habitat, dispersed recreation opportunities, and visual quality.

**Management Area 9**

Consists of non-forest lands or lands not capable of timber production. Management goals are to maintain and protect existing improvements and resource productive potentials. No timber harvest will occur, but roads constructed to access harvest areas in the other management areas may cross portions of this management area.

**Management Area 4**

Consists of lands designated for timber production within big game winter range. The goal is to manage big game winter range to provide forage to support projected big game habitat needs through scheduled timber harvest and permanent forage areas.

**Management Area 18**

Consists of lands that are comprised of an aquatic ecosystem and adjacent upland areas that have direct relationships with the aquatic system. Management goals are to manage riparian areas to feature riparian-dependent resources while producing other resource outputs at levels compatible with the objectives for dependent resources. Timber harvesting may occur, and roads constructed to access harvest areas in the other management areas may cross portions of this management area.

A range of alternatives will be considered. One of these will be the "no-action" alternative, in which the roadless character of the Hellroaring Roadless Area would be maintained and timber harvest and associated road building would be deferred. Other alternatives will examine timber harvest and road construction in different locations and varied cutting methods and timber management intensities to achieve management area goals.

The Forest Service will analyze and document the direct, indirect, and cumulative environmental effects of the alternatives. This will include an analysis of the effects of the alternatives on the roadless character of the area affected. In addition, the EIS will contain an analysis of site-specific mitigation measures.

Public participation will be important during the analysis. People may visit with Forest Service officials at any time during the analysis and prior to the decision; however, two periods of time

are identified for the receipt of comments on the analysis. The two public comment periods are during the scoping process (now until April 15, 1989) and during the review of the Draft EIS (September 1989).

The Fish and Wildlife Service, Department of the Interior, will be informally consulted throughout the analysis. To meet the requirements of the Endangered Species Act, the Fish and Wildlife Service will review the EIS and biological evaluation and, if necessary, render a formal Biological Opinion of the effects on the Threatened and Endangered Species, including the grizzly bear.

The Draft Environmental Impact Statement (DEIS) is expected to be available for public review in September 1989. After a 45-day public comment period, the comments received will be analyzed and considered by the Forest Service in preparing the Final Environmental Impact Statement (FEIS). The FEIS is scheduled to be completed by June 1990. The Forest Service will respond to the comments received in the FEIS. The District Ranger, who is the responsible official for this EIS, will make a decision regarding this proposal, considering the comments and responses, environmental consequences discussed in the FEIS, and applicable laws, regulations, and policies. The decision and reasons for the decision will be documented in a Record of Decision.

Charles Prausa, District Ranger for the Bonners Ferry Ranger District, is the responsible official.

Dated: March 3, 1989.

**Charles Prausa,**

*District Ranger, Bonners Ferry Ranger District, Idaho Panhandle National Forests.*

[FR Doc. 89-5598 Filed 3-9-89; 8:45 am]

BILLING CODE 3410-11-M

### Rock Creek Watershed Environmental Impact Statement

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The Department of Agriculture, Forest Service will prepare an environmental impact statement (EIS) for a proposal to implement commercial timber sales within portions of the Rock Creek watershed on the Ukonom Ranger District.

**DATE:** Comments concerning the scope of the analysis should be received by May 1, 1989.

**ADDRESSES:** Send written comments and suggestions concerning the scope of the analysis to Alice R. Forbes, District Ranger, Ukonom Ranger District, P.O. Drawer 410, Orleans, CA 95556.

**FOR FURTHER INFORMATION CONTACT:** Questions about the proposed action and environmental impact statement should be directed to Penny Eckert, TMO, Ukonom Ranger District, phone (916) 627-3291.

**SUPPLEMENTARY INFORMATION:** A range of alternatives for this area will be considered. One of these will be no road construction or timber harvest. Other alternatives will consider an array of resource management strategies.

Federal, State, and local agencies, and other individuals or organizations who may be interested in or affected by the decision are hereby invited to participate in the scoping process. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in dept.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.
4. Determination of potential cooperating agencies and assignment of responsibilities.

The U.S. Fish and Wildlife Service, Department of the Interior, will be invited to participate as a cooperating agency to evaluate potential impacts on threatened and endangered species habitat if any such species are found to exist in the watershed.

The District Ranger will host a public meeting in the back conference room of the Ukonom Ranger Station, Orleans, California at 7:00 p.m. on Monday, March 27, 1989.

The analysis is expected to take about 10 months.

The draft environmental impact statement (DEIS) is to be filed with the Environmental Protection Agency (EPA) and to be available for public review by January 1990.

The comment period on the draft environmental impact statement (DEIS) will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register.** It is very important that those interested in the management of the Rock Creek Watershed EIS participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of DEIS' must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC,* 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement (FEIS). *Wisconsin Heritages, Inc. V. Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the FEIS.

After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement (FEIS). The FEIS is scheduled to be completed by May 1990. The Forest Service is required to respond in the FEIS to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, disclosure of environmental consequences, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and rationale in the Record of Decision. That decision will be subject to appeal under 36 CFR Part 217.

Date: March 1, 1989.

**Robert L. Rice,**

*Forest Supervisor.*

## COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

### Procurement List 1989; Additions and Deletion

**AGENCY:** Committee for Purchase from the Blind and Other Severely Handicapped.

**ACTION:** Additions to and deletion from procurement list.

**SUMMARY:** This action adds to and deletes from Procurement List 1989 commodities and a military resale commodity to be produced by workshops for the blind or other severely handicapped.

**EFFECTIVE DATE:** April 10, 1989.

**ADDRESS:** Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman (703) 557-1145.

**SUPPLEMENTARY INFORMATION:** On November 18 and December 9, 1988, January 6 and January 13, 1989, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (53 FR 46845 and 49730, 54 FR 457 and 1408) of proposed additions to and deletion from Procurement List 1989, which was published on November 15, 1988 (53 FR 46018).

### Additions

No comments were received concerning the proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified workshops to produce the commodities and military resale commodity at a fair market price and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities and military resale commodity listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and military resale commodity listed.

c. The actions will result in authorizing small entities to produce the commodities and military resale commodity procured by the Government.

Accordingly, the following commodities and military resale commodity are hereby added to Procurement List 1989:

**Commodities**

Towel, Paper
7920-00-823-9772
(Requirements for GSA Regions 2, 8, 9 and 10)

Buckle, Belt
8315-01-075-1818

**Military Resale Item No. and Name**

No. 908 Broom, Push, 18", Indoor/Outdoor

### Deletion

After consideration of the relevant matter presented, the Committee has determined that the commodity listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

Accordingly, the following commodity is hereby deleted from Procurement List 1989:

Pencil, Mechanical
7520-00-285-5818

Beverly L. Milkman,

*Executive Director.*

## Procurement List 1989; Proposed Additions

**AGENCY:** Committee for Purchase from the Blind and Other Severely Handicapped.

**ACTION:** Proposed additions to procurement list.

**SUMMARY:** The Committee has received a proposal to add to Procurement List 1989 commodities to be produced and services to be provided by workshops for the blind and other severely handicapped.

*Comments must be received on or before:* April 10, 1989.

**ADDRESS:** Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman (703) 557-1145.

**SUPPLEMENTARY INFORMATION:** This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and services to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018):

**Commodities**

Folder, File, Kraft
7530-00-985-7097

Sweatpants
8415-01-234-4409
8415-01-234-4410
8415-01-234-4411
8415-01-234-4412
8415-01-234-4413

Sweatshirt
8415-01-234-4420
8415-01-234-4421
8415-01-234-4422
8415-01-234-4423
8415-01-234-4424

**Services**

## DEPARTMENT OF DEFENSE

### Corps of Engineers, Department of the Army,

### Notice of Tentative Sponsor Selection and Request for Additional Proposals; Proposed Norfolk Dam Unit Number 3

**AGENCY:** Department of the Army, U.S. Army Corps of Engineers, Little Rock, District.

**ACTION:** Notice of Tentative Selection of the City of Conway, Arkansas, as the Financial Sponsor and Preference Customer relating to the Proposed Norfolk Dam Unit 3 Hydroelectric Power Project in Arkansas and Request for Additional Proposals. This announcement is being made to fulfill the selection criteria as agreed upon by the Corps of Engineers and Southwestern Power Administration on November 9, 1988.

**SUMMARY:** The Norfolk Dam is located near Norfolk, Arkansas, on the North Fork River, a major north bank tributary of the White River. The U.S. Army Corps of Engineers (Corps) constructed the project and is responsible for its operation. The project was authorized for flood control by the Flood Control Act approved June 28, 1938 (Public Law 761, 75th Congress, 3rd session) and modified to provide facilities for generation of power by the Flood Control Act of August 18, 1941 (Public Law 228, 77th Congress, 1st session). Norfolk Lake is also a major center for recreation and releases from the project support a "put-and-take" trout fishery downstream on the North Fork and White Rivers.

Provisions were made during design and construction of the project for four hydroelectric power generating units. One unit began generation in June 1944 with a second unit placed in operation in February 1950. Units 3 and 4 have not been installed at the project. Each of the two existing units have an installed capacity of 40,275 kilowatts (kW) for a total installed capacity at the project of 80,550 kW. The units generate an average of 184,000,000 kilowatt-hours (kWh) of energy annually. The hydroelectric power and energy generated at Norfolk Dam is marketed by the Southwestern Power Administration (SWPA).

The proposed addition of one hydroelectric power generating unit (Unit 3) is generally described as Plan 1 in the Corps' Little Rock District document entitled "Norfolk Lake Additional Hydroelectric Power Units 3 and 4" dated March 1983 and is authorized through the provisions of the original project authorizations. The proposed unit would have a capacity of approximately 42,500 kW and generate additional energy averaging about 5,900,000 kWh. The estimated cost of construction is $46,000,000 (based on October 1987 price levels).

The City of Conway, Arkansas (City), an incorporated city which owns a municipal electric utility system, has proposed to provide financing to the Federal government for the design and construction of Unit 3 and Norfolk Dam during the period of design and construction. Upon completion of constructon, the City proposes to pay its own debt service and a pro rata share of SWPA's hydroelectric power system's annual operation, maintenance, and replacement (OM&R) and marketing costs. The project would be designed, constructed, owned, and operated by the Corps. The power and energy would be marketed by SWPA.

The sponsor will have two years from the date the final sponsor selection notice is published in the Federal Register to enter into agreements with

VOL 54 ISS 46 MR 10 1989 UMI

the Corps and SWPA for construction of the project. Additional time to enter into the agreements may be provided upon the sponsor's request and approval by the Corps and SWPA. If agreements cannot be negotiated within the specified time frame, the sponsorship will be cancelled automatically and new proposals for potential project sponsors will be considered.

In exchange for financing the design and construction of the project and making the required payments for OM&R and marketing costs, the City requests an allocation of approximately 36,000 kW of firm capacity with associated 1200 hours per year of firm energy from the SWPA's Interconnected System, which includes the Norfork Dam project. If the City is selected and successfully sponsors the project, it would receive the above requested allocation in accordance with Section II, Part A, paragraph 2 of SWPA's Power Allocation Policy as published in the **Federal Register** (52 FR 29881) dated August 12, 1987. The proposed arrangement between the City and SWPA would extend for 50 years after Norfolk Unit 3 is declared in commercial operation. SWPA has determined that the City qualifies for preference, in accordance with Section 5 of the Flood Control Act of 1944, as amended, to receive firm power and energy in accordance with the aforesaid terms, provided the City is the successful sponsor and can make satisfactory wheeling arrangements. Jointly, the Corps and SWPA have tentatively selected the City to be the non-Federal sponsor to provide financing for the proposed Unit 3 at Norfolk Dam.

**DATES:** Questions, comments, and/or proposals received prior to April 10, 1989 will be considered in the final selection process.

For further information about the proposed project financing, contact: Colonel Anthony V. Nida, District Engineer, Little Rock District, Corps of Engineers, P.O. Box 867, Little Rock, AR 72203.

For further information about the proposed marketing of power and energy from the project, contact: Francis R. Gajan, Director, Power Marketing, Southwestern Power Administration, P.O. Box 1619, Tulsa, OK 74101.

Issued at Little Rock, Arkansas, on 22 February 1989.

**Anthony V. Nida,**

*Colonel, Corps of Engineers District Engineer.*

BILLING CODE 3710-47-M

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

**[Docket Nos. ER89-253-000, et al.]**

### Alabama Power Co. et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

March 6, 1989.

Take notice that the following filings have been made with the Commission:

**1. Alabama Power Company**

[Docket No. ER89-253-000]

Take notice that on February 21, 1989, Alabama Power Company (Alabama Power) tendered for filing a Transmission Service Delivery Point Agreement to an existing delivery point covered by the Agreement between Alabama Power and Alabama Electric Cooperative, Inc. (AEC) for transmission Service to Distribution Cooperative Members of AEC which is dated August 28, 1989 (Agreement). Alabama Power states that this Agreement has been designated Rate schedule FERC No. 147. Alabama Power further states that the purpose of this agreement is to indicate revisions in maximum capacity requirement for the Turkey Hill delivery Point of Baldwin County EMC under the Agreement.

Alabama Power requests an effective date of December 14, 1988, and therefore requests waiver of the Commission's notice requirements.

*Comment date:* March 21, 1989, in accordance with Standard Paragraph E at the end of this notice.

**2. Arizona Public Service Company**

[Docket No. ER89-255-000]

Take notice that on February 27, 1989, Arizona Public Service Company (APS or Company) tendered for filing: (1) Amendment No. 2 to the Wholesale Power Agreement (Amendment No. 1), (2) a Transmission Service Agreement, and (3) Revision No. 1 to Exhibit B of the Wholesale Power Agreement (Revisions) all between APS and the Town of Wickenburg, Arizona (Wickenburg).

The Transmission Service Agreement is intended to supersede an Interim Letter Agreement (APS FERC Rate Schedule No. 148). Amendment No. 1 implements the terms of the Rate Settlement Agreement in FERC Docket No. ER84-450-000. The revision reduces Wickenburg's Maximum Demand under its Wholesale Power Agreement pursuant to the conditions specified in Amendment No. 1.

No changes from the currently effective Wholesale Power or Transmission (Wheeling) rate levels are proposed herein. The changes proposed herein result in a reduction in revenues of approximately ($427,000). No new facilities nor modifications to existing facilities are required to provide the aforementioned services.

A copy of this filing has been served upon Wickenburg, and the Arizona Corporation Commission.

*Comment date:* March 21, 1989, in accordance with Standard Paragraph E at the end of this document.

**3. Niagara Mohawk Power Corporation**

[Docket No. ER89-254-000]

Take notice that Niagara Mohawk Power Corporation (Niagara Mohawk), on February 27, 1989, tendered for filing an agreement between Niagara Mohawk and New England Power Company (NEP) dated November 1, 1988.

The November 1, 1988 agreement is to provide for the sale by Niagara Mohawk Power Corporation of firm capacity and related energy of New England Power Company. The terms of this agreement and the period during which the purchase of Capacity and Energy can occur shall commence on November 1, 1988 and shall continue until April 30, 1989.

Copies of this filing were served upon NEP and the New York State Public Service Commission.

*Comment date:* March 21, 1989, in accordance with Standard Paragraph E at the end of this notice.

**Standard Paragraphs**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practices and Procedure (18 CFR 385.211 and 284.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Lois D. Cashell,**

*Secretary.*

BILLING CODE 6717-01-M

**[Project No. 8375-001 Utah]**

### Blacksmith Fork; Availability of Environmental Assessment

March 7, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR, Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a major license for the proposed Blacksmith Fork project, located on the Blacksmith Fork River in Cache County, near Hyrum, Utah, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff analyzed the potential environmental impacts of the proposed project and concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street NE., Washington, DC 20426.

**Lois D. Cashell,**

BILLING CODE 6716-01-M

**[Docket Nos. CP89-923-000 et al.]**

### Paiute Pipeline Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission.

**1. Paiute Pipeline Company**

[Docket No. CP89-923-000]

March 3, 1989.

Take notice that on March 1, 1989, Paiute Pipeline Company (Paiute), P.O. Box 94197, Las Vegas, Nevada 89193-4197, filed in Docket No. CP89-923-000 a request pursuant to § 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide an interruptible transportation service for Southwest Gas Corporation-Northern California (Southwest Gas-Northern California), a local distribution company, under Paiute's blanket certificate issued in Docket No. CP87-309-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Paiute states that pursuant to a transportation agreement dated November 14, 1988, under its Rate Schedule IT-1, it proposes to transport up to 10,316 MMBtu equivalent of natural gas on a peak day, approximately 2,035 MMBtu equivalent of natural gas on an average day and approximately 741,900 MMBtu equivalent of natural gas on an annual basis. Paiute states that no new facilities will need to be constructed to transport the subject gas through its transmission system from the existing interconnection between the facilities of Paiute and Northwest Pipeline Corporation at the Idaho-Nevada border, and to redeliver the gas to Southwest Gas-Northern California at the North Lake Tahoe City Gate, Washoe County, Nevada. It is stated that Paiute's understanding is that Southwest Gas-Northern California will receive deliveries of the gas directly from Paiute and that the gas will be utilized by Southwest Gas-Northern California as system supply for its local distribution system in its northern California service area. Paiute advises that transportation service under § 284.223(a) commenced December 21, 1988, as reported in Docket No. ST89-1812.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**2. Paiute Pipeline Company**

[Docket No. CP89-924-000]

March 3, 1989.

Take notice that on March 1, 1989, Paiute Pipeline Company (Paiute),[1] P.O. Box 94197, Las Vegas, Nevada 89193-4197, filed in Docket No. CP89-924-000 a request pursuant to § 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 284.223) for authority to provide interruptible transportation service for Southwest Gas Corporation-Northern Nevada (Northern Nevada), a local distribution company, under Paiute's blanket transportation certificate authority issued August 31, 1988, in Docket No. CP87-309-000, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Paiute states it will receive the gas at the existing interconnection of its facilities and Northwest Pipeline Corporation (Northwest) at the Idaho-Nevada border in Elko County, Nevada and deliver the gas to Northern Nevada at various points on Paiute's system in Nevada. Paiute will transport the gas pursuant to its Rate Schedule IT-1 for a primary term up to October 31, 1991.

Paiute proposes to transport up to 61,651 MMBtu of gas per peak day and approximately 40,800 MMBtu and 14,884,000 MMBtu of gas per average day and annually, respectively. Paiute states that the transportation service commenced under the 120-day automatic authorization of § 284.223(a) of the Commission's Regulations on December 21, 1988, pursuant to a transportation agreement dated November 14, 1988. Paiute notified the Commission of the commencement of the transportation service in Docket No. ST89-1811-000, on January 20, 1989.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**3. Northern Natural Gas Company, Division of Enron Corp.**

[Docket No. CP89-927-000]

March 3, 1989.

Take notice that on March 1, 1989, Northern Natural Gas Company (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP89-927-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Energy Dynamics, Inc., a marketer, under the blanket certificate issued in Docket No. CP86-435-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that pursuant to a transportation agreement dated January 24, 1989, under its Rate Schedule IT-1, it proposes to transport up to 15,000 MMBtu per day equivalent of natural gas for Energy Dynamics, Inc. Northern states that it would transport the gas from multiple receipt points as shown in Appendix "A" of the transportation agreement and would deliver the gas to multiple delivery points also shown in Appendix "A" of the agreement.

Northern advises that service under § 284.223(a) commenced January 24, 1989, as reported in Docket No. ST89-2220 (filed February 14, 1989). Northern further advises that it would transport 11,250 MMBtu on an average day and 5,475,000 MMBtu annually.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

[1] A wholly owned subsidiary of Southwest Gas Corporation.

**4. Northern Natural Gas Company, Division of Enron Corp.**

[Docket No. CP89-925-000

March 3, 1989.

Take notice that on March 1, 1989, Northern Natural Gas Company (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP89-926-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Enron Gas Marketing, Inc., a marketer, under the blanket certificate issued in Docket No. CP86-435-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that pursuant to a transportation agreement dated January 31, 1989, under its Rate Schedule IT-1, it proposes to transport up to 200,000 MMBtu per day equivalent of natural gas for Enron Gas Marketing, Inc. Northern states that it would transport the gas from multiple receipt points as shown in Appendix "A" of the transportation agreement and would deliver the gas to multiple delivery points also shown in Appendix "A" of the agreement.

Northern advises that service under § 284.223(a) commenced January 31, 1989, as reported in Docket No. ST89-2217 (filed February 14, 1989). Northern further advises that it would transport 150,000 MMBtu on an average day and 73,000,000 MMBtu annually.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**5. El Paso Natural Gas Company**

[Docket No. CP89-907-000]

March 3, 1989.

Take notice that on February 24, 1989, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas 79978, field in Docket No. CP89-907-000 a request pursuant to §§ 157.205 and 284.223 (18 CFR 157.205 and 284.223) of the Commission's Regulations under the Natural Gas Act for authority to continue the interruptible transportation service for Petrus Oil Company L.P. (Petrus) a shipper of natural gas, under El Paso's blanket transportation certificate authorization which was issued by Commission order on November 2, 1988, in Docket No. CP88-433-000, all as more fully set forth in the application and open to public inspection.

El Paso indicates that it will continue to transport the gas from various receipt points and deliver the gas for the account of Petrus to various points on El Paso's system all in Moore County, Texas.

El Paso proposes to transport up to 52,750 MMBtu of gas per peak day and approximately 21,100 MMBtu of gas and 7,701,500 MMBtu of gas on an average day and annually, respectively. El Paso states that the interruptible transportation service commenced on January 28, 1988, pursuant to Part 284 Subpart B of the Commission's Regulations under the terms of a transportation agreement dated November 16, 1987, as amended December 19, 1988. El Paso notified the Commission of the commencement of the transportation service in Docket No. ST88-2341-000 on February 19, 1988.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**6. Colorado Interstate Gas Company**

[Docket No. CP89-916-000]

March 3, 1989.

Take notice that on February 27, 1989, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP89-916-000, a request pursuant to section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas, on an interruptible basis, for Exxon Corporation (Exxon), a producer, under its blanket certificate issued in Docket No. CP80-589-000, et al. pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

CIG states that it would transport up to 70,000 Mcf per day, for Exxon, pursuant to a Transportation Service Agreement dated November 1, 1988, between CIG and Exxon. CIG further states that it would receive the natural gas from various existing points of receipt on its system in Wyoming and would redeliver the natural gas, less fuel gas and lost and unaccounted-for gas, for the account of Exxon, in Kearny County, Kansas. CIG indicates that the estimated average daily and annual quantities would be 10,000 Mcf and 3,650,000 Mcf, respectively.

CIG states that it commenced the transportation of natural gas for Exxon on January 21, 1989, as reported in Docket No. ST89-2188-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations (18 CFR 284.223(a)).

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**7. Tennessee Gas Pipeline Company**

[Docket No. CP89-918-000]

March 3, 1989.

Take notice that on February 28, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-918-000 a request pursuant to § 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to provide an interruptible transportation service for BHP Petroleum Company, Inc. (BHP), a producer of natural gas, under its blanket certificate issued in Docket No. CP89-115-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee states that the maximum daily, average daily and annual quantities that it would transport for BHP would be 45,000 dt equivalent of natural gas, 45,000 dt equivalent of natural gas and 16,425,000 dt equivalent of natural gas, respectively.

Tennessee indicates that in Docket No. ST89-2027, filed with the Commission on January 30, 1989, it reported that transportation service for BHP had begun under the 120-day automatic authorization provisions of § 284.223(a).

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**8. Northern Natural Gas Company, Division of Enron Corp**

[Docket No. CP89-928-000]

March 3, 1989.

Take notice that on March 1, 1989, Northern Natural Gas Company (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed on Docket No. CP89-928-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Centran Corporation (Centran), a marketer, under the blanket certificate issued in Docket No. CP86-435-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern states that pursuant to a transportation agreement dated February 1, 1989, under its Rate Schedule IT-1, it proposes to transport up to 10,000 MMBtu per day equivalent of natural gas for Centran. Northern states that it would transport the gas from multiple receipt points as shown in Appendix "A" of the transportation agreement and would deliver the gas to multiple delivery points also shown in Appendix "A" of the agreement. Northern further states that the proposed service may involve the compression of gas at its Fort Buford Compressor Station for delivery to Northern Border Pipeline Company.

Northern advises that service under § 284.223(a) commenced February 1, 1989, as reported in Docket No. ST89-2221 (filed February 14, 1989). Northern further advises that it would transport 7,500 MMBtu on an average day and 3,650,000 MMBtu annually.

*Comment date:* April 17, 1989, in accordance with Standard Paragraph G at the end of this notice.

**9. William Natural Gas Company**

[Docket No. CP89-901-000]

March 6, 1989.

Take notice that on February 24, 1989, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89-901-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act for authorization to provide a firm transportation service for Conoco, Inc. (Conoco), a producer of natural gas, under its blanket certificate issued in Docket No. CP86-631-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Williams states that it proposes to transport natural gas for Conoco from various points of receipt in Oklahoma and Texas to various points of delivery on Williams' system in Kansas.

Williams further states that the maximum daily, average daily and annual quantities that it would transport for Conoco would be 800 MMBtu equivalent, 320 MMBtu equivalent and 116,800 MMBtu equivalent of natural gas, respectively.

Williams states that transportation service for Conoco began on January 13, 1989 under the 120-day automatic authorization provisions of § 284.223(a) as reported in Docket No. ST89-2223-000 filed with the Commission.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**10. United Gas Pipe Line Company**

[Docket No. CP89-908-000]

March 6, 1989.

Take notice that on February 27, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-908-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation on behalf of MidCon Marketing Corp. (MidCon), under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United requests authorization to transport, on an interruptible basis, up to a maximum of 412,000 MMBtu of natural gas per day for MidCon from receipt points located in Louisiana, offshore Louisiana and Mississippi to delivery points located in Mississippi. United anticipates transporting, on an average day 412,000 MMBtu and an annual volume of 150,380,000 MMBtu.

United states that the transportation of natural gas from commenced February 1, 1989, as reported in Docket No. ST89-2270-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to United in Docket No. CP88-6-000.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**11. Williams Natural Gas Company**

[Docket No. CP89-902-000]

March 6, 1989.

Take notice that on February 24, 1989, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89-902-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Mountain Iron & Supply Company (Mountain Iron), a marketer of natural gas, under WNG's blanket certificate issued in Docket No. CP86-631-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

WNG proposes to transport, on an interruptible basis, up to 10,000 MMBtu equivalent of natural gas on a peak day, 7,500 MMBtu equivalent on an average day and 2,737,500 MMBtu equivalent on an annual basis for Mountain Iron. It is stated that WNG would receive the gas for Mountain Iron's account at various receipt points on WNG's system in Kansas, Oklahoma and Wyoming and would deliver equivalent volumes at various points on WNG's system in Kansas and Missouri. It is asserted that the transportation service would use existing facilities and would not require the construction of additional facilities.

It is explained that the transportation service commenced January 1, 1989, under the self-implementing authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-2181.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**12. United Gas Pipe Line Company**

[Docket No. CP89-910-000]

March 6, 1989.

Take notice that on February 24, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-910-000 a request pursuant to §§ 157.205 and 284.223(2)(b) of the Commission's Regulations under the Natural Gas Act for authorization to provide transportation service on behalf of MidCon Marketing Corporation (MidCon), a marketer of natural gas under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United requests authorization to transport, on an interruptible basis, up to a maximum of 206,000 MMBtu of natural gas per day for MidCon Gas from a receipt point near Agua Dulce, Nueces County, Texas to various delivery points in Louisiana. The receipt point and redelivery points are listed in Exhibits A and B of the December 28, 1988 transportation agreement which provides for this service. United states that the daily volume of natural gas to be transported would be 206,000 MMBtu and the annual volume would be 75,190,000 MMBtu.

It is stated that United commenced transportation of natural gas for MidCon on January 4, 1989, as reported in Docket No. ST89-2265 filed on February 16, 1989.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**13. United Gas Pipe Line Company**

[Docket No. CP89-911-000]

March 6, 1989.

Take notice that on February 27, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas, 77251-1478, filed in Docket No. CP89-911-000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under its blanket certificate issued in Docket No. CP88-6-000, pursuant to

VOL 54 ISS 46 MR 10 1989 UMI

section 7 of the Natural Gas Act, for MidCon Marketing Corp., (MidCon), a marketer, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport up to a maximum of 309,000 MMBtu of natural gas per day for MidCon from specific existing receipt points in Mississippi and Louisiana to specific delivery points in Attala County, Mississippi. United anticipates transporting up to 309,000 MMBtu on a peak day and average day, and 112,785,000 MMBtu annually for MidCon. United explains that service commenced February 1, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-2269.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**14. Tennessee Gas Pipeline Company**

[Docket No. CP89-914-000]

March 6, 1989.

Take notice that on February 27, 1989, Tennessee Gas Pipeline Company (Tennessee) filed in Docket No. CP89-914-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to provide interruptible transportation services for Brooklyn Union Exploration Company, Inc. (Brooklyn), a producer, under its blanket certificate issued in Docket No. CP87-115-000 under section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee proposes to transport natural gas for Brooklyn on an interruptible basis under Tennessee's Rate Schedule IT. Tennessee states that it would transport up to 51,400 dt equivalent of natural gas on a peak day, 51,400 dt equivalent of natural gas on an average day, and 18,761,000 dt equivalent of natural gas on an annual basis. Tennessee asserts that no new facilities are required to implement the proposed transportation service. Tennessee states that it commenced the transportation service pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations as reported in Docket No. ST89-2295.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**15. United Gas Pipe Line Company**

[Docket No. CP89-912-000]

March 6, 1989.

Take notice that on February 27, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-912-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Louisiana State Gas Corporation (Louisiana State), an intrastate pipeline company, under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United requests authorization to transport, on an interruptible basis, up to a maximum of 309,000 MMBtu of natural gas per day for Louisiana State from receipt points located in Louisiana, Texas and Mississippi to delivery points located in Louisiana, Florida, Alabama and Mississippi. United anticipates transporting an annual volume of 112,785,000 MMBtu.

United states that the transportation of natural gas for Louisiana State commenced November 18, 1988, as reported in Docket No. ST89-1742-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to United in Docket No. CP86-6-000.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**16. Interstate Power Company**

[Docket No. CP86-679-011]

March 6, 1989.

Take notice that on February 24, 1989, Interstate Power Company (IPC), 1000 Main Street, Dubuque, Iowa 52001, filed in Docket No. CP86-679-011 a petition to further amend the order issued October 7, 1986, in Docket No. CP86-679-000, as amended by orders issued October 7, 1987, and October 5, 1988, so as to increase the volume of natural gas IPC is authorized to transport for Hawkeye Chemical Company (Hawkeye), all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

IPC proposes to increase the authorized firm transportation volumes for Hawkeye from 22,000 million Btu per day to 23,000 million Btu per day as provided by a February 17, 1989, amendment to the September 27, 1987, transportation agreement. No other changes to the authorized transportation service is proposed.

*Comment date:* March 27, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

**17. Southern Natural Gas Company**

[Docket No. CP89-915-00]

March 6, 1989.

Take notice that on February 27, 1989, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP89-915-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations for authorization to transport gas on an interruptible basis for Sonat Marketing Company (Marketing) under Southern's blanket certificate issued in Docket No. CP88-316-000 pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Southern would perform the proposed transportation service for Marketing, a marketer, pursuant to a service agreement dated December 12, 1988, under Southern's Rate Schedule IT. The service agreement is for a primary term of one month with successive terms of one month thereafter unless cancelled by either party. The service agreement provides for a maximum quantity of 120,000 MMBtu of gas on a peak day but Marketing anticipates requesting 54,794 MMBtu of gas on an average day, and accordingly, 20,000,000 MMBtu of gas on an annual basis. Southern proposes to receive the gas at various receipt points in offshore Texas and offshore Louisiana for delivery to points in offshore Louisiana and Refugio County, Texas. Southern asserts that no new facilities are required to implement the proposed service.

Southern advises that service under § 284.223(a) commenced on December 30, 1988, as reported in Docket No. ST89-1788-000 (filed January 17, 1989).

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**18. United Gas Pipe Line Company**

[Docket No. CP89-906-000]

March 6, 1989.

Take notice that on February 24, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-906-000, a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) and the Natural Gas Policy Act (18 CFR 284.223) for authorization to provide a transportation service for EnTrade Corporation (EnTrade), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP86-6-000 pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport, on an interruptible basis, up to 103,000 MMBtu of natural gas equivalent per day pursuant to a transportation agreement dated January 9, 1989, between United and EnTrade. United would receive natural gas at various receipt points in Texas, Louisiana and Mississippi and redeliver equivalent volumes of gas, less fuel and company used gas, at various delivery points in Louisiana, Mississippi and Alabama.

United further states that the estimated average daily and annual quantities would be 103,000 MMBtu and 37,595,000 MMBtu, respectively. Service under § 284.223(a) commenced January 18, 1989, as reported in Docket No. ST89-2264-000, it is stated.

*Comment date:* April 20, 1989, in accordance with Standard Paragraph G at the end of this notice.

**19. Transcontinental Gas Pipe Line Corporation**

[Docket No. CP89-889-000]

March 6, 1989.

Take notice that on February 23, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP89-889-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

It is stated that Transco proposes to abandon its Austral-Lake Arthur Metering and Regulating Station and appurtenant facilities, and the 730-horsepower Compressor Station No. 46 in Lake Arthur Field, Jefferson Davis Parish, Louisiana (Lake Arthur Field). Transco also states that these facilities are no longer necessary and maintenance costs are prohibitive.

Tranco states that in December 1957, it entered into certain producer contracts to purchase gas for the Transco system. Transco further states that it was subsequently authorized to construct Station No. 46 in order to raise the pressure of the production of gas from wellhead pressure to pipeline pressure. Transco states that in 1982, it notified the respective producers that (1) the compression facilities were inadequate to provide sufficient compression for the gas produced to be delivered into Transco's facilities and the addition of another compressor was uneconomical, (2) Transco had entered into a transportation agreement with Texas Gas Transmission Corporation (Texas Gas) for the gas Transco was purchasing and Transco was requesting the producers to provide the necessary compression facilities at their own wells, with Transco paying the attributable compressor fuel costs, and (3) the point of delivery and gas ownership would be changed to reflect the delivery point at Texas Gas' Eunice Gas Processing Plant and existing measuring station. Transco states that since compression at the Lake Arthur Field was not longer needed, it advised Superior Oil Company on October 21, 1983 and December 16, 1983, of cancellation of its existing operation and maintenance agreement for the Austral-Lake Arthur Metering and Regulating Station and Station No. 46. It is stated that such facilities have not been utilized since that time.

*Comment date:* March 27, 1989, in accordance with Standard Paragraph F at the end of this notice.

**20. Panhandle Eastern Pipe Line Company**

[Docket No. CP89-904-000]

March 6, 1989.

Take notice that on February 24, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP89-904-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon part of its sales service provided to Ohio Gas Company (Ohio Gas), an existing jurisdictional sales customer, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle states that pursuant to § 284.10 of the Commission's Regulations, Ohio Gas has elected to convert a portion of their firm sales entitlements to firm transportation. Panhandle further states that they have entered into sales agreements with Ohio Gas dated October 1, 1988 and February 1, 1989 and requests partial abandonment be effective on October 1, 1989 and February 1, 1989. Panhandle proposes to reduce Ohio Gas' annual total contract demand from 14,303,625 Mcf to 11,021,180 Mcf under Rate Schedule G-1.

*Comment date:* March 27, 1989 in accordance with Standard Paragraph F at the end of the notice.

**Standard Paragraphs**

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regualtory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be dully given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

BILLING CODE 6717-01-M

VOL 54 ISS 46 MR 10 1989 UMI

[Project No. 10061-001]

**City of Atlanta, GA; Surrender of Preliminary Permit**

March 3, 1989.

Take notice that the City of Atlanta, Georgia, permittee for the Lake Lanier Reregulation Project located on the Chattahoochee River in Buford, Gwinnett, and Forsyth Counties, Georgia has requested that its preliminary permit be terminated. The preliminary permit was issued on February 11, 1987, and would have expired on January 31, 1990. The permittee states that analysis of the project did not indicate feasibility for development.

The permittee filed the request on January 27, 1989, and the preliminary permit for Project No. 10061 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.20007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

BILLING CODE 6717-01-M

[Docket No. QF89-156-000]

**Robbins Resource Recovery Co.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility**

March 6, 1989.

On February 23, 1989, Robbins Resource Recovery Company (Applicant), of 1101 Market Street, Suite 2500, Philadelphia, Pennsylvania submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Cook County, Illinois. The facility will consist of two circulating fluidized bed boilers and a condensing turbine generator unit. The net electric power production capacity will be approximately 40.6 megawatts. The primary energy source will be biomass in the form of municipal solid waste. Approximately 6.2 percent of the total annual energy input to the facility will be from oil, which will be used for start up, testing, flame stabilization and control purposes.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

[FR Doc. 89-5557 Filed 3-9-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TQ89-2-000; RP88-141-002, TA89-1-3-002]

**East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions**

March 6, 1989.

Take notice that on March 1, 1989, East Tennessee Natural Gas Company (East Tennessee) is filing ten copies of the following revised tariff sheets to Original Volume No. 1 its FERC Gas Tariff.

Forty-Ninth Revised Sheet No. 4
Substitute Third Revised Sheet No. 123
Substitute Third Revised Sheet No. 123A
Substitute Sixth Revised Sheet No. 124

East Tennessee states that the revisions to Forty-Ninth Rev. Sheet No. 4 are to reflect a Purchased Gas Adjustment (PGA) to East Tennessee's Rates for the quarterly period of April 1989 through June 1989 pursuant to section 22.2 of the General Terms and Conditions of East Tennessee's Tariff. Sheet Nos. 123–124 have been revised to eliminate a typographical error and clarify that the jurisdictional portion of supplier refunds will be determined at the time the amounts are recorded in the Refund Subaccount. These sheets are substitutes for those previously filed in Docket No. RP88–141.

East Tennessee states that it also files a petition for waiver of certain requirements of § 154.310 of the Commission's Regulations. This petition is in response to the Commission's Order on December 30, 1988 in Docket No. TA89–1–2.

East Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Project No. 2510 Oregon]

**City of Eugene, OR; Intent To File an Application for a New License**

March 3, 1989.

Take notice that on December 23, 1988, the City of Eugene (Eugene Water & Electric Board), the existing licensee for the Walterville Hydroelectric Project No. 2510, filed a notice of intent to file an application for a new license, pursuant to section 15(b)(1) of the Federal Power Act (Act), 16 U.S.C. 808, as amended by section 4 of the Electric Consumers Protection Act of 1986, Public Law 99–495. The original license for Project No. 2510 was issued effective January 1, 1949, and will expire December 31, 1993.

The project is located on the McKenzie River in Lane County, Oregon. The principal works of the Walterville Project include the Walterville Canal, 4 miles long and 2,575 cfs capacity, with a gated headworks and plant forebay termination; a pumped storage pond of 65 acres at the right bank of the canal three miles below the headworks; a gated forebay, siphon bypass, and 130-foot-long penstock; a powerhouse with an installed capacity of 8,000 KW; a 12/66–kV substation with two taps to the Leaburg-Currin line; and appurtenant facilities.

Pursuant to section 15(b)(2) of the Act, the licensee is required to make available certain information described in Docket No. RM87–7–000, Order No. 496 (Final Rule issued April 28, 1988). A copy of this Docket can be obtained from the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street NE., Washington, DC 20426. The above information as described in the rule is now available from the licensee at 500 East Fourth Avenue, Eugene, OR 97401, Attn: Mr. Gale Banry, telephone (503) 484–2411.

Pursuant to section 15(c)(1) of the Act, each application for a new license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by December 31, 1991.

Lois D. Cashell,

*Secretary.*

[FR Doc. 89-5563 Filed 3-9-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. SA89-4-000]

**Marathon Oil Co.; Petition for Adjustment and Stay of Refund Obligation**

March 3, 1989.

Take notice that on February 17, 1989 Marathon Oil Company (Marathon), filed a petition for waiver or adjustment under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA). Marathon seeks relief from the refund requirement of an order issued by the Director Office of Pipeline and Producer Regulations (Director) on October 28, 1988 in Docket Nos. CI88–452–000, *et al.* The Director ordered refunds consistent with *Tenneco Oil Company*, 34 FERC ¶ 61,143 (1986). *Tenneco* prohibits a successor-in-interest that files its application for a successor certificate more than one year after acquiring property from retaining monthly escalations until it files its application for a certificate. Marathon also requests a stay of the refund requirement. Marathon's request for a stay of its refund obligation is granted pending final Commission action on this petition.

Marathon states that on June 20, 1984 it informed the Commission of its May 31, 1984 acquisition of Husky Oil Company (Husky), and of Marathon's intention to continue Husky's small producer sales under Husky's existing contracts. Marathon states that in 1984 and prior to February 5, 1988, there was no deadline for the filing of applications for successor-in-interest certificates. Marathon states that although it filed its application for successor certificates on June 10, 1988, it was not issued certificates until October 26, 1988. Furthermore, Marathon states that most of the refund obligation imposed on Marathon by the Director's order is attributable to uncollectible royalty payments to the Minerals Management Service of the United States Department of the Interior. Marathon states that if these royalty payments are not waived its total refund will exceed escalations received from all revenues between March 31, 1984 and June 10, 1988. Marathon states that if its refund obligation is not waived it will suffer an inequity and an unfair distribution of burdens.

The procedures applicable to the conduct of this proceeding are set forth in Rules 1101–1117 (Subpart K) of the Commission's rules of practice and procedure. Any person desiring to participate in this proceeding must file a motion to intervene in accordance with Rule 1105. All motions to intervene must be filed within 15 days after publications of this notice in the Federal Register.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. TQ89-3-38-000]

**Ringwood Gathering Co.; Proposed Changes in FERC Gas Tariff**

March 6, 1989.

Take notice that on March 1, 1989, Ringwood Gathering Company (Ringwood), 4828 Loop Central Drive, Loop Central Three, Suite 850, Houston, Texas 77081, filed Substitute Forty-Ninth Revised Sheet No. PGA–1 to its FERC Gas Tariff reflecting its current quarterly pursuant to 18 CFR 154.304 and 154.308.

Copies of the filing were served upon Ringwood's jurisdictional customers and interested state agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to the taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. TQ89-2-6-000]

**Sea Robin Pipeline Co.; Filing of Revised Tariff Sheet**

March 6, 1989.

Take notice that on March 1, 1989, Sea Robin Pipeline Company (Sea Robin) tendered for filing the following tariff sheet:

Original Volume No. 1

Fifty-Sixth Revised Sheet No. 4

Sea Robin states that the proposed date of the referenced tariff sheet in this docket is April 1, 1989. The above referenced tariff sheet is being filed pursuant to §§ 154.304 and 154.308 of the Commission's regulations to reflect the changes in the purchased gas cost adjustment provisions contained in sections 1 and 4 of Sea Robin's FERC Gar Tariff, Original Volume No. 1.

Sea Robin states that the tariff sheet is filed to reflect a decrease in gas cost of $.0108 under Rate Schedules X–1 and X–2. This produces a current effective commodity charge of $3.2418. Sea Robin states that there is no change in gas cost under Rate Schedules X–7 and X–8.

Sea Robin states that the revised tariff sheet and supporting data are being mailed to its jurisdictional sales customers and to interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's regulations. All such motions or protests should be filed on or before March 14, 1989.

Protests will be considered by the Commission in determining appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

VOL 54 ISS 46 MR 10 1989 UMI

with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

[Docket No. TQ89-2-11-000]

**United Gas Pipe Line Co.; Filing of Revised Tariff Sheets**

March 6, 1989.

Take notice that on March 1, 1989, United Gas Pipe Line Company (United) tendered for filing to its FERC Gas Tariff First Revised Volume No. 1, the following tariff sheets:

*To Be Effective January 1, 1989*

Third Revised Sheet No. 4-G

*To Be Effective April 1, 1989*

Eighty-Fifth Revised Sheet No. 4
Fourth Revised Sheet No. 4.1
Fourth Revised Sheet No. 4-G

United states that these tariff sheets are filed pursuant to §§ 154.304, 154.305 and 154.308 of the Commission's regulations to reflect the changes in the purchased gas cost adjustment provisions contained in Section 19 of United's FERC Gas Tariff, First Revised Volume No. 1.

United states that these tariff sheets reflect a Current Adjustment to the commodity gas rate of $(.0159) per Mcf and a Cumulative Adjustment to the commodity gas rate of $(.4956) per Mcf. This produces a current effective commodity rate of $2.6939.

United states that the revised tariff sheets and supporting data are being mailed to its jurisdictional sales customers and to interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 N. Capitol Street NE., Washington, DC 20426, in such accordance with §§ 285.214 and 385.211 of the Commission's regulations. All such motions or protests should be filed on or before March 14, 1989.

Protests will be considered by the Commission in determining appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**West Texas Gas, Inc.; Filing**

March 6, 1989.

Take notice that on February 28, 1989, West Texas Gas, Inc. (WTG) filed Fourteenth Revised Sheet No. 3a to its FERC Gas Tariff, Original Volume No. 1, proposed to be effective April 1, 1989. This tariff sheet was filed by WTG in accordance with the Commission's purchased gas adjustment regulations.

Copies of the filing were served upon WTG's customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214 (1987)). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## FEDERAL COMMUNICATIONS COMMISSION

**Common Carrier Public Mobile Services Information; Mobile Services Division Licensees Need No Longer Annually File FCC Form 430**

March 6, 1989.

On November 16, 1988, the Commission released a *Report and Order*, CC Docket No. 88-161, FCC 88-339 (*Report and Order*), which, among other things, revised § 22.11(a) of the Rules to require that Part 22 licensees need no longer annually file FCC Form 430 except that they must continue to file FCC Form 430 in response to line 18 of FCC Form 490.

The *Report and Order* stated that a public notice would be issued announcing the effective date of the new rules, at para. 31. Effective immediately, Part 22 licensees need not file annually FCC Form 430. This rule change is approved by the Office of Management and Budget under control number 3060-0420. Applicants for assignments and transfers of control must comply with § 22.11(a) as set forth below:

Miscellaneous forms shared by all domestic public radio services

(a) Licensee qualifications. FCC Form 430 ("Common Carrier and Satellite Radio Licensee Qualifications Report") shall be filed by Mobile Service licensees only as required by Form FCC 490 (Application for Assignment or Transfer of Control Under Part 22).

This public notice does not apply to the effective date of any other rule section.

Federal Communications Commission

## FEDERAL DEPOSIT INSURANCE CORPORATION

**Information Collection Submitted to OMB for Review**

**AGENCY:** Federal Deposit Insurance Corporation.

**ACTION:** Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act.

**SUMMARY:** The submission is summarized as follows:

*Type of Review:* Renewal without any change.

*Title:* Application for Assistance to Operating Insured Banks which are in Danger of Failing.

*Form Number:* None (letter application).

*OMB Number:* 3064-0071.

*Expiration Date of Current OMB Clearance:* April 30, 1989.

*Frequency of Response:* On occasion.

*Respondents:* Insured banks in danger of failing or companies which control or will control insured banks in danger of failing applying for financial assistance from the FDIC to prevent the closing of the banks.

*Number of Respondents:* 100.

*Number of Responses per Respondent:* 1.

*Total Annual Responses:* 100.

*Average Number of Hours per Response:* 40.

*Total Annual Burden Hours:* 4,000.

*OMB Reviewer:* Gary Waxman, (202) 395-7340, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

*FDIC Contact:* John Keiper, (202) 898-3810, Assistant Executive Secretary, Room 6096, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

*Comments:* Comments on this collection of information are welcome and should be submitted on or before May 9, 1989.

**ADDRESSES:** A copy of the submission may be obtained by calling or writing the FDIC contact listed. Comments regarding the submission should be addressed to the OMB reviewer listed. The FDIC would be interested in receiving a copy of the comments.

**SUPLEMENTARY INFORMATION:** The FDIC is requesting OMB approval to extend the clearance of the information collection pertaining to the application for financial assistance under 12 U.S.C. 1823(c) to prevent the closing of an insured bank which is in danger of failing. The applicant provides, in letter form, information about the amount, terms and conditions of the assistance requested from the FDIC and evidence that the bank will have the managerial and financial resources to be a viable institution in the future. The applicant's proposal must also meet the guidelines set forth in the FDIC's Statement of Policy regarding the criteria on assistance to operating insured banks.

Dated: March 6, 1989.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

*Executive Secretary.*

## FEDERAL HOME LOAN BANK BOARD

[No. 89-538]

**Delegation of Authority To Appoint Conservator for Insolvent FSLIC Insured Institutions**

Date: March 7, 1989.

**AGENCY:** Federal Home Loan Bank Board.

**ACTION:** Notice.

**SUMMARY:** The Board is amending the conditions for the exercise of the delegated authority which the Board

VOL 54 ISS 46 MR 10 1989 UMI

authorized by Resolution No. 89-194 to provide that such authority may be exercised by the Executive Directors of the FSLIC and ORA, with the concurrence of the General Counsel, and to indicate more specifically the extent of such delegated authority.

**EFFECTIVE DATE:** March 7, 1989.

**FOR FURTHER INFORMATION CONTACT:** Lawrence W. Hayes, Deputy General Counsel for FSLIC, (202) 906-6428; David N. Wall, Assistant General Counsel for FSLIC, (202) 906-7397; or Vicki L. Hawkins, Attorney, Office of General Counsel, (202) 906-7034, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

**SUPPLEMENTARY INFORMATION:** By Resolution No. 89-194, dated February 14, 1989, the Federal Home Loan Bank Board ("Board") authorized the performance of the Board's function of appointing the Federal Savings and Loan Insurance Corporation ("FSLIC") as conservator for Federally-chartered and other insured institutions, not for the purpose of liquidation, by the Executive Director of the FSLIC, the Executive Director of the Office of Regulatory Activities ("ORA") and the General Counsel of the Bank Board, jointly, upon certain conditions and in accordance with specified procedures. The delegated authority may not be exercised in cases where it is determined that a significant issue of law or policy is involved.

The Board has adopted the following resolution:

*Resolved*, That, pursuant to section 17(a) of the Federal Home Loan Bank Act, 12 U.S.C. 1437(a) (1982), the Federal Home Loan Bank Board ("Board") hereby authorizes the performance of the Board's function of appointing the Federal Savings and Loan Insurance Corporation ("FSLIC") as conservator of federally chartered and other insured institutions, not for the purpose of liquidation, in certain conditions, as follows:

1. The Executive Director of the FSLIC and the Executive Director of the Office of Regulatory Activities, with the concurrence of the General Counsel of the Board (each an "Executive Director" and collectively, "Executive Directors") may jointly exercise the authority of the Board to appoint the FSLIC as conservator of a Federal association, not for the purpose of liquidation, pursuant to section 5(d)(6)(A) and (B) of the Home Owners' Loan Act of 1933, as amended ("HOLA"), 12 U.S.C. 1464(d)(6)(A) or (B), or as conservator of an insured institution other than a Federal association, not for the purpose of liquidation, pursuant to section 406(c)(1)(B) or (2) of the National Housing Act, as amended ("NHA"), 12 U.S.C. 1729(c)(1)(B) or (2) (1982), *Provided, however*, That such authority shall not be exercised if any Executive Director determines that a significant issue of law or policy is involved in the appointment, the determination of a ground for the appointment, or the issuance of an order or resolution concerning the terms of the appointment. The authority granted by this resolution includes the authority to appoint or replace a conservator, not for the purpose of liquidation, to determine or opine that a ground for such appointment exists, and to issue orders and resolutions, each in the form of an order or resolution previously issued by the Board in appointing a conservator, or in substantially similar form, that effect and implement such appointment or replacement, including, but not limited to, orders and resolutions providing for the notification of State officials, the exercise of powers by a conservator, and the indemnification of persons acting on behalf of the FSLIC as conservator. The authority granted by this resolution also includes the authority to modify the powers of conservators who have been appointed by the Executive Directors pursuant to delegated authority: *Provided, however*, That the authority to mdify the powers of such conservators shall not be exercised if any Executive Director determines that a significant issue of law or policy is involved;

2. Each Executive Director may further designate no more than two subordinate officers, each of whom may exercise the authority conferred upon such Executive Director by this resolution. An Executive Director shall file with the Secretary or an Assistant Secretary to the Board the name of any subordinate designated pursuant to the previous sentence and the revocation of any such designation by such Executive Director; and such designation or revocation shall be effective only upon such filing;

3. An Executive Director who determines that a significant issue of law or policy would be involved in the appointment of the FSLIC as conservator for a Federal association or an insured institution shall file with the Secretary or an Assistant Secretary a statement setting forth such determination;

4. Any Board resolution issued pursuant to this resolution shall state in such resolution, but above its first paragraph, "Issued Under Delegated Authority;" and a resolution appointing the FSLIC as conservator or a group of resolutions issued on the same date to appoint the FSLIC as conservator and implement such appointment shall be preceded by a statement signed by or on behalf of the Executive Directors that the resolution is or the resolutions are issued under the authority of this resolution;

5. Each member of the Board, or an Assistant designated by a Board member to act on his or her behalf, shall be informed of any proposed exercise of joint authority under this resolution to appoint a conservator for a Federal association or an insured institution prior to the exercise of such authority; and

6. The Board reserves the power to appoint a conservator for a Federal association or an insured institution in any instance in which the Board determines to exercise such power directly and not through this resolution; and

*Resolved further*, That this Resolution shall be effective immediately upon its adoption by the Board; and

*Resolved further*, That this Resolution supersedes Board Resolution No. 89-194, dated February 14, 1989.

*Resolved further*, That the Secretary to the Board shall immediately forward this notice for publication in the **Federal Register**.

By the Federal Home Loan Bank Board.

**Nadine Y. Washington,**

*Assistant Secretary.*

BILLING CODE 6720-01-M

## FEDERAL TRADE COMMISSION

### Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

TRANSACTIONS GRANTED EARLY TERMINATION BETWEEN: 022089 AND 030389

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Family Support Administration

### Forms Submitted to the Office of Management and Budget for Clearance

The Family Support Administration (FSA) will publish on Fridays information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). Since the last scheduled publication for February 24, 1989, the following package was submitted to OMB: (For a copy of the package below, call the FSA, Reports Clearance Officer on 202 252-5587.) Evaluation of the 1984 Child Support Enforcement Amendments. This information request is needed to obtain information about Child Support Enforcement Program operations and costs in order to: 1) Evaluate the program; 2) determine the degree to which the 1984 Child Support Amendments strengthened the program, and 3) identify problems in the program that may limit program efficiency. Respondents will be Child Support Enforcement Program officers and staff.

*Number of Respondents:* 307.

*Frequency of Response:* 1.

*Average Burden per response:* 2.02.

*Estimated Annual Burden:* 620 hours.

*OMB Desk Clearance Officer:* Justin Kopca.

Written comments and recommendations for the proposed information collection should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3201, 1725 17th Street, NW., Washington, DC 20503.

Date: February 22, 1989.

**Naomi B. Marr,**

*Associate Administrator, Office of Information and Management Systems, FSA.*

### Public Health Service

### Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on March 3, 1989.

(Call Reports Clearance Officer on 202-245-2100 for copies of package)

1. Importer's Entry Notice, Form FDA Set 700—0910-0046—Type of Review: Extension. The Office of Management and Budget has set a common review period for all known Federal agency information collections used to obtain information necessary for the importation of merchandise into the United States. The purpose of the review is to plan for the elimination of the collection of duplicate information elements required from the importing public. The Food and Drug Administration (FDA) has the responsibility of assuring the admissibility of foods, drugs, medical devices, and cosmetics offered for import into the United States. Each sample taken requires certain documents which notify FDA of arrival of each shipment. ORO selects representative items for sampling and analysis. Respondents: Businesses or other for-profit; Number of Respondents: 60,000; Number of Responses per Respondent: 20; Average Burden per Response: .05 hours; Estimated Annual Burden: 60,000 hours.

2. Regulations Under the Federal Import Milk Act—0910-0212—Type of Review: Extension. The Office of Management and Budget has set a common review period for all known Federal agency information collections used to obtain information necessary for the implementation of merchandise into the United States. The purpose of the review is to plan for the elimination of the collection of duplicate information elements required from the importing public. The Import Milk Act prohibits the exportation of milk and cream to this country unless the shipper of such products holds a valid import permit from FDA. The Act requires documentation that all cows are healthy, dairy farms/plants are in good sanitary condition. Respondents: State or local governments, farms, businesses or other for-profit.

| | Number of respondents | Number of hours per response | Number of responses per respondent |
|---|---|---|---|
| Application for Permit to Ship/Transport Milk/Cres, Form FDA 1993 | 2 | .5 | 1 |
| Certificate/Transmittal for an Application Form FDA 1815 * | 2 | .25 | 1.5 |
| Sanitary Inspection of Dairy Farms, Form FDA 1996 | 2 | 1.5 | 126.5 |
| Sanitary Inspection of Milk Plants, Form FDA 1997 | 2 | 2 | 1.5 |
| Time and Temperature Recordings Recordkeeping | 2 | .05 | 126.5 |

Estimated Annual Burden: 400 Hours

* Submitted in lieu of Forms FDA 1994 and 1995, Report of Tuberculin Test of Physical Examination of Cows

3. Tea Chop List and Appellant's Application for Review of Examiner's Return—NEW—The Office of Management and Budget has set a common review period for all known Federal agency information collections used to obtain information necessary for the importation of merchandise into the United States. The purpose of the review is to plan for the elimination of the collection of duplicate information elements required from the importing public. This previously unidentified information collection will be part of this review. Importers of tea or merchandise described as tea are required by the Board of Tea Experts to submit samples for examination to determine compliance with prescribed standards of purity, quality, and fitness for consumption before being allowed entry into the U.S. Tea samples which have been rejected are reviewed upon request by the appellant. Respondents: Businesses or other for-profit. Number of Respondents: 4,500; Number of Responses per Respondent: 1; Average Burden per Response: .25 hour; Estimated Annual Burden: 1,125 hours.

4. Application for Authorization to Relabel or to Perform Other Actions—NEW—The Office of Management and Budget has set a common review period for all known Federal agency information collections used to obtain information necessary for the importation of merchandise into the United States. The purpose of the review is to plan for the elimination of the collection of duplicate information elements required from the importing public. This previously unidentified information collection will be part of this review. The information provided is necessary for agency review to determine authorization to relabel or recondition adulterated or misbranded imported articles. The importer supplies this information to FDA at the port of entry for the adulterated or misbranded article. If the information is not provided, the article is refused admission and must be exported within 90 days or destroyed. Respondents: Businesses or other for-profit, small businesses or organizations; Number of Respondents: 15,000; Number of Responses per Respondent: 1; Average Burden per Response: .25 hour; Estimated Annual Burden: 3,750 hours.

5. Established Populations for Epidemiologic Studies of the Elderly (EPESE) Seventh Follow-up—0925-0271—Little is known about the relationship between changes in health status and subsequent changes in driving practices, pedestrian needs, and mobility in general. This seventh follow-up will include questions about driving and pedestrian practices in relation to health status. Over 2,000 of the participants in the Iowa and New Haven EPESE sites are licensed to drive and will be asked questions about their driving practices. Respondents: Individuals or households; Number of Respondents: 4,650; Number of Responses per Respondent: 1; Average Burden per Response: .213 hour; Estimated Annual Burden: 990 hours.

Written comments and recommendations for the proposed information collections should be sent directly to the OMB Desk Officer designated above at the following address:

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

Date: March 6, 1989.

**Steven A. Grossman,**

*Deputy Assistant Secretary for Health, (Planning and Evaluation).*

### Social Security Administration

### Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Pub. L. 96-511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the **Federal Register** on February 24, 1989.

**Social Security Administration**

(Call Reports Clearance Officer on (301) 965-4149 for copies of package)

1. Time Report of Personnel Services for Disability Programs—0960-0408—The information collected on the form SSA-4514 is used by the Social Security Administration (SSA) for budgeting and accounting for the funds used by State agencies for personnel involved in making disability determinations for SSA. The respondents are State agencies which make those determinations.

*Number of Respondents:* 54.

*Frequency of Response:* 4.

*Average Burden Per Response:* 30 minutes.

*Estimated Annual Burden:* 108 hours.

2. Response to Notice of Revised Determination—0960-0347—The information collected on the form SSA-765 is used by the Social Security Administration to determine if a disability claimant or beneficiary wishes to submit additional evidence, or request a hearing before a favorable determination is revised to an unfavorable one. The respondents are claimants under titles II and XVI of the Social Security Act who wish to file for a hearing in response to a notice of a revised determination.

*Number of Respondents:* 3,202.

*Frequency of Response:* 1.

*Average Burden Per Response:* 30 minutes.

*Estimated Annual Burden:* 1,601 hours.

*OMB Desk Officer:* Justin Kopca.

Written comments and recommendations regarding these information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

Date: March 3, 1989.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

**[WY-940-09-4730-12]**

### Filing of Plats of Survey

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Filing of Plats of Survey.

**SUMMARY:** The plat of survey of the following described lands is scheduled to be officially filed in the Wyoming State Office, Bureau of Land Management, Cheyenne, Wyoming, forty-five (45) calendar days from the date of this publication.

Sixth Principal Meridian

T. 44 N., R. 118 W.

The plat representing the metes and bounds survey of Tract 37, situated in unsurveyed sections 11, 12, 13 and 14, containing 289.42 acres, more or less, T. 44 N., R. 118 W., Sixth Principal Meridian, Wyoming, Group No. 516, was accepted March 3, 1989.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

**ADDRESS:** All inquiries or protests concerning the technical aspects of the survey must be sent to the State Director, Bureau of Land Management, P.O. Box 1828, 2515 Warren Avenue, Cheyenne, Wyoming 82003.

Dated: March 3, 1989.

**Richard L. Oakes,**

*Chief, Branch of Cadastral Survey.*

BILLING CODE 4310-22-M

VOL 54 ISS 46 MR 10 1989 UMI

**Office of Surface Mining Reclamation and Enforcement**

**Availability of the Final Environmental Impact Statement on the Proposed Dry Fork Mine, Campbell County, Wyoming (Federal Coal Leases W-0271199, W-0271200, and W-0271201)**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Interior.

**ACTION:** Notice of availability of a final environmental impact statement (OSMRE–EIS–24).

**SUMMARY:** The Office of Surface Mining Reclamation and Enforcement (OSMRE) is making available a final environmental impact statement (EIS) on the proposed Dry Fork mine. The EIS has been prepared to assist the Department of the Interior in making a decision on the mining plan submitted by Phillips Petroleum Company (PPC) for its proposed surface coal mine, located approximately 5 miles north and east of Gillette, Wyoming.

**ADDRESSES:** Copies of the EIS may be obtained for a limited time from Raymond L. Lowrie, Assistant Director, Office of Surface Mining Reclamation and Enforcement, Western Field Operations, Brooks Towers, Second Floor, 1020—15th Street, Denver, Colorado 80202, Attention: Floyd McMullen.

**FOR FURTHER INFORMATION CONTACT:** Floyd McMullen, Dry Fork EIS Project Leader (telephone: 303–844–3104) at the Denver, Colorado, location given under "ADDRESSES."

**SUPPLEMENTARY INFORMATION:** PPC's proposed Dry Fork mine would be a new surface coal mine located in Campbell County, Wyoming, 5 miles north and east of the city of Gillette. The EIS analyzes the probable impacts that would result should the Secretary of the Interior approve the mining plan for, and PPC subsequently develop, the proposed mine. The EIS also analyzes the probable cumulative impacts that would result from surface coal mining operations, not only at the proposed Dry Fork mine but at the other proposed mine and the six existing mines located nearby, north and east of Gillette.

The life-of-mine (permit) area for the proposed Dry Fork mine, comprising 3,798.49 acres, is currently used for ranching and wildlife habitat. By mining the proposed life-of-mine area, PPC would extract 226.4 million tons of low-sulphur subbituminous coal over a 34-year period and, in the process, would disturb 2,905.0 acres. The peak annual production rate from the mine would be 15 million tons.

Altogether, the life-of-mine areas for the proposed Dry Fork mine and the other proposed and existing mines north and east of Gillette comprise 30,424 acres. Upon completion of mining and related activities, these eight mines would have disturbed about 21,744 acres and produced about 2.1 billion tons of coal.

Three alternatives are evaluated in the EIS. These include (1) approval of the proposed mining plan with conditions; (2) approval of the proposed mining plan with additional mitigation measures over and above the conditions of approval imposed under the first alternative; and (3) disapproval of the proposed mining plan. OSMRE has identified "approval of the proposed mining plan with conditions" as the preferred alternative.

**Brent Wahlquist,**

*Assistant Director, Program Policy.*

Date: March 1, 1989.

[FR Doc. 89–5227 Filed 3–9–89; 8:45am]

BILLING CODE 4310–05–M

## INTERNATIONAL TRADE COMMISSION

**Reprimand for Breach of Commission Protective Order**

**AGENCY:** U.S. International Trade Commission.

**ACTION:** Reprimands for Breach of Commission protective order.

**SUMMARY:** Notice is hereby given of the public reprimand by the U.S. International Trade Commission ("Commission") of Stephen L. Gibson, Esq., and Alan L. Madian, for the failure of each to report a known violation of a Commission protective order for nearly two months. Mr. Gibson, who assumed responsibility for reporting the violation to the Commission, has further been barred from access to confidential information in all Commission matters for a period of three months. The person who was directly responsible for the unauthorized disclosure, which was inadvertent, has been privately reprimanded.

**FOR FURTHER INFORMATION CONTACT:** Calvin Cobb, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E St., SW., Washington, DC 20436, Room 707–L. Telephone: 202–252–1103. Hearing impaired individuals are advised that information in this matter can be obtained by contacting the Commission's TDD terminal at 202–252–1810.

**SUPPLEMENTARY INFORMATION:** In connection with a Commission investigation, in May, 1988, Stephen L. Gibson, Esq., and Alan L. Madian filed with the Commission applications for administrative protective orders (APOs). In the applications each swore: (i) Not to disclose without written permission any of the information obtained under the APO except to certain enumerated categories of approved persons, and (ii) to promptly report any breach of the APO to the Secretary. Both also acknowledged in the APO that violation of the APO may subject each, and their firms, to debarment from practice before the Commission, referral to the U.S. Attorney or appropriate professional association, or "such other administrative sanctions determined to be appropriate * * *". The Commission granted each of the applications.

On the morning of June 22, Mr. Madian and Mr. Gibson had a telephone conversation in which a client referred to confidential business information (CBI) that he was not authorized to receive. Through this reference, Mr. Gibson and Mr. Madian learned that CBI had been inadvertently disclosed to the client (by a person who has been privately reprimanded by the Commission). Mr. Gibson immediately instructed the client to destroy the offending document, and not to discuss the CBI with anyone else. Mr. Gibson then telephoned the receptionist at the client's U.S. office and instructed her to return an express mail package containing CBI, unopened, which was done.

The CBI was part of an exhibit labeled "confidential", that contained a table submitted by domestic producers summarizing quarterly fabrication prices of a certain product under investigation. It was reviewed by a client not eligible for a protective order, who clearly read and understood the confidential data.

On August 15, 1988, nearly two months after the unauthorized disclosure of CBI, Mr. Gibson requested a meeting with the Secretary of the Commission. On August 16, 1988, Mr. Gibson and Mr. Madian came to the Commission and reported the disclosure. Pursuant to the Commission staff's inquiry, affidavits describing the sequence of events have been submitted by all the parties involved.

Stephen L. Gibson is reprimanded for failing promptly to report a known breach of a Commission APO, in direct contravention of the conditions of the APO. Mr. Gibson is further reprimanded for undertaking to report the violation to the Commission, which deterred Mr. Madian from performing his independent duty promptly to report the APO violation. For this misconduct, Mr. Gibson is barred from access to confidential business information in all Commission matters for a period of three months, running from March 6, 1989. Mr. Gibson has no record of prior misconduct before the Commission.

Alan L. Madian is reprimanded for failing to promptly report a known breach of a Commission APO, in direct contravention of the conditions of the APO. Mr. Madian apparently deferred to Mr. Gibson, who undertook to make the report to the Commission, in derogation of Mr. Madian's independent duty to report the APO violation. The Commission considers APO conditions to be independent duties undertaken by each individual covered thereby. In the future, the Commission may not consider an attempted delegation of an independent duty under an APO as mitigation for failure to conform to that duty. Mr. Madian has no record of prior misconduct before the Commission.

The person directly responsible for the disclosure has been issued a private letter of reprimand, for inadvertently failing to prevent the unauthorized disclosure of CBI. There is no record of prior misconduct before the Commission with respect to this person. This person apparently was not aware of the unauthorized disclosure until shortly before it was reported to the Commission, and has therefore not been held accountable for the knowing delay in reporting the APO violation.

By Order of the Commission.

**Kenneth R. Mason,**

*Secretary.*

Issued: March 6, 1989.

[FR Doc. 89–5532 Filed 3–9–89; 8:45 am]

BILLING CODE 720–02–M

## INTERSTATE COMMERCE COMMISSION

**Forms under review by Office of Management and Budget**

The following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) is being submitted to the Office of Management and Budget for review and approval. Copies of the forms and supporting documents may be obtained from the Agency Clearance Officer, Ray Houser (202) 275–6723. Comments regarding this information collection should be addressed to Ray Houser, Interstate Commerce Commission, Room 1319, 12th and Constitution Ave., NW., Washington, DC 20423 and to Gary Waxman, Office of Management and Budget, Room 3228 NEOB, Washington, DC 20503, (202) 395–7340.

*Type of Clearance:*—Extension.
*Bureau/Office:*—Bureau of Accounts.
*Title of Form:*—Classification Index Survey Form for Railroads that do not file an annual report with the Interstate Commerce Commission.
*OMB Form No.:*—3120–0077.
*Agency Form No.:*—RCS.
*Frequency:*—Annually.
*Respondents:*—Railroads.
*No. of Respondents:*—479.
*Total Burden Hrs.:*—44 (5.5 minutes average per response).
*Brief Description of the need & proposed use:*—The purpose of establishing a classification Index Survey form is to reclassify the Railroads based on carrier operating revenues.

[Finance Docket No. 31388]

## Decision Accepting Application of R.J. Corman Railroad Co./Memphis Line; Acquisition of CSX Transportation, Inc. Line Between Warwick and Uhrichsville, OH

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of decision accepting application for consideration.

**SUMMARY:** The Commission is accepting for consideration the application, filed February 8, 1989, by R.J. Corman Railroad Company/Memphis Line to acquire CSX Transportation, Inc.'s 48.9-mile line of railroad between Warwick and Uhrichsville, OH. Pursuant to 49 CFR Part 1180, the Commission finds this to be a minor transaction.

**DATES:** Written comments must be filed with the Interstate Commerce Commission no later than April 10, 1989. Written comments from the Secretary of Transportation and Attorney General of the United States must be filed by April 24, 1989. Applicants' reply is due May 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Joseph H. Dettmar, (202) 275-7245.
[TDD for hearing impaired: (202) 275-1721]

**ADDRESSES:** An original and 10 copies of all documents must be sent to:
Office of the Secretary, Case Control Branch, Attn: Finance Docket No. 31388, Interstate Commerce Commission, Washington, DC 20423.
In addition, one copy of all documents in this proceeding must be sent to each of applicants' representatives:
Lawrence H. Richmond, CSX Transportation, Inc., 100 North Charles Street, Baltimore, MD 21201.
Kevin M. Sheys, Weiner, McCaffrey, Brodsky & Kaplan, P.C., 1350 New York Avenue NW., Washington, DC 20005-4797.

**SUPPLEMENTAL INFORMATION:** On August 30, 1988, R.J. Corman Railroad Company/Memphis Line (RJCM) and CSX Transportation, Inc. (CSXT), collectively referred to as applicants, filed an application seeking Commission approval and authorization, pursuant to 49 U.S.C. 11343, et seq., of RJCM's acquisition of a 48.9-mile CSXT line between Warwick and Uhrichsville, OH. Applicants contend that the subject acquisition transaction is a minor transaction under 49 CFR 1180.2(c) and submit an application containing information in accordance with the railroad consolidation regulations at 49 CFR Part 1180 for minor transactions.

RJCM is a Class III common carrier, and is controlled by Richard J. Corman, an individual. CSXT is a Class I common carrier, and is a unit of CSX Corporation. RJCM currently has 62 miles of line, with its main line extending between South Union, KY, and Zinc, TN. RJCM's existing line handles no overhead traffic and does not connect with the line to be acquired from CSXT. The line to be acquired connects with Consolidated Rail Corporation at Uhrichsville and Massillon, OH, with CSXT at Warwick, OH, and with a Norfolk Southern Corporation line at Massillon, OH.

Applicants state that the proposed transaction will relieve CSXT of the inherent inefficiencies of a branch line operation while expanding RJCM's existing operations, thereby spreading RJCM's operating costs over a larger revenue base. As a result, they allege that both carriers will realize operating efficiencies. Presently, all of the patrons located on the line are served directly only by CSXT and not by any other railroad, and CSXT and RJCM do not compete for originating and terminating freight traffic on the line. Consequently, applicants contend that, unlike a railroad consolidation, the proposed transaction will not result in the loss of competitive rail service to patrons served by the carriers involved in this transaction, but rather the transaction will dilute CSXT's market power in the area. Applicants further state that CSXT's patrons presently enjoy substantial intermodal competition and that the proposed transaction should enable the rail mode to compete more effectively with other modes of surface transportation by providing all of the rail patrons between Warwick and Uhrichsville with more responsive and efficient rail service specifically tailored to local needs. RJCM plans to integrate the line into its existing operations, so the proposed transaction should have no adverse effect on RJCM employees. CSXT has commenced negotiation of appropriate agreements with its employees who may be adversely affected by this transaction, pursuant to the provisions set forth in *New York Dock Railway—Control—Brooklyn Eastern District Terminal*, 360 I.C.C. 60, *aff'd sub nom. New York Dock Railway v. United States*, 609 F.2d 83 (2d Cir. 1979). RJCM states that when it requires additional employees for the acquired line, it will offer employment on a preferential basis to CSXT employees who worked on the line.

Under the consolidation regulations we must initially determine whether a proposal is major, significant, minor, or exempt. The proposed transaction involves a Class I and Class III railroad. It has no regional or national significance and will neither result in any major market extension nor reduce the present level of competition. Accordingly, we find that the proposal is a minor transaction under 49 CFR 1180.2(c) and, because the application complies with the applicable regulations, we are accepting it for consideration.

The application and exhibits are available for inspection in the Public Docket Room at the Offices of the Interstate Commerce Commission in Washington, DC. In addition, they may be obtained upon request from applicants' representatives named above.

Any interested persons, including government parties, may participate in this proceeding by submitting written comments regarding the application. Comments must be filed no later than April 10, 1989. The Secretary of Transportation and Attorney General of the United States must file their comments no later than April 24, 1989. An original and 10 copies must be filed with the Secretary, Interstate Commerce Commission, Washington, DC 20423.

Written comments must be concurrently served by first-class mail on the United States Secretary of Transportation, the Attorney General of the United States, and the applicants' representatives. Written comments must also be served on all parties of record within 10 days of service of the service list by the Commission. We plan to issue the service list by April 24, 1989. Any person who files timely written comments shall be considered a party of record if the person's comments so request. In this event, no petition for leave to intervene need be filed. Consistent with 49 CFR 1180.4(d)(1)(iii), written comments must contain:

(A) The docket number and title of the proceeding;

(B) The name, address, and telephone number of the commenting party and its representative upon whom service shall be made;

(C) The commenting party's position, i.e., whether it supports or opposes the proposed transaction;

(D) A statement of whether the commenting party intends to participate formally in the proceeding or merely comment upon the proposal;

(E) If desired, a request for an oral hearing with reasons supporting this request; the request must indicate the disputed material facts that can only be resolved at a hearing; and

(F) A list of all information sought to be discovered from applicant carriers.

Because we have determined that the proposal in this proceeding constitutes a minor transaction, no responsive applications will be permitted. The time limits for processing a minor transaction are set forth at 49 U.S.C. 11345(d).

Discovery may begin immediately. We admonish the parties to resolve all discovery matters amicably.

This action will not significantly affect either the quality of the human environment or energy conservation.

*It is ordered:*

1. This proposal is found to be a minor transaction under 49 CFR 1180.2(c).

VOL 54 ISS 46 MR 10 1989 UMI

2. The application in Finance Docket No. 31388 is accepted for consideration.

3. The parties shall comply with all provisions as stated above.

4. This decision is effective on the date of service.

Decided: March 3, 1989.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Andre, Lamboley, and Phillips.

**Noreta R. McGee,**

*Secretary.*

BILLING CODE 7035-01-M

## DEPARTMENT OF JUSTICE

### Lodging of Partial Consent Decree; William J. O'Hara, et al.

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on February 24, 1989 a proposed partial consent decree in *United States of America v. William J. O'Hara, Betty B. O'Hara, William J. O'Hara, Inc., Smithkline Beckman Corporation, Ahumax Inc., Congoleum Corporation, Sandvik, In., Scott Paper Company and Childers Products Company*, Civil Action No. 89-1393 was lodged with the United States District Court for the Eastern District of Pennsylvania.

The proposed partial consent decree concerns a judicial enforcement action brought by the United States against the Defendants under the Comprehensive Environmental Response, Compensation, and Liability Act. The complaint filed by the United States alleges that the defendants are jointly and severally liable for response costs incurred and to be incurred by the United States in response to the release or threatened release of hazardous substances at the Henderson Road Injection Well Operable Unit at 372 South Henderson Road, Upper Merion Township, Montgomery County, Pennsylvania. The Complaint also seeks injunctive relief to address an actual and/or threatened imminent and substantial endangerment to the public health and the environment, as well as performance of a remedial design/remedial action ("RD/RA") at the Site pursuant to section 106 of CERCLA. The Site contains thirty-six chemicals of concern including high concentrations of the carcinogenic chemicals vinyl chloride, 1-1 trichloroethane and tetrachloroethene. At least 600,000 gallons of hazardous waste materials may have been disposed into a well on the Site in the late 1970s. These wastes have contaminated ground waters at and in the vicinity of the site that are a source for a major public drinking water supply, the Upper Merion Reservoir ("UMR"), and an off-site industrial well, the McIlvain well.

The proposed partial consent decree requires Defendants to, among other things, pay $188,054.77 in past EPA response costs, initiate and complete a $5.5—7.5 million remedy of the contaminated groundwater at the Site, and pay EPA's oversight costs for the work performed under the Partial Consent Decree.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. William J. O'Hara, et. al.* D.J. Ref. 90-11-2-301.

The proposed consent decree may be examined at the office of the United States Attorney, Eastern District of Pennsylvania, 3310 U.S. Courthouse, 601 Market Street, Independence Mall West, U.S. Courthouse, Philadelphia, Pennsylvania 19106 and at the Region III office of the Environmental Protection Agency, Office of Regional Counsel, 841 Chestnut Street, Philadelphia, Pennsylvania 19107. A copy of the proposed consent decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1521, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land & Natural Resources Division, Department of Justice. In requesting a copy, please enclose a check in the amount of $6.00 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

**Donald A. Carr,**

*Acting Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice.*

[FR Doc. 89-5601 Filed 3-9-89; 8:45 am]

BILLING CODE 4410-01-M

### Lodging of Consent Decree; Rutgers, the State University of New Jersey

In accordance with Departmental policy, 28 CFR 50.7, section 122(d)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9622(d) (2), and section 7003 (d) of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6973(d), notice is hereby given that on February 28, 1989 a proposed consent decree in *United v. Rutgers the State University of New Jersey*, Civil Action No. 89-0123, was lodged with the United States District Court for the District of Rhode Island. The proposed consent decree involves claims by the United States for recovery of clean-up costs incurred and to be incurred at the Picillo Farm Superfund Site in Coventry, Rhode Island. These claims were brought against defendant Rutgers pursuant to CERCLA.

The proposed consent decree requires the defendants to pay $50,000 to the State of Rhode Island and the United States Environmental Protection Agency ("EPA") for past costs expended at the Site. In return, the defendant is given a release from all civil claims for costs or injunctive relief related to the Site pursuant to the provisions of section 122(f) and (g) of CERCLA, 42 U.S.C. 9622(f) and (g). The defendant is also given a release for natural resource damage claims.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Rutgers, the State University of New Jersey*, D.J. Ref. No. 90-11-2-131.

The proposed consent decree may be examined at the Office of the United States' Attorney for the District of Rhode Island, 223 Federal Building and Courthouse, Kennedy Plaza, Providence, Rhode Island 02903 and at the Region I Office of the United States Environmental Protection Agency, John F. Kennedy Federal Building, Room 2203, Boston, Massachusetts 02203. Copies may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.30 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

**Donald A. Carr,**

*Acting Assistant Attorney General, Land and Natural Resources Division.*

## Antitrust Division

### National Cooperative Research Act of 1984; B.F. Goodrich Co. and European Vinyls Corporation Joint Venture

Notice is hereby given that, on February 3, 1989, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), a joint venture formed by B.F. Goodrich Company, Geon Vinyl Division, and European Vinyls Corporation (Holdings) B.V. filed written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objectives of the venture. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to the venture, and its general areas of planned activity, are given below.

The parties to the venture are the following entities:

The B.F. Goodrich Company, Geon Vinyl Division, 6100 Oak Tree Blvd., Cleveland, Ohio 44131, U.S.A., and European Vinyls Corporation (Holdings) B.V., Strawinskylaan 1041, Tower C, NL-1077 XX Amsterdam, The Netherlands.

The objectives of the joint venture are to conduct basic research on processes and products that employ vinyl chloride monomer (VCM) and polyvinyl chloride resins (PVC), and to demonstrate the technical feasibility of such new processes or products.

BILLING CODE 4410-01-M

## DEPARTMENT OF LABOR

### Employment Standards Administration, Wage and Hour Division

### Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

### Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

**General Wage Determination Publication**

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 3rd day of March 1989.

**Robert V. Setera,**

*Acting Director, Division of Wage Determinations.*

BILLING CODE 4510-27-M

## LEGAL SERVICES CORPORATION

**Request for Comments on a Grant Award to the Fort Apache Legal Aid Society, Inc.**

**AGENCY:** Legal Services Corporation.

**ACTION:** The Legal Services Corporation (LSC) announces its intention to award a one-time, non-recurring grant of $81,963 in calendar year 1989 to the Fort Apache Legal Aid Society, Inc. The purpose for making this grant is to provide legal services to the eligible client population of the White Mountain Tribe/Fort Apache Indian Reservation (Arizona).

**DATE:** All comments and recommendations must be received by the Office of Field Services of LSC on or before April 9, 1989.

**FOR FURTHER INFORMATION CONTACT:** Legal Services Corporation, Office of Field Services, Victoria O'Brien, Counsel to the Director, 400 Virginia Avenue SW., Washington, DC 20024-2751, (202) 863-1837.

**SUPPLEMENTARY INFORMATION:**

The Legal Services Corporation is the national independent organization charged with implementing the federally funded system of legal services for low-income people. It hereby announces its intention to award a grant in the amount of $81,963 to Fort Apache Legal Aid Society, Inc. for the provision of legal services to the eligible client population of the White Mountain Apache Tribe/Fort Apache Indian Reservation (Arizona).

It is anticipated that the nine month term of this grant will extend from April 1, 1989 to December 31, 1989. The annualized level of LSC Native American funding for the service area is approximately $109,284 for calendar year 1989.

Interested persons are invited to submit written comments and/or recommendations concerning the above action to Victoria O'Brien.

Dated: March 7, 1989.

**Mary C. Higgins,**

*Director, Office of Field Services.*

## NUCLEAR REGULATORY COMMISSION

**[Docket No. 50-498]**

**Houston Lighting & Power Co.; Environmental Assessment and Finding of No Significant Impact**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-76, issued to Houston Lighting & Power Company, (the licensee), for operation of the South Texas Project, Unit 1, located in Matagorda County, Texas.

**Environmental Assessment**

*Identification of Proposed Action*

The proposed amendment would revise the provisions in the Technical Specifications (TS) relating to the toxic gas monitoring system.

The proposed action is in accordance with the licensee's application for amendment dated March 8, 1988.

*The Need for the Proposed Action*

The proposed change to the TS is required in order to improve the operational reliability of the toxic gas monitoring system as well as reduce the number of unnecessary engineered safety feature (ESF) control room heating, ventilation, and air conditioning (HVAC) recirculation actuations.

*Environmental Impacts of the Proposed Action*

The Commission has completed its evaluation of the proposed revision to the Technical Specifications. The proposed revision would allow the licensee to: (1) revise the toxic gas monitor ESF actuation logic to provide an actuation signal on a two-out-of-two logic for monitor failure instead of a one-out-of-two logic as exists in the present design (the high toxic gas actuation of one-out-of-two is retained); (2) provide separate power supplies from non-Class 1E uninterruptable sources to each monitor; (3) provide a separate control room annuciator for "High Toxic Gas Concentration" and "Monitor Trouble"; (4) relocate the sample intake duct nearer the building entrance to reduce the volume of toxic gas which would enter the control room before the isolation dampers close; (5) delete hydrazine from the FSAR and TS as a monitored/isolated actuation chemical because control room habitability calculations demonstrate that the control room operators will not be incapacitated by a postulated hydrazine spill; (6) increase the setpoint for the ammonia channel in the FSAR and TS to 25 parts per million (ppm) because the revised calculations utilizing techniques in NUREG/CR-1741 demonstrate the operators would have adequate time to don breathing apparatus after a toxic gas release before becoming incapacitated; (7) revise the TS response time from 25 seconds to 5 seconds for isolation upon a high toxic gas signal (a total of 80 seconds is allowed to isolate the control room when setpoint concentrations are reached at the monitor sample point in the duct); and (8) revise the FSAR to add acetaldehyde as a monitored chemical.

Therefore, the proposed changes do not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that this proposed action would result in no significant radiological environmental impact.

With regard to potential non-radiological impacts, the proposed change to the TS involves systems located within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed amendment.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the Federal Register on September 12, 1988 (53 FR 35245). No request for hearing or petition for leave to intervene was filed following this notice.

*Alternative to the Proposed Action*

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

*Alternative Use of Resources*

This action involves no use of resources not previously considered in the Final Environmental Statement (NUREG-1171) for the South Texas Project, Units 1 and 2.

*Agencies and Persons Consulted*

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

**Finding of No Significant Impact**

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated March 8, 1988 which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the Wharton Junior College Library, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488 and at the Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701.

Dated at Rockville, Maryland this 1st day of March 1989.

For The Nuclear Regulatory Commission.

**Jose A. Calvo,**

*Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.*

[FR Doc. 89-5580 Filed 3-9-89; 8:45 am]

BILLING CODE 7590-01-M

**[Docket No. 50-424]**

**Georgia Power Co. et al.; Withdrawal of Application for Amendment to Facility Operating License**

In the matter of: Georgia Power Co., Oglethorpe Power Corp., Municipal Electric Authority of Georgia, City of Dalton, GA.

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and City of Dalton, Georgia (the licensee) to withdraw its August 28, 1987, application of the Vogtle Electric Generating Plant, Unit 1, located in Burke County, Georgia. The proposed amendment would have modified the alarm/trip setpoint limit for the chlorine detection systems which initiated operation of the Control Room Emergency Filtration System in the isolation mode. The Commission issued a Notice of Consideration of Issuance of the Amendment in the Federal Register on November 4, 1987 (52 FR 42360). The application for the proposed amendment was withdrawn because Amendment No. 17 dated February 9, 1989 to Facility Operating License NPF-68 deleted the Applicable Technical Specification and made the proposed August 28, 1987, application unnecessary.

For further details with respect to this action, see (1) the application for amendment dated August 28, 1987, (2) Amendment No. 17 to Facility Operating License NPF-68, and (3) our letter dated February 25, 1989. All of the above documents are available for public inspection at the Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830 and at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555.

Dated at Rockville, Maryland, this February 25, 1989.

For the Nuclear Regulatory Commission.

**Jon B. Hopkins,**

*Project Manager, Project Directorate II-3, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.*

## OFFICE OF PERSONNEL MANAGEMENT

**Proposed Extension of OPM Forms 1203 and 1280, Submitted to OMB for Clearance**

**AGENCY:** Office of Personnel Management.

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), this notice announces the proposed extension to forms which collect information from the public. OPM Form 1203 (Occupational Supplement series—Form B) and OPM Form 1280 (Applicant Data Sheet) are optical scan and key entry documents, respectively. These forms are used by our automated processing center to create basic applicant records for an automated examining system. We will be using these forms to carry out our responsibility for open competitive examining for admission to the competitive service in accordance with section 3304, 5 U.S.C. Approximately 564,000 forms are completed each year with an average completion time of 25 minutes per form, for a total of 235,000 hours. For copies of this proposal, call Lawrence Dambrose (632-0199) or Grace Butler (632-0259).

**DATE:** Comments on this proposal should be received within 10 working days from date of this publication.

**ADDRESSES:** Send or deliver comments to—

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, Room 6410, 1900 E Street NW., Washington, DC 20415 and

Joseph Lackey, Information Desk Officer, U.S. Office, of Information and Regulatory Affairs, Office of Management and Budget, Room 3002, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Armond A. Grant, (202) 653-8076, U.S. Office of Personnel Management.

**Constance Horner,**

*Director.*

BILLING CODE 6325-01-M

**Personnel Management Demonstration Project; Department of Transportation/Federal Aviation Administration Demonstration Project**

**AGENCY:** Office of Personnel Management.

VOL
54
ISS
46
MR
10
1989
UMI

**ACTION:** Final project plan.

**SUMMARY:** Title V of the Civil Service Reform Act authorizes the Office of Personnel Management (OPM) to conduct demonstration projects which experiment with new and different personnel management concepts to determine whether a specified change in personnel management policies or procedures would result in improved Federal personnel management. This notice meets the legal requirement that OPM publish a final project plan before implementing a demonstration project.

**DATE:** Implementation. This project will be implemented effective with the pay period beginning June 18, 1989.

**FOR FURTHER INFORMATION CONTACT:** Edward V. Curran, AHR–4 Federal Aviation Administration, 800 Independence Avenue, SW., Room 523, Washington DC 20591, (202) 267–7912 or Demaris Miller, U.S. Office of Personnel Management, 1900 E Street, NW., Washington, DC 20415, (202) 632–6164.

**SUPPLEMENTARY INFORMATION:** The Department of Transportation (DOT) has submitted a proposed demonstration project for consideration under chapter 47 of title 5, U.S. Code entitled, "The Department of Transportation/Federal Aviation Administration Demonstration Project."

The purpose of the demonstration project is to enhance the ability of the Federal Aviation Administration (FAA) to recruit and retain experienced, qualified employees in designated occupations in certain hard-to-staff facilities.

To accomplish this purpose, this demonstration project provides for payment of a retention allowance to employees occupying safety-related positions at selected hard-to-staff facilities in the Chicago, New York, Los Angeles and Oakland, California areas. The allowance may be as much as 20 percent of an employee's rate of basic pay. The retention allowance is not considered part of an employee's rate of basic pay for any purpose. However, the retention allowance is considered to be part of "total remuneration" for the purpose of computing overtime pay under the Fair Labor Standards Act (FLSA).

The demonstration project covers approximately 2,000 employees at participating facilities who occupy safety-related positions, such as air traffic controllers, aviation safety inspectors, and airway facilities maintenance technicians. The demonstration will run for 5 years from the date of implementation.

The tentatively approved project plan was published in the **Federal Register** on November 2, 1988, Volume 53, Number 212. A public hearing was held by OPM at FAA Great Lakes Region Headquarters in Des Plaines, Illinois, on December 14, 1988, during which interested persons or organizations presented their written or oral views on the proposed project. All persons who requested to testify or present written statements were permitted to do so. The hearing record was left open after the conclusion of the hearing to receive additional written data, views and arguments from hearing participants. The record was closed on January 3, 1989. In addition to the public hearing, interested parties were given from the date of publication until January 3, 1989, to express their views on the project. Comments received after January 3, 1989, were also considered.

**Summary of Comments**

Letters or testimony were received from the following sources:

| Source | Number |
|---|---|
| Members of Congress | 35 |
| Labor Unions | 2 |
| Other organizations | 1 |
| FAA workforce | (933 signers) 125 |
| Total | 163 |

All but six comments expressed approval of the project. However, the overwhelming majority urged that the project be expanded to include additional facilities and occupations.

*Addition of Other Air Traffic, Airway Facilities, and Aviation Standards Facilities*

Most commentors said that additional facilities, perceived as "hard to staff", should be covered. Specifically, they recommended expanding the project to include additional FAA facilities in the following locations:
Atlanta, Georgia.
Boston, Massachusetts.
Chicago, Illinois metropolitan area.
Detroit, Michigan.
Hawthorne, California.
Indianapolis, Indiana.
Lancaster, California.
Los Angeles, California metropolitan area.
Minneapolis, Minnesota.
New York City metropolitan area.
Oakland, California.
Ontario, California.
Palmdale, California.
Pittsburgh, Pennsylvania.
San Francisco, California.
Santa Barbara, California.
South Bend, Indiana.

Based upon the many comments received, a further review of the selection process and the covered facilities and occupations was conducted by the Department of Transportation (DOT) and FAA. This review showed, as did the initial review, that there were other facilities which experience staffing difficulties. One of these facilities, the Bay TRACON (Terminal Radar Approach Control) in Oakland, California, was determined by FAA to have the most severe and chronic staffing difficulties of the hard-to-staff facilities which were suggested by respondents. After carefully considering all of the comments and other factors involved, and using the same principles and criteria as in the initial selection process, DOT and FAA recommended and OPM agreed to expand the project to include the Bay TRACON.

The staffing situation at Bay TRACON is extremely critical because of the pending implementation of the San Jose Airport Radar Service Area (ARSA), which has been delayed due to the critical staffing situation at Bay TRACON. The TRACON has an authorization of 75 controllers, but currently has only 40 full-performance-level controllers and 15 developmental controllers.

Recruitment efforts for the Bay TRACON have been extensive, including continuously-open vacancy announcements, mailings and visits to other facilities, and other comprehensive outreach programs to attract experienced controllers. Ideally, candidates for complex TRACON facilities such as Bay TRACON would have previous radar experience, but because of these recruiting difficulties, many selectees are from non-radar facilities or the FAA Academy. The facilities initially included in the project are located in the New York, Chicago, and Los Angeles areas. Addition of a facility in the Oakland area expands the geographic coverage of the project, and includes another facility with major impact on the national aviation system.

The decision was also made that expansion to other hard-to-staff facilities, other than the Bay TRACON, was not appropriate. Although some of the facilities proposed for inclusion by respondents also experience staffing difficulties, none were found to have problems to the same extent as the covered facilities. Non-covered facilities are distinguished from covered facilities by one or more of the following factors:

- The staffing situation is not as chronic or as severe as at those facilities which have been included in the project. Some of the facilities respondents recommended for inclusion are currently at or above authorized staffing levels.
- The facility is generally less complex than the Level V air traffic facilities included in the project, is therefore able to recruit well-qualified employees from a larger number of same-level or lower-level facilities, and can more easily accommodate developmental controllers, from the FAA academy or other facilities, who do not have extensive radar experience and are not in such short supply. Many of these facilities serve as the main sources of candidates for more complex Level V facilities.
- The facility does not have the same high level of impact on the national aviation system as the covered facilities.

*Cost of Living*

Many of the respondents recommended that certain facilities be included because of the high cost-of-living in the localities in which the facilities were located. However, the demonstration project is not providing a cost-of-living allowance. It is strictly designed to test whether pay incentives will improve the FAA's ability to recruit and retain fully qualified employees at hard-to-staff facilities.

*Addition of Other Occupations*

Supervisory and Managerial Positions

Two of the three labor unions representing employees covered by the pay demonstration project questioned the inclusion of supervisory and managerial personnel at the covered facilities. The National Air Traffic Controllers Association (NATCA) stated that it has yet to see any FAA facilities that cannot be adequately staffed with supervisors and managers. The Professional Airway Systems Specialists (PASS) stated that there is no shortage of supervisors and managers; however, PASS supports the inclusion of supervisors who are directly and daily engaged in safety-related functions. The third union, the American Federation of Government Employees, did not state a position regarding supervisors and managers.

Inclusion of facility supervisors and managers of subordinate employees covered by this project, as proposed by the DOT/FAA, is proper and warranted by the operational nature of the national aviation system, and reflects sound management principles. These positions are an integral part of the aviation system and provide career progression opportunities to employees. In addition, some facilities experience problems recruiting for supervisory and managerial positions, and have difficulty attracting experienced personnel to apply for these positions. The vital nature of these positions was recognized by Congress when it enacted the Air Traffic Control Revitalization Act of 1982, and there has been no change in circumstances that would warrant exclusion of these positions from the project. In addition, failure to include supervisory and managerial positions would result in the pay of these jobs falling below that of some of the supervised employees.

Entry-Level Airway Facilities Positions

The initial determination made prior to issuance of the proposed regulations was that airway facilities positions below the GS–9 level would be excluded from the demonstration project. The primary reason for this determination was concern over creating unfair competition with other agencies who recruit employees in the same occupations. The occupations involved include entry-level engineers, electronics technicians, and computer operators. Approximately 14 employees in these positions are now employed at the covered facilities. Based on input received from the public hearing and during the comment period, this issue was reexamined.

Upon reconsideration, it is apparent that these positions are indeed unique to the FAA. The duties and responsibilities of these positions are significantly different than positions in the same occupations in other agencies, and the specific knowledge, experience, and other qualifications would not typically be comparable. The electronic technicians, engineers, and computer operators of FAA are system-oriented. Knowledge of the National Airspace System (NAS) is essential to properly perform these technical positions. Although the types of equipment with which these employees work may be similar to the equipment of other agencies, the ability to work with this equipment within the NAS system environment is an integral component of these positions.

Therefore, employees occupying airway facilities positions at the GS–5 through GS–8 level at covered facilities will be included in the demonstration project.

Other Occupations

Some respondents recommended that other occupations be covered, including air traffic assistants and administrative and support personnel. These occupations are not being included in the project. The project is designed to test whether pay incentives will improve recruitment and retention of employees in those safety-related occupations where the FAA experiences the most critical staffing problems. It is not intended to cover other occupations (some of which we have covered in special pay rate authorizations) where the FAA may not have similar difficulties in recruiting and retaining employees and which are common to other Federal agencies. To do so would give the FAA an unfair competitive advantage over other local agencies drawing from the same labor pool.

**I. Executive Summary**

Purpose

The purpose of the demonstration project is to test the effectiveness of a quarterly retention allowance in recruiting and retaining experienced, qualified employees in selected occupations at hard-to-staff Federal

VOL 54 ISS 46 MR 10 1989 UMI

Aviation Administration (FAA) facilities.

Participating Facilities

The following facilities have been selected for participation in the demonstration project:

Farmingdale Flight Standards District Office, Farmingdale, New York (includes Manufacturing Inspection District Office).

New York Air Route Traffic Control Center, Ronkonkoma, New York.

New York Terminal Radar Approach Control, Westbury, New York.

New York Flight Standards District Office, Valley Stream, New York.

Teterboro Flight Standards District Office, Teterboro, New Jersey (includes Manufacturing Inspection District Office).

Chicago Air Route Traffic Control Center, Aurora, Illinois.

Chicago O'Hare International Airport, Chicago, Illinois (includes Air Traffic Control Tower, Terminal Radar Approach Control, and Chicago Airway Facilities Sector).

Coast Terminal Radar Approach Control, Santa Ana, California.

Los Angeles Flight Standards District Office, Los Angeles, California.

Los Angeles International Airport, Los Angeles, California (includes Air Traffic Control Tower and Terminal Radar Approach Control).

Oakland Bay Terminal Radar Approach Control, Oakland, California.

Participating Employees

The demonstration project will cover employees assigned to the participating facilities who occupy safety-related positions, such as air traffic controllers, aviation safety inspectors, and airway facilities maintenance technicians. The employees include approximately 1,749 General Schedule employees (GS) and approximately 365 Performance Management and Recognition System employees (GM) for a total of approximately 2,114 employees as of January 1989.

Labor Participation

Employees covered by this project are represented by three unions: the National Air Traffic Controllers Association (NATCA) representing approximately 55.4 percent of covered employees, the Professional Airway Systems Specialists (PASS), representing approximately 16.1 percent of covered employees, and the American Federation of Government Employees (AFGE), Local 2791 representing approximately 3.0 percent of covered employees.

Personnel System Change

The intervention consists of a quarterly retention allowance not to exceed 20% of annual base pay.

*Implementation and Training.* Briefings on the demonstration project have been conducted for management officials in FAA headquarters and regional offices. On-site briefings for employees have been done at each of the participating facilities and included detailed orientation on the background and purpose of the project, implementation and administrative procedures, and anticipated results. Appropriate human resource management and accounting/payroll organizations will receive detailed orientation and training prior to implementation.

Evaluation Plan

A methodically rigorous evaluation plan has been designed to assess project outcomes and to evaluate their system-wide impacts on the organization's mission and their applicability to other Federal organizations. The design is "quasi-experimental" and includes pre- and post-demonstration comparisons.

The evaluation model postulates significant increases in the desired outcome measures in facilities covered by the demonstration project. Attempts will be made to establish cause-and-effect relationships. In order to assure a thorough assessment of the demonstration, the evaulation will cover three distinct phases: (1) An evaluation of the implementation phase to determine that the project is implemented as designed and that the stated processes are operational; (2) periodic assessments of the 5-year experimental phase; and (3) a summative evaluation of the project's overall impact on the organization.

The plan provides for collection of historical data for three years (Fiscal Years 1986, 1987, and 1988) preceding the start of the demonstration project. This baseline data will cover measures relating to staffing levels, turnover rates, employees' experience levels, overtime and sick leave use, morale, and productivity.

Costs

The estimated costs for the demonstration project for the first year are approximately $20.1 million for the identified facilities, based on current pay rates. The estimated cost of the allowance is expected to rise to approximately $24.4 million, based on current pay rates, by the fifth year of the project for these facilities.

Benefits of Project

The anticipated benefits of the demonstration project include full and stable employment at the selected facilities; more experienced employees occupying safety-related positions; higher levels of full-performance-level employees; and reduced use of overtime.

II. Introduction

A. Purpose

The purpose of the demonstration project is to determine whether pay incentives will enhance the ability of the FAA to recruit and retain experienced, qualified employees in designated occupations at certain hard-to-staff locations. Staffing levels are expected to improve at these locations.

To accomplish this purpose, this demonstration project provides for payment of a retention allowance to employees occupying safety-related positions at selected hard-to-staff facilities. The allowance may be as much as 20 percent of an employee's base pay. The retention allowance is not part of an employee's rate of basic pay. However, the retention allowance is considered to be part of "total remuneration" for the purpose of computing overtime pay entitlements under the Fair Labor Standards Act (FLSA).

B. Problems With the Present System

Adequate staffing of FAA facilities with experienced personnel is vital to ensure a continuing high level of public safety. As part of its safety responsibilities, FAA is currently engaged in a full-scale effort to support and improve its safety-related work force. Comprehensive changes are being made to the recruitment, pre-employment processing, and the technical training programs and processes. A study of the existing pay system for air traffic controllers has identified numerous problems with the inflexibility of current methods for classifying and compensating these employees.

Staffing of certain facilities is a problem that has plagued DOT and FAA for many years. Problems associated with staffing include difficulty in attracting adequate numbers of employees, high turnover rates, a low percentage of employees at the full performance level, and high overtime usage. These problems also contribute to difficulty in granting employees' requests to move to other facilities, difficulty in approving annual leave requests, and low morale.

The agency has tried many approaches at hard-to-staff facilities, within the limitations of existing laws and regulations, in an effort to solve these problems, with only limited success. For example, FAA has given additional credit for promotion consideration to employees who have experience at a variety of facilities; developed a "farm team" system of progression where surrounding facilities feed personnel into larger facilities; reorganized facilities and job junctions; developed revised classification standards and re-evaluated positions; conducted nationwide recruiting campaigns; developed a cross-option recruitment program for air traffic control specialists; guaranteed employees who are not successful at the most complex facilities the opportunity to return to their former facility; and guaranteed employees a choice of duty assignment after a specified length of service and attainment of full performance level. Yet, in spite of these efforts, staffing difficulties continue to plague certain facilities.

The covered facilities are characterized by some combination of the following conditions:

- Recruitment difficulties. Some facilities have a chronic problem in attracting adequate numbers of fully-qualified employees to fill vacant positions.
- High turnover rates. Some facilities have chronic problems retaining employees and consequently have high turnover rates.
- Low experience levels. Some facilities have a large percentage of employees who are not fully qualified or who otherwise do not have extensive experience.
- High overtime use. Some facilities have a high level of overtime use, with employees in some cases working an average of four hours of overtime per week.

FAA's staffing problems have captured the attention of numerous public and private sector organizations and individuals, including members of Congress, the General Accounting Office (GAO), the news media, and the Aviation Safety Commission.

In its report dated October 8, 1987, the Senate Appropriations Committee directed the administration to develop proposals to eliminate the constraints found under current personnel law and regulations that prohibit FAA from providing incentives to compensate for cost-of-living or similar factors in order to provide the needed staff at certain hard-to-staff facilities. Additionally, H.R. 4650 and S. 1600, bills introduced during the 1988 congressional session, provided for the FAA to develop compensation systems tailored to "* * * facilitate the use of flexibilities in assigning rates of basic pay in order to better recruit, motivate and retain a well-qualified work force" (S. 1600); and to "* * * establish a pay rate and grade system * * * designed to * * * recruit and retain a well-qualified workforce * * *." (H.R. 4650).

C. Personnel System Change

Many researchers have shown that pay is one of the most important and influential incentives an employer can offer in an attempt to alter employee behavior. Offering a pay allowance at hard-to-staff facilities could influence potential employees to accept or overlook the negative factors associated with a particular facility or geographic area. It is expected that more employees will be motivated to apply for positions at the participating facilities, and to remain in those facilities for longer periods of time. The demonstration project will test whether a retention allowance of up to 20 percent of base pay will help to attract and retain experienced employees at the hard-to-staff facilities selected for the project.

The demonstration project provides for payment of a retention allowance to employees occupying safety-related positions at the covered hard-to-staff facilities. The retention allowances will be paid quarterly on the last payday of each calendar quarter. Except as explained below, the quarterly retention allowance will be computed as a specified percentage (not to exceed 20 percent on an annual basis) of the employee's rate of basic pay in effect for each pay period during the quarterly allowance period.

In the case of an employee who is initially employed in or reassigned to a covered position after the beginning of the quarterly allowance period, the amount will be prorated on the basis of the number of full weeks of employment in a covered position during the period. In the case of a part-time employee, the quarterly retention allowance will be prorated on the basis of the employee's scheduled tour of duty during each pay period of the quarterly allowance period.

Employees who voluntarily leave covered positions during a quarterly allowance period will not receive an allowance for that period. Employees who are suspended during a quarterly allowance period will not receive an allowance for that period. Employees who are in a leave-without-pay status or who are absent-without-leave will be eligible for a prorated allowance which will be reduced by the number of hours in a non-pay status. All covered employees will be told at the time the project is implemented (or upon initial employment in or reassignment to a covered position) what the percentage of the allowance will be, and eligible employees will receive the full allowance proffered them. Employees will also be notified in advance of changes in the percentage of the allowance.

The retention allowance is not considered part of the employee's rate of basic pay for any purpose. However, the retention allowance is considered to be part of "total remuneration" for the purpose of computing overtime pay entitlements under FLSA. Additional FLSA overtime pay entitlements deriving from the payment of a quarterly retention allowance will be paid at the same time the allowance is paid.

The allowance may be as much as 20 percent of an employee's base pay. All eligible employees will receive the maximum allowance percentage for the first full year of the project. However, the Director of the Office of Personnel Management (OPM) and the Secretary of Transportation will periodically assess the progress made toward the project's objectives. The Secretary, in consultation with the Director of OPM, may cap allowances below 20% or may discontinue the allowances altogether. The Secretary's decisions may apply uniformly to all covered positions or may differentiate among sites, occupations or grade levels. Furthermore, the Secretary may authorize the Administrator of FAA to set allowances, for all or for certain categories of covered positions, on an individual, case-by-case basis. The percentage of the allowance in effect at the time an employee moves into a covered position will not be reduced or discontinued for that employee for at least one year, unless a lower percentage applicable to that employee is determined to be appropriate because of the implementation of special salary rates or legislation which would offset the lower percentage.

Although it does not require waiver of laws or regulations, this personnel system change is being conducted as a demonstation project because it involves a modification of the current pay system and provides retention allowances as an alternative to other pay adjustments.

D. Project Goals

The demonstration retention allowance is intended to achieve two primary goals: (1) to attract a sufficient number of experienced, qualified

VOL 54 ISS 46 MR 10 1989 UMI

employees to apply for positions at the selected hard-to-staff facilities; and (2) to retain experienced, qualified employees at these facilities.

E. Participating Facilities

Numerous factors were considered when determining which hard-to-staff facilities could be included in the project. Primary consideration was given to the facility's staffing difficulties, as characterized by staffing levels, turnover, experience levels of employees, and overtime. The facilities selected have chronic difficulty in attracting and retaining experienced employees. They are also among the facilities with the most significant impact on the national aviation system.

The following facilities have been selected to participate in the demonstration project:

Farmingdale Flight Standards District Office, Farmingdale, New York (includes Manufacturing Inspection District Office).

New York Air Route Traffic Control Center, Ronkonkoma, New York.

New York Terminal Radar Approach Control, Westbury, New York.

New York Flight Standards District Office, Valley Stream, New York.

Teterboro Flight Standards District Office, Teterboro, New Jersey (includes Manufacturing Inspection District Office).

Chicago Air Route Traffic Control Center, Aurora, Illinois.

Chicago O'Hare International Airport, Chicago, Illinois (includes Air Traffic Control Tower, Terminal Radar Approach Control, and Chicago Airway Facilities Sector).

Coast Terminal Radar Approach Control, Santa Ana, California.

Los Angeles Flight Standards District Office, Los Angeles, California.

Los Angeles International Airport, Los Angeles, California (includes Air Traffic Control Tower and Terminal Radar Approach Control).

Oakland Bay Terminal Radar Approach Control, Oakland California.

Other facilities may be added to the project during the course of the 5-year demonstration period. The process for adding facilities will be the Secretary's recommendation, the OPM Director's approval and the publication of a notice in the **Federal Register** at least 30 days in advance of the start of the first quarter of eligibility.

F. Participating Employees

For all of the facilities except the Flight Standards District Offices and Manufacturing Inspection District Offices, all employees officially assigned to covered facilities and occupying the following positions will be covered by the demonstration project:

| Position Title | Pay Plan, Series, and Grade |
|---|---|
| Airway Facilities Sector Manager | GM-301-15 |
| Assistant Sector Manager | GM-301-13/14 |
| Supervisory Computer Operator | GS-332-10 |
| Computer Operator | GS-332-5/9 |
| Supervisory General Engineer | GM-801-14 |
| General Engineer | GS-801-5/13 |
| Supervisory Engineering Technician. | GS-802-11/12 |
| Engineering Technician | GS-802-5/12 |
| Mechanical Engineer | GS-830-5/13 |
| Supervisory Electronics Engineer | GM-855-13/14 |
| Electronics Engineer | GS-855-5/13 |
| Supervisory Electronics Technician. | GM-856-13/15 |
| Electronics Technician | GS-856-5/13 |
| Supervisory Air Traffic Control Specialist (Center and Terminal options only). | GM-2152-14/15 |
| Air Traffic Control Specialist (Center and Terminal options only). | GS-2152-4/14 |
| For the Flight Standards District Offices and Manufacturing Inspection District Offices, all employees officially assigned to covered facilities and occupying the following positions will be covered: | |
| Aviation Cabin Safety Specialist. | GS-1801-5/14 |
| Supervisory Aviation Safety Inspector. | GS-1825-14/15 |
| Aviation Safety Inspector | GS-1825-5/14 |

Other positions may be added during the course of the porject. The process for adding positions will be the same as that for adding facilities. The addition of new facilities and positions may not cause the number of covered employees to exceed 5,000. Total current employment in these positions at the participating facilities is approximately 2,114. Current employment statistics for the selected facilities, itemized by series and grade, are provided in Appendix A.

G. Labor Participation

The employees covered by this project are in exclusive bargaining units represented by the National Air Traffic Controllers Association (NATCA), representing approximately 55.4 percent of covered employees, the Professional Airway Systems Specialists (PASS) representing approximately 16.1 percent of covered employees, and the American Federation of Government Employees (AFGE) Local 2791 representing approximately 3.0 percent of covered employees. Meetings to brief all three organizations on the details of the project were held in late September and early October, 1988. Further consultations and negotiations with NATCA and PASS took place during the comment period for this project, and memoranda of understanding have been completed with both unions. AFGE and FAA have consulted on the project. Approximately 25.5 percent of covered employees are not represented by bargaining units.

III. Methodology

A. Project Design

The purpose of a demonstration project is to test changes under controlled conditions before making commitments to put them into effect for a wider population of Federal employees. The project is a simple before/after design and much of the analysis will rely on pre/post measures. However, efforts will be made to make comparisons between this treatment and alternative treatments for comparable staffing problems at other Federal agencies. Validation of the project intervention will also be done through comparison with system-wide information.

B. Selection of Demonstration Sites

The facilities which have been selected are part of a larger group of FAA facilities which have experienced staffing problems. However, in order to remedy intractable staffing shortages and to encourage movement of experienced employees to covered facilities, the project must be limited to those situations where the need is most critical. Among the factors considered in selecting facilities were staffing levels, turnover, experience levels, and overtime use. The facilities included in the project have chronic difficulties in attracting and retaining experienced employees and are recognized as having a major impact on the operation of the nation's aviation system.

C. Project Implementation and Training

While the project does not affect training directly, it is expected to result in decreased training requirements because the overall experience level is expected to rise. There will be more fully qualified employees and fewer trainees.

D. Project Duration

The demonstration project will begin no sooner than 90 days after the date of this final notice. After implementation, the project will be conducted for a period of up to five years. During this period, the staffing situation at each facility participating in the project will be closely monitored and analyzed. After the five-year active stage of the project, the overall results will be analyzed to determine the success of the project in fulfilling the stated objectives and goals.

IV. Evaluation Plan

A comprehensive and methodologically rigorous evaluation will be implemented. The results will be reviewed by an external consultant to assess the merits of this experiment.

A. Evaluation Phases

The demonstration project will be evaluated in three phases: (1) implementation evaluation, (2) experimental evaluation, and (3) summative evaluation.

*Implementation Evaluation.* Once the project has begun, the monitoring of the implementation phase will begin. This is needed to ensure that the project is being implemented in a standardized fashion and that the stated processes are in fact operational. Following the project implementation phase, a report will be issued by the evaluation team detailing all aspects of the implementation and offering suggestions on how to improve the implementation. Any changes made to the design during the implementation will be carefully documented and the design revised accordingly. The report will be submitted to project officials, the Office of the Secretary of Transportation, and the Office of Personnel Management.

*Experimental Evaluation.* The evaluation of the experimental phase will begin as soon as the project is determined to be operational and stable. Data collection initiated prior to implementation will continue on a quarterly basis as outlined in the evaluation model. Reports analyzing the effects of the project will be issued by the evaluator on at least an annual basis. These reports will be submitted to the Office of the Secretary of Transportation and the Office of Personnel Management.

*Summative Evaluation.* Upon conclusion of the experimental phase of the project, an overall assessment of the combined effects of the demonstration project will be made. Impacts of overall system changes will be discussed at this point.

Cause-and-effect relationships will be established to the extent possible, using pre- and post-demonstration data. The effectiveness of the project in meeting the stated objectives will be assessed. Efforts will be made to include an assessment of unanticipated positive as well as negative effects. A final project report will be issued by the evaluation team and made available to the Office of the Secretary of Transportation, the demonstration project sites, and the Office of Personnel Management.

B. Evaluation Design

*Overview and Rationale.* The demonstration project is intended to improve staffing levels, experience levels, and retention in safety-related occupations in hard-to-staff facilities. Turnover rates and overtime usage are expected to drop. These improvements are expected to result from the payment of a retention allowance of up to 20 percent of base pay to employees in the covered occupations and sites.

FAA's Office of the Associate Administrator for Human Resource Management (AHR), Office of Management Systems (AMS), the Civil Aeromedical Institute (CAMI), and OPM worked together to design an evaluation plan to measure the effects of the project. The evaluation will measure the extent to which retention, recruitment, staffing levels, experience levels, turnover, and overtime usage are improved during the demonstration.

Three years' baseline data (for Fiscal Years 1986, 1987, and 1988) is being collected for the facilities involved in the test. This data will include measures of all the indices used to assess the impact of the demonstration project.

Table 1 summarizes the effects expected from the project, the measures that will be used to assess those effects, and the data sources for the measures. Additions and adjustments to this model may be made during the evaluation phase as required.

TABLE 1.—EVALUATION MODEL

| Expected Effects | Measures | Data Sources |
|---|---|---|
| Increased staffing levels. | Percent of goal | [1] CPMIS |
| | Number of vacant positions. | Regions |
| Increased experience levels. | Average tenure | CPMIS |
| | Percent of FPL's/fully qualified employees. | CPMIS |
| Reduced turnover. | Turnover rate | CPMIS |
| Reduced overtime. | Average hours per week per employee. | [2] CUPS |
| Reduced sick leave. | Average hours per week per employee. | CUPS |
| Improved morale | Job satisfaction | [3] Survey |
| Improved productivity. | Operations per employee. | CUPS/CPMIS |

[1] Consolidated Personnel Management Information System
[2] Consolidated Uniform Payroll System
[3] Survey Feedback Action Program

*Methods, Measures, and Data Sources.* The primary method of analysis will be an Hotelling's T test of the differences between the before and after measures. The multivariate version of the T test considers the interrelationships among the outcome measures. For example, improving staffing levels could affect the turnover rate, sick leave usage, and morale. The experimental hypothesis states that after the implementation of the allowance, the measures will show comparatively better staffing, experience levels, turnover, overtime usage, sick leave usage, morale, and productivity. As data are collected annually, time series tests will be performed to gauge the effects of the allowance over time. Separate analyses will be performed for each occupational group (e.g., Air Traffic, Airway Facilities, Flight Standards) to determine if the project has different effects for one group than for another. Similar information will also be obtained on a system-wide basis for comparison with the covered facilities, in order to assess the impact of external factors not associated with the demonstration project. It is recognized that selection of extreme cases for the experimental groups lends itself to the problem of regression to the mean. This will be considered when results are analyzed.

*Data Collection and Analysis Plan.* The data collection instruments/data bases, major areas covered by each instrument/data base, schedule for data collection, and source for each instrument/data base are summarized in Table 2.

Each of the analyses described below will assess changes occurring at each test site and system-wide during the demonstration as compared to the baseline period (i.e., pre-demonstration period).

TABLE 2.—DATA COLLECTION AND ANALYSIS PLAN

| Database | Collector | Schedule | Source |
|---|---|---|---|
| CPMIS | AHR | Baseline | Automated records system. |
| Staffing, Turnover, Experience. | | Quarterly during demonstration. | |
| CUPS | AMS | Baseline | Automated records system. |
| Overtime, Sick leave. | | Quarterly during demonstration. | |
| Survey | CAMI | Biennial | Survey database. |

VOL 54 ISS 46 MR 10 1989 UMI

TABLE 2.—DATA COLLECTION AND ANALYSIS PLAN—Continued

| Database | Collector | Schedule | Source |
|---|---|---|---|
| Operations/employee. | AHR | Baseline.... | Existing automated and manual records systems. |
| | | Quarterly during demonstration. | |

*V. Costs*

The estimated costs for the demonstration project for the first year are approximately $20.1 million for the covered facilities, based on current pay rates. The estimated cost of the allowance will vary over the duration of the project but in no case should exceed $24.4 million for the identified facilities, based on current pay rates. This estimate assumes little change in job market conditions and an increase in employment levels at the participating facilities. Detailed cost estimates by facility are included in Appendix B. These costs will be offset somewhat by the anticipated reduction in overtime and savings associated with reduced turnover, such as reduced permanent-change-of-station travel. The demonstration project also avoids costs that would be incurred by alternative solutions.

*VI. Benefits*

The retention allowances are expected to result in the following benefits for the FAA:

- Full and stable employment at the selected facilities. The agency should be able to attract a larger number of experienced employees to the participating facilities. Once they are on board at the facilities, employees should be more likely to remain there for a longer period of time, and turnover will therefore be reduced.
- More experienced employees occupying safety-related positions/higher numbers of full-performance-level (FPL) employees. The allowance should enable the agency to attract a larger number of fully-trained employees from other facilities. These employees will need less training to become fully qualified than new employees hired from outside the agency. Reduced turnover among employees will also increase experience levels.
- Reduced overtime. Higher staffing levels, reduction in turnover, higher experience levels, and more full-performance-level employees should result in a reduction in overtime use. These benefits in turn should help to ensure a continued high level of safety. All of these benefits may not be experienced at all of the participating facilities, since the staffing problems and their causes vary among the facilities.

*VII. Responsibilities*

The Office of Personnel Management has overall responsibility for designing and implementing the valuation plan (5 U.S.C. section 4703(1)(H)) and for monitoring the evaluation. FAA's Office of the Associate Administrator for Human Resource Management (AHR) will have responsibility for conducting and coordinating the evaluation to ensure that it is accomplished as planned. Responsibility for data collection will be shared by the particpating facilities, regional offices, the organizations responsible for agency databases, FAA's Office of Management Systems (AMS), and OPM. Analysis of data will be the responsibility of AHR and AMS, with additional support to be provided by contractor organizations. Data will also be supplied to OPM on request.

Reports will be provided by AHR to the FAA Administrator, the Secretary of Transportation, and the Office of Personnel Management, as well as to the air traffic facilities, airway facilities, and aviation standards organizations in FAA. The reports will be provided in a summary manner on an annual basis. At the end of the demonstration project, a final report will be prepared which provides an analysis of the overall results of the demonstration project and recommendations for action.

**Appendix A.—Employees Covered by Demonstration Project**

## RAILROAD RETIREMENT BOARD

### Agency Forms Submitted for OMB Review

**AGENCY:** Railroad Retirement Board.

**ACTION:** In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

**Summary of proposal(s)**

(1) *Collection title:* Claim for Credit for Military Service (RUI Act).
(2) *Form(s) submitted:* UI-44.
(3) *OMB Number:* 3220-0072.
(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.
(5) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.
(6) *Frequency of response:* On occasion.
(7) *Respondents:* Individuals or households.
(8) *Estimated annual number of respondents:* 300.
(9) *Total annual responses:* 300.
(10) *Average time per response:* .083 minutes.
(11) *Total annual reporting hours:* 25.
(12) *Collection description:* Military service can be used under certain conditions for entitlement to an extended or accelerated unemployment or sickness benefit provided for under section 2(c) of the Railroad Unemployment Insurance Act. The form will obtain information about the applicant's claimed military service.

**ADDITIONAL INFORMATION OR COMMENTS**

Copies of the proposed forms and supporting documents can be obtained from Pauline Lohens, the agency clearance officer (312-751-4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Justin Kopca (202-395-7316), Office of Management and Budget, Room 3002, New Executive Office Building, Washington, DC 20503.

**Pauline Lohens,**
*Director of Information Resources Management.*

## SECURITIES AND EXCHANGE COMMISSION

**[Rel. No. IC-16846; (812-7261)]**

### The OTC-100 Fund Inc.; Application and Temporary Order

March 3, 1989.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for a pemanent order and grant of a temporary order under the Investment Company Act of 1940.

*Applicant:* The OTC-100 Fund, Inc. ("Applicant").

*Relevant 1940 Act Section:* Permanent order requested, and temporary order granted under section 22(e)(3).

*Summary of Application and Order:* Applicant seeks a permanent order pursuant to sections 6(c) and 22(e)(3) of the 1940 Act permitting the Applicant to suspend the right of redemption through March 22, 1989, to enable the Applicant to take such actions as may be necessary to effect an orderly sale of assets and distribution of proceeds to security holders of the Applicant in comtemplation of the liquidation and dissolution of the Applicant. The Commission is issuing a temporary order granting this request under section 22(e)(3) until March 15, 1989.

*Filing Date:* The Application was filed on March 2, 1989.

*Hearing or Notification of Hearing:* If no hearing is ordered, the application will be granted, and a permanent order will issue permitting Applicant to suspend the right of redemption and payment for shares already submitted for redemption through March 22, 1989. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on March 13, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorney, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

**ADDRESS:** Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549; Applicant, c/o Thomas R. Smith, Jr., Brown & Wood, One World Trade Center, New York, New York 10048.

**FOR FURTHER INFORMATION CONTACT:** Karen L. Skidmore, Branch Chief (202) 272-3023 or Cathey Baker, Staff Attorney (202) 272-3033 (Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

**Applicant's Representations**

1. The Applicant is a no-load, diversified, open-end investment company, organized under Maryland law on November 13, 1984. The investment objective of the Applicant is to obtain a long-term total return that reflects the performance of the 100 largest industrial common stocks listed on the NASDAQ National Market System meeting the Applicant's eligibility requirements as described in the Applicant's current prospectus.

2. The Applicant's investment adviser is Astrop Funds Advisor, Inc. ("AFA"), a wholly-owned subsidiary of Astrop Advisory Corporation, a Georgia corporation ("Astrop Advisory"). The Applicant's principal underwriter is Astrop Fund Distributor, Inc. ("Astrop Distributor"), which is also a wholly-owned subsidiary of Astrop Advisory. As of February 23, 1989, Astrop Advisory underwent a change of control due to the "assignment," as defined by the 1940 Act, of a controlling block of its outstanding voting securities. As a result, AFA also underwent a change of control, which had the effect of terminating the Applicant's then existing management and distribution arrangements. The Applicant's Board of Directors called a special meeting of shareholders of the Applicant to consider approval of new management and distribution arrangements for an interim period. The Applicant's shareholders approved such new arrangements at a special meeting held on February 23, 1989.

3. On March 1, 1989, the Applicant received redemption requests relating to two separate shareholder accounts controlled by CIBA-GEIGY Corporation, a New York corporation (the "CIBA-GEIGY accounts"), which constitute approximately 80% of the outstanding shares of the Applicant. Processing these redemption requests within the seven-day period required by section 22(e) of the 1940 Act could cause the net asset value of the Applicant's remaining outstanding shares to be significantly lower than the net asset value per share would be otherwise, thereby harming the remaining shareholders of the Applicant. The Applicant's Board of

Directors held a series of meetings to consider the ramifications of processing the redemption requests and what action the Applicant should take to protect the interests of all shareholders of the Applicant. CIBA-GEIGY Corporation, as fiduciary for CIBA-GEICY accounts, has agreed to rescind the two redemption requests to enable the Applicant to raise redemption proceeds in an orderly manner not detrimental to the interests of the Applicant's other shareholders. Their agreement is conditioned on CIBA-GEIGY receiving assurances that the Applicant will seek to liquidate its assets prior to the end of March 1989 and that actions are taken to assure that none of such other shareholders are permitted to redeem shares before the CIBA-GEICY accounts.

4. On March 1, 1989, Applicant's Directors, including a majority who are not interested persons, determined: to cease sales of shares of the Applicant effective March 1, 1989; to approve a plan of complete liquidation and dissolution; to call a meeting of shareholders on March 21, 1989 to consider approval of a plan of complete liquidation and dissolution of the Applicant' to authorize the filing of proxy materials; to terimate the Applicant's management agreement with AFA effective March 22, 1989; and to seek the relief requested.

5. The Applicant will use its best efforts to obtain shareholder approval of the Applicant's liquidation before the end of March 1989. Under Maryland law, the affirmative vote of two-thirds of the outstanding shares is needed to approve the liquidation of a corporation; CIBA-GEICY Corporation has advised the Applicant's Directors that its shares will be voted in favor of liquidation.

**Applicant's Legal Analysis**

The Applicant submits that granting the requested relief is for the protection of the Applicant's shareholders, as provided in section 22(e)(3) of the 1940 Act, and consistent with the purposes fairly intended by the policy and provisions of the 1940 Act, as provided in section 6(c) of such Act. The Applicant asserts that the actions taken by the Directors are intended to ensure that each of the Applicant's shareholders will be treated equally in view of the otherwise detrimental effect on minority shareholders of processing the CIBA-GEICY accounts' redemption requests. The Directors' actions will result in the orderly liquidation of the Applicant and, together with the relief requested herein, will cause all shareholders to receive the same net asset value per share. As a result, the relief requested is necessary in order to protect all shareholders of the Applicant and to ensure that each shareholder receives the highest possible price per share under the circumstances.

**Temporary Order**

Based on the foregoing, the Commission has considered the matter and finds, under the standards of section 22(e)(3), that a temporary under authorizing the suspension of redemptions through March 15, 1989 is appropriate for the protection of security holders of the Applicant.

Accordingly, *It is ordered*, under section 22(e)(3) of the 1940 Act, subject to the condition that Applicant cease sales of its shares except pursuant to reinvestment of dividends under any previously existing shareholders requests, that the Applicant be and is hereby permitted (1) to suspend the right of redemption of its outstanding redeemable securities, effective at the opening of business on this date and (2) to suspend payment for shares already submitted for redemption for which payment has not been made prior to this date, both suspensions to continue through March 15, 1989.

By the Commission.

**Jonathan G. Katz,**
*Secretary.*

BILLING CODE 8010-01-M

## DEPARTMENT OF STATE

**[Public Notice CM-8/1270]**

### Shipping Coordinating Committee; Meeting

The U.S. Shipping Coordinating Committee (SHC) will conduct an open meeting at 0930 on Thursday, 30 March 1989 in Room 6332 of the Department of Transportation Building, 400 Seventh Street SW., Washington, DC. The purpose of this special meeting is to continue development of U.S. positions for:

1. The upcoming International Maritime Organization (IMO) Diplomatic Conference on the Draft Salvage Convention scheduled to meet in London from 17-28 April 1989; and

2. The ongoing consideration by the IMO Legal Committee of the question of liability and compensation related to maritime carriage of hazardous and noxious substances (HNS).

The initial SHC public meeting in preparation for the Diplomatic Conference on Salvage was held in Washington, DC on 29 November 1988; a second meeting on this subject was held on 24 January 1989. The third and final meeting prior to the Conference will be that scheduled for 30 March 1989.

In preparing for the Salvage Conference, four draft convention issues were identified from the outset as particularly important from the U.S. perspective:

1. The system established in Articles 10 and 11 ("Criteria for Assessing the Reward" and "Special Compensation," respectively) for sharing the cost of a new environmental incentive for salvors between shipowners and cargo interests;

2. The jurisdiction provisions in Article 21;

3. The present scope of the provision for exception by reservation in Article 24, the effect of which would be to require application of the convention to many offshore hydrocarbon exploration and production facilities; and

4. The absence of any exclusion from the convention for government-owned, non-commercial cargoes carried in other than government-owned vessels.

After preparations for the Salvage Conference were underway, a fifth issue—possible application of the new convention to shipwreck (including treasure) salvage—was identified as a matter of concern to certain domestic interests and subsequently was discussed briefly at the 24 January 1989 SHC meeting. Applicability of the convention to shipwreck salvage is not addressed in the draft convention.

The foregoing five issues, along with any other issues raised by the published Salvage Conference papers or by participants, will be discussed at this special SHC meeting. The views of the public, and particularly those of affected maritime and environmental interests, are requested.

With respect to HNS liability and compensation, the IMO Legal Committee has resumed work on this subject in an effort to develop an international HNS regime which will prove more acceptable than that which was considered but not adopted at the 1984 Diplomatic Conference on Liability and Compensation for Damage in Connection with the Carriage of Certain Substances by Sea. It should be noted that development and implementation of an international HNS regime would have significant impacts on a wide range of U.S. interests related to the maritime and chemical industries, government and the environment.

The United Kingdom has indicated tentative plans to host intergovernmental talks on this subject in London immediately following the Salvage Diplomatic Conference. Specific

BEST COPY AVAILABLE

VOL 54 ISS 46 MR 10 1989 UMI

comments are solicited with respect to each of the basic HNS options and related drafts in order to be prepared to consider which proposals merit further work by interested nations for submission to the next Legal Committee session.

Members of the public are invited to attend the 30 March 1989 SHC meeting, up to the seating capacity of the room.

For further information pertaining to the issues to be discussed at the Shipping Coordinating Committee meeting or to submit views concerning the proposed Salvage Convention or the ongoing HNS negotiations, contact either Captain Frederick F. Burgess, Jr. or Lieutenant Commander Frederick M. Rose, Jr., U.S. Coast Guard (G-LMI), 2100 Second Street SW., Washington, DC 20593, telephone (202) 267-1527, telefax (202) 267-4163.

Dated: March 2, 1989.

**Thomas J. Wajda,**

*Chairman, Shipping Coordinating Committee.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### Certification Basis for the McDonnell Douglas Model MD-11 Airplane

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Amended Type Certification Basis.

**SUMMARY:** This non-rulemaking document establishes the amended type certification basis for the new McDonnell Douglas Model MD-11 airplane. It is published in the interest of keeping the public informed and to advise all interested person of the airworthiness standards applicable to the MD-11.

**ADDRESS:** Details of the FAA disposition of the comments may be obtained by writing to the Federal Aviation Administration, Los Angeles Aircraft Certification Office, ANM-100L, Attention: MD-11 Certification Basis Docket, 3229 East Spring Street, Long Beach, California 90806.

**FOR FURTHER INFORMATION CONTACT:** Mr. Kyle L. Olsen, MD-11 Program Manager, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806, telephone (213) 988-5227.

**SUPPLEMENTARY INFORMATION:**

**Background**

McDonnell Douglas applied on October 9, 1985, for a change to Type Certificate No. A22WE to include the new Model MD-11. The Model MD-11 is a long range derivative of the currently certificated DC-10 that will be able to operate at higher maximum gross weights. It will incorporate three high-bypass ratio turbofan engines, such as Pratt & Whitney PW4000 Series or General Electric CF6-80C2, with digital electronically-controlled engine and thrust management systems. The Model MD-11 will incorporate simplified and automated cockpit controls, and electronic cockpit displays to facilitate operation by two flight crewmembers.

**Discussion**

A notice which invited public comments on the proposed certification basis of the MD-11 was published in the **Federal Register**, on May 24, 1988 (53 FR 18646). Two organizations responded to the invitation and commented on the proposed certification basis.

Comments were submitted on the following topics:

1. Engine and Flight Control System
2. Corrosion Protection
3. Fatigue Life
4. Digital Electronic System
5. Accelerate-stop Distance
6. Emergency Evacuation
7. Instructions for Continued Airworthiness

The commenters provided constructive comments on the proposed certification basis with special concern expressed for the topics listed above. Each comment was reviewed in detail and considered in the development of the certification basis for the MD-11.

The FAA has prepared a response to each of the topics. A disposition of comments which contains these responses is filled in the MD-11 Certification Basis Docket.

While conducting a final review of the proposed certification basis, the FAA concluded that the proposed regulatory provisions do not provide adequate standards for airplane flutter and divergence which were provided by Amendments 25-23 and 25-46. The development of operational speed restrictions, overspeed warning systems and advances in system failure concepts in the 1980's rendered the flutter speed substantiation margins prior to Amendment 25-23 inadequate since they were based on likely overspeeds beyond the design dive speed up to $1.2V_d$. Regardless of the likelihood of overspeed, modern, high-speed flexible transports operating in the transonic speed regime require a substantial margin for analytical reliability purposes. Amendments 25-23 and 25-46 were developed to make the flutter substantiation margins and flutter stability failure concepts consistent with the MD-11 class of transport and with the system failure concepts already being applied by other rules in the proposed certification basis. After considerable review and discussion, the FAA has revised the MD-11 certification basis regarding § 25.629 to include the requirements of these later amendments.

**Type Certification Basis**

Based on the date of application and pursuant to the provisions of § 21.101, the type certification basis of the McDonnell Douglas MD-11 is: Part 25 of the Federal Aviation Regulations (FAR), effective February 1, 1965, as amended by Amendments 25-1 through 25-61 except as noted below:

| Section No. | Title | Thru Amendment 25- |
|---|---|---|
| | PERFORMANCE | |
| 25.109 | Accelerate-stop distance | 41 |
| | CONTROLLABILITY AND MANEUVERABILITY | |
| 25.143 | Control & Maneuver: General | 41 |
| 25.149 | Minimum control speed | 41 |
| | MISCELLANEOUS FLIGHT REQUIREMENTS | |
| 25.251(d) | Vibration and buffeting | 22 |
| | STRUCTURE—GENERAL | |
| 25.305 | Strength and deformation | 53 |
| | FLIGHT MANEUVER AND GUST CONDITIONS | |
| 25.331 | Flight maneuver & gust conditions, General | 45 |
| 25.345(c) | High Lift Devices | 45 |
| | DESIGN AND CONSTRUCTION—GENERAL | |
| 25.607 | Fasteners | 22 |
| 25.631 | Bird strike damage | [1] 22 |
| | CONTROL SYSTEMS | |
| 25.701 (a) & (d). | Flap interconnection | 22 |
| | PERSONNEL AND CARGO ACCOMMODATIONS | |
| 25.772 | Pilot compartment doors | [2] (NA) |
| 25.783 | Doors | 53 |
| | EMERGENCY PROVISIONS | |
| 25.803(d) | Emergency evacuation | 45 |
| 25.812 | Emergency lighting | [4] 57 |
| | VENTILATION AND HEATING | |
| 25.832 | Cabin ozone concentration. | [5] [6] (NA) |
| | FIRE PROTECTION | |
| 25.858(a) | Cargo compartment fire detection systems. | [3] (NA) |
| | EQUIPMENT—GENERAL | |
| 25.1309 | Equipment, systems, and installations. | [3] 22 |

| Section No. | Title | Thru Amendment 25- |
|---|---|---|
| | LIGHTS | |
| 25.1401(b) | Anticollision light system | 40 |
| 25.1401(f) | | 26 |
| | OPERATING LIMITATIONS AND INFORMATION | |
| 25.1529 | Instructions for continued airworthiness. | 53 |

[1] New structure will comply with § 25.631 as amended by later relevant amendments up to and including Amendment 25-61.

[2] New systems, and systems with major changes, their installation and equipment will comply with § 25.1309 as amended by later relevant amendments up to and including Amendment 25-61.

[3] Not applicable. Since the original certification basis, which did not include this section, has been determined to be adequate, the requirements of this section do not apply to this type design.

[4] Compliance with a later amendment to this section is required for Part 121 operators.

Part 36 of the FAR, as amended by Amendments 36-1 through 36-16, and any later amendments in existence at the time of certification. McDonnell Douglas has elected to comply with the Stage 3 noise level requirements.

Special Federal Aviation Regulation (SFAR) 27, as amended by Amendments 27-1 through 27-6, and any later amendments in existence at the time of certification.

The following special conditions and exemptions are part of the DC-10 certification basis and will also be part of the MD-11 certification basis (Ref.: Type Certificate Date Sheet No. A22WE):

1. Special Conditions No. 25-18-WE-7, dated January 7, 1970, and Special Conditions No. 25-18-WE-7, Amendment No. 1, dated July 9, 1971.

2. Special Condition No. 25-46-WE-14 dated October 26, 1972.

**Exemptions From FAR Part 25**

1. Number 1573 issued April 28, 1972—exemption from § 25.807(c)(5) to permit evacuation with a seating capacity of 80 for a pair of oversize Type I exits.

2. Number 2453 issued September 26, 1977—exemption from § 25.807(c)(1) to permit evacuation of passengers with either of the following exit-seat configurations: (a) One oversize Type I emergency exit meeting the conditions specified in Exemption No. 1573 on each side of the fuselage and a passenger seating capacity of 50; or (b) one Type A emergency exit on each side of the fuselage and a passenger seating capacity of 70.

The following optional requirements are part of the DC-10 certification basis and will apply to the MD-11:

Ditching Provisions—§ 25.801.

Ice Protection Provisions—§ 25.1419.

**Additional Exemptions**

As of the date of this notice, McDonnell Douglas has not petitioned the FAA for any exemptions relative to the type certification of the Model MD-11 airplane.

**Additional Special Conditions**

At this time, the FAA has identified several additional novel design features that may require the promulgation of special conditions in order to provide appropriate safety standards. The McDonnell Douglas Model MD-11 will have several digital electronic systems controlling essential and critical functions. Under the provisions of §§ 21.101(b)(2) and 21.16, the FAA is proposing to draft special conditions concerning the following items:

1. Functional reliability of digital electronic systems.

2. Lightning protection of digital electronic systems.

3. Protection from the effects of unwanted radio frequency (RF) energy.

These special conditions, and any others deemed necessary, will be proposed in a subsequent notice(s) of proposed special conditions pursuant to § 11.28 of Part 11 and all public comments received on that notice(s) will be considered before the special conditions are issued.

**Additional Design Review**

In addition to meeting the provisions of the applicable airworthiness, noise, and engine emission regulations and special conditions, it must be shown that no feature or characteristic makes the airplane unsafe, under the provisions of § 21.21(b)(2). The MD-11 design and operational characteristics will be reviewed accordingly.

**Post Certification Activity**

Finally, design evaluation does not end with the issuance of the type certificate. Regulations require aircraft owners and operators to submit various reports and data on the aircraft's service experience. The FAA continues to monitor the safety performance of the design after the type design is approved and the product is introduced into service. This is accomplished through the various reports and data the FAA receives daily, as well as through post certification design reviews. The airworthiness standards, such as Part 25, as well as the operational standards, such as Parts 91, 121, and 125, are amended from time-to-time to consider new technologies and to upgrade the existing level of safety. If, during an evaluation, an unsafe condition is found as a result of service experience and that condition is likely to exist or develop in other products of the same type, the FAA issues an Airworthiness Directive (AD) under Part 39 to require a change to the type design or to define special inspection or operational limitations. In effect, these are also retroactive applications of required type design changes.

Issued in Seattle, Washington, on February 24, 1989.

**Leroy A. Keith,**

*Manager, Transport Airplane Directorate Aircraft Certification Service.*

### Radio Technical Commission for Aeronautics (RTCA); Special Committee 165—Minimum Operational Performance Standards for Aeronautical Mobile Satellite Services; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I), notice is hereby given for the second meeting of RTCA Special Committee 165 on Minimum Operational Performance Standards for Aeronautical Mobile Satellite Services to be held March 20-22, 1989, in the RTCA Conference Room, One McPherson Square, 1425 K Street NW., Suite 500, Washington, D.C. 20005, commencing at 1:00 p.m.

The agenda for this meeting is as follows: (1) Chairman's remarks; (2) approval of the first meeting's minutes, RTCA Paper No. 24-89/SC165-8; (3) technical presentations; (4) Working Group Reports on Operation and Implementation Working Group Report, Equipment Standards Working Group Report, and Service Performance Criteria Working Group Report; (5) review of overall draft progress; (6) Working Group sessions; (7) assignment of tasks; (8) other business; and (9) date and place of next meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

# Sunshine Act Meetings

Federal Register
Vol. 54, No. 46
Friday, March 10, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS**

**TIME AND DATE:** 10:00 a.m., Wednesday, March 15, 1989.

**PLACE:** Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets NW., Washington, DC 20551.

**STATUS:** Open.

**MATTERS TO BE CONSIDERED:**

1. Proposed May-December 1989 fee schedules for Federal Reserve check return services.
2. Any items carried forward from a previously announced meeting.

**Note:** This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

**CONTACT PERSON FOR MORE INFORMATION:** Mr. Joseph R. Coyne, Assistant to the Board, (202) 452-3204.

**FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS**

**TIME AND DATE:** Approximately 10:30 a.m., Wednesday, March 15, 1989, following a recess at the conclusion of the open meeting.

**PLACE:** Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

**STATUS:** Closed.

**MATTERS TO BE CONSIDERED:**

1. Proposed purchase of computers within the Federal Reserve System.
2. Review of the Board's compensation project and related personnel matters. (This item was originally announced for a closed meeting on February 27, 1989.)
3. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
4. Any items carried forward from a previously announced meeting.

**CONTACT PERSON FOR MORE INFORMATION:** Mr. Joseph R. Coyne, Assistant to the Board; (202 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 8, 1989.

## DEPARTMENT OF THE INTERIOR

### Bureau of Indian Affairs

### List of Lands Affected by White Earth Reservation Land Settlement Act of 1985

February 21, 1989.

**AGENCY:** Bureau of Indian Affairs, Interior.

**ACTION:** Notice.

**SUMMARY:** This notice lists all allotments or interests therein on the White Earth Chippewa Reservation in Minnesota which have been determined to fall within the scope of section 4(a), 4(b), or 5(c) of the White Earth Reservation Land Settlement Act of 1985, Pub. L. 99–264 (100 Stat. 61), as amended by Pub. L. 100–153 (101 Stat. 886), and Pub. L. 100–212 (101 Stat. 1433). This notice is required by section 7(c) of the Act as amended.

**FOR FURTHER INFORMATION CONTACT:** Project Director, Branch of WELSA, Bureau of Indian Affairs, Route 3, Box 112, Cass Lake, Minnesota 56633, Telephone: (218) 335–2174.

**SUPPLEMENTARY INFORMATION:** The White Earth Reservation Land Settlement Act of 1985, Pub. L. 99–264, as amended by Pub. L. 100–153, and Pub. L. 100–212, provides for alternative methods of resolving disputes relative to the title to certain allotments for which trust patents were issued to White Earth Chippewa Indians. Sections 4(a) and 4(b) of the Act define circumstances by which the title to an allotment may have been lost through a questionable tax forfeiture, sale, mortgage, or other taking or transfer during the trust period. The Act authorizes the Secretary of the Interior to: (1) Identify the allotments or interests therein which were lost under such circumstances, (2) determine the individuals entitled to compensation for the loss of such allotments or interests therein, and (3) ascertain the amount of compensation to which each such individual is entitled. In addition, section 5(c) of the Act provides that the White Earth Band of Chippewa Indians shall be compensated for allotments which were granted to individuals who had died prior to the selection dates of their respective allotments.

Under section 8(a) of the Act, the compensation for the loss of the allotment or interest is to be based on the fair market value of the allotment or interest therein as of the date of the taking or transfer less any compensation actually received at the time. The compensation to be paid under the Act shall include interest, compounded annually at five percent from the date of the questionable taking or transfer, until March 24, 1986, and at the general rate of interest earned by Department of the Interior funds thereafter. The Secretary is authorized to issue written notices of compensation determination to the allottees or heirs entitled thereto. Such notice shall describe the basis for the Secretary's determination, the process whereby such compensation shall be distributed, and the applicable time limits for judicial review of the determination. Any individual who has already elected to file suit in the Federal District Court for the District of Minnesota to seek the recovery of title to an allotment or interest therein, or damages, is barred from receiving any compensation under the Act pursuant to section 8(c).

The Secretary was directed to publish a first list of allotments or interests that fall within the provisions of section 4(a), 4(b), or 5(c) of the Act. The first list of allotments and interests affected by the Act was published in the **Federal Register** at Vol. 51, No. 182, on September 19, 1986. The Secretary is also authorized, pursuant to section 7(c) of the Act, to publish a second list of allotments and interests affected by the Act. The amendment contained in Pub. L. 100–212 authorizes the Secretary to publish corrections or additions to the first list as well. This list is the second list of allotments and interests therein which have been determined by the Department of the Interior to fall within the provisions of section 4(a), 4(b), or 5(c) of the Act. This list does not contain certain tracts and interests that have been removed or corrected from the first list that have been found to be outside the scope of section 4(a), 4(b), or 5(c) of the Act.

The inclusion or exclusion of a particular allotment or interest therein on this list may be judicially reviewed pursuant to the provisions of the Administrative Procedure Act, 5 U.S.C. 701 *et seq.* Any such action must be filed in Federal District Court for the District of Minnesota and shall be barred unless it is filed within 90 calendar days of this publication.

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

W.P. Ragsdale,

*Acting Assistant Secretary—Indian Affairs.*

### Instruction Sheet

Each questionable taking or transfer has been assigned a ten, eleven, or twelve character Issue Number. In every instance, the first six characters, FS3408 are identical and denote the Minneapolis Area Office, Minnesota Agency, and White Earth Indian Reservation. The last four, five, or six characters identify the specific taking or transfer.

Two separate lists have been prepared so that information about any specific taking or transfer can be located by reference to the Issue Number, name(s) of the allottee, legal description of the tract which was involved in the taking or transfer, and in some instances, the name(s) of the heir(s) when the taking or transfer applies to an inherited interest. The page numbers referred to below are located at the top center of each page and are not the five digit **Federal Register** page numbers located on the upper right or left corners of each page. The two lists appear under the following headings and page numbers: MASTER LIST (pages 1–23), and PARTIAL INTERESTS LIST (pages 24–36). The two lists are arranged sequentially by Issue Number which provide cross referencing between the two lists.

The MASTER LIST contains information regarding all allotments and inherited interests affected by the Act, including the following subheadings:

ISSUE NO.: The ten, eleven, or twelve character number, explained above, which identifies the Area Office, Agency, Reservation, and specific taking or transfer affected by the Act. Where there are multiple tracts of land, there has occasionally been the need to add one or more letters to the Issue Number in order to distinguish among such tracts. Also, where a tract of land has been the subject of multiple takings or transfer by interest holders, letters have been added to the Issue Number to distinguish between such takings and transfers.

ALLOT. NO.: The number assigned, at the time of the allotment selection, to the allotment comprising the tract of land which was involved in the taking or transfer. Many White Earth allottees, after receiving an original allotment, were also granted an additional allotment, with different numbers assigned to each. To distinguish between the two allotments, the allotment numbers are preceded by the letter O (Original Allotment) or A (Additional Allotment).

CO.: The County in which the tract involved in the taking or transfer is located. These are identified as either Becker (B), Clearwater (C), or Mahnomen (M) County.

LEGAL SUBDIV., SEC., TWP., and RNG.: The legal description of the tract which is involved with the taking or transfer by Legal Subdivision, and Section (SEC), Township (TWP), and Range (RNG) numbers. Where a metes and bounds description is required for the legal subdivision, it is described as MB (Metes and Bounds). Further information concerning such tracts can be obtained from the Branch of WELSA office in Cass Lake, Minnesota.

ENGLISH NAME: All known English names of the allottee, including given name, middle initial, middle name, maiden name, married name, and other English names which have been identified for the allottee.

OJIBWAY NAME: The name of the allottee in Ojibway, the native language of the White Earth Band of Chippewa Indians. The names are shown with phonetic spellings.

Tracts which fall within the provisions of section 5(c) of the Act where the claimant is the White Earth Band, appear only on the MASTER LIST with the White Earth Band listed under the sub-heading of English name.

The PARTIAL INTERESTS LIST is limited to include only the Issue Numbers, Names of any Inherited Interest Holder, and their respective inherited interests for the takings or transfers which resulted in the loss of less than full title to the subject tracts. The Issue Number can be cross referenced to the MASTER LIST which will indicate the name of the allottee, and the legal description of the tract involved in the takings or transfers. ISSUE NO. and ALLOT. NO. are the same as explained above.

NAME OF INTEREST HOLDER: The name of the individual who held an inherited interest, less than full interest, in the tract at a time preceding the taking or transfer, or at the time of the taking or transfer.

INTEREST: The fractionated interest, or inherited share, held in trust by the interest holder as of either a time preceding the taking or transfer, or held as the date of the transfer or taking. The fractionated interest is indicated by numerator and denominator.

If you wish further information about allotments or interests therein which are contained in this list, call or write the Branch of WELSA office. The address and telephone number are indicated in the "FOR FURTHER INFORMATION CONTACT" section of this document. Be sure to include the complete Issue Number in any correspondence with the Bureau of Indian Affairs.

1989
UMI

**DEPARTMENT OF LABOR**

**Mine Safety and Health Administration**

**30 CFR Parts 56 and 57**

**Metal and Nonmetal Mines; Public Hearings**

**AGENCY:** Mine Safety and Health Administration, Labor.

**ACTION:** Notice of public hearings.

**SUMMARY:** The Mine Safety and Health Administration (MSHA) will hold public hearings on its proposal to revise existing safety standards for explosives at metal and nonmetal mines. The hearings will be held in Pittsburgh, Pennsylvania; Salt Lake City, Utah; and Irving, Texas. These hearings are in response to requests received from the public. Each hearing will cover the major issues raised by commenters in response to the proposed rule.

**DATES:** All requests to make oral presentations for the record should be submitted at least five days prior to each hearing date. However, immediately before each hearing begins, any unallotted time will be made available to persons making late requests.

The public hearings will be held at the following locations on the dates indicated, beginning at 9:00 a.m.

*Date and city*

April 6, 1989—Pittsburgh, PA
April 11, 1989—Salt Lake City, UT
April 13, 1989—Irving, TX

**ADDRESSES:** The hearings will be held at the following locations:

Holiday Inn—Pittsburgh Airport,1406 Beers School Road (See Hotel Locator for Room), Coraopolis, PA 15108

Salt Palace Center, Spruce Room—North Lobby Entrance, Between Second West & West Temple Streets, Salt Lake City, UT 84101

Holiday Inn D.F.W. Airport South, 4440 West Airport Freeway, Ballroom B, Irving, TX 75061

Send requests to make oral presentations to: Mine Safety and Health Administration, Office of Standards, Regulations and Variances, Room 631, 4015 Wilson Boulevard, Arlington, Virginia 22203.

**FOR FURTHER INFORMATION CONTACT:** Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, MSHA, phone (703) 235-1910.

**SUPPLEMENTARY INFORMATION:** On November 10, 1988, MSHA published proposed revisions to its existing safety standards in 30 CFR Parts 56 and 57 for explosives at metal and nonmetal mines (53 FR 45487). The comment period for the proposed rule closed on February 10, 1989. In the comments filed to the proposed rule, MSHA received requests to hold public hearings.

The purpose of the public hearings is to receive relevant comment and to answer questions concerning the proposal. The hearings will be conducted in an informal manner by a panel of MSHA officials. Although formal rules of evidence will not appty, the presiding official may exercise discretion in excluding irrelevant or unduly repetitious material and questions.

Each hearing will begin with an opening statement from MSHA. The public will then be given an opportunity to make oral presentations. During these presentations, the hearing panel will be available to answer relevant questions. At the discretion of the presiding official, speakers may be limited to a maximum of 20 minutes for their presentations. Time will be made available at the end of each hearing for rebuttal statements. A verbatim transcript of each proceeding will be taken and made a part of the rulemaking record. Copies of the hearing transcript will be available for review by the public.

MSHA will also accept additional written comments and other appropriate data from any interested party, including those not presenting oral statements. Written comments and data submitted to MSHA will be included in the rulemaking record. To allow for the submission of any post-hearing comments, the record will remain open until May 31, 1989.

**Issues**

Commenters requested clarification or revision of specific provisions of the proposed rule, some of which received extensive comment. Several major issues are outlined in this notice. MSHA specifically solicits additional comment on them, in addition to any other aspects of the proposal.

**Storage—Surface and Underground**

*Areas around storage facilities*

Proposed § 56/57.6101 addresses the combustion hazards that can exist near a magazine from either the natural growth of vegetation or the accumulation of other materials which would support combustion.

MSHA received several comments on this standard. One commenter suggested modifying the standard to require establishing systematic procedures to minimize the accumulation of rubbish, brush or dry grass, rather than prohibiting their accumulation. The commenter suggested a revision that would not restrict the presence of materials used for the storage, transportation or hauling of explosives, such as pallets, magazine boxes or shipping boxes, all of which are "combustible."

Several commenters addressed the provision relating to the containment of combustible liquids in the event of leakage. One commenter stated that it should be permissible to totally dike the area surrounding the magazine. Others suggested that there is no need to slope drainage away from explosive storage facilities to prevent combustible liquid from entering the storage facility. One commenter stated that facilities containing combustible liquids are already addressed in MSHA's fire prevention and control standards in Subpart C of 30 CFR Parts 56 and 57.

Another commenter suggested that MSHA consider adding a minimum separation distance between combustible liquid storage tanks and explosive material storage areas consistent with MSHA's proposed table of distances.

*Location of storage facilities*

Proposed § 56/57.6131 addresses the location of surface magazines.

Many comments centered on the appropriateness of MSHA's table of distances for locating storage facilities away from dams, electric substations and mine openings. One commenter suggested that storage facilities be located in accordance with the Bureau of Alcohol, Tobacco and Firearm's minimum requirements. Another commenter felt that without additional data, it is incorrect for MSHA to say that the MSHA table is derived from the American Table of Distances (ATD) since the ATD was developed "to provide safe distances for storage of explosive materials from inhabited buildings, highways, passenger railways and between explosive materials magazines." MSHA specifically solicits further comment on this issue including information on the number of facilities that would be affected by changes in the proposed rule.

*Magazine requirements*

Proposed § 56/57.6132 addresses construction and housekeeping criteria for surface magazines. One commenter suggested the deletion of paragraphs (b), (d), (e), and (f) of the proposed standard. The commenter would replace these sections with a requirement that the magazines be "constructed to the specifications of 27 CFR Part 55"

construction requirements of the Bureau of Alcohol, Tobacco and Firearms. In general, these paragraphs require that magazines be noncombustible; equipped with electrical bonding connections; made of nonsparking materials on the inside; and ventilated to control dampness and excessive heating. The commenter also stated that MSHA has not produced data to justify paragraph (d) which requires bonding and grounding of magazines. The commenter stated that grounding systems require constant maintenance and that inadquately maintained systems present a greater danger than ungrounded magazines. MSHA requests additional data on the subject of bonding and grounding of magazines, particularly related to safety benefits and cost impact.

*Auxiliary Facilities*

Proposed § 57.6161 addresses facilities used to store explosive material near work places underground and establishes a new category of storage facilities, "auxiliary facilities." Several commenters believed the new category was inappropriate and suggested that MSHA's proposal be modified to accommodate the various storage practices currently in use that are dictated by the diversity of mining conditions. One commenter stated that a limit of one-week's supply of explosives in an auxiliary facility is overly restrictive. Another commenter stated that MSHA's approach to controlling access to the facilities should be performance-oriented and directed at controlling access to the mine rather than specifically requiring locking or attending the facilities. MSHA specifically requests additional comment concerning the appropriateness of this standard and, in particular, the one-week limitation on supplies.

**Transportation**

*Separation of explosive material*

Proposed § 56/57.6201 distinguishes between Class A and Class C detonators and specifies the transportation requirements for each. Under the proposal, Class A detonators, and Class C detonators in quantities of more than 1000, shall not be transported in a vehicle or conveyance with explosives or blasting agents unless the detonators are maintained in the original packaging. The proposal would permit Class C detonators to be transported in quantities up to 1000 with explosives or blasting agents if such detonators are in closed containers and separated from the explosives or blasting agents.

One commenter stated that the proposed standard does not cover all detonators on a mine property and that MSHA's proposed regulation is confusing. Another commenter recommended that MSHA retain the existing standard and stated that the proposed regulation would create additional hazards for miners by necessitating increased handling of explosive material.

*Vehicles*

Proposed § 56/57.6202 addresses the hazard of detonation of explosive materials during transportation on a mine vehicle.

One commenter stated that there are no known instances of detonation resulting from the build-up of heat and moisture in a delivery vehicle and suggested the deletion of paragraph (a)(5) which requires that vehicles be vented except when transporting in bulk. The commenter also stated that paragraph (a)(8), requiring that the vehicle be attended except when parked at the blast site and when loading is in progress, is impractical and unworkable. Another commenter recommended that MSHA modify the standard to have only one multipurpose dry-chemical fire extinguisher or a fire suppression system. Another stated that requiring the engine of a "shot fire buggy" to be turned off during placement of primers into drill holes slows the loading cycle and does not increase safety. The Agency solicits specific information quantifying any productivity loss resulting from this requirement.

**Use—Surface and Underground**

*Loading and blasting*

Proposed § 56/57.6306 deals with precautions during loading and blasting and would add several new provisions. Paragraph (b) requires that once loading begins, only activity directly related to the blasting operation be permitted within the blasting site. Some commenters stated that this provision is unnecessarily restrictive. They suggested that MSHA either modify the definition of "blast site" or modify the standard to allow work not related to blasting to continue within the blast site. MSHA solicits further comment on this proposed standard.

*Fuel oil requirements for ANFO*

Proposed § 56/57.6309 prohibits liquid hydrocarbon fuels with flash points lower than that of No. 2 diesel oil (125 degrees Fahrenheit) from being used to prepare ammonium nitrate-fuel oil (ANFO).

Several commenters, operating primarily in subarctic conditions, opposed this proposed limitation. One commenter suggested the standard be revised to allow the use of No. 1 diesel oil when weather temperatures are below 50 degrees Fahrenheit. The Agency is aware that the Institute of Makers of Explosives (IME) is meeting in May for a thorough discussion regarding the mixing of all explosive formulations. The Agency anticipates that, in accordance with the request of the IME, the record in this rulemaking can remain open for a sufficient time to allow the IME to submit further comment on this issue.

*Firing devices*

Proposed § 56/57.6405 deals with power sources and control of firing devices. MSHA continues to seek comments on the various parameters and costs associated with testing, repairing, and maintaining of blasting machines.

**Nonelectric Blasting—Surface and Underground**

*Nonelectric systems*

Proposed § 56/57.6501 addresses misfire hazards encountered in detonating cord blasting. A new provision in paragraph (a) requires the use of double trunklines or loop systems to help prevent misfires when blasting with any nonelectric system. Paragraphs (b) and (d) are also new provisions dealing with shock tube and gas tube blasting systems.

Several comments were received regarding this proposed standard. Some commenters supported the requirement for double trunklines. However, because of changing technology, several commenters felt MSHA should reconsider its proposal. One commenter suggested that the standard should only require the operator to follow the manufacturer's instructions.

Commenters also stated that it is common practice in underground mines to attach trunklines after loading each section of the face and before moving to load other portions of the round. Further, they stated that changing this practice would require additional loading equipment. MSHA requests specific information on the additional equipment required.

Extraneous Electricity—Surface and Underground

*Precautions during storms*

Proposed § 56/57.6604 broadens the scope of the existing surface blasting standard to require that when an electrical storm is approaching, all personnel be withdrawn from surface blast areas and from underground operations capable of being initiated by lightning. MSHA is also considering requiring withdrawal when a storm is within five miles of the site, as determined by the use of specialized lightning detectors, when there is a likely hazard to employees working with explosive materials. MSHA seeks further discussion of this issue.

Date: March 7, 1989.

David C. O'Neal,

*Assistant Secretary for Mine Safety and Health.*

Title 3—

The President

## Proclamation 5941 of March 8, 1989

## Federal Employees Recognition Week, 1989

By the President of the United States of America

A Proclamation

Nineteen hundred and eighty-nine marks the two hundredth year of uninterrupted governance under the Constitution of the United States. It is a fitting occasion to honor those of our fellow citizens who are pledged by solemn oath to "support and defend" that Constitution. As capable and dedicated Federal employees, these men and women have contributed to the success of free, democratic government both here and around the world.

Federal employees speed our mail, guard our borders, and care for our ailing veterans. They conduct medical research that will lead to cures for devastating illnesses, they man the spacecraft that probe the boundaries of the universe, and they help the men and women of the Armed Forces maintain our national security. In countless ways, Federal employees serve our country with skill and dedication, seeing to it that the will of the American people is carried out effectively.

Federal employees show us the meaning of public service off the job as well. Thousands of churches, fraternal lodges, voluntary associations, and community groups across the country have come to count on the generosity and active involvement of Federal employees.

Those individuals dedicated to serving our country as employees of the Federal Government deserve our respect, gratitude, and recognition. Accordingly, by House Joint Resolution 22, the Congress has designated the week beginning March 6, 1989, as "Federal Employees Recognition Week" and authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week beginning March 6, 1989, as Federal Employees Recognition Week. I call upon the people of the United States to observe this occasion with appropriate ceremonies and activities, in recognition of the skillful and loyal service provided the Republic by employees of the Federal Government.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of March, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

George Bush

## ACTION

MiniGrants; Availability of Funds; Notice

VOL 54 ISS 46 MR 10 1989 UMI

**ACTION**

**MiniGrants; Availability of Funds**

**AGENCY:** ACTION.

**ACTION:** Notice of availability of funds.

**SUMMARY:** This notice announces the availability of funds for Fiscal Year 1989 under the ACTION MiniGrant Program authorized by the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93-113, Title I, Part C, 42 U.S.C. 4993).

The ACTION MiniGrant Program is intended to initiate, strengthen and/or supplement volunteer efforts and to encourage broad-based volunteer citizen participation which will develop and enhance community self-reliance. MiniGrants should be considered and used as a means to establish or strengthen activities and programs which demonstrate a solid potential for long-term effect.

Pursuant to MiniGrant Guidelines published in the **Federal Register** on October 12, 1984, (49 FR 40083), ACTION has established the MiniGrant funding priorities for Fiscal Year 1989. The project areas for which MiniGrants will be considered are as follows:

(1) Projects that focus on illicit drug use prevention and education activities for youth. These applications should:
—Focus on prevention rather than intervention or treatment;
—Emphasize strengthening the family;
—Provide positive alternatives to drug use;
—Create or enhance community coalitions against drug use; and
—Mobilize local resources to continue the project.

Applications incorporating "responsible use" of illicit drug methodologies will not be considered.

(2) Projects that focus on providing literacy training for:
—Individuals in need who reside in low-income communities or other underserved areas with a high concentration of illiteracy;
—Individuals who failed to complete elementary or secondary school and read at the zero to fourth grade levels;
—Parents of children between the ages of two and eight who themselves have minimal reading skills;
—People with limited proficiency in English, such as the English as a Second Language population, with a high need for functional proficiency in order to participate fully in American life, e.g. school and employment.

(3) Projects which provide services to children and families which may include:
—Meeting nutritional, physical, medical and mental health needs of infants and toddlers;
—Offering training for child care workers and practical education for parents;
—Providing early identification of developmental problems;
—Expanding services to infants and toddlers with physical and mental disabilities;
—Providing affordable quality child care to meet local needs;
—Expanding prenatal and postnatal health care for all women and children, especially the working poor and their dependents;
—Enhancing the ability of protective services to respond to child abuse and neglect; and
—Providing a broad range of family support activity.

(4) Projects which provide services to the homeless which may include:
—Basic survival services—such as food, shelter, and clothing;
—Stabilization services, dealing with a range of concerns, e.g., transportation, laundry, medical and mental health care, recreation, referral and advocacy;
—Growth services, e.g., counseling, job training, education programs, job search assistance, housing locator, etc.;
—Preventive services, e.g., mortgage and low-income energy assistance, and after care (post shelter) visits.

Subject to the availability of Fiscal Year 1989 funding, up to $150,000 will be available for grants not to exceed $8,400 each. Grant funding will be provided on a one-time, non-renewable basis for a budget period not to exceed one year. All grants of $3,500 or more in ACTION Federal funds require a minimum matching share of 10% (cash or in-kind) of the total grant cost, and a greater match is encouraged.

*Eligibility:* Public and private non-profit organizations which utilize, or will utilize volunteers as an integral part of their provision of services may apply for grants.

*Awards:* Publication of this announcement does not obligate ACTION to award any specific number of grants, or to obligate the entire amounts of funds available, or any part thereof.

*Deadlines:* One signed original and two copies of all completed applications will be submitted to the appropriate ACTION State Office, no later than 5:00 p.m. local standard time on April 21, 1989. Only those applications received at the appropriate office by the deadline will be eligible. Addresses of the State Offices will be included in the application package. In addition to the address list, the application package will contain an application form, a copy of the MiniGrant guidelines which were published in the **Federal Register**, October 12, 1984, and a guide to help individuals complete the application.

*Application Review:* ACTION's Program Demonstration and Development Division will review and evaluate all eligible applications submitted under this announcement. ACTION's Associate Director for Domestic and Anti-Poverty Operations will make the final selection.

To receive an application package, please contact your ACTION State Office. Following is an address list of ACTION Regional Offices, along with the addresses of ACTION State Offices under their jurisdiction.

**Region I**

—Mr. John F. Torain, ACTION Regional Director, 10 Causeway Street, Rm. 473, Boston, MA 02222-1039, (617) 565-7000.
—Mr. Romero A. Cherry, ACTION State Program Director, Abraham Ribicoff Federal Bldg., 450 Main Street, Rm. 524, Hartford, CT 06103-3002, (203) 240-3237.
—Mr. Thomas E. Endres, ACTION State Program Director, Federal Bldg., Rm. 305, 76 Pearl Street, Portland, ME 04101-4188, (207) 780-3414.
—Mr. Malcolm Coles, ACTION State Program Director, 10 Causeway Street, Room 473, Boston, MA 02222-1038, (617) 565-7015.
—Mr. Peter Bender, ACTION State Program Director, Federal Post Ofc. & Courthouse, 55 Pleasant Street, Room 316, Concord, NH 03301-3939, (603) 225-1450.
—Mr. Vincent Marzullo, ACTION State Program Director, John O. Pastore Fed. Bldg., Rm. 232, Two Exchange Terrace, Providence, RI 02903-1758, (401) 528-5424.

**Region II**

—Mr. Herbert W. Stupp, ACTION Regional Director, 6 World Trade Center, Rm. 758, New York, NY 10048-0206, (518) 472-3664.
—Mr. Stanley Gorland, ACTION State Program Director, 402 East State Street, District III—Room 422, Trenton, NJ 08608-1507, (609) 989-2243.
—Mr. Bernard A. Conte, ACTION State Program Director, 6 World Trade Center, Room 758, New York, NY 10048-0206, (212) 466-4471.
—Mr. Ruben Nazario, ACTION State Program Director, Federico DeGetau Federal Ofc. Bldg., Carlos Chardon Avenue, Suite G-49, Hato Rey, PR 00918-2241, (809) 766-5314 or 766-5188.

**Region III**

Ms. Maryann Urban, ACTION Regional Director, U.S. Customs House, Rm. 108, 2nd and Chestnut Street, Philadelphia, PA 19106-2912, (215) 597-9972.
Betsy Irvin Wells, ACTION State Program Director, Federal Building, Room 372-D, 600 Federal Place, Louisville, KY 40202-2230, (502) 582-6384.
Mr. Paul Schrader, ACTION State Program Director, Federal Bldg., Room 500, 85 Marconi Blvd., Columbus, OH 43215-2888, (614) 469-7441.
Ms. Jean Taylor-Brown, ACTION State Program Director, 603 Morris Street, 2nd Floor, Charleston, WVA 25301-1409, (304) 347-5246.
Ms Gloria Sokolowski, Acting ACTION State Program Director, U.S. Customs House, Room 108, 2nd and Chestnut Streets, Philadelphia, PA 19106-2998, (215) 597-3543.
Mr. Lindsay B. Scott, ACTION State Program Director, 400 North 8th Street, P.O. Box 10066, Richmond, VA 23240-1832, (804) 771-2197.
Mr. Jerry E. Yates, ACTION State Program Director, Federal Bldg., Box 257, 31 Hopkins Plaza, Room 1125, Baltimore, MD 21201-2814, (301) 962-4443.

**Region IV**

Evelyn Morrison, Acting ACTION Regional Director, 101 Marietta Street, NW., Suite 1003, Atlanta, GA 30323-2301, (404) 331-2859.
John D. Timmons, ACTION State Program Director, Beacon Ridge Tower, Room 770, 600 Beacon Parkway West, Birmingham, AL 35209-3120, (205) 254-1908.
Mr. Henry Jibaja, ACTION State Program Director, 930 Woodcock Road, Suite 221, Orlando, FL 32803-3750, (305) 648-6117.
Mr. David A. Dammann, ACTION State Program Director, 75 Piedmont Ave., NE., Suite 412, Atlanta, GA 30303-2587, (404) 331-4646.
Mr. Alfred E. Johnson, ACTION State Program Director, 265 Cumberland Bend Drive, Nashville, TN 37228-3889, (615) 251-5561.
Mr. Robert L. Winston, ACTION State Program Director, Federal Bldg., P.O. Century Station, Room 131, 300 Fayetteville Street Mall, Raleigh, NC 27601-1739, (919) 856-4731.
Mr. Arthur E. Brown, III, ACTION State Program Director, Federal Bldg., Room 1005-A, 100 West Capitol Street, Jackson, MS 39269-1092, (601) 965-4462.
Mr. Jerome J. Davis, ACTION State Program Director, Federal Building, Room 872, 1835 Assembly Street, Columbia, SC 29201-2430, (803) 765-5771.

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 54 FR 12345.

SUBSCRIPTIONS AND COPIES

PUBLIC

Subscriptions:

| | |
|---|---|
| Paper or fiche | 202-783-3238 |
| Magnetic tapes | 275-3328 |
| Problems with public subscriptions | 275-3054 |

| | |
|---|---|
| Paper or fiche | 523-5240 |
| Magnetic tapes | 275-3328 |
| Problems with Federal agency subscriptions | 523-5240 |

For other telephone numbers, see the Reader Aids section at the end of this issue.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

PHILADELPHIA, PA

WHEN: March 30, at 1:00 p.m.
WHERE: 841 Chesnut Street, Room 705, Philadelphia, Pa
RESERVATIONS: Call the Philadelphia Federal Information Center
Philadelphia: 215-597-1799
New Jersey: 800-366-4488

WASHINGTON, DC

WHEN: April 11, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

SALT LAKE CITY, UT

WHEN: April 12, at 9:00 a.m.
WHERE: State Office Building Auditorium, Capitol Hill, Salt Lake City, UT
RESERVATIONS: Call the Utah Department of Administrative Services, 801-538-3010

# Presidential Documents

Title 3—

The President

## Executive Order 12670 of March 9, 1989

## Nuclear Cooperation With EURATOM

By the authority vested in me as President by the Constitution and laws of the United States of America, including Section 126a(2) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2155(a)(2)), and having determined that, upon the expiration of the period specified in the first proviso to Section 126a(2) of such Act and extended for 12-month periods by Executive Orders Nos. 12193, 12295, 12351, 12409, 12463, 12506, 12554, 12587, and 12629, failure to continue peaceful nuclear cooperation with the European Atomic Energy Community would be seriously prejudicial to the achievement of U.S. non-proliferation objectives and would otherwise jeopardize the common defense and security of the United States, and having notified the Congress of this determination, I hereby extend the duration of that period to March 10, 1990.

THE WHITE HOUSE,
*March 9, 1989.*

# Rules and Regulations

Federal Register
Vol. 54, No. 47
Monday, March 13, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

**DEPARTMENT OF AGRICULTURE**

**Farmers Home Administration**

**7 CFR Part 1951**

**Servicing and Collections**

**AGENCY:** Farmers Home Administration, USDA.

**ACTION:** Final rule.

**SUMMARY:** The Farmers Home Administration (FmHA) amends its account servicing regulations to provide for the consolidation of the annual statement of loan accounts and the loan summary statements required by the Food Security Act of 1985. The intended effect is to consolidate the year end work load of the Agency and eliminate the cost of providing two annual statements to FmHA field offices for borrowers with loans made or insured under the Consolidated Farm and Rural Development Act. Other revisions are made to reflect changes in internal processing of account information.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** John E. Distler, Chief, Accounting Systems Planning and Design Branch I, Accounting Systems Planning Division, USDA, 1520 Market Street, St. Louis, MO 63103, Telephone (314) 425-4458.

**SUPPLEMENTARY INFORMATION:** This final action has been reviewed under USDA procedures established in Departmental Regulation 1512-1 which implements Executive Order 12291 and has been determined to be exempt from those requirements because it involves only internal agency management.

A loan summary statement is required for the loan programs listed in the Catalog of Federal Domestic Assistance under titles and numbers as follows: Farm Ownership Loans, 10.407; Farm Operating Loans, 10.406; Emergency Loans, 10.404; Soil and Water Loans, 10.416; Water and Waste Disposal Systems for Rural Communities, 10.418; and Community Facilities Loans, 10.423.

The first three of these listed programs are not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials.

This final action has been reviewed in accordance with FmHA Instruction 1940-G, "Environmental Program." FmHA has determined that this final action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91-190, an Environmental Impact Statement is not required.

The Food Security Act of 1985 (Pub. L. 99-198) requires that FmHA furnish to a borrower, upon their request, a loan summary statement for any loan made or insured under the Consolidated Farm and Rural Development Act. The Form FmHA 389-777, Loan Summary Statement, provides FmHA field offices with a detailed status of each loan for the loan summary period. Farmers Home Administration also produces a Form FmHA 450-14, Annual Statement of Loan Account, which is currently sent to the field offices and to all borrowers with loans made or insured by FmHA. Form FmHA 450-14 is being merged with the loan summary statement to provide a detailed summary of all loan activity to all borrowers.

The statement will reflect the detail of each loan for the reporting period, including the interest rate, outstanding principle due at the beginning of the period, amount of payments made during the period, amount due at the end of the period, allocation of payments, total amount due on all loans at the end of the period, and any delinquency. As of December 31 of each year, a hard-copy report will be produced and forwarded to each borrower, a copy will be retained in the borrower's file in the field office. In addition, at the end of each calendar quarter, a cumulative report will be produced on microfiche and retained in the Finance Office. Form FmHA 1951-9 will be created by the Agency's automated accounting system. The reporting period will begin on January 1, or the date of loan closing and end on December 31.

Since all field offices are now equipped with multifunction work stations and have the capability of retrieving current borrower information from the automated accounting system, the reference as to how the field offices will inquire about borrower information is being altered.

Also, the regulations are revised to reflect that a notice of the availability of loan summary statements is posted in FmHA offices and to contain a sample of this notice.

These changes in regulations are being made to advise FmHA field offices of the changes in the procedures to be followed when a borrower requests a loan summary statement and to formalize what already is being done regarding the posting of the notice of availability of loan summary statements in FmHA offices. This is internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rule making and the opportunity for comment are not required; this rule may be made effective less than 30 days after publication in the Federal Register.

**List of Subjects in 7 CFR Part 1951**

Account servicing, Credit, Loan programs—agriculture, Loan programs—housing and community development, Low and moderate income housing loans—servicing requirements, Reporting requirements, Rural areas.

Therefore, Chapter XVIII, Title 7, of the Code of Federal Regulations is amended as follows:

## PART 1951—SERVICING AND COLLECTIONS

1. The authority citation for Part 1951 is revised to read as follows:

**Authority:** 7 U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.23, and 7 CFR 2.70

### Subpart A—Account Servicing Policies

2. § 1951.7 is amended by redesignating paragraph (g) as paragraph (h) and by adding a new paragraph (g) and revising paragraph (h) to read as follows:

**§ 1951.7 Accounts of borrowers.**

* * * * *

(g) *Inquiry for other than Multiple Family Housing (MFH) loans.* Inquiry for these loan programs will be made through field terminals using procedures

VOL 54 ISS 47 MR 13 1989 UMI

in the "Automated Discrepancy Processing System (ADPS)" manuals.

(h) *Loan Summary Statements.* Upon request of a borrower, FmHA issues a loan summary statement that shows the account activity for each loan made or insured under the Consolidated Farm and Rural Development Act. The field office will post on the bulletin board a notice informing the borrower of the availability of the loan summary statement. See Exhibit A for a sample of the required notice.

(1) The loan summary statement period is from January 1 through December 31. The Finance Office forwards a copy of Form FmHA 1951–9, "Annual Statement of Loan Account," to field offices to be retained in borrower files as a permanent record of borrower activity for the year.

(2) Quarterly Forms FmHA 1951–9 are retained in the Finance Office on microfiche. These quarterly statements reflect cumulative data from the beginning of the current year through the end of the most recent quarter. If a borrower requests a loan summary statement with data through the most recent quarter, county supervisors may request copies of these quarterly or annual statements by sending Form FmHA 1951–57, "Request for Loan Summary Statement," to the Finance Office.

(3) When a loan summary statement is requested by the borrower, the field office will copy the applicable annual or quarterly Forms FmHA 1951–9. A copy(ies) of Form FmHA 1951–9; a copy of Form FmHA 1951–58, "Basis for Loan Account Payment Application for Farmer Program Loans;" and a copy of the promissory note showing borrower installments will constitute the loan summary statement provided to the borrower.

3. Subpart A of Part 1951 is amended by adding Exhibit A to read as follows:

**Exhibit A—Notice to FmHA Borrowers**

FmHA borrowers with farmer program and community program loan types made under the Consolidated Farm and Rural Development Act may request a loan summary statement which shows the calendar year account activity for each loan. Interested borrowers may request these statements through their local FmHA office.

**Subpart E—Servicing of Community Program Loans and Grants**

4. § 1951.207, paragraph (l) is revised to read as follows:

**§ 1951.207 General servicing actions.**

* * * * *

(l) *Loan Summary Statements.* Upon request of a borrower, FmHA issues a loan summary statement that shows the account activity for each loan made or insured under the Consolidated Farm and Rural Development Act. The field office will post on the bulletin board a notice informing the borrower of the availability of the loan summary statement. See Exhibit A of Subpart A of this part for a sample of the required notice.

(1) The loan summary statement period is from January 1 through December 31. The Finance Office forwards a copy of Form FmHA 1951–9, "Annual Statement of Loan Account," to be retained in borrower files as a permanent record of borrower account activity for the year.

(2) Quarterly Forms FmHA 1951–9 are retained in the Finance Office on microfiche. These quarterly statements reflect cumulative data from the beginning of the current year through the end of the most recent quarter. Servicing offices may request copies of these quarterly or annual statements by sending Form FmHA 1951–57, "Request for Loan Summary Statement," to the Finance Office.

(3) When a loan summary statement is requested by the borrower, the servicing office copies the applicable Forms FmHA 1951–9. A copy(ies) of Form FmHA 1951–9 and a printout from the multifunction work stations which reflects all future installments owed by the borrower will constitute the loan summary statement to be provided to the borrower.

Date: May 23, 1988.

## FEDERAL RESERVE SYSTEM

**12 CFR Part 201**

**[Regulation A]**

**Extensions of Credit by Federal Reserve Banks; Change in Discount Rates**

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Final rule.

**SUMMARY:** The Board of Governors has amended its Regulation A, "Extensions of Credit by Federal Reserve Banks," for the purpose of increasing discount rates.

The Board took this action in light of inflationary pressures on the economy.

The Board acted on requests submitted by the Boards of Directors of the twelve Federal Reserve Banks. The discount rate is the interest rate that is charged depository institutions when they borrow from their district Federal Reserve Bank.

**EFFECTIVE DATE:** This rule is effective on March 6, 1989. The discount rate changes were effective on the dates specified below.

**FOR FURTHER INFORMATION CONTACT:** William W. Wiles, Secretary of the Board (202/452–3257); for the hearing impaired *only*, Telecommunications Device for the Deaf (TTD) (202/452–3544), Earnestine Hill or Dorothea Thompson, Board of Governors of the Federal Reserve System, Washington, DC 20551.

**SUPPLEMENTARY INFORMATION:** Pursuant to the authority of sections 10(b), 13, 14, 19, *et al.*, of the Federal Reserve Act, the Board has amended its Regulation A to incorporate changes in discount rates on Reserve Bank extensions of credit. Further, under the authority of 5 U.S.C. 553(b)(3) (B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good cause found that current economic and financial considerations require that these amendments be adopted immediately.

**List of Subjects in 12 CFR Part 201**

Banks, Banking, Credit, Federal Reserve System.

For the reasons outlined above, the Board of Governors amends 12 CFR Part 201 as set forth below:

**PART 201—[AMENDED]**

1. The authority citation for 12 CFR Part 201 continues to read as follows:

Authority: Secs. 10(a), 10(b), 13, 13a, 14(d) and 19 of the Federal Reserve Act (12 U.S.C. 347a, 347b, 343 *et seq.*, 347c, 348 *et seq.*, 357, 374, 374a and 461); and sec. 7(b) of the International Banking Act of 1978 (12 U.S.C. 347d).

2. Section 201.51 is revised to read as follows:

**§ 201.51 Short-term adjustment credit for depository institutions.**

The rates for short-term adjustment credit provided to depository institutions under § 201.3(a) of Regulation A are:

| Federal Reserve Bank | Rate | Effective |
|---|---|---|
| Boston | 7.0 | Feb. 24, 1989. |
| New York | 7.0 | Do. |
| Philadelphia | 7.0 | Do. |
| Cleveland | 7.0 | Do. |
| Richmond | 7.0 | Do. |
| Atlanta | 7.0 | Do. |
| Chicago | 7.0 | Do. |
| St. Louis | 7.0 | Do. |

| Federal Reserve Bank | Rate | Effective |
|---|---|---|
| Minneapolis | 7.0 | Do. |
| Kansas City | 7.0 | Do. |
| Dallas | 7.0 | Feb. 27, 1989. |
| San Francisco | 7.0 | Feb. 24, 1989. |

3. Section 201.52 is revised to read as follows:

**§ 201.52 Extended credit for depository institutions.**

(a) *Seasonal credit.* The rates for seasonal credit extended to depository institutions under § 201.3(b)(1) of Regulation A are:

| Federal Reserve Bank | Rate | Effective |
|---|---|---|
| Boston | 7.0 | Feb. 24, 1989. |
| New York | 7.0 | Do. |
| Philadelphia | 7.0 | Do. |
| Cleveland | 7.0 | Do. |
| Richmond | 7.0 | Do. |
| Atlanta | 7.0 | Do. |
| Chicago | 7.0 | Do. |
| St. Louis | 7.0 | Do. |
| Minneapolis | 7.0 | Do. |
| Kansas City | 7.0 | Do. |
| Dallas | 7.0 | Feb. 27, 1989. |
| San Francisco | 7.0 | Feb. 24, 1989. |

(b) *Other extended credit.* The rates for other extended credit provided to depository institutions under sustained liquidity pressures or where there are exceptional circumstances or practices involving a particular institution under § 201.3(b)(2) of Regulation A are:

| Federal Reserve Bank | Rate | Effective |
|---|---|---|
| Boston | 7.0 | Feb. 24, 1989. |
| New York | 7.0 | Do. |
| Philadelphia | 7.0 | Do. |
| Cleveland | 7.0 | Do. |
| Richmond | 7.0 | Do. |
| Atlanta | 7.0 | Do. |
| Chicago | 7.0 | Do. |
| St. Louis | 7.0 | Do. |
| Minneapolis | 7.0 | Do. |
| Kansas City | 7.0 | Do. |
| Dallas | 7.0 | Feb. 27, 1989. |
| San Francisco | 7.0 | Feb. 24, 1989. |

These rates apply for the first 30 days of borrowing. For credit outstanding for more than 30 days, a flexible rate will be charged which takes into account rates on market sources of funds, but in no case will the rate charged be less than the basic discount rate plus one-half percentage point. Where credit provided to a particular depository institution is anticipated to be outstanding for an unusually prolonged period and in relatively large amounts, the 30-day time period may be lengthened or shortened.

By order of the Board of Governors of the Federal Reserve System, March 6, 1989.

**William W. Wiles,**

*Secretary of the Board.*

BILLING CODE 6210–01–M

## SMALL BUSINESS ADMINISTRATION

**13 CFR Part 124**

**Protest and Appeals Procedures Concerning Determinations of Social and Economic Disadvantaged Status as a Condition of Eligibility**

**AGENCY:** Small Business Administration.

**ACTION:** Final rule.

**SUMMARY:** The Small Business Administration (SBA) has established procedures to govern protests of social and economic disadvantaged status of certain small businesses and appeals of SBA's determinations of such status. These procedures apply to certifications of disadvantaged status for purposes of the Defense Department's (DoD's) Small Disadvantaged Business Set-Asides and Small Disadvantaged Business Evaluation Preferences, authorized under section 1207 of Pub. L. 99–661, the Subcontracting Program authorized by section 8(d) of the Small Business Act (15 U.S.C. 636(d)) and for any other Federal procurement program, excluding SBA's section 8(a) program, which requires SBA to determine social and economic disadvantage as a condition of eligibility.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jane Palagrove Butler, Deputy Director, Office of Program Eligibility, (202) 653–6813.

**SUPPLEMENTARY INFORMATION:** On June 8, 1988, SBA published a proposed rule establishing procedures to govern protests of social and economic disadvantaged status of certain small businesses and appeals of SBA's determination of such status. 53 FR 21482 (1988). These procedures apply to certifications of disadvantaged status for purposes of DoD's Small Disadvantaged Business Set-Asides and Small Disadvantaged Business Evaluation Preferences, authorized under section 1207 of Pub. L. 99–661, the Subcontracting Program authorized by section 8(d) of the Small Business Act and for any other Federal procurement program where disadvantaged status is a criterion of eligibility. The procedures, however, are not intended to apply to SBA's section 8(a) program, which requires SBA to determine social and economic disadvantage as a condition of eligibility. The reasons for the rule may be found in the preamble to the proposed rule at 53 FR 21482 (June 1988).

SBA has made five changes to the rule. First, SBA has amended § 124.605(b)(1)(iv) to clarify that protests brought by contracting officers must state their reasons for initiating a protest and may not be initiated merely by forwarding the protest of a third party. This amendment is made in response to the growing practice of some contracting officers who deliberately or unwittingly aid unsuccessful offerors in circumventing the SDB protest timeliness requirements by forwarding late protests without adopting the grounds for such protests as their own or further elaborating on such grounds.

In adopting this amendment, SBA considered the alternative of permitting contracting officers and SBA to initiate protests only until the date of contract award. This alternative was rejected, however, because it would limit the ability of the contracting officer to question the disadvantaged status of successful SDB offerors, even when the contracting officer was presented with persuasive evidence to the contrary. It is important that the benefits of the SDB program accrue only to small disadvantaged businesses. In negotiated procurements, especially, it is possible that the date of award might coincide with the date the unsuccessful offerors are notified. In such cases, any avenue or protest would be closed if contracting officers and SBA were precluded from initiating a protest after the date of award.

In order to prevent this undesirable result and to address the problem of circumvention of protest timeliness requirements, SBA has amended § 124.605 specifically to preclude such action on the part of contracting officers.

In § 124.608(c), the last sentence has been reworded to clarify that materials requested from the protested concern are late if they are not received by SBA's Director of the Office of Program Eligibility (for the Office of Minority Small Business and Capital Ownership Development) within ten days from the date the notification of the protest was received by the protested concern. Late submissions will not be considered in deciding the protest. SBA believes the expeditious operation of the procurement system and fairness to other eligible SDB concerns justify a strict timeliness requirement.

SBA has amended § 124.608(b)(2) to specify that SBA may allow an affidavit

VOL 54 ISS 47 MR 13 1989 UMI

for a current 8(a) program participant in lieu of other documentation, and to limit such submission to 8(a) concerns for which SBA has conducted an annual review within the 12 month period preceding the date on which SBA receives the protest, and then only if proceedings to suspend, terminate or graduate the concern from the 8(a) program are not pending. If an annual review has not been conducted, or if suspension or removal proceedings are pending, an affidavit may not be allowed. These changes were made to more clearly reflect that the submission of an affidavit from the firm is at SBA's discretion, and to clearly indicate that the firm's 8(a) participation must be in good standing with SBA at the time of the submission of the affidavit.

SBA has amended § 124.608 to delete paragraph (3) which allowed a non-8(a) firm which has been found to be an eligible SDB within the past six months to submit an affidavit in lieu of other documentation. The affidavit procedure with respect to non-8(a) concerns was deleted because SBA determined that the administration of the affidavit system would be unduly burdensome on the Agency. In addition, the Agency believes that requiring complete documentation each time a protest is made would not place an undue hardship on the protested firm since the firm can merely update the documentation which it previously provided to SBA.

Finally, SBA has amended § 124.602 to include definitions for termination proceedings, graduation proceedings, suspension proceedings and annual review.

SBA provided a 30-day public comment period following publication of the proposed rule. SBA received two comments in response to the proposed rule.

One comment addressed the application of the ten percent evaluation preference for SDBs but did not comment on the proposed rule at all. SBA has forwarded the comment to the Department of Defense for its consideration.

The other commenter objected to limiting the potential protesters of disadvantaged status to SBA, the contracting officer and those who have submitted a bid on the requirement at issue. SBA has considered this comment and has decided not to adopt it in this final rule. Given the limited resources SBA has available to devote to SDB protests, the limitation on potential protesters is appropriate. Moreover, the regulation permits non-bidders to submit to the contracting officer or to SBA the information supporting their view that the disadvantaged status of the apparent low SDB bidder should be challenged.

SBA certifies that this rule is not a major rule for purposes of Executive Order 12291. The rule sets forth agency procedures for determining disadvantaged status. Utilization of and compliance with such procedures should not entail significant costs and will not approach an economic impact of $100 million.

SBA further certifies that this rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* Section 603 of that Act requires an agency to prepare a regulatory flexibility analysis whenever the agency is required by section 553 of the Administrative Procedure Act (5 U.S.C. 553) to publish a notice of proposed rulemaking. This rule is exempted from such requirements by 5 U.S.C. 553(b)(A) as it establishes agency procedures for challenging disadvantaged status.

This rule also will not impose any new reporting or recordkeeping requirements for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. Chapter 35. SBA Forms 1010A, 1010B, and 413, appearing in § 124.608, have been approved by the Office of Management and Budget under control numbers 3245-0015, 3245-0015, and 3245-0188, respectively.

**List of Subjects in 13 CFR Part 124**

Administrative practice and procedure, Government procurement, Minority business, Reporting and recordkeeping requirements, Technical assistance.

Accordingly, pursuant to sections 5(b)(6), 8(a) and 8(d) of the Small Business Act (15 U.S.C. 634(b)(6), 636(a) and 636(d)), Part 124 of title 13 CFR is amended as follows:

## PART 124—[AMENDED]

1. The authority citation is revised to read:

Authority: 15 U.S.C. 634(b)(6) 637(a), 637(d); Pub. L. 99-661 (sec. 1207).

2. The title of Part 124 is revised to read "Minority Small Business and Capital Ownership Development/Small Disadvantaged Business Status Protest and Appeal Procedures."

3. Sections 124.1 through 124.508 are designated as Subpart A, entitled "Section 8(a) and Section 7(j) Programs".

4. New Subpart B (consisting of §§ 124.601 through 124.610), entitled "Disadvantaged Business Status Protest and Appeal Procedures," is added as follows:

**Subpart B—Disadvantaged Business Status Protest and Appeal Procedures**

Sec.

124.601 Introduction.
124.602 General definitions.
124.603 Who may protest the disadvantaged status of a concern.
124.604 Who makes disadvantaged status determinations.
124.605 Protest procedures.
124.606 Grounds of protest.
124.607 Form and specificity of protest.
124.608 Notification of protest.
124.609 Making the disadvantaged status determination.
124.610 Appeals of disadvantaged status determinations.

**Subpart B—Disadvantaged Business Status Protest and Appeal Procedures**

**§ 124.601 Introduction.**

(a) This subpart sets forth the procedures to be used whenever the SBA is asked to make a determination as to whether a particular concern is "disadvantaged" for purposes of Department of Defense's (DoD's) Small Disadvantaged Business (SDB) set-aside contracts and SDB evaluation preferences, authorized by section 1207 of the National Defense Authorization Act for Fiscal Year 1987, Pub. L. 99-661, SBA's section 8(d) subcontracting program, and any other Federal procurement program requiring SBA to determine social and economic disadvantage as a condition for eligibility. These procedures are separate and distinct from those governing size protests and appeals.

(b) In determining the disadvantaged status of a protested concern, the SBA shall utilize the definitions of social and economic disadvantage and other eligibility requirements established in Subpart A of Part 124 of this title, including the requirements placed on ownership and control. In addition, for purposes of SDB set-asides and SDB evaluation preferences only, there is the additional requirement that the majority of the earnings of the concern directly accrue to the disadvantaged individual who owns and controls it. SBA shall apply these definitions in accordance with the presumption contained in section 8(d) of the Small Business Act (15 U.S.C. 636(d)).

(c) All protests relating to whether a concern is a "small" business for purposes of any Federal program requiring such a condition for eligibility, including SDB set-asides and SDB evaluation preferences, are to be filed pursuant to the procedures set forth in § 121.9 of these regulations. The rules contained in Part 121 apply to all such size determinations. For purposes of

SDB set-asides, SDB evaluation preferences and the section 8(a) subcontracting program, the size standard contained in the solicitation is the applicable size standard for the requirement. An appeal of such a size determination may be made pursuant to § 121.11 of these regulations.

**§ 124.602 General definitions.**

(a) *Annual Review.* SBA's annual review and evaluation of financial statements, eligibility certifications submitted by the 8(a) concern, and such other submissions as may be required of Program Participants to ascertain continued eligibility of a concern for participation in the 8(a) program.

(b) *Appeal.* A request for re-examination of the initial SBA determination regarding a protest.

(c) *Associate Administrator for Minority Small Business and Capital Ownership Development (AA/MSB&COD).* The SBA official who is responsible for deciding appeals of disadvantaged status.

(d) *Control.* See § 124.104, Title 13, CFR.

(e) *Current Section 8(a) Program Participant.* Any business concern which is approved for participation in the section 8(a) program as of the date on which SBA receives the protest on the solicitation at issue.

(f) *Director, Office of Program Eligibility.* For purposes of this section, the term Director shall include the head of the Office of Program Eligibility or any individual which he/she designates.

(g) *Office of Program Eligibility (OPE).* The SBA office within the Office of Minority Small Business and Capital Ownership Development which is responsible for making determinations regarding protests of disadvantaged status.

(h) *Economic Disadvantage.* See § 124.106, Title 13, CFR.

(i) *Graduation Proceeding.* See § 124.110(k), Title 13, CFR.

(j) *Ownership.* See § 124.103, Title 13, CFR.

(k) *Protest.* An initial challenge of the disadvantaged status of a business concern.

(l) *Small Disadvantaged Business (SDB) Concern.* A business concern, including mass media:

(1) Which is small as defined pursuant to section (3) of the Small Business Act and implementing regulations at 13 CFR Part 121;

(2) Which is at least 51 per centum owned by one or more socially and economically disadvantaged individuals as defined by §§ 124.105 and 124.106, Title 13, CFR; or in the case of any publicly owned business, at least 51 per centum of the stock of which is owned by one or more socially and economically disadvantaged individuals;

(3) Which has the majority of its earnings accruing directly to such individuals; and

(4) Whose management and daily business operations are controlled by one or more of such individuals.

(m) *Social Disadvantage.* See § 124.105, Title 13, CFR.

(n) *Suspension Proceeding.* See § 124.113, Title 13, CFR.

(o) *Termination Proceeding.* See § 124.112, Title 13, CFR.

**§ 124.603 Who may protest the disadvantaged status of a concern.**

(a) In connection with a specific SDB set-aside requirement or a requirement for which the apparent low bidder is an SDB which has invoked its SDB evaluation preference, the following entities may protest the disadvantaged status of a concern which is the apparent low responsible offeror:

(1) Any other concern which submitted an offer for that requirement;

(2) The procuring agency contracting officer; and

(3) The Small Business Administration.

(b) In connection with an 8(d) subcontract, the procuring agency contracting officer or SBA may protest the disadvantaged status of a proposed subcontractor. Other small business subcontractors and the prime contractor may submit information to the contracting officer in an effort to persuade the contracting officer to initiate a protest.

(c) Protests of disadvantaged status relating to other Federal procurement programs, excluding SBA's section 8(a) program, which require SBA to determine social and economic disadvantage as a condition of eligibility, may be filed by the Federal agency official responsible for determining program eligibility, and any other interested party.

**§ 124.604 Who makes disadvantaged status determinations.**

In response to a protest challenging the disadvantaged status of a concern, the SBA's Director of the Office of Program Eligibility (OPE), or such person as the Director shall designate, in the Office of Minority Small Business and Capital Ownership Development (MSB&COD) shall determine whether the concern is disadvantaged.

**§ 124.605 Protest procedures.**

(a) *Filing.* (1) Except in cases where the contracting officer or SBA initiates a protest, all protests shall be directed to the procuring agency contracting officer responsible for the particular requirement.

(2) In cases where the contracting officer initiates a protest, he/she shall file the protest with SBA in accordance with paragraph (c) of this section and shall provide notification in accordance with § 124.608 of this part.

(3) In cases where SBA initiates a protest, the protest shall be referred to the Office of Program Eligibility within the Office of MSB&COD and notification shall be provided in accordance with § 124.608 of this part.

(b) *Timeliness of Protest.*—(1) *SDB Set-Aside and SDB Evaluation of Preference Protest*—(i) *Written SDB Set-Aside Protest.* In order for a written protest submitted by a business concern in connection with a specific SDB set-aside requirement to be considered timely, it must be received by the contracting officer prior to the close of business on the fifth day, exclusive of Saturdays, Sundays and legal holidays, after the bid opening date for sealed bids, or after the receipt from the contracting officer of notification of the identity of the prospective awardee in negotiated acquisitions.

(ii) *Written SDB Evaluation Preference Protest.* In order for a protest by a business concern to be timely when challenging the SDB status of an apparent low bidder to which an SDB evaluation preference has been applied, it must be received by the contracting officer prior to the close of business on the fifth day, exclusive of Saturdays, Sundays and legal holidays, after the receipt from the contracting officer of notification of the prospective awardee.

(iii) *Oral Protests.* A protest for SDB set-asides or SDB evaluation preferences shall also be considered timely if made orally to the contracting officer within the allotted 5-day period, and the contracting officer thereafter receives a confirming letter postmarked no later than one calendar day after the date of such telephone protest.

(iv) A protest by the contracting officer or SBA shall be timely for the purpose of the SDB acquisition in question whether filed before or after award. However, when a protest is brought by the contracting officer, it must be brought on his or her own behalf stating the grounds for such protest. The contracting officer may not initiate a protest merely by forwarding to SBA the protest of a third party.

(v) A protest received after the time limits set forth above shall not be considered.

VOL 54 ISS 47 MR 13 1989 UMI

(2) *Section 8(d) Protests.* (i) In order for a protest in connection with an 8(d) subcontract to be considered timely, it must be received by the contracting officer prior to the completion of performance by the intended 8(d) subcontractor.

(ii) A protest received after subcontract performance by the intended 8(d) subcontractor shall not be considered.

(3) Protests, in connection with any procurement, which are filed by any person before bid opening or notification of intended award, whichever applies, shall be considered premature and shall not be forwarded to SBA, but shall be returned to the protestor without action.

(c) *Referral to SBA.* (1) Any contracting officer who receives a timely protest shall promptly forward such protest to the SBA's Director of the Office of Program Eligibility, Office of Minority Small Business and Capital Ownership Development, 1441 L Street, NW., Washington, DC 20416.

(2) When a contracting officer receives a protest and refers it to the SBA, such referral shall contain the following:

(i) The protest and any accompanying materials;

(ii) The date on which the protest was received and a determination as to timeliness;

(iii) A copy of the protested concern's self-certification as to disadvantaged status; and

(iv) The date of bid opening or the date on which notification of the apparent successful offeror was sent to all unsuccessful offerors, as applicable.

(3) A protest by a Federal agency in connection with a procurement program requiring SBA to determine social and economic disadvantage as a condition of eligibility shall be accompanied by any materials in the possession of the agency which cause it to question the disadvantaged status of the concern.

**§ 124.606 Grounds of protest.**

(a) Protests challenging the social disadvantage of the protested concern must demonstrate that the protested concern is not owned and controlled by one or more socially disadvantaged individuals as defined by Subpart A of this part. A protest could challenge the social disadvantage of the protested concern by submitting evidence that:

(1) The individuals who own and control the protested concern have not been subjected to, or have overcome racial or ethnic prejudice or cultural bias, or

(2) The individuals associated with the protested concern who could be considered socially disadvantaged do not actually own and control the protested concern.

(b) Protests challenging the economic disadvantage of the protested concern must demonstrate that the protested concern is not owned and controlled by one or more economically disadvantaged individuals as defined in Subpart A of this part.

**§ 124.607 Form and specificity of protest.**

(a) No specific form is required for a protest under this subpart.

(b) A protest must be sufficiently specific to provide reasonable notice as to the ground(s) upon which the protested concern's disadvantaged status is challenged and to call into question the disadvantaged status of the protested concern. A protest merely alleging that the protested concern is not disadvantaged, without setting forth any basis for the allegation, will not be deemed to specify adequate grounds for the protest. Some basis for the belief stated in the protest must be given. However, the contracting officer shall forward all protests received to SBA for a decision on whether to pursue the determination of disadvantaged status.

(c) Protests which do not contain sufficient specificity may be dismissed by the SBA.

(d) A dismissal by the Director of OPE of a protest for lack of specificity may be appealed to SBA's AA/MSB&COD pursuant to § 124.609 of these regulations.

**§ 124.608 Notification of protest.**

(a) Upon receipt of a protest challenging the disadvantaged status of a concern, the Director of OPE shall immediately notify the protestor and the contracting officer of the date such protest was received and whether it will be processed or dismissed for lack of specificity.

(b) In cases where the protest is sufficiently specific, the Director of OPE shall also immediately advise the protested concern of the receipt of the protest and forward to the protested concern a copy of the protest.

(1) In such cases, the Director of OPE is authorized to ask the protested concern to provide any or all of the following information and documentation: a completed SBA Form 1010A, "Statement of Personal Eligibility" for each individual claiming disadvantaged status; a completed SBA Form 1010B, "Statement of Business Eligibility;" a completed SBA Form 413, "Personal Financial Statement," no older than 60 days, for each individual claiming disadvantaged status; whether the protested concern, or any of its owner(s), officers or directors have applied for admission to or participated in the SBA's section 8(a) program and if so, the name of the company which applied for 8(a) participation and the date of the application; business tax returns for the last two completed fiscal years; personal tax returns for the last two completed fiscal years; personal tax returns for the last two years for all officers, directors and for any individual owning at least 5% of the business entity; business financial statements for the last two completed fiscal years, and current business financial statements no older than 60 days; articles of incorporation, corporate by-laws, or partnership agreements, as appropriate; and any other information which the Director of OPE deems necessary to permit a determination as to the social and/or economic disadvantaged status of the protested concern.

(2) Unless the protest presents specific information which would call into question the veracity of the application documents filed by a current participant in SBA's section 8(a) program, SBA may allow such a concern to submit, in lieu of the information specified in paragraph (b)(1) of this section, a sworn affidavit by its owner, managing partner, President or Chief Executive Officer that the 8(a) application and any amendments thereto remain accurate, and that circumstances concerning the ownership and control of the business and the disadvantaged status of its principal(s) have not changed since the most recent annual review. If the ownership and/or control of the business have changed since the date of the most recent annual review, the protested concern must comply with paragraph (b)(1) of this section. An affidavit may be allowed only if SBA has conducted an annual review of the 8(a) participant firm during the 12-month period preceding the date on which SBA receives the protest; and if proceedings to suspend, terminate or graduate the concern from the 8(a) program are not pending.

(3) Notwithstanding the exceptions in paragraph (b)(2) of this section, the Director of OPE is authorized to request any document which he/she deems necessary to determine disadvantaged status.

(c) Within 10 working days of the date that notification of the protest was received from the Director of OPE, the protested concern must deliver to the Director of OPE by hand or by mail the information and documentation requested pursuant to paragraph (b)(1) of this section or the affidavit permitted by paragraph (b)(2) of this section.

Materials submitted by mail must be received by the close of business on the 10th working day. Materials, including affidavits, not received by close of business on the 10th working day shall not be considered in deciding the protest.

**§ 124.609 Making the disadvantaged status determination.**

(a) *General.* The Director of OPE shall make a disadvantaged status determination within 15 working days after receipt of a protest challenging such status, or as soon thereafter as possible. If, in connection with an SDB acquisition or other procurement requirement, the SBA cannot make such a determination within 15 working days, the Director of OPE shall inform the contracting officer responsible for the particular requirement when a determination is expected to be made.

(b) *Time Limits for Response.* If the information and documentation requested by SBA under § 124.608(b) is not received by the Director of OPE within the 10-day period as required by § 124.608(c), SBA may determine the protested concern to be non-disadvantaged.

(c) *Withdrawal of Protest.* Once properly instituted by the filing of a specific disadvantaged status protest, the determination may be completed by the SBA even if the protest is withdrawn or the SDB acquisition or other procurement requirement in question is cancelled or awarded. The continuation of the disadvantaged status determination is discretionary with the SBA.

(d) *Basis for Determination.* (1) Except with respect to a concern which is a current participant in SBA's section 8(a) program or a concern authorized by § 124.609(b) of this part to submit an affidavit concerning its disadvantaged status, the disadvantaged status determination shall be based on the protest record as supplied by the protestor, protested concern, SBA or others.

(2) If deemed necessary or appropriate, the SBA may make a part of the protest record information in its files and information submitted in response to requests to the protestor, the protested concern, the contracting officer, or other persons for additional specific information.

(3) In determining disadvantaged status, SBA shall review ownership and control of each protested firm as well as social and economic disadvantage regardless of the grounds specified in the protest.

(e) *Disadvantaged Status Determination.* The SBA shall base its disadvantaged status determination upon the record, including reasonable inferences therefrom. SBA shall render a written determination including the basis for its findings and conclusions.

(f) *Summary Determination for Current 8(a) Participant.* The SBA may summarily determine that a concern is socially and economically disadvantaged if that concern is a current participant in the SBA's section 8(a) program so long as SBA has completed an annual review of the concern within the previous 12 month period unless the protested concern cannot submit or fails to submit an affidavit authorized by § 124.608(b) of these regulations. This summary determination shall not apply if suspension, termination, or graduation proceedings are pending against the concern.

(g) *Notification of Determination.* After making its disadvantaged status determination, the SBA shall immediately notify the contracting officer, the protestor, and the protested concern of its determination. No later than one business day thereafter, SBA shall provide by certified mail, return receipt requested, a copy of its written determination to the protested concern and, consistent with the Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552), to all other parties to the proceeding.

(h) *Results of an SBA Disadvantaged Status Determination.* (1) A disadvantaged status determination becomes effective immediately and remains in full force and effect unless and until reversed upon appeal by SBA's AA/MSB&COD pursuant to § 124.610 of this part.

(2) A concern which was determined to be non-disadvantaged may certify itself as a disadvantaged business for purposes of future SDB evaluation preferences, future SDB acquisitions, 8(d) subcontracts, and other Federal procurement programs requiring disadvantaged status as a condition for eligibility provided that it has a good faith belief that it has changed the conditions upon which the determination of non-disadvantaged status was based. At the time of such certification, the concern shall notify the contracting officer that it was previously determined to be non-disadvantaged. However, if such concern is the lowest responsive offeror for an SDB acquisition, or for any requirement by involving its SDB evaluation preference, or is otherwise deemed eligible for a Federal procurement program requiring disadvantaged status as a condition for eligibility, the contracting officer shall treat such certification as a protest of the concern's disadvantaged status and shall forward it to SBA pursuant to § 124.605(c) of this part. SBA shall process a protest based on such certification in accordance with the provisions of this part.

(3) If a current 8(a) participant is found to be non-disadvantaged as a result of failure to submit the affidavit permitted by § 124.608(b)(ii) of this part, or for other cause, the concern will be subject to the same certification and notice requirements specified in paragraph (i)(2) of this section. However, a determination of non-disadvantaged status will not automatically terminate the concern's 8(a) program participation. A hearing before an administrative law judge is required before a firm can be terminated from the 8(a) program, *see* § 124.112 of this part.

(i) *Misrepresentation of Disadvantaged Status.* (1) A concern which was determined to be non-disadvantaged and which has not overcome or changed the circumstances which caused this determination cannot certify itself to be disadvantaged for future SDB acquisitions, 8(d) subcontracts, and other Federal procurement programs requiring disadvantaged status as a condition for eligibility. A certification of disadvantaged status by such a firm may be deemed a misrepresentation of disadvantaged status.

(2) A concern which was previously determined to be non-disadvantaged and certifies, in good faith, that it is a disadvantaged business for a subsequent SDB acquisition, SDB evaluation preference, 8(d) subcontract, or other Federal procurement program requiring disadvantaged status as a condition for eligibility, must nevertheless inform the contracting officer that it previously had been determined by the SBA to be non-disadvantaged. Failure to advise the contracting officer of such a non-disadvantaged status determination by the SBA may be deemed a misrepresentation of disadvantaged status.

**§ 124.610 Appeals of disadvantaged status determinations.**

(a) Appeals to re-examine disadvantaged status determinations may be filed with the SBA's AA/MSB&COD by any of the following:

(1) The concern whose disadvantaged status was determined by the Director of OPE;

(2) The original protestor; and

(3) The procuring agency contracting officer responsible for the SDB

VOL 54 ISS 47 MR 13 1989 UMI

acquisition or other procurement requirement in question.

(b) Notice of an appeal must be provided to the protested concern, the original protestor, and the procuring agency contracting officer responsible for the SDB acquisition or other procurement requirement in question.

(c)(1) An appeal must be in writing and must be received by the Associate Administrator for Minority Small Business and Capital Ownership Development, U.S. Small Business Administration, 1441 L Street, NW., Washington, DC 20416, no later than 5 working days after the date of receipt of such determination.

(2) An untimely appeal shall be dismissed.

(d) *Grounds for Appeal.* The SBA will re-examine a disadvantaged status determination only if there was a clear and significant administrative error in the processing of such decision, or if the Director of OPE completely failed to consider a significant fact contained within the materials supplied by the protestor or the protested concern. Disadvantaged status determinations shall not be re-examined based on additional information or changed circumstances which were not disclosed to the Director of OPE at the time of his/her decision.

(e) No specific form is required for the appeal. However, the appeal must identify the disadvantaged status determination for which a re-examination is sought, set forth a full and specific statement of the reasons as to why the disadvantaged status determination is alleged to be erroneous pursuant to paragraph (d) of this section, and present arguments in support of such allegations.

(f) An appeal may proceed to completion even though an award of the SDB acquisition or other procurement requirement which prompted the initial protest has been made. In such a case, however, a reversal by the AA/MSB&COD shall not apply to the awarded SDB acquisition or other awarded procurement requirement and shall have future effect only.

(g) The appeal will be decided by the AA/MSB&COD within 5 working days of its receipt, if practicable.

(h) The appeal decision shall be based on all the information and documentation in the record. A copy of the decision shall be provided to the protested concern by certified mail, return receipt requested. To the extent consistent with the Privacy Act and the Freedom of Information Act, all parties to the proceeding shall be notified of SBA's final decision.

(i) The decision of the AA/MSB&COD is the final decision of the Small Business Administration.

Date: January 24, 1989.

**James Abdnor,**

*Administrator.*

BILLING CODE 8025-01-M

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### 14 CFR Part 39

**[Docket No. 88-NM-09-AD; Amdt. 39-6164]**

### Airworthiness Directives; Boeing Model 747 Series Airplanes Equipped With General Electric CF6-45/50 Series Engines or Rolls Royce RB211-524 Engines; McDonnell Douglas Model DC-9 Series Airplanes, Including Model DC-9-80 Series Airplanes, Model MD-88 Airplanes, and C-9 (Military) Airplanes; McDonnell Douglas Model DC-10 Series Airplanes and KC-10 (Military) Airplanes; Airbus Industrie Model A300 Series Airplanes, Model A300-600 Series Airplanes Equipped With General Electric CF6-80C2 Engines, and Model A310 Series Airplanes Equipped with Pratt & Whitney (P&W) 4000 Series Engines

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD), applicable to certain transport category airplanes identified above, which requires inspection and replacement, if necessary, of certain main fuel supply and vapor recovery hoses. This amendment is prompted by reports of premature degradation of the hoses, which has resulted in fuel leakage. This condition, if not corrected, could result in a fire in the airplane engine compartments.

**EFFECTIVE DATE:** March 30, 1989.

**ADDRESSES:** The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124; McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60); or Airbus Industrie, Product Support Division, Avenue Didier Daurat, 31700 Blagnac Cedex, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the FAA, Central Region, Chicago Aircraft Certification Office, 2300 East Devon Avenue, Room 232, Des Plaines, Illinois.

**FOR FURTHER INFORMATION CONTACT:** Mr. Les Taylor, Aerospace Engineer, Chicago Aircraft Certification Office, FAA, Central Region, 2300 East Devon Avenue, Room 232, Des Plaines, Illinois 60018; telephone (312) 694-7126.

**SUPPLEMENTARY INFORMATION:** The FAA has received several reports of failure of certain main fuel supply and vapor recovery hoses on various transport category airplanes, and consequent fuel leakage. The suspect hoses were manufactured using a material that has subsequently been found to be understrength in that it degrades prematurely under certain heat conditions. This hose material was manufactured by Aeroquip Corporation and the suspect hoses are installed in 601-type hose assemblies. The suspect fuel supply hoses bear cure date codes of 3Q84 through 2Q87; the suspect vapor recovery hoses bear cure date codes of 2Q84 through 3Q87. The suspect bulk 601 hose has a CAGE code of 50656 (regardless of cure date code).

Failure of the main fuel supply or vapor recovery hose could result in a fire in the airplane engine compartments.

The FAA has reviewed and approved the following service bulletins, which describe procedures for inspection of the main fuel supply and vapor recovery hoses on the various affected airplanes, and replacement of the hoses, if necessary:

| Airplane | Manufacturer | Service Bulletin | Date |
|---|---|---|---|
| B-747 series with CF6-45/50 engines | Boeing | 747-73A3046 | June 9, 1988. |
| B-747 series with RB211-524 engines | Boeing | 747-73A2049 | December 8, 1988. |
| DC-9 series, DC-9-80 series, Model MD-88 | McDonnell Douglas | A73-10, Rev. 1 | June 22, 1988. |
| DC-10 series | McDonnell Douglas | A73-21 | June 23, 1988. |

Additionally, Airbus Industrie has issued the following service bulletins which describe similar procedures:

| Airplane | Manufacturer | Service Bulletin | Date |
|---|---|---|---|
| A300 | Airbus Industrie | A300-73-009 | September 30, 1988. |
| A300-600 | Airbus Industrie | A300-73-6009 | October 11, 1988. |
| A310 | Airbus Industrie | A310-73-2011 Rev. 1 | September 27, 1988. |

Airbus Industrie Model A300, A300-600, and A310 series airplanes are manufactured in France and type certificated in the United States under the provisions of section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this situation is likely to exist or develop on other airplanes of the same type designs, this AD requires inspection of the main fuel supply and vapor recovery hoses and, if fuel leakage is detected, replacement of the hoses prior to futher flight, in accordance with the applicable service bulletin previously described. If fuel leakage is not detected, the suspect hoses must be repetitively inspected until replaced with serviceable hoses. Such replacement constitutes terminating action for the repetitive inspections. This section also prohibits the installation of bulk 601 hose with CAGE code of 50656.

The Direction Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, has issued a similar airworthiness directive addressing this subject.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

### List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

### Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

### PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

### § 39.13 [Amended]

2. By adding the following new airworthiness directive:

**Boeing, McDonnell Douglas, and Airbus:** Applies to Boeing Model 747 series airplanes equipped with General Electric CF6-45/50 series engines, as listed in Boeing Alert Service Bulletin 747-73A2048, dated June 9, 1988; Boeing Model 747 series airplanes equipped with Rolls Royce RB211-524 engines, as listed in Boeing Alert Service Bulletin 747-73A2049, dated December 8, 1988; McDonnell Douglas Model DC-9 series airplanes, including Model DC-9-80 series airplanes, Model MD-88 airplanes, and C-9 (Military) airplanes, as listed in McDonnell Douglas Service Bulletin A73-10, Revision 1, dated June 22, 1988; McDonnell Douglas Model DC-10 series airplanes and KC-10 (Military) airplanes, as listed in McDonnell Douglas Alert Service Bulletin A73-21, dated June 23, 1988; Airbus Industrie Model A300 series airplanes, as listed in Airbus Industrie Service Bulletin A300-73-009, dated September 30, 1988; Airbus Model A300-600 series airplanes equipped with General Electric CF6-80C2 engines, as listed in Airbus Industrie A300-73-6009, dated October 11, 1988; and Airbus Model A310 series airplanes equipped with Pratt & Whitney (P&W) 4000 series engines, as listed in Airbus Industrie Service Bulletin A310-73-2011, Revision 1, dated September 27, 1988; certificated in any category.

Compliance is required as indicated, unless previously accomplished.

To prevent engine compartment fires due to fuel leakage from degraded hose assemblies, accomplish the following:

A. Within 30 days after the effective date of this amendment, inspect the main fuel and vapor recovery hose assembly for fuel leakage and determine the cure date code contained on both the main fuel supply hose and the vapor recovery hose, in accordance with Boeing Alert Service Bulletin 747-73A2048, dated June 9, 1988 (for Model 747 series airplanes equipped with General Electric CF6-45/50 series engines); Boeing Alert Service Bulletin 747-73A2049, dated December 8, 1988 (for Boeing Model 747 series airplanes equipped with Rolls Royce RB211-524 engines); McDonnell Douglas Service Bulletin A73-10, Revision 1, dated June 22, 1988 (for Model DC-9 and DC-9-80 series airplanes, and Model MD-88 airplanes); McDonnell Douglas Service Bulletin A73-21, dated June 23, 1988 (for Model DC-10 series airplanes); Airbus Industrie Service Bulletin A300-73-009, dated September 30, 1988 (for Model A300 series airplanes); Airbus Industrie A300-73-6009, dated October 11, 1988 (for Model A300-600 series airplanes); or Airbus Industrie Service Bulletin A310-73-2011, Revision 1, dated

VOL 54 ISS 47 MR 13 1989 UMI

September 27, 1988 (for Model A310 series airplanes). The affected hose assemblies are Aeroquip Part Numbers (P/N):

| | |
|---|---|
| AE10008444H0140 | AE704313-1. |
| AE703400-3 | AE704312-2. |
| AE703402-2 | AE704314-1. |
| AE10001004H0072 | AE706348-1. |
| AE703530-1 | AE700084-2. |
| AE703861-1 | AE703402-2 or RBSL0010-503. |
| 801000-8-0304 | AE704312-5. |
| AE703860-1 | AE704312-7 or 221D4020-501. |
| AE703862-1 | AE704312-4 or 221D0041-*. |
| AE703863-1 | |
| 1AE10008444H0144 | |

The affected main fuel supply hoses contain cure date codes of 3Q84 through 2Q87. The affected vapor recovery hoses contain cure date codes of 2Q84 through 3Q87. The affected bulk 801 hose contains a CAGE code of 50656 (regardless of cure date code).

1. If fuel leakage is detected, prior to further flight, replace the hose(s) with a serviceable hose not containing the cure date codes or CAGE code specified above, in accordance with the applicable service bulletin identified above.

2. If the affected hoses are installed, but fuel leakage is not detected, repetitively inspect the hoses for evidence of fuel leakage in accordance with the schedule specified in the applicable service bulletin.

B. After the effective date of this amendment, bulk 801 hose with CAGE code or 50656 shall not be installed on any airplane.

C. Replacement of main fuel supply and vapor recovery hoses with serviceable hoses that do not contain the cure date codes or CAGE code specified in paragraph A., above, constitutes terminating action for the requirements of this AD.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Chicago Aircraft Certification Office, FAA, Central Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Chicago Aircraft Certification Office.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124; McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60); or Airbus Industrie, Product Support Division, Avenue Didier Daurat, 31700 Blagnac Cedex, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the FAA, Central Region, Chicago Aircraft Certification Office, 2300 East Devon Avenue, Room 232, Des Plaines, Illinois.

This amendment becomes effective March 30, 1989.

Issued in Seattle, Washington, on March 3, 1989.

**Leroy A. Keith,**

*Manager, Transport Airplane Directorate, Aircraft Certification Service.*

[FR Doc. 89-5630 Filed 3-10-89; 8:45 am]

BILLING CODE 4910-13-M

**14 CFR Part 95**

**[Docket No. 25814; Amdt. No. 349]**

## IFR Altitudes; Miscellaneous Amendments

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

**EFFECTIVE DATE:** April 6, 1989.

**FOR FURTHER INFORMATION CONTACT:** Paul J. Best, Flight Procedures Standards Branch (AFS-420), Air Transportation Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-8277.

**SUPPLEMENTARY INFORMATION:** This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitutes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 95**

Aircraft, Airspace.

Issued in Washington, DC on March 2, 1989.

**Robert L. Goodrich,**

*Acting Director, Flight Standards Service.*

**Adoption of the Amendment**

Accordingly and pursuant to the authority delegated to me by the Administrator, Part 95 of the Federal Aviation Regulations (14 CFR Part 95) is amended as follows effective at 0901 g.m.t.:

**PART 95—[AMENDED]**

1. The authority citation for Part 95 continues to read as follows:

**Authority:** 49 U.S.C. 1348, 1354 and 1510; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 95 is amended to read as follows:

14 CFR Part 97

[Docket No. 25813; Amdt. No. 1366]

## Standard Instrument Approach Procedures; Miscellaneous Amendments

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** The amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

**EFFECTIVE DATE:** An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the **Federal Register** on December 31, 1980, and reapproved as of January 1, 1982.

**ADDRESSES:** Availability of matters incorporated by reference in the amendment is as follows:

*For Examination—*

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

*For Purchase—*

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

*By Subscription—*

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

**FOR FURTHER INFORMATION CONTACT:** Paul J. Best, Flight Procedures Standards Branch (AFS-420), Air Transportation Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

**SUPPLEMENTARY INFORMATION:** This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP continued in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 97**

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC on March 3, 1989.

**Robert L. Goodrich,**

*Acting Director, Flight Standards Service.*

**Adoption of the Amendment**

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 g.m.t. on the dates specified, as follows:

**PART 97—[AMENDED]**

1. The authority citation for Part 97 continues to read as follows:

**Authority:** 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; §97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

## FEDERAL TRADE COMMISSION

16 CFR Part 456

## Trade Regulation Rule; Ophthalmic Practice Rules

**AGENCY:** Federal Trade Commission.

**ACTION:** Final Trade Regulation Rule.

**SUMMARY:** The Federal Trade Commission issues a final rule that removes restraints imposed by state law on certain specified forms of commercial ophthalmic practice. The Commission has concluded that these restrictions are unfair acts or practices within the meaning of Section 5 of the Federal Trade Commission Act and are appropriately remedied by the Trade Regulation Rule promulgated today. The rule bars four types of state restrictions on commercial practice: (1) Prohibitions on certain forms of lay association with or control over optometric practices; (2) limitations on the number of branch offices which optometrists may own or operate; (3) prohibitions on the practice of optometry in commercial locations; and (4) prohibitions on the practice of optometry under a nondeceptive trade name. The rule also incorporates, with minor technical changes, the prescription release requirement originally promulgated as part of the Trade Regulation Rule on Advertising of Ophthalmic Goods and Services.

Published here are the Rule's Statement of Basis and Purpose, which incorporates a Regulatory Analysis, and the text of the final rule.

**EFFECTIVE DATE:** September 1, 1989.

**ADDRESS:** Requests for copies of the Rule and the Statement of Basis and Purpose should be sent to the Public Reference Branch, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, DC 20580.

**FOR FURTHER INFORMATION CONTACT:** Richard Kelly, Renee Kinscheck, or Patricia Brennan, Division of Service Industry Practices, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580 (202) 326-3304, (202) 326-3287, or (202) 326-3274.

**SUPPLEMENTARY INFORMATION:**

**List of Subjects in 16 CFR Part 456**

Eyeglasses, Ophthalmic practice, Trade rules.

By direction of the Commission, Chairman Oliver dissenting.

**Donald S. Clark,**

*Secretary.*

**Statement of Basis and Purpose**

*I. Introduction*

A. Overview of the Rule

1. *Commercial Practice Restrictions.* Some state-imposed restrictions on the commercial practice [1] of optometry cause significant injury to consumers. While justified as necessary to protect consumers, these restrictions actually work to deprive consumers of necessary eye care, restrict consumer choice, and impede innovation in the eye care industry.

The monetary cost—likely to be millions of dollars annually—is great. Over half of all Americans and more than 90 percent of elderly consumers use corrective eyewear, and over eight billion dollars was spent on eye exams and eyewear in 1983.[2] A significant

[1] Optometric practices range across a continuum from what can be characterized as strictly traditional (e.g., solo practitioner operating in an office building under own name) to highly commercial (e.g., large chain optometric firm, with offices in many states). For purposes of this proceeding, an optometrist is considered to be in "commercial practice" if he or she is associated with or employed by a nonoptometrist, uses a trade name, operates more than a single office, or practices at a mercantile location.

[2] NAOO, H-78, at 7 (figure derived from the annual National Consumer Eyewear study conducted by the Optical Manufacturers Association). The NAOO anticipated that 1985 sales would exceed nine billion dollars.

All documents on the rulemaking record have been given alphanumeric designations based upon the system established by the Presiding Officer. A full explanation of these designations is given at the beginning of Bureau of Consumer Protection.

Continued

VOL 54 ISS 47 MR 13 1989 UMI

proportion of these costs can be attributed to the inefficiencies of an industry protected from competition by state regulation. A study done by the FTC's Bureau of Economics shows that prices for eye care are 18 percent higher in markets where chain firms are totally restricted than in markets where chain firms operate freely.

State restrictions on commercial practice are pervasive. Some restrictions are statutory. Others are found in regulations promulgated by state boards of optometry.[5] This rule declares unfair four specific types of state restrictions on competition among optometrists and other vision care providers:

(1) *Restrictions on Affiliations With Nonoptometrists.* Most states have one or more restrictions on lay affiliations. Such restrictions take many forms, including restrictions on employment of optometrists by business corporations or nonoptometrists, on the forming of partnerships between optometrists and nonoptometrists, on the splitting of optometrists' professional fees with nonoptometrists (which, in effect, can prohibit joint-ownership or equity-participation agreements), and on the forming of franchise agreements and landlord-tenant agreements between optometrists and nonoptometrists, including agreements under which rental payments are based on a percentage of gross revenue.[6] Some states also prohibit such corporate affiliations by prohibiting nonoptometrists from exercising any control over the business aspects of an optometric practice.[6]

(2) *Restrictions on practice in mercantile locations.*[6] Over twenty states impose one or more bans that appear to explicitly prohibit the practice of optometry in mercantile locations. The most common ban explicitly prohibits optometrists from practicing in or leasing space from a retail establishment, such as a department store or optical store. Most states that prohibit optometrists from practicing in a retail establishment permit optometrists to locate in or next to that business only if there is a separate entrance to a public street or hallway, in what is known as a "two-door" or "side-by-side" arrangement. In addition, several states appear to restrict practice in shopping malls.[7]

(3) *Restrictions on branch offices.* Many states restrict the number of offices that an optometrist may own or operate. Some impose flat limitations on the number of offices that an optometrist may open,[8] while others indirectly impose limits by requiring an optometrist to be present a certain percentage of the time a branch office is open.[9]

(4) *Restrictions on the use of trade names.*[10] Trade name restrictions generally take one of three forms. First, some states explicitly ban any use of trade names by optometrists.[11] Second, some states specify that trade names must include certain words.[12] Third, several states require that the names of all optometrists practicing under a trade name or at any advertised location must be disclosed in all advertisements that use the trade name.[13]

As of 1985, at least 44 states had one or more of these four types of restrictions.[14] Thirty-nine states prohibited employer-employee or other business affiliations between optometrists and persons who are not optometrists, including partnerships, joint-ownership or equity-participation agreements, franchise agreements, landlord-tenant agreements, and other similar affiliations. At least 19 states limited the number of branch offices which may be owned or operated by optometrists, often limiting optometrists to one or two branch offices. Thirty states restricted optometrists from practicing in mercantile locations such as shopping malls, department stores, and other retail establishments. At least 32 states prohibited the use of nondeceptive trade names by optometrists. Each of these restrictions prevents or restricts the development of alternatives to the traditional solo practice.

Evidence gathered during a lengthy investigation and an extensive rulemaking proceeding includes two Commission-sponsored surveys, additional survey evidence, and expert economic, testimonial, and documentary evidence. That substantial body of evidence demonstrates that these restrictions raise prices to consumers and, by reducing the frequency with which consumers obtain vision care, decrease the overall quality of care provided in the market. The rulemaking record establishes that the presence of commercial optometric firms lowers the cost of eye care to patients of both commercial and noncommercial optometrists. The evidence also indicates that these restrictions do not provide offsetting quality-related benefits to consumers.

The Commission has concluded that these restrictions are unfair acts or practices within the meaning of section 5 of the Federal Trade Commission Act and are appropriately remedied by the Trade Regulation Rule promulgated today.

2. *Prescription Release.* The rule continues to require that optometrists and ophthalmologists release eyeglass lens prescriptions to their patients upon completion of an eye examination. The Commission considered a staff proposal

---

Federal Trade Commission, Ophthalmic Practice Rules: State Restrictions on Commercial Practice, (1988), L-1 (hereinafter referred to as "Final Staff Report"). For example, documents in the H category are written comments filed by providers or sellers of ophthalmic goods or services and by ophthalmic organizations. Documents in the J category are written witness statements, transcripts of the hearings and hearing exhibits. Hearing transcripts, which appear on the rulemaking record as J-71, are cited by page number (e.g., "Tr. 998").

[5] In still other cases, attorney general opinions, judicial interpretations, and board interpretations may reveal restrictions not apparent from the face of the statute or regulation.

[6] The sharing of profits or of gross revenues is an integral part of many of these business relationships. For example, partnership agreements involve distribution of income on a percentage basis. An essential element of franchise agreements is payment of a percentage of gross revenues by the franchisee to the franchiser, often referred to as a "royalty."

[6] Some degree of lay control over the business aspects of a practice is an essential element of these relationships.

[6] As used herein, "mercantile location" refers to shopping malls and to retail establishments such as department stores and optical outlets.

[7] Two states, Rhode Island and Alaska, apparently prohibit shopping mall practices altogether. While Rhode Island's prohibition does not mention shopping malls explicitly, it does bar optometrists from practicing in a building where over 50% of the remaining space is rented under percentage leases. Since such leases are almost universally used in shopping centers, J. Solish, Counsel, R.H. Teagle Corp., Tr. 1271; C. Calleon, NAOO, Tr. 283, the effect of this provision is to inhibit optometric practice in shopping centers. In Alaska, no such ban appears in statute or regulation. However, there is evidence that the Board of Optometry enforces such a restriction. J. Ingalls, President, Western States Optical, J-84, at 3-4.

[8] See, e.g., Ky. Rev. Stat. section 320.310(3) (1988).

[9] See, e.g., Or. Admin. R. section 853-10-080(6) (1984).

[10] The Supreme Court's decision in *Friedman v. Rogers*, 440 U.S. 1 (1979), that a Texas statute prohibiting the use of trade names did not violate the First Amendment, does not preclude a Commission finding of unfairness regarding trade name bans. The Commission applies a different standard for purposes of an unfairness analysis under section 5 of the FTCA.

[11] See, e.g., Fla. Stat. section 463.014(1)(e); Ind. Admin. R.1-4-1(a).

[12] For example, California requires that all trade names contain the word "optometrist" or "optometric." Cal. Bus. & Prof. Code sections 5123 (b) and (c).

[13] See, e.g., Md. Rev. Stat. section 388.200.

[14] See charts in Final Staff Report, L-1, at 33-46, for a detailed breakdown of state regulation of the practice of optometry. The statistics on commercial practice restrictions cited here and elsewhere in the Statement are based on an analysis of state regulatory practice as of 1988. A sampling of state statutes and regulations as of October 1988, confirmed that one or more of the restraints at issue here continue to exist in a majority of the states.

to modify this provision to require that prescriptions be released only upon request. After weighing the evidence, we conclude that there is a continuing need for the "automatic release" component of the requirement. However, technical changes have been made in the rule language in order to make clear that this provision is directed only at prescriptions for eyeglass lenses and creates no obligation concerning the release of prescriptions for contact lenses.

B. History of the Proceeding.

This proceeding grew out of an investigation begun in 1975 into state and private restraints on advertising of ophthalmic goods and services. The first phase of the investigation culminated with the promulgation in 1978 of the Trade Regulation Rule on the Advertising of Ophthalmic Goods and Services.[15] As the investigation progressed, the staff began to accumulate evidence that restrictions on advertising were not the only public restraints that appeared to limit competition, increase prices, and reduce the quality of eye care provided to the public. The second phase of this inquiry focused on the commercial practice restrictions described above.

To obtain further evidence on these issues, staff conducted two comprehensive studies. The first, published in 1980 by the Bureau of Economics, compared the price and quality of optometric services in restrictive and nonrestrictive markets.[16] The second study, published in 1982 by the Bureaus of Consumer Protection and Economics, compared the price and quality of cosmetic contact lens fitting services of commercial optometrists and other provider groups.[17] At the same time, the staff conducted a study measuring compliance with the prescription release requirement of the Eyeglasses Rule.[18]

In July 1980 staff published the results of its investigation on commercial practice restrictions in an initial staff report.[19] Based on this report and other evidence gathered, the Commission published an Advance Notice of Proposed Rulemaking ("ANPR") in December 1980, that requested comments on the issues presented by the investigation and on what action, if any, the Commission should take.[20]

Based on the survey evidence, the initial staff report, and the comments received in response to the ANPR, the Commission published on January 4, 1985, a Notice of Proposed Rulemaking initiating this rulemaking proceeding ("Eyeglasses II").[21] During the proceeding, 243 written comments were received: 12 from consumers and consumer groups; 159 from optometrists, sellers of ophthalmic goods, and their professional associations; 69 from federal, state, and local government officials; and 3 from members of the academic community. Ninety-four persons testified during three weeks of public hearings.[22] Twenty-four rebuttal comments were filed in response to that testimony.

The staff reviewed the entire record and published its final report in October 1986.[23] The report recommended the promulgation of a rule that would eliminate the four types of commercial practice restrictions described above and modify the prescription release provisions in the Eyeglasses Rule. The Presiding Officer's Report, released in December 1986,[24] recommended against adopting a rule that would proscribe commercial practice restrictions, and also recommended against modifying the prescription release requirements of the Eyeglasses Rule. After review of these comments, the staff submitted its final recommendations to the Commission in July 1987.[25]

On November 5, 1987, the Commission heard oral presentations from several rulemaking participants who had asked to present their views directly to the Commission as provided in § 1.13(i) of the Commission's Rule.[26] The Commission met on February 10, 1988, and voted to promulgate a rule that prohibits four specified types of state bans on commercial practice and retains the prescription release requirement from the original Eyeglasses Rule.

*II. Factual Basis for the Rulemaking*

A. Evidentiary Standards for an Unfairness Rulemaking [27]

The Commission requires that a preponderance of the evidence support the factual propositions underlying a determination that an existing act or practice is legally unfair. Before promulgating an unfairness rule the Commission requires answers to the following questions: (1) Is the act or practice prevalent? (2) Does the act or practice injure consumers? (3) Is the proposed rule likely to reduce that injury? (4) Is the injury to consumers outweighed by countervailing benefits that flow from the act or practice at issue? and (5) Can consumers reasonably avoid the injury? [28]

---

[15] 16 CFR Part 456 (hereinafter cited as "Eyeglasses Rule"). The Commission found public and private bans on nondeceptive advertising by vision care providers and the providers' failure to release eyeglass lens prescriptions to be unfair acts or practices in violation of section 5 of the FTC Act. The rule prohibited bans on nondeceptive advertising and required vision care providers to furnish copies of prescriptions to consumers after eye examinations. Subsequently, the U.S. Court of Appeals for the District of Columbia in *American Optometric Association v. FTC*, 626 F.2d 896 (D.C. Cir. 1980), upheld the prescription release requirement but remanded the advertising portions of the Eyeglasses Rule for further consideration in light of the Supreme Court decision in *Bates v. State Bar of Arizona*, 433 U.S. 350 (1977). After further consideration, the Commission has addressed the few remaining advertising restrictions through administrative litigation rather than rulemaking.

[16] Bureau of Economics, Federal Trade Commission, Restrictions on Advertising and Commercial Practice in the Professions: The Case of Optometry (1980), B-2-31 (hereinafter cited as "BE Study"). That study showed that commercial practice restrictions resulted in higher prices for eyeglasses and eye examinations, but did not increase their quality.

[17] Bureaus of Consumer Protection and Economics, Federal Trade Commission, A Comparative Analysis of Cosmetic Lens Fitting by Ophthalmologists, Optometrists, and Opticians (1983), B-5-1 (hereinafter cited as "Contact Lens Study"). That study showed that commercial optometrists charged significantly lower prices for fitting cosmetic contact lenses and fitted such lenses at least as well as other fitters of contact lenses.

Federal Trade Commission*, 767 F.2d 957, 971 (1985); Rule on Sale of Used Motor Vehicles, Statement of Basis and Purpose, 49 FR 45692, 45703 (1984); Credit Practices Rule, Statement of Basis and Purpose, 49 FR 7740, 7742 (1984); Letter from Federal Trade Commission to Senators Wendell H. Ford and John C. Danforth (Dec. 17, 1980) (hereinafter cited as "Unfairness Statement"). In issuing the Credit Practices Rule, the Commission acknowledged that the evidence necessary to answer these questions will vary depending on the circumstances of each rulemaking and the characteristics of the industry involved. 49 FR 7740, 7742 n. 4.

VOL 54 ISS 47 MR 13 1989 UMI

As a matter of policy, the Commission has set an even higher standard for promulgation of a rule that directly challenges state law. Out of deference to the principles of federalism, the Commission will take such action as a remedy of last resort, appropriate only if substantial consumer injury is clearly shown; the benefits of the state laws are minimal or absent; and the states are not acting on their own to change the laws.[59]

In this proceeding, the record clearly supports affirmative answers to each of the above-mentioned questions. First, at least 44 states have one or more of the four types of restrictions at issue here. Second, comprehensive and reliable evidence shows that the restrictions cause significant harm to consumers by increasing prices and reducing the frequency with which consumers obtain care. Third, by declaring that such restrictions are unfair, the rule removes such restrictions and thereby eliminates the harm to consumers. Fourth, comprehensive and reliable evidence indicates that the restrictions do not provide consumer benefits since they fail to increase the quality of care received by consumers. Fifth, consumers cannot avoid the adverse effect of these state-imposed and state-enforced restrictions.[60]

The Commission has a responsibility to see that the best evidence reasonably available is included on a rulemaking record before promulgating a rule.[61] The best evidence will often be surveys or other methodologically sound quantitative analyses. The Commission may also consider other reliable evidence and expert testimony.

The quantity and quality of evidence in this proceeding supports promulgation of the rule under standards set by the Commission and the courts. The need for the rule is demonstrated by the BE and Contact Lens Studies.[62] The rule is further supported by additional studies, by documentary and testimonial evidence, and by the absence of any substantial or persuasive contrary evidence. The cumulative impact of this evidence persuades us that the rule is necessary and will provide substantial benefits to consumers.

[62] See infra section II.D. for a detailed discussion of the methodology used in these studies.

B. Evidence Regarding Harm to Consumers Caused by Commercial Practice Restrictions.

1. *Higher Prices.* The evidence on the record demonstrates that commercial practice restrictions raise prices for eye care goods and services.[63] By impeding competition from commercial firms, the restrictions result in higher average prices for both commercial and traditional practitioners and at all levels of quality. This conclusion is supported by a preponderance of the evidence, which shows: (1) That average prices for eye exams and eyeglasses are lower in markets with chain firms than in markets without chain firms; (2) that chain firms and other large-volume providers charge significantly lower prices than noncommercial providers; and (3) that each of the restrictions imposes unnecessary costs on commercial practice that impede its development and raise prices to consumers. No reliable evidence contradicts these conclusions.[64]

The BE Study found that prices for eye exams and eyeglasses were 18% higher in markets without chain firms than in markets with chain firms. In markets with chain firms, both traditional and commercial optometrists charged lower prices, and prices were lower at all levels of quality.[65] An earlier study by Professors Lee and Alexandra Benham also concluded that prices of eyeglasses were substantially higher in states with restrictions than in states without restrictions.[66]

Additional evidence demonstrating that commercial firms—generally chain firms or other large-volume providers—charge significantly lower prices for equivalent quality goods and services than noncommercial optometrists includes: (1) The Contact Lens Study, which found that commercial optometrists charged significantly less for cosmetic contact lens fitting than noncommercial optometrists; [67] (2) a survey submitted by the California Optometric Association, which found that chain optometric firms charged less for eye exams than private optometrists; [68] and (3) extensive documentary and other evidence demonstrating that large-volume providers frequently take advantage of economies of scale to charge lower prices for equivalent goods and services.[69]

Finally, as summarized below, the record demonstrates that each of the specific restrictions at issue here imposes unnecessary costs on optometric providers and hinders the development of high-volume practices, resulting in fewer such firms in the market, higher prices to consumers, and decreased access to eye care.

While the studies on the record do not separately describe the effects of each particular commercial practice restriction, the record contains an abundance of other evidence that supports a Commission finding that each of the four types of restrictions inhibits or restricts the formation and expansion of high-volume optometric practices.[70] In addition, the record establishes how the restrictions decrease efficiency and increase prices for volume practitioners that manage to enter the market in spite of the restrictions.

(1) Restrictions on lay associations prohibit optometrists from obtaining capital from nonoptometrists by entering into partnerships, joint ownership agreements or other associations with such persons or entities, a constraint which inhibits capital development. This, in turn, impedes the development of large-scale practices that can take advantage of volume purchase discounts and other economies of scale.[71] These

[63] See Final Staff Report, L-1, at 157-178.

[64] Id. at 168-178.

[65] Id. at 101-107.

[66] Benham and Benham, *Regulating Through the Professions: A Perspective on Information Control*, 18 J. L. & Econ. 421 (1975), B-3-39. See Final Staff Report, L-1, at 104 for a further discussion of the Benhams' study. In the 1980 Staff Report and the Final Staff Report, staff acknowledged several potential methodological shortcomings with the Benham data which indicate that the study, standing alone, would not be sufficient to support this rulemaking. Final Staff Report, L-1, at 105; 1980 Staff Report, B-2-1, at 46, 86-89. Despite these potential shortcomings, the record indicates that the Benham data provides useful information to corroborate the findings of the BE Study. Final Staff Report, L-1, at 104-105. See also 1980 Staff Report, B-3-1, at 56-59.

[67] The results showed that commercial optometrists charged prices that were on average 20% lower than noncommercial optometrists and over 30% lower than ophthalmologists.

[68] Consumer Study of Optometric Practices in Metro-Atlanta Area, J-87(a) (Attachment to Statement of California Optometric Ass'n) (hereinafter cited as "Atlanta Survey"). The survey was conducted by John H. Thomas and Associates, Atlanta, Georgia. See Final Staff Report, L-1, at 161-163 for a further description of this survey.

[69] For example, in 1982, the California Department of Consumer Affairs estimated that the cost differences attributable to economies of scale during the first 10 years of practice between an independent solo practitioner and a corporation could range from $12 to $13 per customer. Department of Consumer Affairs, State of California, Commercial Practices Restrictions in Optometry 8-11, 13 (1982), J-24(b). See also Final Staff Report, L-1, at 59-67, 177-178.

[70] See Final Staff Report, L-1, at 49-100.

[71] The record indicates that the use of volume discounts by high-volume practices can reduce significantly the costs of equipment, material, and supplies. For example, the NAOO stated that through the use of volume discounts, an office could

Continued

restrictions contribute to higher prices by excluding or deterring volume practitioners from entering the market and by preventing practitioners in the market from operating at the most efficient level.[72]

(2) Restrictions on practicing in mercantile locations, such as department or drug stores, also raise prices to consumers by inhibiting the formation of high-volume commercial practices. Mercantile locations, which are generally more convenient to consumers, generate a high volume of consumer traffic. Restrictions on practicing in mercantile locations may also impose unnecessary space, construction, or personnel costs that must be passed on to consumers.[73] These burdens fall both on optometric chain firms and on individual practitioners.

(3) Restrictions on branch offices create barriers to expansion both by individual optometrists and by lay optometric firms. These restrictions reduce the total volume of patients that a practice might otherwise be able to serve. This reduced volume of patients prevents optometrists from taking advantage of economies of scale that arise from volume purchasing discounts and reduced per office advertising costs. Also lost are the potential savings that multi-branch practices may achieve through more efficient management techniques.[74]

(4) Bans on trade name practice and advertising deprive consumers of valuable information and increase consumer search costs. Trade names are of value to consumers because, over time, the names come to reflect the cumulative experience that consumers have had with a particular firm. As a result, trade names are a valuable asset to firms, and restrictions on their use hinder the growth and development of optometric firms. Trade name bans also make it difficult for high-volume operators to advertise multiple outlets and to allocate advertising expenses over those outlets.[75]

The record also establishes [76] that state laws which require that all trade name advertisements include the names of all optometrists practicing at a given advertised location or practicing under the advertised trade name effectively ban much nondeceptive trade name advertising. Thus these restrictions have a similar detrimental effect on consumers as outright bans on trade name usage and advertising.

Many states have enacted more than one of these restrictions.[77] While each of these restrictions may impede the growth and efficiency of chain firms or volume practices, a combination of restrictions may completely bar their entry.

The Presiding Officer also found that the record demonstrated that prices for optometric goods and services are significantly lower in nonrestrictive markets than in restrictive markets.[78] Commenters did not seriously dispute the evidence that large-volume practitioners can achieve economies of scale unavailable to smaller practitioners,[79] nor did they submit any reliable studies that contradicted the price findings of the BE and Contact Lens Studies.[80]

2. *Less Care.* Commercial practice restrictions harm consumers not only by raising prices but also by decreasing the overall quality of care received by consumers. The record evidence indicates that, as a result of the higher prices in restrictive markets, consumers obtain eye care less frequently than they otherwise would.[81] Some consumers

be equipped for about two-thirds of the standard retail price. Moreover, materials such as frames and lenses can be discounted as much as 25% when purchased in volume. See Final Staff Report, L-1, at 60-61.

[72] Id. at 57-67.

[73] For example, in those states that mandate a two-door or side-by-side arrangement, optometrists typically must maintain an office that is separate from the optical dispensary and that also has a separate entrance to a public street, corridor, or hallway. This results in higher construction costs, requires more space and thus more rent, and increases frontage costs.

The NAOO estimates that the cost of constructing, equipping, and fixturing a side-by-side office is 15-20% higher than for an equivalent one-door office. NAOO, H-78, at 35. This cost, which typically might amount to $10,000 per office, includes duplicating the heating, cooling, bathroom, waiting room, and other facilities. See also Final Staff Report, L-1, at 84-88.

[74] For example, branch office restrictions may prevent optometric firms from employing or entering into other business relationships with optometrists at more than the permitted number of locations. NAOO, H-78, at 60. Each office that the optometrist is scheduled to work in is considered a branch for purposes of these restrictions, so that firms cannot schedule an optometrist to practice in more than the permitted number of locations. This may prevent these firms from efficiently distributing their optometrists to best meet the needs of the firms' various offices. See Final Staff Report, L-1, at 74-77.

[75] See Final Staff Report, L-1, at 95-97.

[76] The evidence shows that the cost of disclosing the names of all optometrists practicing under a trade name is so burdensome as to preclude the effective use of trade names under many circumstances. Similarly, the cost of disclosing the names of all optometrists at particularly advertised locations effectively prevents nondeceptive trade name usage in such advertisements under some circumstances. See NAOO, H-78, at 84-87. G. Black, Arkansas Retail Merchants Ass'n, D-1 at 2; P. Zeidman, Counsel, International Franchise Ass'n, Tr. 617-620; NAOO Panel, Tr. 538; and Final Staff Report, L-1, at 86.

[77] At least 26 states have at least three of these restrictions. *See* charts in Final Staff Report, L-1, at 33-46.

[78] Presiding Officer's Report, L-2, at 182-196.

[79] Some commenters pointed to limited instances in which smaller-volume practitioners may achieve economies of scale. *See* e.g., Reponse of the COA to Dept. of Consumer Affairs Report, K-12, at 6 (attachment to Rebuttal of the COA) and Post-record comment of AOA, M-176, at 454. However, even if small discounts are available to small-scale practitioners, that does not contradict the fact that larger discounts may be available to high-volume practitioners.

[80] See Final Staff Report, L-1, at 165-171. Some survey evidence was presented by the COA and the AOA that ostensibly showed that commercial firms do not charge less and may even charge more than noncommercial optometrists. For instance, the COA claimed that the Atlanta Survey's findings on "mark-ups" showed that "alleged corporate efficiencies (*e.g.*, savings through volume discounts) were not being passed on to consumers" because all the provider groups had equivalent "mark-ups" on materials. However, this "mark-up" data provided no useful insight into the relative prices charged by the different provider groups because of considerable variation in the wholesale costs of the frames and lenses purchased for the survey. *Id* at 165-66. The AOA also attempted to rely on some data from a *20/20* magazine survey showing that average billings were higher for optometric practices with annual sales greater than $200,000 a year than for practices with lower annual sales. However, this survey fails to provide meaningful data about differences between chain and nonchain firms. *Id.* at 168-170. It also fails to provide meaningful data about differences between low-volume practices and high-volume practices, as that term has been used in this proceeding—*i.e.*, multi-optometrist, multi-office practice. See Rebuttal Statement of R. Bond, FTC economist, L-16, at 15 n. 6. As explained by the author of the *20/20* article, each group (both over $200,000 and under $200,000) most probably includes both chain and independent operations. It is unclear whether the reported gross sales volume refers to per-office volume or per-company volume. If the data is *per-office* gross sales, the data cannot be used to distinguish low-volume firms from those with a significantly larger volume since large chains may have per-office volume above or below $200,000, while private practitioners may also be in either category. (This data was calculated based upon figures in Rebuttal Statement of NAOO, H-78a, at 11 and in Ophthalmic Practice Rulemaking Statement and Exhibits—Robert R. Nathan Associates, Inc., J-66(A), at Vol. II, Ex. 1, Appendix E at E-3 (hereinafter referred to as "Nathan Study"). If the data is *per company*, $200,000 is too low a figure to provide a meaningful distinction between high and low volume. Many solo practitioners have this volume, but some chain firms have annual sales in the billions. Further, the *20/20* article noted that in this sample, more smaller practices advertised than larger ones; only 40 percent of larger practices advertised. "One probable reason would be the infrequent advertising of many large ophthalmological and optometric practices which still deem advertising to be unprofessional." *20/20* Article; Nathan Study, J-66(a) at Vol. II, Ex. II, Appendix E, at E-2, E-6. This indicates that many traditional private practitioners and small group practices were included in the "over-$200,000" group.

[81] Professors James Begun and Lee Benham stressed the importance of frequency of eye care as an aspect of quality and stated that there can be little doubt that the restrictions result in reduced frequency of vision care purchases. *See* J. Begun, Professor, Virginia Commonwealth University, K-1,

VOL 54 ISS 47 MR 13 1989 UMI

forego eye care entirely, while others delay the purchase of eyeglasses and eye exams.

Evidence of the rulemaking record shows that some consumers are not obtaining adequate vision care because of financial circumstances. Testifying in favor of Medicare coverage for eye care, the AOA told a Congressional committee in 1976 that many elderly persons go without adequate vision care because of its cost.[53] In that Congressional testimony, the AOA also provided evidence that uncorrected vision problems can lead to serious injury to older consumers. According to the AOA, 65 percent of all serious injuries sustained by persons 65 and older are caused by falls; 25 percent of these relate directly to uncorrected vision problems.

Survey evidence also demonstrates that higher prices result in reduced purchases of eye care. Based on the results of an extensive nationwide survey, Professors Lee and Alexandra Benham found that significantly fewer individuals purchased eyeglasses in a given year in states with higher prices than in states with lower prices.[54] In 1979, a survey of 1,234 families sponsored by General Mills found that families had cut back on annual medical checkups, new eyeglasses, dental treatment, and various preventive health care services because of inflation.[55]

Finally, Public Health Service data indicate that annual purchase and repair of eyeglasses increases with family income.[56] This evidence indicates that economic considerations influence vision care expenditures, and that people are likely to cut back such expenditures as prices rise.

Very few proponents of the restrictions addressed the question of the frequency of eye care purchases. While some pointed to alleged shortcomings of the survey data discussed above, none of the alleged shortcomings prevent the Commission from concluding that commercial practice restrictions, which raise the price of eye care, lead to reduced purchases of eye care.[57]

A few commenters did state that no one is going without eye care since special assistance is available for the indigent.[57] However, no evidence was presented by these commenters to indicate how extensive such programs are or under what circumstances they would apply. Moreover, these commenters did not address the point that consumers not eligible for such assistance programs may be delaying or rationing purchases because of higher prices. On the other hand, we find persuasive the testimony of consumer groups that all but the poorest consumers must pay for vision care out of their own pocket without reimbursement by public assistance or private insurance.[58] A study by the Optical Manufacturers Association demonstrated that only 10–20 percent of all expenditures for eye examinations, eyeglasses, and contact lenses is paid for by insurers or other third-party payors. The remaining 80–90 percent is paid directly by the patient.[59]

Commercial practice restrictions also affect consumers' access to vision care by restricting the places where an optometrist may locate. The record indicates that commercial optometrists may be more conveniently located [60] and may be more frequently available on weekends and evenings.[61] These are additional reasons why restrictions on such firms tend to reduce accessibility and the frequency of purchase of vision care.

### C. Countervailing Benefits of Commercial Practice Restrictions

The stated justification for commercial practice restrictions is that they are necessary to maintain high-quality vision care.[62] If this assertion were true, one would expect to find higher quality care in those markets where commercial practice is prohibited or limited. But the record is quite clear on this central issue: There is no difference in the average quality of care available to consumers in restrictive and nonrestrictive markets.[63] Our conclusion that commercial practice restrictions do not increase the average quality of care provided [64] is based primarily on the results of the BE Study, and is also supported by the Contact Lens Study and by the absence of any substantial and reliable contrary evidence.

The BE Study compared eye care quality in markets with and without chain firms and found that the overall level of quality of eye care was not lower in markets where chain firms were allowed to operate.[65] The study provides reliable evidence covering major areas of eye care provided by optometrists, including the accuracy of prescriptions, the accuracy and workmanship of eyeglasses, the extent of unnecessary prescribing, and the ability to detect eye problems and pathologies.[66] The study found that there was no significant difference in any of these aspects of quality between markets with chain firms and those without chain firms.[67]

The BE Study did find significant variation in the extensiveness of eye examinations provided by optometrists in both restrictive and nonrestrictive markets. The evidence shows that an equal percentage of optometrists provide more extensive exams and less extensive exams in both types of markets.[68] In nonrestrictive markets, commercial optometrists, on average, provide more of the less extensive exams than noncommercial optometrists. In restrictive markets, where all optometrists are by definition noncommercial optometrists, an equal percentage of optometrists provide less extensive exams. These optometrists, like the commercial optometrists, provide less costly and less extensive exams, although their prices are significantly higher than those of the commercial optometrists in nonrestrictive markets.

These findings demonstrate that commercial practice restrictions do not affect the distribution of quality within a given market. Other factors such as the forces of supply and demand are most likely responsible for this distribution. At most, the evidence suggests that there is a group of optometrists in both types of markets that will meet the demand for lower-cost, less-extensive exams. Where commercial practice is restricted, noncommercial optometrists meet that demand, but charge higher prices than commercial practitioners in nonrestrictive markets. Even though commercial firms may, on average, provide less extensive exams than those provided by noncommercial optometrists in nonrestrictive markets, the overall quality of care is no lower in those markets.[69]

The findings of the BE Study on quality of care are supplemented by the Contact Lens Study's conclusion that, on average, commercial optometrists fitted cosmetic contact lenses at least as well as noncommercial optometrists.[70]

Proponents of the restrictions offered no evidence on differences in quality between restrictive and nonrestrictive markets, but instead attempted to show that commercial optometrists provide lower quality of care than noncommercial optometrists.[71] Much of this evidence was anecdotal and was often countered by other anecdotal testimony concerning poor quality of care provided by noncommercial optometrists.[72]

Moreover, the survey evidence that was presented by proponents of the restrictions was unreliable. The Nathan Study, commissioned by the AOA, was offered as evidence of quality differences between commercial and noncommercial optometrists in one market.[73] However, that study failed to employ generally accepted and recommended survey techniques in order to guard against bias. The record indicates that the procedures used created a significant potential that the bias of AOA representatives who were substantially involved in the survey could have affected the results. This renders the survey unreliable.[74] Furthermore, by focusing on only one market, the Nathan Study fails to address the central issue of whether there is a difference in overall quality between restrictive and nonrestrictive markets. Even if we were to assume that the evidence on quality presented by proponents of the restrictions were reliable or convincing, it would not contradict the findings of the BE Study that there is no difference in the quality of care between restrictive and nonrestrictive markets.[75]

### D. Methodology of the BE and Contact Lens Studies.[76]

The findings of the BE and Contact Lens Studies are central to the Commission's conclusions that these restrictions injure consumers and diminish overall quality of care by limiting access to care. The studies drew a great deal of comment, both supportive and critical.[77] In discussing the significance of the comment on the studies, we will first describe the key components of each study, summarize the major points raised by commenters, and explain why we believe these studies provide the best evidence reasonably available on the quality of care and a sufficiently reliable and comprehensive evidentiary basis for this rule.

1. *The BE Study.* The BE Study was designed to measure the effects on consumers of commercial practice restrictions. The study was conceived and conducted by the Bureau of

Exhibit 12 (Attachment to Rebuttal Statement of NAOO); Rebuttal Statement of Lee Benham, Professor, Washington University, R–17, at 2; A. Benham-Hutto, Professor, University of Virginia, at A–7 (Appendix A to Rebuttal Statement of NAOO). Consumers Union stated that removal of the restrictions will allow more frequent eye exams and improve patient health because more consumers will be able to afford the vision care and eyeglasses they need. H. Snyder, West Coast Director, Consumers Union, J–34(a) at 2, citing, State of California, Department of Consumer Affairs, Commercial Practice Restrictions in Optometry (1982), J–34(a), at Exh. A at iii (Attachment to Statement of Consumers Union).

[53] Medical Appliances for the Elderly: Needs and Costs, Hearings Before the Subcomm. on Health and Long-term Care of the House Select Comm. on Aging, 94th Cong., 2d Sess. 185 (1976) (Statement of the AOA), B–3–36.

[54] Benham and Benham, *Regulating Through the Professions: A Perspective on Information Control*, 18 J.L. & Econ. 421, 436 (1975), B–2–28. This survey consisted of interviews with 15,000 individuals in 1970. The sample was drawn to overrepresent elderly individuals and individuals living in inner cities and in rural areas. Id. at 428.

[55] Forty-eight percent of families said that they had cut back on such expenditures as a result of inflation; 59% of low-income families, 60% of minorities and 72% of single parents made this statement. M. Karsen, *U.S. Health Profile*, Washington Post, Apr. 30, 1979, B–8–87, at C–1, col. 4.

[56] Data for 1977 indicated that there was a 25% increase in the number of persons who purchased or repaired eyeglasses in that year as family income increased from less than $12,000 to $25,000 or more per year. Public Health Service, U.S. Dept. of Health and Human Services, National Health Care Expenditures Study, Eyeglasses and Contact Lenses: Purchases, Expenditures, and Sources of Payment 4 (1979), C–14.

[57] For example, some commenters criticized the methodology of the Benhams' survey and claimed that some of the surveys showed that commercial practice restrictions caused reduced eye care purchases. See Post-record comment of AOA, M–178, at 422–38. See also Nathan Study, J–88(a), Vol. I, Exh. 1, at 89 n. 1. However, we are not persuaded that the alleged flaws in the Benhams' survey undercut the findings that, in general, higher prices of eye care lead to reduced consumer purchases. *See* Staff's final Recommendations, 0–1(b), at 13–14. While the AOA acknowledged that the surveys showed that inflation, recession, and available income affect consumer decision-making, it claimed that the surveys did not show that commercial practice restrictions, in particular, result in reduced purchases of eye care. However, because these surveys show that, in general, higher prices of eye care lead to reduced consumer purchases and because other evidence on the record shows that commercial practice restrictions lead to higher prices in the market, we can conclude that commercial practice restrictions result in reduced purchases of eye care.

[58] See, e.g., Nathan Study, J–88(a), Vol. I, Ex. 1 at 109–110; J. Moye, Mississippi Optometrist, Tr. 428–29; J. Robinson, Secretary, North Carolina Board of Optometry, Tr. 3001.

[59] See, e.g., H. Snyder, West Coast Director, Consumers Union, J–34(a), at 2 and Tr. 1088–93; J. Deming, President-elect, American Ass'n of Retired Persons, Tr. 68; E. Eggen, Director, American Ass'n of Retired Persons, J–87(a), at 6. Medicare does not, in general, cover vision care.

[60] Optical Manufacturers Association, National Consumer Eyewear Study III (1984), cited in NAOO, H–78, at 2.

[60] See NAOO, H–78, at 4.

[61] Id. at 2; NAOO Panel, Tr. 383–84.

[62] We note that the majority of states where commercial practices exist did not testify in this proceeding. Many of these states submitted written comments, but did not allege abuses by commercial firms. See, e.g., C. Owen, Speaker of Michigan House of Representatives, E–3; L. Clarke, Executive Secretary, New York State Board of Optometry, E–6; B. Rimmiler, Executive Director, Missouri State Board of Optometry, E–8; B. Nichols, Secretary, Wisconsin Department of Regulation and Licensing, E–37. Some of these commenters supported promulgation of the proposed rule.

There is no apparent a priori reason why one would expect these restrictions on business practices to affect the quality of professional care. Both commercial and noncommercial optometrists have similar educational qualifications and must pass the same licensing examinations in order to practice. Commercial optometrists face the same incentives as noncommercial optometrists to satisfy consumer demand and provide an acceptable level of quality eye care. Private optometrists, like commercial firms, must earn a profit in order to stay in business and both types of practitioners seek to generate profits by selling eyewear. Practitioners in both groups must maintain a good reputation in order to attract and hold the loyalty of patients.

[63] See Final Staff Report, L–1, at 103–173 (discussion of BE Study) and 199–206 (discussion of other quality evidence).

[64] In fact, as discussed *supra* at section II.B.2, the restrictions have some adverse effect on quality of care because the higher prices associated with restrictions cause consumers to seek eye care less frequently.

[65] The BE Study is discussed in detail in the Final Staff Report, L–1, at 101–122. See also infra section II.D.1 for a description of the study's methodology.

[66] See infra at section at II.D.1.

[67] See discussion of BE Study in Final Staff Report, L–1, at 112–113.

[68] Id. at 112.

[69] Moreover, the evidence shows that an increasing number of commercial firms are stressing high quality exams. *See* Final Staff Report, L–1, at 202–206. The evidence indicates that some commercial firms, just as some private optometrists, provide very thorough exams and treat a full range of patients, including those with complex problems.

[70] See infra section II.D.2. for a fuller discussion of the methodology of this study.

[71] See citations in Final Staff Report, L–1, at 199–96, 199–201. See also Post-record comment on AOA, M–178, at 490; Post-record comment of COA, M–178, at 5–6; and Presiding Officer's Report, L–2, at 174, 182.

[72] See Final Staff Report, L–1, at 199–206.

[73] In this survey, test subjects with a variety of eye conditions obtained eye examinations from a sample of commercial and noncommercial optometrists in New York City. The purpose of the survey was to determine whether commercial and noncommercial practitioners differed in their ability to detect the eye conditions of the subjects. Nathan reported that 92 percent of the commercial optometrists and 60 percent of the private optometrists detected the eye conditions. According to Nathan, these results showed that eye examinations in New York City given in commercial practice environment tended to be less comprehensive and lower in quality than those given in private practice settings. Nathan Study, J–88(A), Vol. I, Ex. 3, p. 5.

[74] See Final Staff Report, L–1, at 145–56 and Appendix C.

[75] No evidence presented by proponents of the restrictions compared quality of care provided in the two types of markets.

[76] A comprehensive analysis of comments devoted to methodological issues in this proceeding is found in Appendixes A and B of the Final Staff Report, L–1, and in Staff's Final Recommendations, 0–1(b), at 21–48.

[77] The most lengthy and technical of the comments about the studies was submitted by Robert R. Nathan and Associates, a firm of consulting economists hired by the AOA for the proceeding. Nathan's three-volume submission contains both comments on specific aspects of the BE and Contact Lens Studies and the results of a survey Nathan conducted of New York City optometrists in an effort to rebut the quality findings of the BE Study. See supra notes 71, 72. Appendix C of the Final Staff Report, L–1, contains a detailed description of, and expert comments on, the Nathan survey's methodology.

VOL 54 ISS 47 MR 13 1989 UMI

Economics with the expert advice of optometrists on the faculties of two major colleges of optometry (the College of Optometry of the State University of New York and the Pennsylvania College of Optometry) and the Director of the Optometric Service of the Veterans Administration. In the study, nineteen trained survey researchers [78] posed as consumers and purchased over 400 eye exams and over 230 pairs of eyeglasses from optometrists in twelve different metropolitan areas across the country.[79]

The twelve markets represented a range of competitive and regulatory environments. Cities were classified as markets where advertising was present if there was advertising of eyeglasses or eye exams in the newspapers or "Yellow Pages." Cities were classified as markets with commercial practice if eye examinations were available from large optical chain firms.[80]

Based on the data obtained by the survey subjects, the BE Study's authors calculated the average prices charged for an eye exam and eyeglasses [81] by each type of practitioner in each type of market (*e.g.*, chain firms in nonrestrictive markets, nonadvertisers in nonrestrictive markets). Then, using data regarding the number of optometrists of each type in a particular market, the study's authors calculated market-wide average prices for markets with both advertising and chain firms and for markets with neither.[82]

Subsequent to the study's publication, its principal author calculated market-wide average prices for markets with chain firms and markets without chain firms.[83] These calculations showed that the average prices charged by optometrists for eye exams and eyeglasses were 18% higher in markets without chain firms than in markets with chain firms.[84]

BE staff used multivariate regression analysis to analyze the data for: (1) Differences among markets in the advertising environment,[85] (2) differences among markets in the supply of optometrists; (3) differences among markets in the demand for optometric services; and (4) differences among subjects in prescriptive needs. Each of these factors might affect price, independent of the presence of chain firms. The price data were also adjusted for differences in the cost-of-living among cities.[86]

In order to measure any differences in quality between markets with chain firms and markets without chain firms, the study compared: (1) The accuracy of the eyeglass prescriptions; (2) the accuracy and workmanship of the eyeglasses; (3) the extent of unnecessary prescribing; and (4) the ability of the optometrist to detect eye problems and pathologies. Elaborate procedures were established to guarantee an accurate and unbiased assessment of these factors.[87]

On the first three dimensions of quality the study directly examined the optometrist's product or service or "output." For example, the optometrists who acted as consultants for the study performed eye examinations on each survey subject before the subjects went into the field. After examinations, prescriptions, and eyeglasses were obtained by the subjects, the consultants compared those prescriptions and eyeglasses to the prescriptions they had written. The consultants also assessed the eyeglasses for the quality of workmanship—e.g., scratches and imperfections on lenses, the quality of the edging and mounting of lenses, and the quality of materials used.

On the fourth aspect of quality, output was not directly examined. That is, the study did not directly examine whether or not optometrists detected eye pathologies since the study did not use subjects with such pathologies. Instead, the study used a "process" test that indirectly measured the likelihood that an optometrist would detect such pathologies by examining whether the optometrist performed the tests and procedures that are designed to detect complex eye problems and pathologies.

This process test was highly sophisticated and did detect meaningful differences in quality between optometrists. For example, the thoroughness index used in the BE Study included over twenty test procedures as well as other aspects of the examination.[88]

The evidence establishes that the use of this process test provided reliable information about differences in quality of care for two reasons. First, there is a close correlation between the use of a correct process and a correct outcome. During the rulemaking hearings, noncommercial optometrists were virtually unanimous in their assessment that more procedures and more time spent during an eye examination is indicative of a higher quality exam.[89] In fact, some of the same optometrists who criticized the BE Study's use of a process test, nevertheless used the results of that test to demonstrate the alleged differences in quality of care

[78] With two exceptions, the survey subjects had relatively routine visual problems. Some commenters and the Presiding Officer questioned the study's validity because subjects with more complex problems and pathologies were not included. See Post-record comment of AOA, M–178, at 5–7, 227–230, 263–64; Post-record comment of COA, M–178, at 9, 9–14; and Presiding Officer's Report, L–2, at 176–177.

[79] BE defined the relevant geographical markets as Standard Metropolitan Statistical Areas (SMSA's). The 12 SMSA's were: Little Rock, Arkansas; Knoxville, Tennessee; Providence, Rhode Island; Columbia, South Carolina; Winston-Salem, North Carolina; Milwaukee, Wisconsin; Columbus, Ohio; Portland, Oregon; Baltimore, Maryland; Minneapolis-St. Paul, Minnesota; Seattle, Washington; and Washington, DC.

[80] The "least restrictive" markets in the study had neither advertising nor chain firms; in addition restrictive laws such as those at issue in this proceeding existed in these markets. Cities were classified as "least restrictive" if advertising and chain firms were present. In the least restrictive cities there was price advertising of eyeglasses and at least nonprice advertising of eye exams.

[81] This amount included any dispensing fees, as well as charges for glaucoma tests or any other exam procedures that were priced separately. In order to minimize variations in the eyeglasses frames, subjects were instructed to purchase a particular unisex metal frame, if possible. BE Study, B–3–21, at 68.

[82] BE Study, B–3–21, at 5.

[83] Rebuttal Statement of R. Bond, FTC economist, K–18, at Table A–8.

[84] See Final Staff Report, L–1, at 108.

[85] Some commenters noted that the BE Study did not discuss the independent effects of advertising and chain firms. See, e.g., Nathan Study, J–69(a) at 32, 36–39, 47; AOA, H–81, at 26. However, the BE Study did report that neither advertising nor chain firms had any effect upon quality in a market. Also, while the BE Study did not discuss the independent effects of chain firms and advertising upon price, the study was designed to examine these effects separately. R. Bond, FTC economist, Tr. 669; Rebuttal Statement of R. Bond, K–18, at 5. The separate effects of chain firms were derived by performing a simple calculation on the BE Study's underlying data. See Letter from R. Bond, FTC economist, to J. Greenan, Presiding Officer (May 30, 1986), J–79; Rebuttal Statement of R. Bond, FTC economist, at 5 and Appendix A. See also R. Bond, Tr. 668; J. Kwoka, Professor, George Washington Univ., Tr. 800–01. Dr. Kowka, a coauthor of the BE Study, stated his agreement with Dr. Bond's conclusions and methods of analysis. J. Kwoka, J–12(a), at 9 and Tr. 800–01.

[86] Be Study, B–3–21, at 46–55, 91–93.

[87] See Final Staff Report, L–1, at 109–112.

[88] Thus, we reject the assessment that the process test measured only a very simple and basic process. See Presiding Officer's Report, L–2, at 175; Post-record comment of AOA, M–178, at 227–49; Post-record comment of COA, M–178, at 9, 13. See also discussion in Staff's Final Recommendations, O–1(b), at 34–35.

[89] See, e.g., AOA Comment, H–81, at 42; B. Barresi, Professor, Center for Vision Care Policy, SUNY, J–13(a), at 10; COA Comment, J–67(a), at 4; J. Easton, President-elect, AOA, J–4, at 20; H. Glazier, President, Maryland Board of Optometry, J–21, at 2, Tr. 808, 816; J. Izydorek, optometrist, H–130, at 1; J. Kennedy, optometrist, J–38, at 1; D. Kuwabara, Chairman, Hawaii Board of Optometry, J–34, at 2; Nathan Study, J–69(a), Vol. I, Ex. 2 at 39–40 and Ex. 3 at 17–18; W. Scholl, optometrist, H–134, at 1; J. Scholles, optometrist, AOA trustee, J–21, at 7–8; Southern California College of Optometry, J–41(a), at 1; L. Strakowitz, member, New Jersey Board of Optometry, J–1, at 2; D. Sullins, optometrist, AOA trustee, J–36, at 11;

offered by optometrists in nonrestrictive markets.[90]

Second, the evidence shows that the use of a process test creates no bias in favor of chain firms.[91] Such a bias would exist only if commercial optometrists perform equivalent procedures less competently than other optometrists. In other words, it would have to be shown that any differences in quality were due to differences in competence rather than to differences in time spent and procedures performed. The evidence shows, however, that any differences in quality, if they exist, are likely due to time spent or procedures performed and not due to commercial optometrists performing given test procedures less competently than other optometrists.[92]

The Presiding Officer rejected the quality results of the BE Study. He apparently believed that only an outcome test, using subjects with a wide range of pathologies, would provide reliable evidence. We disagree with this conclusion for two reasons. First, it ignores the BE data discussed above, which permits conclusions about more complex eye problems, and it does not take into account the practical problems presented in conducting a methodologically sound outcome study. Individuals with pathologies in need of immediate treatment could not ethically be used in a lengthy series of field examinations. Finding a large enough sample of individuals who would be suitable survey subjects and who had pathologies not in need of immediate treatment would be prohibitively time-consuming and expensive. Second, there is a significant likelihood that the pathological conditions would change while the survey was being conducted, which would make it impossible to make valid comparisons among the optometrists examining the survey subjects. These obstacles cast serious doubt on the feasibility of conducting an outcome test on this aspect of quality.

The Commission also considered and rejected the assertion that the BE Study would have found that quality was lower in nonrestrictive markets than restrictive markets if its authors had calculated average quality based on the total number of exams given, rather than on number of practitioners. Dr. Kenneth Myers, Director of Optometry Services at the Veterans Administration and a former consultant to the FTC on the BE Study, asserted that the method for calculating average thoroughness of examinations on a market-wide basis was flawed. The BE Study calculated averages by simply averaging the thoroughness scores of all optometrists. Because some optometrists see more patients than others, Dr. Myers believed that the averages should have been weighted to account for the different number of exams performed by individual optometrists. He assumed that such a calculation would lead to a finding of lower average quality in markets with chain firms than the finding reported in the BE Study. However, if one uses Dr. Myers' methodology and his estimate that the typical commercial practitioner performs twice as many exams as the typical noncommercial practitioner, average quality scores for both restrictive and nonrestrictive markets would be lower, but the average score for nonrestrictive markets would still be about the same as that for restrictive markets.[93]

We find that the process test used in the BE Study to evaluate comparative examination thoroughness provides meaningful information about quality of care. Moreover, that test was only one of four factors used to evaluate quality of care. Our conclusions on the quality of care are based on the record as a whole, and not just individual components of any one study.

2. *The Contact Lens Study.* In this study, the eyes of over 500 cosmetic contact lens wearers in 16 urban areas across the country were examined for the presence of seven potentially pathological eye conditions commonly associated with improper contact lens fitting.[94] Each of the survey subjects had been fitted with contact lenses within the preceding three years and was still wearing contact lenses at the time the examinations were performed. The examination procedures were chosen after consultations with representatives of the major eye care professional organizations—the American Academy of Ophthalmology, the American Optometric Association, and the Opticians Association of America.[95] Those organizations also nominated the expert examiners who performed the eye examinations. Three examiners—an ophthalmologist, an optometrist, and an optician—examined each subject.

The examiners were instructed to determine which of the five illustrations of each potentially pathological condition in a grading manual most closely resembled the actual appearance of the subject's eyes. The grading manual, which had been designed by the group representatives, was used to minimize inconsistencies in grading by the several dozen examiners. The examiner then recorded a grade of 0, 1, 2, 3, or 4 for each condition. A grade of 0 meant that the condition was absent; a grade of 4 signified that the condition was present to an extreme degree. The number grades for each of the seven conditions for each eye were combined using a weighing formula to create a "summary quality score" for each subject, which would indicate the overall condition of the subject's eyes.[96]

In addition to analyzing the summary quality scores, the study also examined the relative presence of each of the seven eye conditions individually. A "higher quality" score was assigned if the examination revealed that a particular condition was totally absent (i.e., the grade was 0); a "lower quality" score was assigned if the examination revealed that a particular condition was present to any degree (i.e., the grade was 1, 2, 3, or 4).

In order to compare quality among the different providers, differences in the summary and individual quality scores were computed for commercial optometrists, noncommercial optometrists, opthalmologists, and opticians. Multiple regression estimation techniques were used in order to control

[90] See e.g., Southern California College of Optometry Panel, J–41(a), at 18; AOA Comment, H–81, at 26; Final Staff Report, L–1, Appendix A at 9 n. 21.

[91] Those commenters who alleged bias in the process test provided no persuasive explanation for that assertion. See AOA Comment, H–81, at 27; Nathan Study, J–69(1), Vol. I, Ex. 1, at 79.

[92] The regression analysis that BE Staff performed on the Nathan survey data indicates that there is no such bias. The analysis found that the commercial firms in the Nathan survey did not exhibit a statistically significant lower pass rate than the private firms, holding constant the time spent on an exam and whether or not a case history was taken. This tends to show that commercial firms perform as well as noncommercial optometrists when they both spend equal time and perform equivalent procedures. See Final Staff Report, L–1, Appendix A at 5–6.

[93] See Staff's Final Recommendations, Addendum to Appendix A, O–1(b), at 8.

[94] These included epithelial and microcystic edema (intercellular accumulation of fluids which causes the cornea to swell); corneal staining (abrasions or lesions on the cornea); corneal neovascularisation (impingement of blood vessels into the normally avascular cornea); corneal striae (ridges or furrows on the cornea); injection ("bloodshot" eyes); and corneal distortion or warpage (irregularity in the curvatures of the cornea). The subjects were also tested for visual acuity to determine whether their prescriptions were adequate. Contact Lens Study, B–5–1, at 20–21. Also, subjects' lenses were examined to determine their physical condition and cleanliness.

[95] There is evidence on the record that representatives of all three organizations reached a consensus on the methodology to be used in the study. See Final Staff Report, L–1, at 194 n. 290.

[96] Since all of the seven conditions are not necessarily equally serious, they were assigned different weights based on the relative severity of that condition.

VOL 54 ISS 47 MR 13 1989 UMI

for the effects of a number of factors other than fitter competence that could have affected the relative health of the study subjects' eyes. These additional factors included the wearers' age, sex, and wearing habits, and the physical condition of the lenses.

The survey subjects were also asked how much they paid for their lenses, the eye exam, follow-up care, and the initial lens care kit.[97] The final package price figures were then adjusted for cost-of-living differences in the 18 cities in the sample and to account for the fact that the subjects purchased their lenses in different years.

Two additional tests were later conducted by BE staff on the Contact Lens Study data which demonstrated that these price differences were, in fact, associated with the presence of commercial practice and were not due to the effects of advertising or other market forces that could also affect prices. These tests corroborated the general findings of the study that commercial optometrists charged less than noncommercial optometrists.[98]

The major concerns raised by some commenters about the methodology of the Contact Lens Study were that (1) former contact lens wearers (or "dropouts") were not examined; [99] (2) possible changes in the "k-readings" [100] of the subjects were not evaluated; [101] and (3) study subjects were not required to wear their lenses for at least four hours prior to the examination.[102]

In most instances, the failure to include the specified procedure was unavoidable. For example, consultants and staff wanted to evaluate the care given to former contact lens wearers and to evaluate changes in the k-readings. However, in both instances, the expert consultants could suggest no practical and meaningful way to do so.[103] The testimony of some witnesses suggests that some transient and less significant eye problems might have been more frequently apparent if subjects had been required to wear their lenses for at least four hours before they were examined.[104] But other more serious and long-term conditions do not disappear overnight and would still have been apparent even if a subject had inserted his or her lenses only an hour or two before being examined.

The Presiding Officer and some commenters appear to have concluded that the study's findings must be entirely rejected because of these alleged methodological shortcomings. Although the Contact Lens Study may fail to provide information on some types of patients, or some types of contact lenses, there is no evidence on the record indicating that the study results would have been different had this additional data been included, or that the absence of that data created a bias in favor of commercial optometrists that affected the overall results of the survey.

The BE and Contact Lens Studies provide reliable information about the relative cost and quality of eye care available in the marketplace. We conclude that the evidence provided by the studies—along with other evidence on the record—meets or exceeds the applicable legal standards. In seeking evidence on the need for a rule, the Commission must balance the benefits and costs of obtaining information that answers all questions with certainty.[105] In this proceeding, the studies were subjected to intense scrutiny, but none of the studies' critics offered evidence that materially discredited the studies' key findings. Our confidence in the soundness of the studies is buttressed by consideration of the record as a whole, which contains substantial testimony and economic analysis that support the conclusions of the authors of the BE and Contact Lens Studies.

## III. Legal Issues

### A. Introduction

A major issue in this proceeding is the extent of the FTC's authority to declare state laws to be unfair acts or practices. After careful consideration of the legal issues discussed below, we have concluded that the FTC can, in appropriate instances, proceed directly against unfair state restraints.

### B. Unfairness

This rule declares certain state-imposed restrictions on commercial practice by optometrists to be unfair acts or practices. The Commission has authority under section 18 of the Federal Trade Commission Act to prescribe:

> [R]ules which define with specificity acts or practices which are unfair or deceptive acts or practices in or affecting commerce [within the meaning of * * * section 5(a)(1)].[106]

[97] Some commenters noted that the price data collected is based on consumers' recall of the prices that they paid, at times several years in the past. Nathan Study, I–86(a), Vol. 1, Exh. 2, at 14, 15, and 27. No bias is alleged, however, and there appears to be no reason why consumers would systematically recall paying lower prices at commercial firms than at noncommercial firms. Thus, even if there is some random error in the price data for both commercial and noncommercial optometrists, it would not affect the price differences which were found.

[98] See J. Mulholland, FTC economist, I–19(a), at 7–8, which explains in detail the additional tests which BE staff performed to control for the effect of other variables which could have affected price. See also J. Mulholland, Tr. 794–96.

[99] Presiding Officer's Report, L–2, at 177; Post-record comment of AOA, M–178, at 333–34; Post-record comment of COA, M–178, at 11. This criticism is discussed in the Final Staff Report, L–1, at 135–37.

[100] K-readings, taken with the use of a keratometer, measure the steepest and flattest curvatures of the corneal surface. Contact Lens Study, B–8–1, at 9, 22–23.

[101] Presiding Officer's Report, L–2, at 178; Post-record comment of AOA, M–178, at 315–24. This criticism is discussed in Staff's Final Recommendations, O–1(b), at 44–48.

[102] Presiding Officer's Report, L–2, at 179–180; Post-record comment of AOA, M–178, at 346–359. This criticism is discussed in the Final Staff Report, L–1, at 127–140.

Commenters also listed other alleged problems with the Study, which are discussed in the Final Staff Report, L–1, at 123–44 and in Appendix B. Some commenters stated that the study did not include a representative sample and distribution of difficult contact lens patients and fitting problems and that no difficult cases were included. See, e.g., Post-record comment of AOA, M–178, at 298–300, 302; Post-record comment of COA, M–178, at 14. The fact that the study may not contain a representative distribution of difficult cases does not, however, invalidate the data which the study does provide. While some difficult cases were undoubtedly included in the study, the study did not include an assessment of the relative ability of optometrists to fit more difficult lenses such as therapeutic lenses and the more recently available extended wear lenses, toric lenses, or bifocal lenses. See AOA Post-record comment, M–178, at 102. Also, by excluding patients who had previously worn or attempted to wear contact lenses within three years of the survey date, the study excluded many patients with more difficult eye problems who may have experienced prior problems with their lenses. See Contact Lens Study, B–8–1, at A–1. (Excluding these patients also significantly reduced the possibility of bias which could develop if patients who knew they had difficult eye problems tended to select one group of optometrists over another.) Staff determined that it was impractical to include therapeutic lenses, and other more complex lenses could not be included because they were not available at the time the study was conducted. See Final Staff Report, L–1, at 142–43. However, the failure to study these more difficult cases does not detract from the validity of the data which the study does provide on the relative ability of optometrists to fit the less-difficult cosmetic contact lens patient.

[103] See Staff's Final Recommendations, O–1(b), at 43–48.

[104] Id. at 47 n.186.

[105] Credit Practices Rule, Statement of Bias and Purpose, 49 FR 7740, 7742 (1984). In upholding the Credit Practices Rule, the court recognized the danger in insisting that all of the Commission's conclusions be based on rigorous, quantitative economic analysis, and quoted language from the legislative history of Magnuson-Moss indicating that the Commission is not required to undertake a full scale economic investigation prior to promulgation of a rule. "To do so would inordinately delay FTC proceedings and deny relief to the consuming public while indefinite questions of economic prediction were resolved by the Commission." *American Financial Services v. FTC*, 767 F.2d 957, 986–87, citing H.R. Rep. No. 1107, 93rd Cong. 2d Sess. 47 (1974). The court quoted language from the legislative history indicating that the Commission should rely on "its best estimate" of the impact of the rule. Id. at 986–87 citing H.R. Rep. No. 1107, 93rd Cong. 2d Sess. 47 (1974), *U.S. Code Cong. & Admin. News* (1974) at 7728.

[106] 15 U.S.C. 57(a)(1)(B).

When Congress created the FTC in 1914 it gave the Commission power to determine and prevent "unfair methods of competition." From the beginning Congress intended this power to be interpreted very broadly.[107] Congress necessarily recognized that it would be impossible to define or even to predict the infinite ways in which the goals of the statute might be thwarted. Consequently, Congress gave the Commission the tools to deal with problems as they developed. Although the original language focused on competition, it was generally understood that the Act "gave the Commission considerable discretion in identifying unfair consumer practices."[108]

The Wheeler-Lea amendments of 1938[109] clarified the FTC's authority to reach acts and practices that injure the public as well as competitors. Those amendments added language to section 5 of the FTC Act to prohibit not only "unfair methods of competition," but also "unfair or deceptive acts or practices."[110] In passing that amendment Congress contemplated that the concept of unfairness would be a flexible doctrine, responsive to changing conditions in the marketplace. The courts have repeatedly recognized the breadth of this delegation and have given the Commission significant latitude in defining unfairness.[111] In its 1980 Unfairness Statement [112] the Commission set out the principles that currently guide the Commission in determining whether acts or practices are unfair.

Those principles were accepted by the D.C. Circuit in upholding the Credit Practices Rule.[113] The court's opinion noted that the consumer injury test described in the Commission's Unfairness Statement was "the most precise definition of unfairness articulated by either the Commission or Congress."[114]

The Unfairness Statement sets out three criteria that must be met in order to find consumer injury: (1) The injury must be substantial; (2) the injury must not be outweighed by offsetting consumer or competitive benefits; and (3) the injury must be one that consumers cannot reasonably avoid.[115] The rulemaking record demonstrates that the injury flowing from state restrictions on the commercial practice of optometry clearly meet these criteria.[116] As summarized *supra* in sections II. B. and C., these restrictions injure consumers by substantially raising the price of eye care, by limiting its accessibility, and by reducing the frequency with which consumers receive it. Further, no demonstrable benefits have been shown to flow from these restrictions, nor can consumers reasonably escape their injurious effect.

Like other rules promulgated under the Commission's unfairness authority, this rule seeks to halt practices that unreasonably create or take advantage of an obstacle to the free exercise of consumer decisionmaking and, in turn, to a well-functioning market.[117] Here, however, the obstacles are created by state governments rather than by private actors. This compels us to consider whether the actions of state governments can be unfair acts or practices.

Through the Magnuson-Moss amendments of 1975 Congress sought to bolster the Commission's existing authority to find acts or practices to be unfair.[118] During consideration of the rulemaking provisions, Congress repeatedly acknowledged that Commission rules would preempt inconsistent state law.[119] The legislative history of Magnuson-Moss reveals that both the sponsors and opponents of the bill recognized the potentially broad reach of the proposed rulemaking authority and contemplated that this power could be used to challenge existing laws directly.[120] A conclusion that harmful state restrictions could not be deemed "unfair" would be inconsistent with this Congressional understanding. Since the passage of the Magnuson-Moss amendments, Congress' attention has been drawn repeatedly to Commission rulemakings that would reach state laws. Each time the issue has arisen during debates over amendments to the FTC Act, Congress has declined to limit the reach of our unfairness authority under section 18. In fact, in 1985 both the House and Senate expressly stated their understanding that the Commission's unfairness authority extends to prohibiting state restraints through rules such as the proposed Eyeglasses II rule.[121] Against this legislative background, we believe that the Commission's unfairness authority is broad enough to encompass state laws.

### C. Preemption

Although the language of the FTC Act does not expressly address the preemptive effect of Commission rules, it is clear that Section 18 trade regulation rules preempt inconsistent state law. Under the Supremacy Clause of the U.S. Constitution (Art. VI, section 2), federal law supersedes inconsistent state law. Validly enacted regulations of federal agencies have the same preemptive effect on inconsistent state

[107] Realizing that it would be impossible to define with specificity all unfair practices, Congress considered and chose not to enact a statutory definition of the term "unfair method of competition." See S. Rep. No. 596, 63d Cong. 2d Sess. 13 (1914) and H.R. Conf. Rep. No. 1142, 63d Cong., 2d Sess. 19 (1940), *cited in American Financial Services* v. *FTC*, 767 F.2d 957 (1985).

[108] See Averitt, *The Meaning of "Unfair Acts or Practices" in section 5 of the Federal Trade Commission Act*, 70 Geo L.J. 225, 230–231, 235.

[109] 52 Stat. 111 (1938) (15 U.S.C. 45(a)(1)).

[110] Id.

[111] See, e.g., *Atlantic Refining Co. v. FTC*, 381 U.S. 357, 367 (1965); *FTC v. R.F. Keppel & Bros.*, 291 U.S. 304, 310 (1934); *FTC v. Raladam Co.*, 283 U.S. 643, 648 (1931).

[112] See Unfairness Statement, supra note 25.

[113] *American Financial Services v. FTC*, 767 F.2d 957 (D.C. Cir. 1985). The court found that the Commission had not exceeded its authority in promulgating the rule, given that the Commission's articulated rationale comported fully with the criteria set out in the Commission's Statement. Id. at 982.

[114] Id. at 972. The court noted further that Congress had reviewed the Statement and "ha[d] not seen fit to enact any more particularized definition of unfairness to limit the Commission's discretion." Id. at 982.

[115] Unfairness Statement, supra note 28 at 5–6.

[116] See Final Staff Report, L–1, at 306–26.

[117] Unfairness Statement, supra note 28, at 7–8. *See also American Financial Services, Inc. v. FTC*, 767 F.2d 957, 98, (DC Cir. 1985).

[118] Magnuson-Moss Warranty—Federal Trade Commission Improvement Act, 88 Stat. 2183 (1975) (15 U.S.C. 57(a)). The amendments extended the FTC's unfairness jurisdiction by adding the "affecting" commerce language to section 5 of the FTCA and by granting rulemaking power through section 18.

Some commenters argued that nothing in the Wheeler-Lea amendments authorized the Commission to find state laws to be unfair, and nothing in the Magnuson-Moss Act broadened the preexisting definition of unfairness. *See* Post-record comment of AOA, M–178, at 25–27 and Post-record comment of COA, M–178, at 22–29. We read the legislative history of Wheeler-Lea as confirmation of the principle that the unfairness standard must be a broad one. That interpretation is then brought to the legislative history of Magnuson-Moss where Congress did express its understanding that Section 18 rules would preempt state laws.

[119] See Final Staff Report, L–1, at 330–37.

[120] 117 Cong. Rec. 39640 (1971). See also discussion in Final Staff Report, L–1, at 339–40.

[121] 126 Cong. Rec. 2069, 2076–77 (1980). H.R. Rep. No. 99–162, 99th Cong., 1st Sess., 9–10 (1985) and S. Rep. No. 99–81, 1st Sess., 4–5 (1985). The bills accompanying these reports went to conference committee, but were never voted out. Earlier, in 1980, the Senate expressly rejected an amendment sponsored by Senators McClure and Melcher designed to stop the Commission from challenging the kind of state laws at issue in the Eyeglasses Rule and in the Eyeglasses II proceeding. 126 Cong. Rec. 2066 (1980). In defeating the McClure-Melcher amendment, opponents argued that state regulation of professionals was an entirely appropriate subject of FTC trade regulation rulemaking. 126 Cong. Rec. 2069 (1980) (statement of Sen. Metzenbaum); 126 Cong. Rec. 2076–77 (1980) (statement of Sen. Javits); 126 Cong. Rec. 2077 (1980) (statement of Sen. Inouye).

VOL 54 ISS 47 MR 13 1989 UMI

laws as federal statutes, even in the absence of any explicit Congressional statement of intent to preempt.[125] Where there is irreconcilable conflict between federal and state regulation and no express language about preemption.[126] Here that presumption is statute or in the legislative history, the customary Presumption is in favor of preeption.[128] Here that presumption is bolstered by the legislative history of the Magnuson-Moss Act and by subsequent court interpretations of Commission rulemaking power.

Those commenters who have insisted that the Commission cannot preempt state laws absent a clear indication of Congressional intent have misunderstood the nature of the rulemaking authority delegated to the Commission by Congress in the Magnuson-Moss Act.[124] A showing of express Congressional intention to preempt is necessary only where Congress directs an agency to "occupy a field" of regulation.[125] In enacting the FTC Act and Title II of the Magnuson-Moss Act Congress did not intend that the Commission "occupy the field" of Consumer protection [126] or antitrust regulation. In fact, in proposed legislation preceding passage of the Magnuson-Moss amendments, Congress sought to clarify the preemptive effect of Commission rules promulgated under Magnuson Moss by stating that the FTC Act would not occupy the field and that only inconsistent state laws would be preempted.[127] Throughout the period when rulemaking legislation was being considered, the record shows that Congress was aware of the preemption issue, invariably assumed that Commission rules would preempt inconsistent state law, and took no action to limit that preemptive effect.[128]

Courts that have considered and ruled on the issue have also recognized that FTC rules preempt inconsistent state laws, relying both on general Supremacy Clause principles and on Congressional intent in enacting the Magnuson-Moss Act.[129]

D. State Action

The state action doctrine of *Parker v. Brown* [130] does not limit the Commission's power under section 18 rules.[131] In *Parker*, the Supreme Court refused to construe the Sherman Act as applying to the anticompetitive conduct of a state acting through its legislature.[132] The doctrine has never been applied to the Commission's unfairness jurisdiction generally nor to our rulemaking authority in particular. Moreover, in enacting the Magnuson-Moss amendments, Congress considered the preemption issue and concluded that Commission rules should have broad preemptive effect. To apply the *Parker* doctrine to section 18 rulemaking would frustrate Congressional intent.[133]

Important differences between the Sherman and FTC Acts demonstrate that the policy reasons that led the Court to limit the reach of the Sherman Act do not apply to our rulemaking authority under section 18 of the FTC Act. In construing the Sherman Act, the Court recognized that, if the Act were to be applied to certain state actions, widespread and indiscriminate disruption of long-standing state economic legislation would occur. Well-established state economic regulation could be dismantled at the behest of private litigants with no consideration given to important state interests. Implicit in the Court's holding was the realization that if the Sherman Act were to apply to state action, private parties and state officials would be subject retroactively to treble damages and criminal sanctions for obeying otherwise valid state laws.[134] Given Congressional silence on the effect of the Sherman Act on state law, the *Parker* court concluded that Congress could not have intended such sweeping and possibly chaotic results.

Application of section 18 rulemaking to state legislation would not produce such dire consequences. First, challenges to state laws under section 18 can be initiated only by the FTC, a federal agency with a mandate to protect the public interest and subject to Congressional oversight. In contrast, private parties seeking to protect private rights or enrich private pockets may use the Sherman Act to challenge state laws. Second, FTC rules apply prospectively, eliminating the danger of imposing retrospective penalties, such as those available under the Sherman Act,[135] against state officials or against private parties who have acted in good faith reliance on otherwise valid state laws.[136] Third, rulemaking is a more appropriate vehicle for examining whether federal or state interests are served by regulatory schemes than adjudicative actions under the Sherman Act. Unlike a private action brought under the Sherman Act, rulemaking allows for participation by all interested parties (including state officials) and for development of a record that reflects a broader perspective than could be achieved in private litigation. Because it more closely resembles the legislative than the adjudicative model, rulemaking is more conducive to the formation of public consensus and compromise. Finally, the application of the unfairness criteria in a section 18 rulemaking requires the Commission to consider the prevalence of the acts or practices, the nature of the injury, and any countervailing benefits. Thus, a section 18 rulemaking permits a review of state law that is both more flexible and potentially more protective of important state interests [137] than is an action under the Sherman Act, where the focus is exclusively on competition issues. Thus, any disruption of long-standing state economic legislation will not occur unless careful review of the evidence shows that minimal or no benefits flow from that legislation.[138]

Moreover, to the extent that *Parker* is a doctrine based on statutory construction, the clear differences in the legislative histories of the Sherman and Magnuson-Moss Acts support our view that Congress did not intend that *Parker* apply to section 18 rulemaking. While the legislative history of the Sherman Act is devoid of indications that Congress gave any consideration to the effect the Sherman Act would have on state law,[139] the legislative history of Magnuson-Moss is replete with evidence that Congress considered the relationship between the Commission's section 18 authority and state law.[140]

E. State as a "Person"

In order to declare state laws to be unfair acts or practices, we must be able to conclude that a state or its officials are "persons" within the meaning of the Federal Trade Commission Act.

While no federal court has determined this issue within the context of the FTC Act,[141] the Supreme Court has found state entities to be persons for the purpose of the Robinson-Patman Act [142] and the Sherman and Clayton Acts.[143] The Supreme Court has also found states to be persons under selected provisions of the IRS Code.[144]

In determining whether states meet the statutory definition of "person," the Supreme Court has generally looked to the legislative environment of the statute, including such factors as the subject matter, content, legislative history, and executive interpretation of the statute.[145] In addition, the Court has also considered whether exclusion of states from the statutory class of persons would frustrate the purpose of the statute.[146]

We have weighed these factors and believe that to exclude states from the reach of the Commission's unfairness authority would defeat the purpose of the FTC Act. The legislative history of the FTC Act indicates that Congress intended an expansive meaning to be given to the word "person." [147] Furthermore, the finding that states are persons within the meaning of section 5 for the purposes of this rulemaking is consistent with recent Commission decisions [148] and our reading of the entire FTC Act and its amendments, including the broad scope of the Commission's unfairness authority, as discussed supra at section III.B.[149]

*IV. Federalism Concerns*

As discussed above in section III., we are persuaded that the Commission has the legal authority to prohibit the state restraints at issue in this proceeding. Judicious exercise of that power, however, prompts us to consider whether we should act in this instance. We are keenly aware that this proceeding raises important questions about the proper allocation of power between the states and the federal government. However, after careful consideration, we are convinced that this rule is a proper exercise of federal power and is consonant with the principles of federalism.

---

[125] See, e.g., Fidelity Federal Savings and Loan Ass'n v. De La Cuesta, 458 U.S. 141, 153–54 (1982). See also discussion in Final Staff Report, L–4, at 327–28.

[126] See, e.g., *Paul v. United States*, 371 U.S. 245 (1963); *Free v. Bland*, 369 U.S. 663 (1962).

[127] For example, both the AOA and the CDA claimed that neither the language nor the legislative history of Magnuson-Moss show a clear manifestation of Congressional intent to grant FTC rules preemptive power. See Post-record comment of AOA, M–178, at 10–25 and Post-record comment of COA, M–178, at 23–25. They go on to note that Title I of Magnuson-Moss (i.e., warranty provisions) contains an express grant of preemptive power while Title II (i.e., section 18 rulemaking) contains no such express grant. However, in Title I Congress intended to occupy a portion of the field of warranty regulation and therefore needed to express the preemptive effect. Title II envisions only conflict preemption. The case law cited by these commenters unequivocally establishes that conflict preemption flows automatically from the Supremacy Clause, regardless of any express Congressional intent to preempt. See, e.g., *Fidelity Federal Savings and Loan Ass'n v. De La Cuesta*, 458 U.S. 141, 153–54 (1982); *Michigan Canners and Freezers Ass'n v. Agricultural Marketing and Bargaining Board*, 467 U.S. 461, 469–70 (1984); *Florida Lime & Avocado Growers, Inc. v. Paul*, 373 U.S. 132, 142–43 (1966).

[128] In these instances any state regulation on the same subject as the federal regulation is preempted even if the state regulation does not conflict with the federal requirements. See, e.g., *Rice v. Santa Fe Elevator Corp.*, 331 U.S. 218 (1947). In contrast, this rule displaces only four specified types of state restraints on the commercial practice of optometry. States continue to have broad authority to regulate the practice of optometry in order to safeguard the health of consumers. See discussion infra, section IV.

[129] The House Committee Report accompanying Magnuson-Moss noted that the FTC "should not intrude where cases of consumer fraud of a local nature are being effectively dealt with by State or local government." H.R. Rep. No. 93–1107, 93d Cong., 2d Sess. 45 (1974).

[130] S. 3201, 91st Cong., 2d Sess. 103 (1970). See S. Rep. No. 96–1124, 91st Cong., 2d Sess. 23 (1970).

[131] The Magnuson-Moss amendments were passed during the 93d Congress. However, similar measures had been introduced in the two previous Congresses. Language regarding preemption appeared in some, but not all, of the proposed bills and accompanying reports. As a consequence, arguments regarding Congress' ultimate purpose have been raised by a number of commenters. See Brief of the American Optometric Association, *AOA v. FTC*, H–61, App. A at 28–29 (Attachment to AOA comment). Our consideration of all of the evidence leads to the conclusion that Congress understood the traditional preemptive effect of federal rules and the presence or absence of statements in the various bills and reports reflects only Congressional efforts to clarify the scope of the existing preemptive authority. See Final Staff Report, L–1, at 330–37.

[132] In upholding the Credit Practices Rule, the Court of Appeals in *American Financial Services v. FTC* concluded that Congress intended FTC rules to have "that preemptive effect which flows naturally from a repugnancy between the Commission's valid enactments and state laws." 767 F. 2d 957, 989–90. The Court in *Katharine Gibbs School v. FTC*, 612 F.2d 658 (2d Cir. 1979), relied on similar reasoning on treating the preemption issue as settled. Although the Court remanded the rule in that case because the Commission had not defined with specificity the unfair acts and practices targeted by the rule, the court indicated that "questions of preemption could be answered with relatively little difficulty." If the Commission identified clearly the acts and practices encompassed by a rule. 612 F. 2d at 66. In the instant rulemaking, we have striven to define the unfair acts or practices with as much specificity as possible.

[133] 317 U.S. 341 (1942).

[134] Both the AOA and COA have contended that the state action doctrine applies to the federal antitrust laws generally, and therefore must apply to the FTCA. See Post-record comment of the AOA, M–178, at 29 and Post-record comment of the COA, M–178, at 29–30.

[135] 317 U.S. 341 (1942).

[136] The Commission has recognized that the *Parker* doctrine applies to adjudications brought under its unfair methods of competition authority, but only to the extent that the unfair methods of competition challenged consist of traditional Sherman Act violations. See *Massachusetts Furniture & Piano Movers Ass'n v. FTC*, 773 F.2d 391 (1st Cir. 1985); *Indiana Federation of Dentists*, 101 F.T.C. 57, 180 n. 36 (1983). In 1987, both the House and Senate passed versions of FTC authorizing legislation that would codify the Commission's application of the state action doctrine to its unfair methods of competition jurisdiction. In drafting this legislation, however, it is clear that Congress intended that the Commission's authority over unfair acts or practices not be limited by the state action doctrine. H.R. Rep. 271, 100th Cong. 1st Sess., 20 (1987).

[137] See Verkuil, *Preemption of State Law by the Federal Trade Commission*, 1979 Duke L.J. 225, 231; Note, *The State Action Exemption and Antitrust Enforcement Under the Federal Trade Commission Act*, 89 Harv. Law Rev. 715, 734–736 (1976).

[138] The retrospective penalties provided for under the Sherman Act are treble damages and criminal sanctions. Courts have considered the nature of the remedy and whether the suit is brought by a private litigant or by the federal government to be relevant factors in determining whether Congress intended particular statutory provisions to apply to the states. See *Employees of the Department v. Department of Public Health and Welfare*, 411 U.S. 279 (1973). *Cf. Lafayette v. Louisiana Power & Light Co.*, 435 U.S. 389 (1977); *New Mexico v. American Petrofina, Inc.*, 501 F.2d 363, 367 (9th Cir. 1974).

In *Employees*, the Court was construing the Fair Labor Standards Act, which clearly covered both private parties and state governments. The only question in that case was whether the various redress provisions of the statute were intended by Congress to apply to state governments. The Court concluded that Congress did not intend to allow private parties to seek penalties from state governments although Congress did intend to allow the federal government to sue state governments for violations of this act. In reaching this conclusion the court was influenced by the fact that the penalty provisions "may saddle the states with 'enormous fiscal burdens,' and that 'Congress, acting responsibly, would not be presumed to take such action silently.'" *Employees of the Department v. Department of Public Health and Welfare*, 411 U.S. 279, 304 (Brennan, J., dissenting, quoting majority opinion at 284, 286).

[139] The imposition of penalties under the FTC Act is guided by FTC discretion, which is informed by the public interest. In § 456.4(b) of this rule, the Commission has stated that it will not seek the imposition of civil penalties against states, state agencies or state officials for violation of this rule.

[140] See discussion *infra* at section IV.

[141] In a subsequent case, the Court stated that the legislative history actually contains some statements expressing a Congressional intention not to invade the legislative authority of the states. *Southern Motor Carriers Rate Conference v. United States*, 471 U.S. 48, 58 n. 19 (1985).

[142] See discussion of unfairness *supra* at Section III. B. There is also evidence to suggest that, at the time it amended the FTC Act in 1975, Congress was aware that the Commission might use its rulemaking power to challenge state-imposed restrictions on drug price advertising. See 120 Cong. Rec. 36150–52 (1974) (statement of Commissioner Thompson).

[143] But see, *California ex rel. Christensen v. FTC*, 1974–2 Trade Cas. (CCH) ¶75,328 (N.D. Cal. 1974), vacated and remanded, 549 F.2d 1321 (9th Cir.), cert. denied sub nom. *California Milk Producers Advisory Board v. FTC*, 434 U.S. 876 (1977).

[159] The Commission took the same position when it promulgated the Eyeglasses Rule. Statement of Basis and Purpose for the Trade Regulation Rule on Advertising of Ophthalmic Goods and Services, 43 FR 23992, 24004 (1978). On appeal of that rule, the court reserved judgment on the issue of whether the Commission could exercise jurisdiction over the states. *American Optometric Ass'n v. FTC*, 626 F.2d 896 (D.C. Cir. 1980).

VOL 54 ISS 47 MR 13 1989 UMI

Because we are dealing with state law, we have proceeded with extreme caution at each step of this rulemaking. Procedural safeguards are built into section 18 rulemakings to ensure that all interested parties have ample notice so that they have an opportunity both to present their views and evidence and to challenge the evidence and views submitted by other parties.[180] In deference to the significant state interests at stake, we solicited the views of state officials as well as industry members and consumers. We gave every consideration to claims that quality of care concerns justify these restrictions and would have deferred to any credible showing of countervailing benefits. In fact, when state laws are the subject of a section 18 rulemaking, the Commission has required that there be an even more rigorous showing of consumer injury and absence of countervailing benefits than is required under the Commission's unfairness standard.[181]

Nonetheless, as discussed above in section II.C., the record contains no persuasive evidence that commercial practice restrictions have any positive effect on the quality of care consumers receive or that they promote any other legitimate state interest. On the other hand, the record shows that state-imposed restraints on the commercial practice of optometry seriously hinder the provision of eye care to consumers. These restraints impose substantial costs on consumers. The primary effect of this regulation is to protect one category of providers, primarily solo practitioners, from competition from high-volume chain firms—at an annual cost to consumers of millions of dollars. This stifling of competition not only leads to higher prices and less eye care for consumers today, but delays the development of more innovative and cost-effective ways of providing services tomorrow.[182]

While we are convinced of the injury that these restrictions cause, we are also mindful of the states' traditional role in protecting the health and welfare of their citizens. Therefore, we have drafted this rule narrowly so as not to intrude gratuitously on the legitimate exercise of the police powers of the state.[183] The extent of our "intrusion" is carefully limited to those regulations that have been shown to be unfair, and should not interfere with the states' ability to protect their citizens from deceptive or abusive practices by optometrists or to ensure that high-quality optometric care is provided.

What the rule does challenge is state regulation that, in effect, insulates local optometrists from competition from large, price-competitive chain firms, most of which operate interstate.[184] Thus, this rule intrudes on no traditional state interest. Rather, it represents an appropriate exercise of the Commission's responsibility, grounded in the Commerce Clause, to protect markets from unfair or deceptive acts or practices.

By empowering the federal government to regulate commerce, the framers clearly sought to limit the extent to which states could restrict the development of interstate markets. Such limits were originally seen as necessary to protect the nascent national economy from the protectionist actions of the states, which the framers feared would lead to a destructive cycle of discrimination against out-of-state goods and the retaliation that would inevitably result.[185] That some policy of limiting state authority over interstate markets, underlying the Commerce Clause, favors Commission action here to prevent states from denying interstate ophthalmic providers access to local markets when the evidence demonstrates that the states' asserted basis for such actions—to protect citizens from poor-quality ophthalmic care—has no substantial basis in fact.[186]

In providing the Commission with Section 18 rulemaking authority, Congress has made a limited delegation to the FTC of its legislative authority to protect consumers from acts or practices that unreasonably interfere with the efficient functioning of interstate markets. We find that the existing restrictions on commercial practice are designed to and do impede the efficient flow of interstate commerce, and that they impose significant costs on consumers without providing any countervailing benefits. Thus, they constitute the kind of unfair acts or practices that Congress authorized the FTC to challenge in section 18 rulemaking.

We also believe that promulgation of this rule is consistent with a recent Executive Order on federalism.[187] That Order sets out certain policymaking criteria to guide executive agencies in the formulation of federal policy. In particular, the Order directs executive departments and agencies to act in strict adherence to constitutional principles and limit the policymaking discretion of states only where there is clear and certain constitutional authority and only where there is a problem not merely common to the states, but national in scope. In addition, the Order directs that any regulatory preemption of state law be limited to the minimum level necessary to achieve the objectives of the statute.

While the FTC is not bound by the requirements of this Order, we believe this rule conforms to the policymaking criteria outlined in the Order. We have proceeded under the clear and enumerated power of Congress to protect interstate commerce. The legislative history of the Magnuson-Moss amendments and subsequent Congressional action provide clear authority for this rule. We have identified a serious problem amenable to solution only at the national level; we have carefully examined the proffered claims of state interest; and we have fashioned a narrowly drawn deregulatory response that does not intrude on the legitimate interests states have in protecting the health and safety of their citizens.

[180] The Magnuson-Moss amendments impose additional safeguards beyond those mandated by the Administrative Procedure Act. These include additional hearing requirements and expanded scope of review by the courts. 15 U.S.C. 57a. See also Verkuil, *Preemption of State Law by the Federal Trade Commission*, 1976 Duke L.J. at 245-43; Note, *The State Action Exemption and Antitrust Enforcement under the Federal Trade Commission Act*, 89 Harv. L. Rev. 713, 745-50 (1976).

[181] Letter from Federal Trade Commission to Senator Robert Packwood, Chairman, Committee on Commerce, Science and Transportation, United States Senate, March 5, 1982. Our decision to forego remedies normally available for violations of the FTC Act is a further indication of our recognition that the actions of states and their officials, as opposed to actions by private citizens, merit special consideration in an enforcement proceeding. See discussion of Commission's enforcement policy *infra* in section V.

[182] For over thirty years scholars have written at length of the various ways in which excessive state economic regulation—such as these restrictions on the commercial practice of optometry—distorts the operation of markets and harm consumers. See, e.g., P. Verkuil, *State Action, Due Process and Antitrust: Reflections on Parker v. Brown*, 75 Col. Law Rev. 328 (1975); G. Stigler, *The Theory of Economic Regulation*, 2 Bell J. Econ. & Mgmt. Sc. 3 (1971); W. Gellhorn, *Individual Freedom and Governmental Restraints* (1956).

[183] In response to the cautionary message of the Court of Appeals in the Eyeglasses Rule, we have drafted this rule to focus narrowly on four specific areas of commercial practice. In remanding the advertising portions of the rule, the Court stated that the Commission had preempted the whole field of ophthalmic advertising, and so had "at least approached the outer boundaries of its authority." 626 F.2d 865, 870. The Court went on to state that answers to questions regarding preemption and state action "may depend . . . on the extent to which a federal regulation gratuitously intrudes on the exercise of police powers of the states." Id.

[184] While on their face these restrictions do not discriminate against out-of-state providers, they, in fact, have a disproportionately harmful effect on high-volume practices that operate interstate.

[185] Under the Articles of Confederation, some states engaged in protectionist activities that threatened to effect the development of a vital interstate economy. For example, New York imposed port fees and tonnage duties on vessels from Connecticut and New Jersey, increasing the cost of farm products coming from those two states. In retaliation, New Jersey taxed the property for the lighthouse at Sandy Hook that New York had built, while Connecticut merchants suspended commercial dealings with New York for one year and imposed fines on those who disregarded the boycott. A. Ciesecka, *American Commercial Legislation Before 1789*, 126-135 (1910). See also C. P. Nettels, *The Emergence of a National Economy, 1775-1815*, 73-73 (1977).

[186] We take no position on whether the commercial practice restraints that are the subject of this rulemaking could be challenged successfully by private parties using a Commerce Clause theory and the evidence on this record.

[187] Exec. Order No. 12,612, 52 FR 41685 (1987).

*V. Section-by-Section Analysis*

The following section-by-section analysis explains the intended scope and meaning of each of the rule provisions adopted by the Commission.

Section 456.1: Definitions

This section defines certain terms used in the rule. Many of these terms are contained in the Eyeglasses Rule and relate to the prescription release requirement. The rule makes some modifications to terms used in the Eyeglasses Rule and includes some new definitions.

*Paragraph (a):* The term "patient" has been substituted for the term "buyer" to conform more closely to industry usage. The term covers anyone who has undergone an eye examination.

*Paragraphs (b), (c), and (d)* remain unchanged from the original rule definitions.

*Paragraphs (e) and (f)* replace § 456.1(h) of the Eyeglasses Rule. The specific terms "ophthalmologist" and "optometrist" in paragraphs (e) and (f) have been substituted for the general word "refractionist" used in § 456.1(h) of the Eyeglasses Rule to define those categories of providers—Doctors of Medicine, Osteopathy and Optometry—who are qualified under state law to perform eye examinations. This change was made for two reasons. First, the use of the term "refractionist" in the Eyeglasses Rule has caused confusion because it is not generally used by consumers or by industry members. Second, the provisions of the Eyeglasses II Rule relating to commercial practice apply to optometrists, not ophthalmologists. The term "refractionist" has been deleted so that this distinction is clear.

*Paragraph (g):* The definition of the term "person" has been changed. This term was originally used in § 456.6 of the Eyeglasses Rule. That rule provision is no longer in effect, so the original definition of the term is no longer relevant. The term "person" is now used only in the rule provisions concerning commercial practice. The definition has been changed to make it clear that the term covers any individual, partnership, corporation or other entity, whether or not the FTC has jurisdiction over the "person."

*Paragraph (h):* The term "prescription" is defined as those specifications necessary to obtain lenses for eyeglasses. Thus, under the rule, the prescription that is released to the patient need only contain the data on the refractive status of the patient's eyes and any information, such as the date or signature of the examining optometrist or ophthalmologist, that state law requires in a legally fillable eyeglass prescription. The definition deletes all references to contact lenses. This change is intended to end the confusion generated by the definition in the Eyeglasses Rule concerning the obligation of optometrists and ophthalmologists to place the phrase "OK for contact lenses" (or similar words) on eyeglass prescriptions. No such obligation exists under the rule. This change will also clarify the fact that the prescription release requirement does not affect state laws regulating who is legally permitted to fit contact lenses. This change does not affect the requirement that optometrists and ophthalmologists offer prescriptions for lenses for eyeglasses to all patients whose eyes they examine, including those patients who wear or intend to purchase contact lenses.

*Paragraph (i):* The definition of "optometric services" is new. It is intended to cover the full range of services which may be provided by an optometrist under state law. The precise meaning of the term may vary slightly from state to state since states define the practice of optometry differently. The term only includes services provided by an optometrist, not by other professionals such as ophthalmologists who may also be licensed under state law to provide such services.

The new term is needed because the terms in the rule as originally proposed did not cover the full range of services which may be provided by optometrists. The term "ophthalmic services," as defined in § 456.1(d), covers only the measuring and fitting of eyeglasses or contact lenses subsequent to the eye exam. The term "eye examination," as defined in § 456.1(b), covers tests and procedures to determine the refractive status of the eyes. Optometrists are licensed to perform other services, however. For example, optometrists may prescribe eye exercises to deal with eye muscle problems or, in many states, prescribe topically applied prescription drugs to treat certain forms of eye disease. All such activities are included under the term "optometric services."

Section 456.2: Separation of Examination and Dispensing

This section requires that optometrists and ophthalmologists give prescriptions for eyeglass lenses to their patients immediately after completing an eye examination. Except for minor changes in terminology, this section is identical to the prescription release requirement contained in the Eyeglasses Rule (originally § 456.7).

*Paragraph (d)* addresses the use of waivers or disclaimers of liability. As the Commission makes clear in its declaration of intent (§ 456.5(c)), the rule does not impose liability on an ophthalmologist or optometrist for the ophthalmic goods and services dispensed by another individual pursuant to the ophthalmologist's or optometrist's prescription. By its terms, the rule proscribes only "waivers or disclaimers" of the physician's or optometrist's own responsibility. The Commission has interpreted this portion of the rule to permit nondeceptive affirmative statements concerning responsibility. For example, a written statement that "the person who dispenses your eyeglasses is responsible for their accuracy" would not violate § 456.2(d). However, such an affirmative statement cannot be coupled with a waiver or disclaimer of the optometrist's or ophthalmologists's own liability.[188]

Section 456.3: Federal or State Employees

This section (originally § 456.8 of Eyeglasses Rule) deletes references to the remanded portions of the Eyeglasses Rule and clarifies the intended effect of this section. This section exempts practitioners who work for any federal, state, or local government agency from the rule's prescription release requirements. If practitioners work only part-time for the government, the exemption only applies when they are engaged in their governmental duties.

Section 456.4: State Bans on Commercial Practice [189]

*Paragraph (a)(1): Lay Association.* The purpose of this section is to

[188] 43 FR 46286-46287 (1978).

[189] State bans may arise from a variety of sources: statutes, regulations, attorney general opinions, court opinions, and enforcement policy decisions by state boards and other state agencies. Regardless of the method used or the state entity involved, the rule prohibits such bans.

VOL 54 ISS 47 MR 13 1989 UMI

invalidate state prohibitions on optometrists' entering into certain designated business associations with nonoptometrists that make it possible to provide optometric services and ophthalmic goods and services to consumers in more efficient ways.

As originally proposed, § 456.4(a)(1) proscribed state prohibitions on "employer-employee or other business relationships" between optometrists and nonoptometrists. However, we realized that this language would leave some uncertainty in the minds of lawmakers and practitioners as to the scope of the rule.[100] We have narrowed the language of § 456.4(a)(1) to make it an unfair act or practice for states to prohibit those specific types of associations that the record demonstrates are critical to the development of commercial practice: (1) The employment of optometrists by lay persons or corporations to provide optometric services; (2) partnership agreements, joint-ownership or equity-participation agreements, profit-sharing agreements, or franchise agreements [101] between optometrists and nonoptometrists (including those that involve the sharing of revenues between optometrists and nonoptometrists) for the purpose of providing optometric services or ophthalmic goods or services; or (3) the leasing of office space by optometrists from nonoptometrists, including the payment of rentals on such leases based on a percentage of the optometrist's revenues.

The record also demonstrates that lay control over the business aspects of an optometric practice is an integral element of commercial practice. Subsection (v) invalidates those state regulations that prevent lay persons or corporations from controlling those business aspects of a practice that the record demonstrates have no effect on quality of care—e.g., setting of fees, salaries, or minimum office hours; location of the practice; choice of suppliers of material, equipment, services, and laboratory work; establishing minimum quantities of materials in stock and minimum equipment;[102] advertising, promotion, and marketing practices; accounting and financial practices; office design, decor, and maintenance; and other activities that involve business judgments to a similar degree.[103] As discussed more completely herein, this provision of the rule does not prevent states from passing regulations concerning these business aspects of optometry. It simply prevents the states from mandating that optometrists alone, and not lay persons or corporations, must make these decisions.

Finally, the language of this provision makes clear that the only affiliations covered by § 456.4(a)(1) are affiliations for the purpose of "providing optometric services" or "forming entities whose business, in whole or part, is providing optometric services or ophthalmic goods and services to the public." The inclusion of this language makes clear that affiliations for anything other than this stated purpose are not covered by the rule.[104]

The rule does not interfere with a state's ability to adopt or enforce any law or regulation that addresses specific harmful practices arising from lay association. For example, the rule does not interfere with a state's ability to prohibit improper lay control of the practice of optometry or the professional judgment of an optometrist, where the terms "practice of optometry" or "professional judgment" do not encompass those business aspects of a practice described in subsection (v).

The rule does not affect the ability of the states to prohibit the use of certain compensation schemes. For example, states could, if they were so inclined, prohibit employers of optometrists from setting quotas for the number of examinations that optometrists must perform. States could also choose to ban the payment of commission based on the number of examinations given or prescriptions written by optometrists. The evidence in this record does not establish that commission payments provide clear consumer benefits or that they result in no consumer injury.[105]

States may also establish minimum standards of competence or honesty and discipline those optometrists, commercial or not, who fail to meet those standards. In short, under the rule, states retain broad authority to regulate the commercial and traditional practice of optometry in order to protect the health and safety of their citizens and to prevent abuse of consumers.

*Paragraph (a)(2): Branch Offices.* The rule allows optometrists to own, operate, or practice in any number of offices. Corporations or other entities which offer optometric services through affiliations between optometrists and lay persons, as allowed by § 456.4(a)(1) of the rule, would also be permitted to own or operate any number of offices.

The rule also prohibits states from requiring optometrists to remain in personal attendance at each branch office for a specific percentage of the time the branch is open. Such a requirement effectively limits the number of branch offices that an optometrist may own and therefore is prohibited by the rule.

However, as § 456.5(a) makes clear, the states retain broad authority to regulate health and safety and to

---

[100] For example, some commenters argued that the original language was broad enough to encompass regulations banning "capping and steering" and referral arrangements. While in some instances such regulations may be unconstitutional restraints on commercial speech, the rule language makes clear that the rule does not cover such prohibitions.

[101] Typically, under an optometric franchising arrangement, the optometrist pays the franchiser for a specified set of goods or services, which might include the use of the franchiser's trade name and trademarks, the benefits of its goodwill, proven method of doing business, volume discounts on equipment and inventory, financing available through the franchiser, and participation in the franchiser's advertising program. The franchiser retains control over many aspects of the franchisee's business organization, such as office design, items stocked, and minimum quality standards. J. Solish, Attorney, R.H. Teagle Corp., Tr. 1388–72; cf. P. Zeldman, Attorney, National Franchise Association, Tr. 981 (describing attributes of franchising agreements generally).

[102] Obviously, these minimum standards would have to accord with any state-imposed standards for optometric practice. Furthermore, under the rule, states could require that optometrists be permitted to have equipment and inventory above the minimum level established by the lay person or corporation.

[103] The record establishes that corporations which associate with optometrists—for example, by employing optometrists or entering into franchise agreements—where currently permitted, commonly control these aspects of the business. See, e.g., NAOO, H–78a, at 39–40 and Appendices J, K, L, and M. Other evidence on the record, see supra section II.C., demonstrates that associations between optometrists and lay persons have no adverse impact on the quality of care available in the market.

[104] For example, the rule was never intended to address commercial practices by ophthalmologists. The record evidence centers on commercial optometric practice; there is little evidence concerning commercial practice by opthalmologists. Under this provision, ophthalmologists also may enter into affiliations with optometrists for the purpose of providing optometric services or ophthalmic goods and services to the public.

The term "sellers" also appeared in the proposed language of § 456.4(a)(1). Sellers was defined to include opticians. As a result, the rule as originally proposed would have prohibited state restraints on lay persons employing (or otherwise affiliating with) "sellers." The record shows that the law of only one state prohibits such affiliations, and no evidence or comments were submitted about this restriction. Consequently we decline to extend the rule to such a restriction.

[105] In contrast to an franchise or leasing arrangement, for example, where an optometrist pays a percentage of his gross revenue to the franchiser or lessor, commission payments entail a payment to an optometrist which varies depending upon the number of eyeglasses sold or revenue generated by the optometrist. The former creates no incentive for the optometrist to overprescribe while the latter arguably does.

prevent consumer abuses. For example, states could require that optometric services or ophthalmic goods or services provided at each office be supplied only by a person qualified to do so. As another example, states could regulate the services provided at each office by requiring minimum eye examination procedures, minimum office equipment, or a specific level of sanitation.

*Paragraph (a)(3): Mercantile locations.* This provision allows optometrists to locate their practices inside retail optical stores, department stores, or other mercantile establishments. Optometrists can also locate in shopping malls or adjacent to optical retailers. Under the rule corporations and other entities that offer optometric services by employing optometrists or otherwise affiliating with optometrists, pursuant to § 456.4(a)(1) of the rule, can also locate in mercantile locations.

Consequently, the rule also eliminates so-called "two-door" or "side-by-side" requirements, which are frequently used to prohibit optometrists from locating directly inside mercantile establishments. These requirements mandate separate offices for the optometrist and the optician, including, in some instances, separate doors and duplicate facilities and partitions between the two offices. Under the rule, states could not require separate offices, separate entrances, duplicate facilities, or partitions.

Finally, as § 456.5(a) makes clear, the rule is not intended to interfere with the state's ability to enforce general zoning laws or any law, rule, or regulation which prohibits the location of an optometric practice in an area which would create a public health or safety hazard.

*Paragraph (a)(4): Trade Names.*[106] The rule invalidates state prohibitions on optometrists' practicing under any nondeceptive trade name. Thus, for example, optometrists employed by a chain firm could practice under the name of the chain firm as long as the name was not deceptive. Optometrists working for other optometrists could practice under the name used by their employer. Optometric franchisees could practice under the franchise name. Solo practitioners could adopt any nondeceptive trade name. Corporations and other entities which offer optometric services through affiliations with optometrists, pursuant to § 456.4(a)(1) of the rule, could also practice under any nondeceptive trade name.

Some states, for example, require that any trade name include the name of one or more of the optometrists practicing under the trade name.[107] Such requirements would violate the rule since they prohibit use of a wide variety of nondeceptive trade names, including some that are well-established in other states. Other states require that all trade names used by optometrists include the word "optometric" or "optometrist."[108] Trade names which do not include these terms, such as "Smith Optical Center," are not in general, deceptive. Such a requirement would also be prohibited under the rule, since it would prohibit the use of all other nondeceptive trade names.[109]

The rule also allows optometrists to advertise under a trade name in a nondeceptive manner. For example, optometrists could display their trade names on signs and use the trade name in media advertising. Similarly, chain firms offering eye exams could advertise optometric services under the trade name.

The rule also prohibits states from mandating that any trade name advertisement disclose the names of all optometrists practicing at a given advertised location or practicing under the advertised trade name.

However, as § 456.5(a) (3) and (4) make clear, the rule does not infringe on the state's ability to enforce any law, rule, or regulation which requires that the identity of an optometrist be disclosed to a patient before, during, or after the time optometric services are provided or ophthalmic goods are dispensed or from enforcing any state law, rule, or regulation that is reasonably necessary to prevent the deceptive use of trade names in advertising. Also, the rule would not prevent states from imposing reasonable disclosure requirements on any trade name advertising.

Sections 456.4(b) and 456.5(b): Enforcement Policy

The Commission expects that the states will comply voluntarily with the rule. If, however, a state or local governmental agency or official attempts to enforce a state law or regulation that conflicts with the rule, § 456.5(b), while not creating a private right of action, recognizes that individuals can interpose the rule as a defense in any proceeding brought by the state. In such a situation, a person could correctly assert that the rule preempts the state law or regulation and therefore there is no basis on which any enforcement action could be brought. Because the Commission expects the states to comply voluntarily with the rule, it does not anticipate bringing any law enforcement actions against state or local governmental agencies or officials. Section 456.4(b) of the rule also provides that no state or local governmental agency or official is liable for civil penalties, consumer redress, or other monetary relief that would ordinarily be available under the FTC Act for violations of this rule.

Section 456.5: Declaration of Commission Intent

*Paragraph (a):* Section 456.5(a) is intended to make clear that the rule does not affect any state regulation as long as the state does not engage in the specific practices enumerated in § 456.4(a) (1)–(4). Thus, the rule does not interfere with a broad range of state regulation that safeguards the health and safety of eye care consumers, or prevents unfair or deceptive practices or anticompetitive conduct by eye care providers, including commercial practitioners. For example, many states specify that particular procedures must be performed each time an optometrist performs an eye examination or that every optometrist's office must have particular equipment. Many states require that optometrists refer cases of suspected pathology to ophthalmologists, or require that optometrists verify the accuracy of lenses prepared according to their prescriptions. All states prohibit fraud and deception in the practice of optometry and virtually all require that optometrists practice "competently."[110] The rule does not interfere with a state's ability to regulate optometry, including commercial practice, through such regulations.

We also acknowledge that a state or local government can enact regulation that may have an incidential impact on the ability of optometrists to engage in the specific practices covered by the rule, as long as the regulation does not distinguish between commercial and

---

[106] Section 456.1(j) of the rule as originally proposed defined the term "trade name ban." The rule incorporates the substance of this definition in this section, which bars states from prohibiting the use of trade names. Thus, a separate definition is unnecessary.

[107] See, e.g., La. Rev. Stat. Ann. section 1112 (West 1982); Mo. Admin. Code Tit. 4, CSR 210–2.060(4)(E) (1984); Or. Admin. R. section 853–300–010 (1984).

[108] See, e.g., Minn. R. 6500.0360, Subp. 3 (1987).

[109] In fact, use of the term "optometric" in the trade names of large chain firms could well be confusing to consumers since the term may imply that optometric services are available at all the chain's retail locations when, in fact, this may not be the case.

[110] See Final Staff Report, I–1, at 65–66.

VOL 54 ISS 47 MR 13 1989 UMI

noncommercial optometrists or optometric firms. Thus, the rule does not invalidate state labor laws, antitrust laws, zoning laws, or other state or local regulation that may have an incidental impact on the ability of optometrists to engage in the conduct protected by the rule.

*Paragraph (b):* See analysis of § 456.4(b) for a discussion of the Commission's views regarding the ways in which the Commission intends the rule to be enforced.

*Paragraph (c):* See analysis of waivers and disclaimers of liability in § 456.2(d).

*VI. Alternatives Considered*

During the course of this proceeding the Commission carefully considered alternative approaches to the promulgation of a rule. We also considered adopting a broader prohibition on commercial practice restraints—one that would reach indirect as well as direct bans—and considered various proposed modifications to the existing prescription release provisions. Each of these alternatives is discussed below.

A. Alternatives to Promulgation of a Rule

1. *Take no action; defer to the states.* The Commission could leave to the states the decision whether or not to eliminate these restrictions. The Commission could continue to make its staff studies and other evidence available to state legislatures and regulatory agencies, or could develop a model state law, in the hope that states would take corrective action in this area. However, the prospects for significant change are dim. The BE Study has been available since 1980, and staff has testified or submitted comments in support of deregulation of commercial practice in a significant number of states.[171] Nevertheless, the record indicates that such restrictions are still widespread.[172] Based on this record we have no reason to expect that more than a few states will voluntarily repeal commercial practice restrictions in the foreseeable future.

2. *Case-by-case approach.* A second alternative would be to issue complaints and proceed on a case-by-case basis against particular states or state regulatory boards.[173] Rulemaking appears to be the more appropriate vehicle for a number of reasons, especially since nearly all of the states would be affected. Rulemaking procedures permit all affected and interested parties, including all potentially affected states, to participate in a full and open discussion of the issues and to present evidence for and against the proposal. In a rulemaking proceeding, the Commission can assess the implications of the proposal on a nationwide basis more readily than in a case against one state. In addition, promulgation of a rule would provide more complete protection for consumers. Even if an order were issued against a particular state or state regulatory board, that order would not extend to other states with similar restrictions. Thus, significant numbers of consumers would be left without relief in other states. Case-by-case adjudication against a number of states would be more time-consuming and costly than rulemaking.

B. Alternative Rule Provisions

1. *Commercial Practice—Direct and Indirect Bans.* The rule as proposed at the start of this proceeding covered state restraints that directly or indirectly prohibited commercial practice.[174] Such a formulation would have given the Commission the greatest flexibility in reaching indirect attempts to prohibit commercial practice. At the same time, the Commission was mindful that such an approach arguably would invalidate many laws and regulations not specifically enumerated in the rule. We chose to promulgate a more limited rule that defines the invalidated restrictions very clearly in order to eliminate any uncertainty regarding which laws or regulations are affected by this rule. The rule sets out four types of state laws that act as direct restraints on the commercial practice of optometry: (1) Bans on lay association; (2) limitations on branch offices; (3) bans on mercantile locations; and (4) bans on trade names.

Additionally, we have clearly identified and incorporated into the rule four other types of restraints that interfere with activities essential to the functioning of commercial practice: (1) Bans on the sharing of profits (§ 456.4 (a)(1) (i)); (2) bans on lay control over the business aspects of a practice (§ 456.4 (a)(1) (v)); (3) requirements that specify that owners of branch offices remain in personal attendance at each branch for a specific percentage of the time that the branch is open (§ 456.4 (a)(2)); and (4) requirements that mandate the disclosure in advertising of the names of all optometrists practicing at a given advertised location or practicing under a trade name (§ 456.4 (a)(4)).

The rule is now much narrower. It proscribes only those specified types of state laws and regulations that the record demonstrates create serious barriers to the formation and operation of commercial optometric firms and thereby cause significant consumer injury.

2. *Prescription Release.* On June 2, 1978, the Commission promulgated the Eyeglasses Rule.[175] That rule, in pertinent part, requires optometrists and ophthalmologists to release to their patients copies of their eyeglass prescriptions immediately following eye examinations regardless of whether or not the patient requests the prescription.[176]

The Commission found that many consumers were being deterred from comparison shopping for eyeglasses because optometrists and ophthalmologists refused to release eyeglass prescriptions even when requested to do so, or charged an additional fee for release of the prescription.[177] The Commission promulgated an automatic release requirement based on a finding of "consumers' lack of awareness that the purchase of eyeglasses need not be a unitary process"—i.e., that purchasing eyeglasses can be separated from the process of obtaining an eye exam.[178] The automatic release provision was thus imposed as a remedial measure.

In this proceeding the Commission considered whether or not the prescription release requirement should be modified or extended. The major modification considered was amendment of the rule to require that prescriptions be provided only upon request of the patient. In addition, the Commission asked for comment on five

[171] Comments regarding restrictions on the commercial practice of optometry have been submitted to at least nine states, including California, Delaware, Kansas, Mississippi, New Jersey, North Dakota, Oregon, Texas, and Virginia.

[172] See Final Staff Report, L-1, at 36–46.

[173] Proceeding against private associations would not be effective since it would do nothing to remove the state-imposed restraints at issue in this proceeding.

[174] See 50 FR 986 (1985). This intention was specifically stated in proposed §§ 456.5 (b) and (c).

[175] 43 FR 23,992 (1978) (codified at 16 CFR 456).

[176] The rule also prohibits optometrists and ophthalmologists from charging additional fees for the prescriptions, from conditioning the availability of eye examinations on the purchase of ophthalmic goods, or from including waivers of liability on the prescription. These provisions were upheld by the U.S. Court of Appeals in 1980. *American Optometric Assoc. v. FTC*, 626 F.2d 896 (DC Cir. 1980).

[177] In addition, some practitioners refused to conduct an examination unless the patient agreed to purchase eyeglasses from the practitioner or included potentially intimidating disclaimers of liability on the prescription itself. 43 FR 23992, 23998 (June 2, 1978).

[178] See Final Staff Report, L-1, at 251–52.

other possible changes in the rule.[179] The Commission considered the record evidence on each of these proposals and chose not to adopt any of them for the reasons outlined below.

a. *Automatic Release.* The Commission decided to retain the remedial aspect of the prescription release requirement after consideration of two surveys[180] placed on the rulemaking record, as well as numerous comments and testimony offered by optometrists, opticians, professional associations, state boards, and consumer groups.

Our reading of the record reveals that there is significant non-compliance with the automatic release requirement[181] and that there continues to be a lack of consumer awareness about prescription rights. Given that the record does not contain sufficient evidence to conclude that the remedial aspects of the rule are no longer needed, we decline to modify or repeal the rule.[182]

b. *Contact Lens Prescription Release.* The NPR requested comment on whether significant numbers of consumers were refused copies of their contact lens prescriptions, whether consumers could reasonably avoid these refusals, and what are the costs and benefits of extending the prescription release rule to contact lenses.[183] While the record suggests that it is not uncommon for practitioners to refuse to give patients copies of their contact lens prescriptions,[184] and that the resulting costs to consumers could be significant,[185] we do not believe that the record contains sufficient reliable evidence to permit a conclusion that the practice is prevalent.

Moreover, even if the evidence on prevalence of refusal to release contact lens prescriptions and resulting injury to consumers were satisfactorily documented, we would have to consider if any countervailing benefits justified the refusal. Some commenters suggested that refusal to release is necessary to permit the fitter to verify the fit of the lens[186] on the eye because there is some danger that lenses may not conform to the eye as expected.[187] According to these commenters, it would be inappropriate to require them to release contact lens specifications to their patients, since patients could then obtain replacement lenses from dispensers that do not verify the fit.[188]

Because the record evidence is insufficient to evaluate this claim fully, the Commission cannot conclude that a refusal to release a contact lens prescription is an unfair act or practice.

c. *Other Prescription Release Matters.* The Commission received no substantial evidence showing that practitioners refuse to release duplicate copies of prescriptions to patients who lose or misplace their original copies, or that eyeglass dispensers refuse to return prescriptions to patients after filling the prescription.[189] Because we do not have sufficient evidence to show that either of these practices is prevalent, rulemaking in these areas would be inappropriate.

*VII. Other Matters*

A. Cost-Benefit Analysis

Before the Commission determines that an act or practice is legally unfair, we analyze the act or practice in terms of the scope and nature of the injury it causes and in light of any offsetting benefits it provides. In sections II. B. and C., we set out a detailed summary of the injury imposed by commercial practice restrictions and the absence of any countervailing benefits that might justify the restrictions. However, we also must consider the projected benefits and effects of the rule that we are promulgating.[190]

1. *Effect on Consumers.* The primary benefit to consumers from the removal of commercial practice restrictions is that they will be able to purchase vision care goods and services at lower prices without any compromise in quality of care. The record evidence indicates that (1) Prices are significantly lower in markets where commercial practice is not restricted; (2) commercial optometrists charge lower prices than noncommercial optometrists; (3) noncommercial optometrists who operate in markets where commercial practice is permitted charge less than their counterparts in markets where commercial practice is prohibited; and (4) overall quality of care is no lower in nonrestrictive than in restrictive markets. As restrictions on commercial practice are removed, competition among optometrists should increase. Lower prices should then result from this increased competition and from economies of scale achieved by larger optometric providers. Lower prices will also increase the availability of ophthalmic goods and services to consumers who before could afford such services infrequently, or in some instances, not at all.

Implementation of the rule will have no adverse effect on consumers. They will be able to obtain the same overall quality of care, but at lower prices. Finally consumers will benefit from their ability to choose, if they wish, the convenience of one-stop service (eye examinations plus eyeglass or contact lens dispensing) from optometrists or retail optical firms who employ optometrists.

2. *Effect on Industry Members.* The rule will directly affect all opthalmologists and optometrists who perform eye examinations and all optometrists, opticians, and others who desire to engage in commercial ophthalmic practice. In 1982, there were approximately 12,000 ophthalmologists, 22,000 optometrists, and 26,000 opticians in active practice in the United States. Most ophthalmologists and optometrists are self-employed. The majority of

[179] (1) Should the rule require optometrists and ophthalmologists only to offer, rather than give, eyeglass prescriptions to their patients? (2) Should the requirement be repealed altogether? (3) Should the rule be extended to require the release of contact lens prescriptions to patients? (4) Should the rule be extended to require optometrists and ophthalmologists to release duplicate copies of prescriptions to patients who lose or misplace their original copies? and (5) Should the rule require dispensers of eyeglasses to return the eyeglass prescription to patients after filling the prescription? 50 FR 802–03 (1985).

[180] The Market Facts Study, supra note 18, developed by staff in conjunction with the Market Facts Public Sector Research Group, was designed to measure eye doctors' compliance with the prescription release requirement and consumer knowledge and experience with prescriptions. The American Association of Retired Persons also submitted a survey conducted in 1985. That survey polled older consumers to determine their familiarity with eyeglass prescriptions. AARP Survey, J–37(b) (Attachment to Statement of E. Eggan, Director, American Ass'n. of Retired Persons).

[181] The Market Facts Study concludes that 44% of refractionists are not in compliance with the rule and that an additional 19% are only in partial compliance. See also Presiding Officer's Report, L–2, at 24–25, which concludes that noncompliance remains a problem and recommends that the rule not be modified.

[182] Little evidence was presented in response to the Commission's question regarding an "offer" requirement. Comments from parties on opposing sides of the release upon request or repeal issues generally opposed the use of an offer in lieu of their favored position.

[183] 50 FR 803 (1985).

[184] See Final Staff Report, L–1, at 283–87.

[185] Id. at 286–89.

[186] This need varies somewhat between hard and soft contact lenses. Hard lenses are ordered according to the fitter's specifications and, in many cases, are then modified or finished by the fitter on a custom basis.

[190] Federal Trade Commission, Rules of Practice, § 1.14(2)(iii).

VOL 54 ISS 47 MR 13 1989 UMI

opticians are self-employed or employed in "independent" retail optical establishments.

The rule will give members of the optometric industry greater freedom to provide goods and services in the most cost-effective manner. They will be able to enter into business affiliations with nonoptometrists, own and operate several branch offices, use a trade name for their practice, and locate their practices in retail or mercantile settings. In a less-restrictive regulatory environment, they will have greater opportunity to develop innovative ways of offering services and goods to consumers. Corporations or other business entities presently selling opthalmic goods would be able to hire, lease space to, or associate with optometrists in order to offer one-stop shopping to consumers.

No direct costs would be imposed on optometrists, ophthalmologists, or opticians by the removal of state bans on commercial forms of practice. The rule would only permit, not require, providers to operate branch offices, maintain offices in mercantile locations, use trade names, or affiliate with lay corporations and individuals.

The only "costs" borne by industry members would be those created by doing business in a market where greater consumer choice stimulates more competition. The indirect effects of the rule on various industry members cannot be determined with any degree of precision, and will depend at least in part on how individual providers respond to the changing market conditions. For example, some noncommercial optometrists may be forced to adopt more cost-effective business practices or lower their prices in order to meet increased competition. In markets where commercial practice is now prohibited, it can be anticipated that commercial firms will enter.

3. *Effect on Small Entities.* The primary impact of the rule on small entities will stem from the increased competition in the vision care industry which can be anticipated as a result of the rule's deregulatory effects. The economic impact on individual small entities from increased competition in the vision care industry, although difficult to determine, could be substantial. However, the provisions of the rule that remove certain governmental restraints on commercial ophthalmic practice would permit small entities (i.e., optometrists and opticians) to engage in alternate modes of practice, including commercial practice, or to expand, should they desire to do so.

The rule could hurt some small entities and benefit others, depending on how they respond to a more competitive market. In states that currently restrict commercial practice, for example, the market will become more flexible and capable of responding to consumer demand. Those small entities that have been denied the opportunity to engage in more efficient business practices will now be able to do so.

Data from studies of the ophthalmic market indicate that this market is price elastic: that is, as prices of eye examinations and eyeglasses decline, there is a proportionately greater increase in consumption. Thus, we anticipate an increase in total expenditures for vision care products and services. However, the market will be a more competitive one. Some less efficient providers will undoubtedly lose business.

4. *Effect on Government Entities.* The rule invalidates state statutes and regulations that ban commercial forms of practice. Thus, state and local regulatory agencies would not have to bear the costs of enforcing these bans. However, other indirect costs might arise should state or local officials decide to enact new regulations in areas not covered by the rule. In addition to the costs involved in enacting such regulations, the regulatory agencies might incur additional enforcement costs.

B. Final Regulatory Analysis

The final regulatory analysis [101] of the rule has been integrated into the Statement of Basis and Purpose, as allowed by statute. [102]

Accordingly, Title 16, Part 456 of the Code of Federal Regulations is revised to read as follows:

## PART 456—OPHTHALMIC PRACTICE RULES

Sec.

456.1 Definitions.
456.2 Separation of examination and dispensing.
456.3 Federal or State employees.
456.4 State bans on commercial practice.
456.5 Declaration of Commission intent.

Authority: Section 18(a), 88 Stat. 2193, as amended 92 Stat. 98, (15 U.S.C. 57a); 80 Stat. 383; 81 Stat. 54; 89 Stat. 1561–1564; 90 Stat. 1247 (5 U.S.C. 552).

[101] The statute requires that the analysis contain (1) A statement of the need for and objectives of the rule; (2) a summary of the issues raised by public comments, a summary of the agency's assessment of such issues, and a statement of changes made in the rule as a result of those comments; and (3) a description of the significant alternatives to the rule considered and reasons for rejecting each alternative. 5 U.S.C. 604.

[102] 5 U.S.C. 553(c).

### § 456.1 Definitions.

(a) A "patient" is any person who has had an eye examination.

(b) An "eye examination" is the process of determining the refractive condition of a person's eyes or the presence of any visual anomaly by the use of objective or subjective tests.

(c) "Ophthalmic goods" are eyeglasses, or any component of eyeglasses, and contact lenses.

(d) "Ophthalmic services" are the measuring, fitting, and adjusting of ophthalmic goods subsequent to an eye examination.

(e) An "ophthalmologist" is any Doctor of Medicine or Osteopathy who performs eye examinations.

(f) An "optometrist" is any Doctor of Optometry.

(g) A "person" is any individual, partnership, corporation, association or other entity.

(h) A "prescription" is the written specifications for lenses for eyeglasses which are derived from an eye examination, including all of the information specified by state law, if any, necessary to obtain lenses for eyeglasses.

(i) "Optometric services" are any acts or practices which are included within the definition of the practice of optometry under state law.

### § 456.2 Separation of examination and dispensing.

It is an unfair act or practice for an ophthalmologist or optometrist to:

(a) Fail to provide to the patient one copy of the patient's prescription immediately after the eye examination is completed. Provided: An ophthalmologist or optometrist may refuse to give the patient a copy of the patient's prescription until the patient has paid for the eye examination, but only if that ophthalmologist or optometrist would have required immediate payment from that patient had the examination revealed that no ophthalmic goods were required;

(b) Condition the availability of an eye examination to any person on a requirement that the patient agree to purchase any ophthalmic goods from the ophthalmologist or optometrist;

(c) Charge the patient any fee in addition to the ophthalmologist's or optometrist's examination fee as a condition to releasing the prescription to the patient. Provided: An ophthalmologist or optometrist may charge an additional fee for verifying ophthalmic goods dispensed by another seller when the additional fee is imposed at the time the verification is performed; or

(d) Place on the prescription, or require the patient to sign, or deliver to the patient a form or notice waiving or disclaiming the liability or responsibility of the ophthalmologist or optometrist for the accuracy of the eye examination or the accuracy of the ophthalmic goods and services dispensed by another seller.

### § 456.3 Federal or State employees.

This rule does not apply to ophthalmologists or optometrists employed by any federal, state or local governmental entity.

### § 456.4 State bans on commercial practice.

(a) It is an unfair act or practice for any state or local governmental entity to:

(1) Prevent or restrict optometrists from entering into associations with lay persons or corporations by:

(i) Prohibiting persons other than optometrists from employing optometrists to provide optometric services to the public;

(ii) Prohibiting optometrists and persons other than optometrists from entering into partnership agreements, joint-ownership or equity-participation agreements, or profit-sharing agreements for the purpose of forming entities to provide optometric services or ophthalmic goods and services to the public;

(iii) Prohibiting optometrists and persons other than optometrists from entering into franchise agreements (including those that provide for the sharing of revenues) for the purpose of forming entities to provide optometric services or ophthalmic goods and services to the public;

(iv) Prohibiting optometrists from leasing space from persons other than optometrists to provide optometric services to the public or prohibiting optometrists from entering into leases for such space where rental payments under such leases are based on a percentage of revenues; or

(v) Prohibiting lay control over the business aspects of an optometric practice or an entity formed to provide optometric services or ophthalmic goods and services to the public;

(2) Limit the number of offices that may be owned or operated by optometrists or by entities formed by any of the agreements covered by § 456.4(a)(1) of the rule; or require that an owner of branch offices remain in personal attendance at each branch office for a specific percentage of time;

(3) Prohibit optometrists, or any entities formed by any of the agreements covered by § 456.4(a)(1) of the rule, from practicing in a pharmacy, department store, shopping center, retail optical dispensary or other mercantile location;

(4) Prohibit optometrists, or any entities formed by any of the agreements covered by § 456.4(a)(1) of the rule, from practicing or holding themselves out to the public, by advertising or otherwise, under any nondeceptive trade name, including a name other than the name shown on their licenses or certificates of registration; or require the disclosure in advertising of the names of all optometrists practicing at a given advertised location or practicing under a trade name.

(b) If any state or local governmental entity or officer violates any of the provisions of § 456.4(a)(1)–(4), that person will not be subject to civil penalty, redress, or other monetary liability under any section of the Federal Trade Commission Act.

### § 456.5 Declaration of Commission intent.

(a) The provisions of § 456.4(a)(1)–(4) are not intended to interfere with the exercise of state or local governmental authority to protect the health and welfare of the public. In exercising its authority to safeguard the health and safety of eye care consumers or to protect the public from unfair or deceptive practices or anticompetitive conduct, a state or local government can enact regulation that has the incidental effect of preventing an individual optometrist or optometric firm from engaging in a specific agreement or activity covered by § 456.4(a)(1)–(4), as long as such regulation does not distinguish between optometrists or optometric firms that engage in any of the agreements or activities enumerated in § 456.4(a)(1)–(4) and optometrists or optometric firms that do not engage in such agreements or activities. For example, the rule does not prevent states or local governments from prohibiting the location of an optometric practice in an area that could create a public health or safety hazard, or from enforcing a general zoning regulation, even though such prohibition or regulation had the incidental effect of preventing an optometrist from locating in some specific commercial location. While the rule affects state or local regulation of the business aspects of the practice of optometry, it is not intended to interfere with the authority of a state or local government to:

(1) Prohibit improper lay interference in the ophthalmic care provided a patient by an optometrist;

(2) Require that the optometric services provided at a branch office be supplied by a person qualified to do so under state or local law;

(3) Require that the identity of an optometrist be disclosed to a patient before, after, or at the time optometric services are performed;

(4) Prevent the deceptive use of trade names or prevent trade name infringement; or

(5) Establish and maintain minimum quality standards for ophthalmic goods or services.

(b) The Commission intends that this rule may be used as a defense to any proceeding of any kind that may be brought against any optometrist, or any entity formed by any agreement covered by § 456.4(a)(1) of the rule, for using a trade name, working for or affiliating with a person who is not an optometrist, operating branch offices or practicing in a mercantile location.

(c) In prohibiting the use of waivers and disclaimers of liability in § 456.2(d), it is not the Commission's intent to impose liability on an ophthalmologist or optometrist for the ophthalmic goods and services dispensed by another seller pursuant to the ophthalmologist's or optometrist's prescription.

(d) The rule, each subpart, and the Declaration of Commission Intent and their application are separate and severable.

### Separate Statement of Chairman Daniel Oliver, Ophthalmic Practice Rule Statement of Basis and Purpose

When the Commission voted to promulgate the Ophthalmic Practice Rule, I questioned the use of the Federal Trade Commission rulemaking authority to strike down state laws that restrict competition in the eye care market. Based on principles of federalism, I voted against the proposed rule.

The restraints at issue are clearly anticompetitive and adversely impact consumers. They illustrate what I have said a thousand times: it is government that is the primary source of restraints on competition.

Nevertheless, I continue to believe that this harmful effect on consumers does not allow us to strike down anticompetitive state activities that are protected by the "state action" doctrine. I reiterate my conclusion that the Commission lacks the authority to promulgate the Ophthalmic Practice Rule.

**SECURITIES AND EXCHANGE COMMISSION**

**17 CFR Parts 210, 240, 249, 270, and 274**

**[Release Nos. 33-6823; 34-26589; IC-16549; FR-36; File No. S7-6-88]**

**Reporting Requirements for Issuer's Change of Fiscal Year; Financial Reporting Changes; Period To Be Covered by First Quarterly Report After Effective Date of Initial Registration Statement**

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Final rules.

**SUMMARY:** The Securities and Exchange Commission ("Commission") today announced the adoption of amendments to Regulations 13A and 15D under the Securities Exchange Act of 1934 that revise the reporting and filing requirements when a domestic or foreign private issuer changes its fiscal year end or a successor issuer has a different fiscal year than its predecessor. The Commission also is adopting amendments to Form 8–K to require reporting of a change in fiscal year. New Rule 30b1–3 under the Investment Company Act of 1940 is being adopted to govern the reporting requirements for investment companies that change their fiscal year end. In addition, a new accounting Rule 3–06 and other amendments to the accounting and proxy rules relating to financial reporting are being adopted. Finally, the Commission is adopting amendments to the quarterly reporting rules that modify the period to be covered in a new registrant's first quarterly report.

**EFFECTIVE DATE:** April 12, 1989. The amendments to Exchange Act Rules 12b–25, 13a–10, and 15d–10, Forms 8–K, 10–K, 10–Q, 20–F, 12b–25, and N–SAR, and new Investment Company Act Rule 30b1–3 are effective for an issuer's decision to change a fiscal year and made on or after April 12, 1989. All other amendments are effective for filings made on or after April 12, 1989.

**FOR FURTHER INFORMATION CONTACT:** Howard P. Hodges or Joseph S. Aleknavage, (202) 272–2553, Office of the Chief Accountant of the Division of Corporation Finance, or Barbara J. Green, (202) 272–2589, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. After the effective date, contact Joseph S. Aleknavage, (202) 272–2553, Office of the Chief Accountant of the Division of Corporation Finance, or Emanuel D. Strauss or Mark W. Green, (202) 272–2573, Office of Chief Counsel, Division of Corporation Finance. With respect to investment companies, contact Lawrence A. Friend, (202) 272–2108, Office of Disclosure, Division of Investment Management.

**SUPPLEMENTARY INFORMATION:** The Commission today announced the adoption of amendments to Rules 12b–25,[1] 13a–10,[2] 13a–13,[3] 14a–3,[4] 15d–10,[5] and 15d–13 [6] under the Securities Exchange Act of 1934 ("Exchange Act"),[7] as well as revisions to Forms 8–K,[8] 10–K,[9] 10–Q,[10] 20–F,[11] and 12b–25.[12] The Commission also is adopting a new accounting Rule 3–06 and amendments to Rule 3–12 [13] of Regulation S–X.[14] With respect to investment companies, new Rule 30b1–3 and amendments to Rules 6b–16 [15] and 30b1–2 [16] and Form N–SAR [17] under the Investment Company Act of 1940 ("Investment Company Act") [18] are being adopted.

## I. Executive Summary

### A. The Proposals

On June 2, 1988 the Commission issued a release proposing amendments to Exchange Act Rules 13a–10 and 15d–10, which set forth reporting requirements applicable when an issuer changes its fiscal year end.[19] The proposals were designed to update the rules, integrate them with other current periodic reporting requirements, codify staff rule interpretations, and clarify issuers' quarterly reporting obligations in change of fiscal year circumstances. The Commission also proposed a new item to Form 8–K to require reporting of a change in fiscal year and a new Investment Company Act rule to govern the reporting requirements for investment companies that change their fiscal year end. In addition, to codify staff practices, amendments were proposed to the proxy and accounting rules regarding financial reporting. Proposals also were made to amend the quarterly reporting rules to eliminate a reporting gap by modifying the period for which a new registrant's first quarter report must be filed.

A majority of the commentators on the Proposing Release were accounting firms and an accounting association.[20] All but one of the commentators expressed general support for the proposals, in whole or in part.[21] While commentators generally approved of the revision of issuers' reporting obligations in change of fiscal year circumstances, or codification of staff practices, most also had suggestions on specific aspects of the proposals.

The Commission is adopting the amendments substantially as proposed. The changes from the proposals are mainly in response to commentators' suggestions. All substantive changes from the proposals are noted and explained in the detailed discussion of the amendments in Part II below.

### B. The Amendments

Prior to the amendments, Rules 13a–10 and 15d–10 required an issuer changing its fiscal year end to file an "interim report" with the Commission containing financial and other information about the "interim period" from the end of the most recently concluded fiscal year to the opening date of the new fiscal year if that period covered three or more months. Such reports were required to be filed on the form used for the issuer's annual report.

To avoid confusion with other reports, such as quarterly reports, which commonly are referred to as interim reports, under the amendments, interim reports are referred to as "transition reports" and interim periods called "transition periods." The amendments also include the following substantive revisions:

(1) Transition Reporting on Forms 10–Q and 10–K

Separate transition reports are required for all transition periods, except those of one month or less. Issuers will continue to file a transition report on the annual reporting form, usually Form 10–K, including audited financial statements, for transition periods of six or more months. For a transition period shorter than six months, issuers are given an option to file a transition report on either Form 10–Q, including unaudited financial statements, or Form 10–K, including audited financial statements. Information for a transition period of one month or less may be included in the issuer's report on Form 10–Q for the first quarter of the newly adopted fiscal year that ends after the date on which the issuer determined to change its fiscal year, if separate audited statements of income and cash flows covering the transition period are filed with the first annual report for the newly adopted fiscal year. If the issuer's next report is the first annual report for the newly adopted fiscal year, instead of a quarterly report, a transition period of one month or less may be covered in that annual report.

(2) Conforming the Filing Requirements of Transition Reports to the Current Requirements for Forms 10–Q and 10–K

To conform to the current filing periods for reports on Forms 10–K and 10–Q, the filing period for transition reports on Form 10–K is 90 days after the close of the transition period or the date of the determination to change the fiscal year, whichever is later, and for transition reports on Form 10–Q 45 days after the later of these two events.

(3) Codification of Staff Rule Interpretations of the Quarterly Reporting Requirements When an Issuer Changes Its Fiscal Year End

Consistent with staff practice, issuers will continue to have the option of filing quarterly reports for the transition period on the basis of either the old or new fiscal year. Also, consistent with staff rule interpretations, issuers, in most cases, will continue to be required to file a quarterly report for any quarter of the old fiscal year that ended before the date of the issuer's determination to change its year end. The amendments specify that the requirement to file quarterly reports on the new basis begins with the first quarter in the new fiscal year that ends after the issuer determined to change its year end.

(4) Clarification of Transition Reporting for Successor Issuers

Amendments to Rules 13a–10 and 15d–10 require transition reporting for all successor issuers, but only where they have a different fiscal year end from that of the predecessor. Successor issuers are required to file a transition report concerning the predecessor for any transition period between the close of the fiscal year covered by the last annual report of the predecessor and the date of succession. For a transition period of six or more months, the successor issuer must file the transition report on Form 10–K, including audited financial statements. For a transition period of less than six months, the successor issuer may opt instead to file the transition report on Form 10–Q, including unaudited financial statements. Just as for changes in fiscal year, where the transition period is one month or less, the successor issuer need not file a separate transition report, provided that the required information for the transition period is contained in a subsequent quarterly report, or if the next report is an annual report, in that annual report.

(5) Separate Transition Reporting Rules for Foreign Private Issuers

Separate provisions require a foreign private issuer with a transition period longer than six months to file a Form 20–F containing responses to all items required when the Form is used as an annual report, and including audited financial statements. For a transition period of six or fewer months, a foreign private issuer may opt instead to file a transition report on Form 20–F that includes responses to only a limited number of specified items and unaudited financial statements. Where the transition period is one month or less, a foreign private issuer is not required to file a separate transition report if the first annual report for the newly adopted fiscal year covers the transition period as well as the fiscal year.

(6) Reporting a Change in Fiscal Year on Form 8–K

New Item 6 of Form 8–K requires an issuer to report its new fiscal year end, the Form (10–K or 10–Q) on which the report covering the transition period will be filed, and the date of the determination to change its fiscal year end. The Form 8–K must be filed within 15 days after that date.

(7) Specific Provisions Regarding Filing Fees and Extensions of Time

No filing fee is required for transition reports. Amended Rule 12b–25 and amended Form 12b–25 add transition reports to those reports for which an extension of time for filing is available.

(8) Separate Rule for Transition Reporting of Investment Companies

New Investment Company Act Rule 30b1–3 provides transition reporting requirements specifically tailored to the semi-annual and annual reporting obligations of investment companies. The new Rule codifies the staff practice of requiring investment companies that change their fiscal year end to file a report on Form N–SAR within 60 days of either the close of the resulting transition period or the date of the determination to change the fiscal year end, whichever is later.

(9) Codification of Staff Practice of Permitting Reliance on Nine Months Statements

New accounting Rule 3–06 and a parallel note to Rule 14a–3(b)(1) [22] of the proxy rules codify the staff practice of accepting, under specified circumstances such as a change in fiscal year, financial statements covering a 9 to 12 month period in satisfaction of a requirement for financial statements for either one year or one year of a multiple year period.

(10) Codification of Staff Practice on Age of Audited Financial Statements in A *First-Time Registrant's Registration Statement*

To assure that timely financial statements for first-time registrants are available, amended accounting Rule 3–12 codifies the staff practice of requiring that the most recent audited financial statements in a registration statement under the Securities Act of 1933 ("Securities Act") [23] or on Form 10 [24] filed by a non-reporting company be no more than 1 year and 45 days old.

(11) Period to be Covered by First Report on Form 10–Q for First-Time Registrants

To avoid reporting gaps, amended Rules 13a–13 and 15d–13 governing quarterly reporting require a new registrant to file its first report on Form 10–Q for the first fiscal quarter following the most recent fiscal year or full quarter for which financial statements were included in its registration statement.

Examples illustrating the application of the amendments to typical reporting situations are contained in the Appendix in Part V of this Release. The examples have been modified where appropriate to reflect changes from the proposals.

II. Discussion

*A. Reporting Fiscal Year Changes*

1. Transition Reporting on Forms 10–Q and 10–K

The Commission is adopting amendments to Rules 13a–10 and 15d–10 [45] requiring an issuer to file separate transition reports for all transition periods, except those of one month or less. Under the prior rules, a separate transition report was not required for a transition period shorter than three months. In the Proposing Release, the Commission solicited comment on a proposed requirement of separate transition reports for all transition periods, including transition periods shorter than three months. Three commentators criticized the proposed requirement as not useful, necessary or justified by the costs, and recommended that information on such shorter transition periods be included in the issuer's next report on Form 10–Q.

The Commission has decided not to require a separate transition report for transition periods of one month or less. Where the transition period is one month or less, the Commission believes that the cost associated with filing a separate report for such a short time span outweigh the limited benefit of such reports to investors.[46] The amendments instead permit information about a transition period of one month or less to be included in the issuer's report on Form 10–Q for the first quarter of the newly adopted fiscal year that ends after the date on which the determination was made to change the fiscal year.[47] If the issuer's next report is the first annual report for the newly adopted fiscal year, the transition period may be covered in that annual report.

Separate transition reports are required for all transition periods longer than one month. As the transition period becomes longer, the investor's interest in the prompt disclosure of financial information about the transition period increases. The Commission believes that requiring transition reports for all transition periods longer than one month strikes the appropriate balance between the investment community's need for disclosure and the desire of issuers to minimize the costs of compliance.

Under the amendments, as under the prior rules, use of Form 10–K will continue to be required for transition reports for transition periods of six or more months.[48] For transition periods shorter than six months, amended Rules 13a–10 and 15d–10 give issuers the option to file transition reports on either Form 10–Q, including unaudited financial statements, or Form 10–K, including audited financial statements.[49] All information requested in the textual items of the reporting forms, as well as the required financial information, must be provided. Technical changes are being adopted, as proposed, to make the descriptions and cover sheets of and General Instructions to Forms 10–K and 10–Q consistent with the amendments.

In the Proposing Release, comment was invited on the six month cutoff. The three commentators addressing the six month cutoff favored it.[50] While the proposals would have required use of Form 10–Q for transition periods shorter than six months, two commentators favored affording issuers an option to file on either Form 10–Q or Form 10–K for such shorter transition periods so that issuers could furnish audited financial statements in the first instance. The Commission has adopted this suggested option, enabling issuers that opt to use Form 10–K to avoid the possibility of later revisions of previously published unaudited financial statements for the transition period.

Because the amendments afford issuers the option to use Form 10–K or 10–Q, the Commission has added a requirement, not contained in the proposals, that an issuer state in its Form 8–K reporting the change in fiscal year the Form (Form 10–Q or 10–K) on which the report covering the transition period will be filed.[51] This requirement will enable investors and the Commission staff to determine when information on the transition period will be available.

2. Filing Requirements for Transition Reports

To parallel the current filing requirements for Form 10–K, the amendments change the time for filing a transition report on Form 10–K from 120 to 90 days after the close of the transition period or the date of the determination to change the fiscal year, whichever is later.[52] The 90 day filing period applies to all transition reports filed on Form 10–K, regardless of the length of the transition period, and should give issuers sufficient time to have audited financial statements prepared covering transition periods of any length. To parallel the current filing requirements for Form 10–Q, an issuer that chooses to file a separate transition report on Form 10–Q must file that report within 45 days after the later of the close of the transition period or the date of the determination to change the fiscal year.[53]

3. Requirements for Changing a Fiscal Year After the Year End

Amended Rules 13a–10(a) and 15d–10(a) codify current staff rule interpretations by requiring an issuer to file an annual report for any fiscal year that ended before the date on which the issuer determined to change its fiscal year end. An issuer is required to report this date in the Form 8–K reporting its change in fiscal year.[54] In most cases, the date would be evidenced by minutes of the issuer's board of directors or an authorized committee thereof.[55] The amendments also codify the staff interpretive position that a transition report can be used only for periods of less than 12 months. Transition reports are not permitted for periods longer than 12 months because of the difficulties of constructing data for comparable periods that would be useful in understanding trends in a business.

[45] Rule 13A–10 applies to issuers with securities registered pursuant to section 12 of the Exchange Act (15 U.S.C. 78*l*). Rule 15d–10 applies to issuers with securities registered under the Securities Act and filing Exchange Act reports pursuant to section 15(d) of the Exchange Act (15 U.S.C. 80o(d)).

[46] A change from a fiscal year ending as of the last day of the month to a 52–53 week fiscal year commencing within seven days of the month end (or from a 52–53 week to a month end) is not deemed a change in fiscal year for purposes of reporting subject to Rule 13a–10 or 15d–10 if the new fiscal year commences with the end of the old fiscal year. In such cases, a transition report would not be required. Either the old or new fiscal year could, therefore, be as short as 360 days, or as long as 371 days (372 is a leap year).

[47] *See* Part II.A.4., *infra*, amended Rules 13a–10(d) and 15d–10(d), and Appendix Examples 1.a. & 1.e.

[48] *See* amended Rules 13a–10(b) and 15d–10(b) and Appendix Examples 1.d., 1.g., & 1.h.

[49] *See* amended Rules 13a–10(c) and 15d–10(c) and Appendix Examples 1.b., 1.c., & 1.f.

[50] With a six month cutoff, the amendments allow 17 months between filing audited financial statements in the case where an issuer changes its fiscal year end with a resulting transition period of five months. For example, an issuer with a December 31 year end that changes its fiscal year in 1990 to May 31, 1990 will be permitted to file a Form 10–Q, including unaudited financial statements, covering the transition period from January 1, 1990 through May 31, 1990. The issuer will not be required to file audited financial statements until August 29, 1991, the due date for its next annual report covering the newly adopted fiscal year from June 1, 1990 through May 31, 1991. Compliance with the requirements for financial statements under the transition reporting rules will be deemed to satisfy the updating obligations under section 10(a)(3) of the Securities Act [15 U.S.C. 77j(a)(3)].

[51] For a discussion of new Item 8 of Form 8–K, *see* II.A.3., *infra*.

[52] *See* amended Rules 13a–10(b) and 15d–10(b).

[53] *See* amended Rules 13a–10(c) and 15d–10(c).

[54] *See* discussion of new Item 8 of Form 8–K at II.A.3., *infra*.

[55] Other evidence of the date could include a contemporaneous public announcement or press release.

4. Financial Reporting Requirements for Transition Periods

Under the amendments, financial statements in transition reports on Form 10–K must be audited. In contrast, unaudited financial statements are permitted in transition reports on Form 10–Q.

Under the amendments, a transition report on Form 10–K must include either financial statements, which may be unaudited, for the comparable period of the prior year, or a footnote, which may be unaudited, giving specified information for the comparable period of the prior year.[56] The prior year footnote information must state, at a minimum, revenues, gross profits, income taxes, income or loss from continuing operations before extraordinary items and cumulative effect of a change in accounting principles, and net income or loss. The effects of any discontinued operations and/or extraordinary items as classified under the provisions of generally accepted accounting principles also must be shown, if applicable. Per share data based upon such income or loss and net income or loss is required to be presented in conformity with applicable accounting standards.[57]

One commentator recommended that the amendments address whether the financial statements or footnote information for the comparable period of the prior year must be included in subsequent filings. The amendments as adopted have been changed to specify that, where called for by the time span covered, subsequent filings must include such statements or information.

Consistent with existing requirements for Form 10–Q, a transition report on Form 10–Q also is required to include financial information about the comparable period of the prior year.[58] As suggested by one commentator, the amendments as adopted state that schedules need not be filed in transition reports on Form 10–Q.[59] When an issuer files a transition report on Form 10–Q, separate audited statements of income and cash flows covering the transition period are required to be filed as part of the first annual report for the newly adopted fiscal year.[60] The annual report also must contain a separate audited balance sheet for a transition period of less than six months, if an audited balance sheet as of the end of the prior fiscal year is not filed. Further, the amendments specify that notes to the financial statements for the transition period included in the annual report may be integrated with the notes for the full fiscal period.

As discussed above, pursuant to amended Rule 13a–10(d) or 15d–10(d), in specified circumstances, an issuer may include information about a transition period of one month or less in its first quarterly report on Form 10–Q for the newly adopted fiscal year after the date of determination to change its year end, rather than in a separate transition report. If this is done, the financial statements required by Part I, which may be unaudited, must be furnished separately for the transition period as part of the Form 10–Q.[61] In addition, the issuer must file with the first annual report of the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period. If the issuer's next report is a Form 10–K rather than a Form 10–Q, all of the required information for the transition period must be included in the Form 10–K.

Commentators asked for clarification of the application of the requirements of Item 303, "Management's Discussion and Analysis of Financial Condition and Results of Operations," [62] of Regulation S–K [63] to transition periods. Consistent with new Rule 3–06 of Regulation S–X, as discussed below,[64] for a transition period of nine or more months, the information for full fiscal years set forth in Item 303(a) [65] will be required. For transition periods shorter than nine months, the information for interim periods set forth in Item 303(b) [66] will be required.

Similarly, when responding to Item 301 of Regulation S–K, "Selected Financial Data," [67] a transition period of nine or more months will be deemed to meet the requirement for one year of selected financial data if the data for all other periods covers the full time span required to be reported. Transition periods of less than nine months may be shown in the table of selected financial data for the last five fiscal years of the issuer (or for the life of the issuer if less) or may be shown in a footnote. The table of selected financial data should report on all periods within the time span for which information is required to be furnished, including any transition periods.

5. Quarterly Reporting When an Issuer Changes Its Fiscal Year

The amendments to Rules 13a–10 and 15d–10 are intended to clarify the requirements for filing quarterly reports in change of fiscal year circumstances.[68] The amendments codify the current staff practice of requiring issuers to file quarterly reports during the transition period. Under the amendments, companies continue to have the option of filing such quarterly reports based on the quarters of either the old or newly adopted fiscal year.[69] Under either option, an issuer still is required to file a quarterly report for any quarter of the old fiscal year that ended before the date on which the issuer determined to change its fiscal year end, except where the last day of the quarter also is the last day of the transition period.[70]

[56] *See* amended Rules 13a–10(b) and 15d–10(b).

[57] The prior year footnote information tracks Rule 1–02(aa)] of Regulation S–X [17 CFR 210.1–02(aa), except that disclosure of income taxes is required under the amendments because such information is pertinent to understanding the fluctuations in earnings and earnings trends.

[58] *See* II.A.5., "Quarterly Reporting When an Issuer Changes Its Fiscal Year," *infra*, for a discussion of the new Note to paragraphs (c) and (e) of Rules 13a–10 and 15d–10 that addresses difficulties in providing comparable period financial information.

[59] However, schedules for such transition periods are required to be filed in subsequent annual reports on Form 10–K pursuant to Rules 5–04 (17 CFR 210.5–04), 7–05 (17 CFR 210.7–05), and 9–07 (17 CFR 210.9–07) of Regulation S–X where the income statements covering the transition period are required to be audited.

[60] *See* amended Rules 13a–10(c) and 15d–10(c).

[61] The information covering the transition period required by Part II and Item 2 of Part I, "Management's Discussion and Analysis of Financial Condition and Results of Operations," may be combined with the information regarding the quarter.

[62] 17 CFR 229.303.

[63] 17 CFR 229.10–.802.

[64] *See* "Amendments to the Accounting and Proxy Rules to Permit Reliance on Nine Month Statements," Part II.B.1., *infra*.

[65] 17 CFR 229.303(a).

[66] 17 CFR 229.303(b).

[67] 17 CFR 229.301.

[68] *See* amended Rules 13a–10(e) and 15d–10(e).

[69] *See* amended Rules 13a–10(e)(2) and 15d–10(e)(2). Thus, an issuer with a December 31 year end that decides on February 1, 1990 to change its year end to October 31, 1990 has the option of filing quarterly reports either for the quarters of the old fiscal year ending March 31, June 30, and September 30, 1990 or for the periods coinciding with quarters of the new fiscal year ending January 31, April 30, and July 31, 1990. If the same issuer had decided on June 1, 1990 to change its year end to October 31, 1990, the issuer already would have filed a quarterly report for the quarter ending March 31, 1990 but still would have the option to file the quarterly reports either for the quarters of the old fiscal year ending June 30 and September 30, 1990 or for the period coinciding with the quarter of the new fiscal year ending July 31, 1990.

[70] *See* amended Rules 13a–10(e)(1) and 15d–10(e)(1). For example, an issuer with a December 31 year end that decides on October 15, 1990 to change its year end to November 30, 1990 is required to file by November 14, 1990 a quarterly report on Form 10–Q for the quarter ending September 30, 1990 of the old fiscal year. If the same issuer decided on October 15, 1990 to change its year end to September 30, 1990, the issuer is not required to file a quarterly report on Form 10–Q for the quarterly period ending September 30, 1990 of the old fiscal year, because the last day of the quarter would be the same as the last day of the transition period. In

Continued

VOL 54 ISS 47 MR 13 1989 UMI

The amendments also specify the time by which an issuer must begin filing quarterly reports on the basis of the newly adopted fiscal year. An issuer is required to begin filing quarterly reports on the new basis with the quarterly report for the first quarter of the new fiscal year ending after the issuer determined to change its fiscal year end.[51] With respect to quarterly periods ending before the issuer's determination to change its year end, no reporting on the new basis is required.

The switch in quarterly reporting from the old to the new fiscal year may result in a period of less than three months that is not covered by a separate report on Form 10–Q. The Proposing Release stated that such a period would be covered on a cumulative basis in the next report on either Form 10–Q, Form 10–K or in a transition report, depending on when the switch occurred. One commentator noted that, under the proposals, the disclosure of some non-financial information about such a period might not be required in the next Form 10–Q and thus might be delayed, and further that it might be difficult for investors to derive financial information about such a period from cumulative financial information disclosed in the next Form 10–Q or other later reports.

The amendments as adopted have been modified to specify that, unless such a period of less than three months is or will be covered in the issuer's transition report or in the first annual report on Form 10–K for the newly adopted fiscal year, information (*e.g.*, legal proceedings, changes in securities) about such period must be included in the issuer's initial report on Form 10–Q for the newly adopted fiscal year.[52] Separate financial statements covering such period, which may be unaudited, must be furnished therewith.[53] These modifications do not require any additional reports, only that the financial information also be set out separately, and not just cumulatively.

The amendments also specify when recasting of prior year quarterly financial information is not required for an issuer that changes to a new fiscal year end that does not coincide with the end of a quarter of the previous fiscal year. A new Note to paragraphs (c) and (e) of Rules 13a–10 and 15d–10 permits an issuer to file quarterly reports for the quarters of the new fiscal year without recasting data for the prior fiscal year, where recasting either is not practicable or cannot be cost-justified, if the issuer furnishes (1) financial statements for the quarters of the preceding fiscal year most nearly comparable to the quarters in the newly adopted fiscal year; (2) an adequate discussion of seasonal and other factors that could affect the comparability of information or trends reflected; (3) an assessment of the comparability of the data; and (4) a representation as to the reason the recasting has not been undertaken. The Note also applies to prior year information in transition reports on Form 10–Q.[54]

6. Transition Reporting for Successor Issuers

Amended Rules 13a–10(f) and 15d–10(f) specify transition reporting requirements for successor issuers with a different fiscal year end from that of the predecessor. No transition report is required where the successor issuer and the predecessor have the same fiscal year end. Under such circumstances, the successor issuer continues to report on the same reporting schedule as that of the predecessor.[55]

While former Rule 13a–10 specified reporting requirements only for successor issuers with securities registered on Form 8–B,[56] the amendments cover all successor issuers.[57] Although former Rule 15d–10 had no provision covering transition reporting for successor issuers, the amendments add such a provision to cover companies with reporting obligations pursuant to section 15(d).[58]

Under the amendments, the transition reporting requirements for successor issuers correspond generally to the transition reporting rules applicable when other issuers change their fiscal year. The principal difference is the period to be covered in the transition report. The period to be reported on by a successor issuer ends on the date of the succession, rather than on the day prior to the beginning of the newly adopted year, in order to reflect the predecessor's operations separately from those of the successor.[59]

For a transition period of six or more months, the amendments require a successor issuer to file a transition report on Form 10–K, including audited financial statements, within 90 days after the date of the succession.[60] For a transition period shorter than six months, the successor issuer has the option to file the transition report on either Form 10–K, including audited financial statements, within 90 days after the date of the succession, or Form 10–Q, including unaudited financial statements, within 45 days after the date of the succession.[61] If the transition report is filed on Form 10–Q, the next annual report of the successor issuer must include audited statements of income and cash flows for the transition period. For a transition period of one month or less, no separate transition report is required, provided that information on the transition period is included in the successor issuer's report on Form 10–Q for the first quarter that ends after the date of the succession, or if the successor issuer's next report is an annual report, in that annual report.

These amendments, which give an issuer the option to use either Form 10–K or Form 10–Q for transition periods shorter than six months, differ from the proposals, which would have required a successor issuer to file a transition report on Form 10–Q for such shorter transition periods. Like the option afforded other issuers that change their fiscal year, the option is available to successor issuers so that they may furnish audited financial statements covering the transition period in the first instance, and avoid the possibility of revision in a later audit of previously released unaudited financial information about the transition period.[62]

7. Transition Reporting for Foreign Private Issuers

The Commission is adopting separate transition reporting provisions for foreign private issuers. The separate provisions provide specific guidelines for foreign private issuers in change of fiscal year circumstances and are consistent with other separate reporting requirements and separate reporting forms for such issuers. In addition, given the varied reporting requirements and practices in foreign jurisdictions, in appropriate cases, the Commission staff will consider requests to modify the transition reporting requirements for foreign private issuers to take account of varying domicile country reporting requirements and practices.

Under amended Rules 13a–10(g) and 15d–10(g), a foreign private issuer is required to file a Form 20–F to report on all transition periods, except those of one month or less. Where the transition period is longer than six months, such issuer is required to file a transition report on Form 20–F that contains responses to all items required when the form is used as an annual report and includes audited financial statements.[63] For transition periods of six or fewer months, the amendments give a foreign private issuer an option similar to that given domestic issuers. The foreign private issuer may file its transition report on Form 20–F, either with responses to all items required when Form 20–F is used as an annual reporting form and including audited financial statements, or, in the alternative, with responses to a limited number of specified items and including unaudited financial statements.[64] The Commission has determined not to require a foreign private issuer to file a separate transition report for a transition period of one month or less if the first annual report for the newly adopted fiscal year covers the transition period as well as the fiscal year. As with domestic issuers, the costs associated with filing separate transition reports for such limited periods of one month or less are not justified by the minimal benefit to investors.

In the Proposing Release, the Commission proposed the same cutoff for foreign private issuers as domestic issuers. The Commission, however, has determined to adopt for foreign private issuers a different cutoff from that used for domestic issuers. While domestic issuers have the option to file transition reports on Form 10–Q with unaudited financial statements only for transition periods shorter than six months, foreign private issuers have the option of filing an abbreviated Form 20–F with unaudited financial statements for transition periods of six or fewer months. The different cutoff for foreign private issuers is adopted to be consistent with the reporting practices of some foreign private issuers, which develop interim financial statements that cover semi-annual periods pursuant to the laws or practices of their domicile country or rules of exchanges upon which their securities are traded.[65]

Under the amendments, a transition report on Form 20–F with responses to only the selected items and unaudited financial statements is required to be filed within three months after the close of the transition period or the date of the determination to change the fiscal year, whichever is later. A transition report on Form 20–F with responses to all items required when the form is used as an annual report and including audited financial statements must be filed within six months after the later of these two events. This six-month filing period parallels the filing period for annual reports on Form 20–F.

In the Proposing Release, the Commission solicited comment on whether foreign private issuers should be excused from providing unaudited financial statements in transition reports if they are not required to develop such statements under the laws or practices of their domicile country, or any exchange upon which their securities trade. While two commentators agreed with the exception, the Commission is not adopting the exception as part of Rules 13a–10(g) and 15d–10(g). Because the financial reporting practices of foreign private issuers vary, the Commission had determined that requests for such an exception will be considered by the staff in appropriate circumstances, particularly where an issuer can demonstrate that developing such financial data would not be practicable or cost-justified.[66]

8. Reporting Fiscal Year Changes on Form 8–K

The Commission also is adopting amendments to require an issuer to report on a Form 8–K its decision to adopt a new fiscal year in response to a new Item 8. Formal notice of a change in reporting periods should eliminate confusion and misapprehension as to the reasons for issuer's financial reports not being filed and provide an orderly and reliable mechanism for getting news of the change to investors.

Under the amendments, the issuer must report both the date of its determination to change its fiscal year end and the date of its new fiscal year end.[67] In addition, to accommodate the option to file either a Form 10–K or Form 10–Q covering a transition period shorter than six months,[68] the amendments as adopted are modified to require the issuer to state in its Form 8–K the particular Form on which the report covering the transition period will be filed. This information should be available at the time of filing the Form 8–K because of the planning required for an audit.[69] The report on Form 8–K must

---

the event, a transition report on Form 10–K is required to be filed within 90 days after October 15, 1990 to cover the transition period from January 1, 1990 through September 30, 1990.

[51] See amended Rules 13a–10(e)(3) and 15d–10(e)(3). In the first example in footnote 50, a Form 10–Q is required for the first quarter (ending February 28, 1991) of the new fiscal year.

[52] The information covering the transition period required by Part II and Item 2 of Part I, "Management's Discussion and Analysis of Financial Condition and Results of Operations," may be combined with the information regarding the quarter.

[53] See amended Rules 13a–10(e)(4) and 15d–10(e)(4) and Appendix Example 1.e. For example, an issuer with a December 31 year end decides on June 1, 1990 to change its year end to October 31, 1990 and begins filing quarterly reports based on the quarters of the new fiscal year with the quarterly report for the quarter ending July 31, 1990. Under the amendments, the period from April 1 through April 30, 1990 would not be covered by a separate report on Form 10–Q. That period would be required to be covered in the quarterly report filed for the quarter ending July 31, 1990, and separate financial statements covering April 1 through April 30, 1990 would be required to be filed with that quarterly report.

[54] The amendments do not require an issuer that decides to change its year end after having filed quarterly reports based on the old fiscal year to file new Form 10–Qs for those quarters of the new fiscal year already concluded. However, pursuant to Item 302(a)(5) of Regulation S–K [17 CFR 229.302(a)(5)], specified issuers must provide selected financial data for each full quarter of the two most recent fiscal years in their annual reports on Form 10–K. Accordingly, the first annual report on Form 10–K of such an issuer after a fiscal year change would be required to contain historical quarterly information on the basis of the new fiscal year.

[55] See Rules 12g–3 [17 CFR 240.12g–3] and 15d–5 [17 CFR 240.15d–5].

[56] 17 CFR 249.209b. Form 8–B is a registration form principally used for the securities of an issuer that has no registered securities but has succeeded to an issuer with registered securities.

[57] Thus, successions reported on Form 8–K, as well as on Form 8–B, are covered. See Release No. 34–9077 (February 10, 1971) [36 FR 3804]. Rule 12b–2 [17 CFR 240.12b–2] defines succession and, correlatively, successor.

[58] See amended Rule 15d–10(f).

[59] Where the successor issuer and the predecessor have a different fiscal year end and the succession is solely for the purpose of forming a holding company or changing the state of incorporation, the succession will be viewed as any change in fiscal year and not subject to the provisions of amended Rules 13a–10(f) and 15d–10(f).

[60] See amended Rules 13a–10(f) and 15d–10(f) and Appendix Example 2.b.

[61] See amended Rules 13a–10(f) and 15d–10(f) and Appendix Example 2.a.

[62] Other current reporting requirements for successor issuers and the Division's current interpretive positions respecting disclosures by successor issuers are not affected. As noted in the Proposing Release, when there is a change in accounting basis between the successor and predecessor, the quarterly or annual report for the period in which the succession occurs is required to present separately the statements of income and cash flows to reflect the periods prior and subsequent to the succession.

[63] Form 20–F generally is used by foreign private issuers as a registration statement, as well as an annual report. General Instruction G(b) of Form 20–F specifies that an annual report on Form 20–F shall include the information specified in Parts I, III and IV of the Form.

[64] The items, which cover most of the subjects covered in a Form 10–Q, are: Item 3, "Legal Proceedings;" Item 9, "Management's Discussion and Analysis of Financial Condition and Results of Operations;" Item 15, "Defaults Upon Senior Securities;" Item 16, "Changes in Securities and Changes in Security for Registered Securities;" and either Item 17 or 18, "Financial Statements."

[65] *Cf.* Release No. 34–24634 (June 23, 1987) (52 FR 24230) in which the Commission approved proposed rule changes by the American and New York Stock Exchanges permitting the exchanges to waive or modify specified listing standards for foreign securities. The Commission noted that the proposals would permit some foreign companies to report interim earnings on a semi-annual rather than quarterly basis.

[66] See Rule 3–13 of Regulation S–X (17 CFR 210.3–13), which allows the Commission to waive the filing of financial statements upon informal written request of an issuer and where consistent with the protection of investors.

[67] See discussion of the provisions of changing a fiscal year after the end of that particular year at II.A.3., *supra*.

[68] See discussion at II.A.1., "Transition Reporting on Forms 10–Q and 10–K," *supra*.

[69] If the issuer decides later to file the report covering the transition period on a form different from the form specified in its Form 8–K reporting the change in fiscal year, the issuer should file an amended Form 8–K stating the change.

VOL

MR
13
1989
UMI

be filed within 15 days after the date of the issuer's determination to change its fiscal year end.

9. Filing Fees and Extensions of Time

Amendments to Rules 13a–10 and 15d–10 make it explicit that no filing fee is required for a transition report.[70] Amendments to Rule 12b–25, Form 12b–25, and the description of the Form also are being adopted that add transition reports to those reports for which an extension of time for filing is available.[71] Consistent with the extension periods for Forms 10–K and 10–Q, the extension for a transition report on Form 10–K or 20–F is 15 calendar days after the due date and extension for a transition report on Form 10–Q is five calendar days after the due date.

10. Transition Reporting for Investment Companies

Instead of filing annual and quarterly reports on Forms 10–K and 10–Q, registered management investment companies file semi-annual reports on Form N–SAR, while unit investment trusts file only annual reports on Form N–SAR.[72] Therefore, the Commission is (1) exempting registered investment companies from Rules 13a–10 and 15d–10,[73] and (2) adopting a new Rule under the Investment Company Act specifying their transition reporting obligations.[74] The new Rule requires investment companies that change their fiscal year end to file a report on Form N–SAR within 60 days after either the close of the resulting transition period or the date of the determination to change the fiscal year end, whichever is later.[75]

Under the amendments, the transition report filed by a management investment company must cover a period no longer than six months, which is the period ordinarily covered by a report on Form N–SAR.[76] The new Rule does not specify the period the transition report must cover and, in certain circumstances, an investment company has a choice between two periods.[77] Like the amendments to Rules 13a–10 and 15d–10, new rule 30b1–3 specifies that no filing fee is required for a transition report.[78]

*B. Other Financial Reporting Changes*

1. Amendments to the Accounting and Proxy Rules to Permit Reliance on Nine Month Statements

The Commission is adopting new Rule 3–06 of Regulation S–X, which provides that, where the issuer has changed its fiscal year, the filing of financial statements covering a period of nine to 12 months will be deemed to satisfy a requirement for one year of financial statements.[79] The new Rule also provides that, where there is a requirement for filing financial statements for a multiple year period that does not exceed three consecutive years,[80] the filing of financial statements that include one period of nine to 12 months will be deemed to satisfy a filing requirement of one year, if for all other years in the time period financial statements covering the full years are provided.[81] The new Rule applies to financial statements in proxy and information statements, registration statements and Exchange Act reports. A parallel provisions is added to the proxy rules in the form of a new Note 2 to Rule 14a–3(b)(1).[82] The note, which tracks the language of new Rule 3–06,[83] provides that separate audited financial statements covering two years and one period of nine to twelve months fulfill the requirement for statements of income and cash flows for the three most recent fiscal years.[84] Registered investment companies, however, are not covered by the proposed new Rule and Note because they are subject to different reporting requirements.[85]

2. Amendment to Rule 3–12

To assure more timely financial statements of first-time issuers, the Commission is adopting an amendment to Rule 3–12 of Regulation S–X.[86] The amendment, which codifies staff practice, specifies that the registrant's most recent audited financial statements in a registration statement filed under the Securities Act or on Form 10 under the Exchange Act that relates to the securities of a non-reporting issuer may not be more than one year and 45 days old at the date of effectiveness of the registration statement.[87] Prior to the amendments, by changing its fiscal year end, an issuer that was not a reporting company before filing a registration statement could have attempted to file and have declared effective a registration statement with financial statements up to 18 and one-half months old.[88]

The amendment applies only to companies not yet in the Exchange Act reporting system because their financial and business history is not available to investors and the marketplace. As noted in the Proposing Release, the one year and 45 day cutoff for the age of non-reporting company financial statements is consistent with those requirements of Rule 3–01 of Regulation S–X that limit the age of the financial statements in a registration statement of a company that previously has not been reporting pursuant to the requirements of the Exchange Act.[89]

C. Quarterly Reporting: First Report to be Filed on Form 10–Q

Finally, the Commission is adopting amendments to Rules 13a–13 and 15d–13 to eliminate any gap in the reporting period between the financial information included in a registration statement and the first report on Form 10–Q.[90] Under the amendments, the requirement to file quarterly reports commences with the first fiscal quarter following the most recent fiscal year or full quarter for which financial statements were included in the registration statement.[91] A first-time registrant is required to file its first Form 10–Q the later of 45 days after the effectiveness of the registration statement, or the date on which such report would have been required to be filed if the issuer had been a reporting company as of its last fiscal quarter. Prior to the amendments, an issuer's first report on Form 10–Q was required to be filed commencing with the first quarter ending after the effective date of its first registration statement.[92]

As is currently the case, first-time registrants generally will continue to be required to commence filing quarterly reports at the time specified, regardless of whether they have operations during this period.[93]

**III. Cost-Benefit Analysis**

In the Proposing Release, the Commission requested commentators to provide views and data as to the costs and benefits associated with the proposed amendments to Exchange Act Rules 12b–25, 13a–10, 14a–3, and 15d–10, Forms 8–K, 10–K, 10–Q, 20–F, and 12b–25, proposed new Investment Company Act Rule 30b1–3, the proposed amendments to Investment Company Act Rules 8b–16 and 30b1–2 and Form N–SAR, proposed new Rule 3–06 and the proposed amendment to Rule 3–12 of Regulation S–X.

Four commentators expressed views specifically on the costs and benefits associated with the reporting requirements for transition periods shorter than three months. One commentator believed that the requirement of separate transition reports for such shorter transition periods would not be cost beneficial as data concerning such periods would not be accompanied by similar disclosure for comparable historical periods. Another commentator that found the requirement unnecessary stated that the additional costs of such reports would not be substantial, but that the benefits would decrease as the transition period becomes shorter. As noted above in Part II.A.1., the amendments as adopted do not require a separate transition report for transition periods of one month or less.

Two other commentators expressed concerns that the costs of presenting audited financial statements covering shorter transition periods of less than three months in the first annual report of the newly adopted fiscal year would outweigh the benefits because of the short period covered and because such audited financial statements would be over one year old when presented. The amendments have not modified substantially the former rules in this regard.

The Commission also requested views and data as to the costs and benefits associated with amending Rules 13a–13 and 15d–13 to require a new registrant to file its first report on Form 10–Q for the first quarterly period other than the fourth quarter ending after the annual or quarterly period covered by the most recent financial statements included in its effective registration statement. The Commission noted that this revision should benefit investors by providing more timely and complete financial information about a first-time registrant for the period following the latest financial information in an effective registration statement. No comments were received on the costs and benefits associated with these amendments.

**IV. Final Regulatory Flexibility Analysis**

A Final Regulatory Flexibility Analysis in accordance with 5 U.S.C. 604 has been prepared concerning the proposed amendments to Exchange Act Rules 12b–25, 13a–10, 13a–13, 14a–3, 15d–10, and 15d–13, Forms 8–K, 10–K, 10–Q, 20–F, and 12b–25, proposed new Investment Company Act Rule 30b1–3 and the proposed amendments to Investment Company Act Rules 8b–16 and 30b1–2 and Form N–SAR, proposed new Rule 3–06 and the proposed amendment to Rule 3–12 of Regulation S–X. Members of the public who wish to obtain a copy of the Final Regulatory Flexibility Analysis should contact Barbara J. Green, (202) 272–2589, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. A summary of the corresponding Initial Regulatory Flexibility Analysis appears at 53 FR 21670 (Release No. 33–6778).

---

[70] *See* amended Rules 13a–10(f) and 15d–10(f).

[71] *See* amended Rule 12b–25(a) and (b)(2)(ii).

[72] *See* Rules 30a–1 and 30b1–1 under the Investment Company Act (17 CFR 270.30a–1 and 270.30b1–1). Form N–SAR is filed under both the Exchange Act and the Investment Company Act.

[73] *See* amended Rules 13a–10(h) and 15d–10(h).

[74] *See* new Investment Company Act Rule 30b1–3. Investment companies electing to be regulated as business development companies must comply with the Exchange Act periodic reporting requirements applicable to entities other than investment companies, including the filing of Forms 10–K and 10–Q. Accordingly, such companies are subject to the provisions of Exchange Act Rules 13a–10 and 15d–10 rather than new Investment Company Act Rule 30b1–3.

[75] Investment companies filing Form N–SAR must do so within 60 days of the end of the reporting period. *See* Rule 30b1–1.

[76] The rule does not provide for a transition report for unit investment trusts which, regardless of their fiscal year ends, are required to file Form N–SAR for a 12-month period ending December 31.

[77] A management investment company making a determination on January 15 to change its fiscal year end from December 31 to February 28 cannot file a report for the period from July 1 to February 28 because the period would be longer than six months. Rather, the investment company must file a report, no later than 60 days after January 15, either (1) covering the transition period beginning July 1 and ending August 31 or (2) covering the period from July 1 to December 31, and then file, no later than 60 days after February 28, a report for the transition period from January 1 to February 28.

[78] Form N–SAR is amended to provide an instruction for transition reporting. In addition, the Commission is adopting technical amendments to Rules 8b–16 and 30b1–2 and Form N–SAR under the Investment Company Act to correct erroneous references to Rule 30b1–5. The references are changed to Rule 30b1–1 which, until 1988, was designated as Rule 30b1–2. *See* Release No. 33–6621 (July 1, 1985) [50 FR 27960].

[79] See Rule 3–03(b) of Regulation S–X [17 CFR 210.3–03(b)] and Rule 14a–3(b)(1) of the proxy rules. Rule 3–03(b) is referred to in Form S–K under the Exchange Act and applicable to the Securities Act registration statement forms (except Form S–18 [17 CFR 239.28] and those forms filed by investment companies).

[80] See Rules 3–02(a) [17 CFR 210.3–02(a)] and 3–03(b) of Regulation S–X, Rule 14a–3(b)(1) of the proxy rules, and Item 21(d) of Form S–18. The Securities Act registration statement forms (except Form S–18) and Exchange Act Forms S–K, 10, and 10–K all require financial statements prepared in accordance with Regulation S–X.

[81] Where there has been a significant acquisition by the issuer, new Rule 3–06 also permits the filing of financial statements of the company being acquired covering a period of nine to 12 months in satisfaction of a requirement for one year of financial statements, if the required financial statements for all other periods cover the full time span. In addition, under the amendments, the filing of financial statements covering a period of nine to 12 months satisfies a requirement for one year of financial statements where the Commission so permits pursuant to Rule 3–13 of Regulation S–X.

[82] This provision also applies to information statements. *See* Rule 14c–3(a)(1) [17 CFR 240.14c–3(a)(1)], which requires that the information specified in Rules 14a–3(b)(1) through (b)(11) [17 CFR 240.14a–3(b)(1)—(11)] also be given to shareholders who receive information statements.

[83] The wording of the amendment has been changed from the proposals to parallel new Rule 3–06 more closely.

[84] Three commentators raised the issue of restatement of prior period financial statements. As in the past, the staff will continue to accept in annual reports on Form 10–K and annual reports to shareholders the restatement of prior period financial statements to conform with an issuer's newly adopted fiscal year, although such restatement will not be required.

[85] See Rule 3–14 of Regulation S–X [17 CFR 210.3–14].

[86] *See* new paragraph (d); former paragraphs (d) and (e) have been redesignated.

[87] The wording of the amendment has been modified to clarify that the one year and 45 day rule does not apply to financial statements other than those of the registrant.

[88] Rule 3–01(b) of Regulation S–X [17 CFR 210.3–01(b)] has permitted specified registrants to use unaudited financial statements that are at least as current as the third fiscal quarter of the most recently completed fiscal year if their registration statement is filed within 45 days after the end of the most recent fiscal year. Thus, under the former rules, a first-time registrant under the Securities Act with a December 31, 1986 year end that changed its year end in 1987 to May 31, 1987 could have filed unaudited financial statements covering the transition period from January 1, 1987 through May 31, 1987 and unaudited financial statements covering the subsequent nine months ending February 29, 1988 in a registration statement and attempted to have that registration statement declared effective on July 14, 1988. The most recently audited financial statements in the registration statement would have covered the year ending December 31, 1986.

[89] Rule 3–01(b) provides that the audited financial statements of the prior fiscal year may not be used more than 45 days after the end of the current fiscal year, unless the specified circumstances in Rule 3–01(c) [17 CFR 210.3–01(c)] exist, which include the requirement that the registrant be filing reports pursuant to Section 13 (15 U.S.C. 78m) or 15(d). In addition, Rule 3–01(a) [17 CFR 210.3–01(a)] requires a registrant that has been in existence for less than one fiscal year to file audited financial statements within 135 days of the date of filing the registration statement.

[90] *Cf.* Rule 15d–2 [17 CFR 240.15d–2], which eliminates a similar reporting gap by requiring an issuer whose registration statement becomes effective after a fiscal year end without audited financial statements as of such fiscal year end in the prospectus to file a special report within 90 days of effectiveness on the form appropriate for annual reports of the registrant. The special report must include audited financial statements for the last full fiscal year.

[91] *See* amended Rules 13a–13(a) and 15d–13(a).

[92] For example, under the amendments, a registrant with a December 31 year end whose registration statement became effective on April 14, 1990 including financial statements as of December 31 of the prior year, is required to file a quarterly report for the quarter ending March 31, 1990. The quarterly report is not due until 45 days after April 14, 1990, the date of effectiveness. Under the former rules, the same registrant would not have been required to file a quarterly report for the quarter ending on March 31, 1990. The former rules only would have required its first quarterly report for the quarter ending June 30, 1990.

[93] Generally, the staff has taken the position that registrants under the Securities Act whose registration statements are declared effective shortly before the end of their fiscal year, thereby creating Exchange Act reporting requirements pursuant to section 15(d), are required to file annual and quarterly reports even where the registrant has not commenced operations; for example, where the registrant is in the process of a best efforts offering and has not yet met the minimum, or where an acquisition by the registrant has not yet been completed pending regulatory approval.

*1. Examples of Reporting Under the Amendments for a Domestic Issuer with a Dec. 31 Year End that Files Periodic Reports Pursuant to Section 13 or 15(d) of the Exchange Act*

a. Decision made early in year to change year end to date already past with resulting transition period of one month or less:

On March 1, 1990 the issuer decides to change year end to Jan. 31, 1990
—15 days after March 1, 1990 files an 8–K
—90 days after Dec. 31, 1989 files a 10–K covering full year from Jan. 1, 1989 through Dec. 31, 1989
—At the option of the issuer, it may file a separate transition report on Form 10–Q 45 days after March 1, 1990 covering the transition period from Jan. 1, 1990 through Jan. 31, 1990
—At the option of the issuer, it may file a separate transition report on Form 10–K 90 days after March 1, 1990 covering the transition period from Jan. 1, 1990 through Jan. 31, 1990
—45 days after April 30, 1990 files a 10–Q covering the first quarter ending April 30, 1990 of the new fiscal year; if the issuer has not opted to file a separate transition report on either Form 10–Q or 10–K, the 10–Q for the quarter ending April 30, 1990 must cover the transition period from Jan. 1, 1990 through Jan. 31, 1990 and include separate financial statements, which may be unaudited, for the transition period from Jan. 1, 1990 through Jan. 31, 1990
—45 days after July 31, 1990 and Oct. 31, 1990 files 10–Qs covering the quarters ending July 31, 1990 and Oct. 31, 1990 of the new fiscal year, respectively
—90 days after Jan. 31, 1991 files a 10–K covering the full year from Feb. 1, 1990 through Jan. 31, 1991, with regular timing of quarterly and annual reporting continuing thereafter; if the issuer filed a separate transition report on Form 10–Q or the transition period information was included in 10–Q for the quarter ending April 30, 1990, the 10–K must include separate audited financial statements covering the transition period from Jan. 1, 1990 through Jan. 31, 1990

b. Decision made early in year to change year end to date already past with resulting transition period shorter than six months but longer than one month:

On March 1, 1990 the issuer decides to change year end to Feb. 28, 1990
—15 days after March 1, 1990 files an 8–K
—90 days after Dec. 31, 1989 files a 10–K covering full year from Jan. 1, 1989 through Dec. 31, 1989
—Either 45 days after March 1, 1990 files a transition report on Form 10–Q or 90 days after March 1, 1990 files a transition report on Form 10–K covering the transition period from Jan. 1, 1990 through Feb. 28, 1990
—45 days after May 31, 1990 files a 10–Q covering the first quarter ending May 31, 1990 of the new fiscal year, with regular timing of quarterly and annual reporting continuing thereafter; if the transition report was filed on Form 10–Q, the 10–K covering the full year from March 1, 1990 through Feb. 28, 1991 must include separate audited financial statements covering the transition period from Jan. 1, 1990 through Feb. 28, 1990

c. Decision made early in year to change year end to future date with resulting transition period shorter than six months but longer than one month:

On Feb. 1, 1990 the issuer decides to change year end to May 31, 1990
—15 days after Feb. 1, 1990 files an 8–K
—90 days after Dec. 31, 1989 files a 10–K covering full year from Jan. 1, 1989 through Dec. 31, 1989
—Either 45 days after Feb. 28, 1990 files a 10–Q covering the period ending Feb. 28, 1990 coinciding with a quarter of the new fiscal year or 45 days after March 31, 1990 files a 10–Q covering the quarter ending March 31, 1990 of the old fiscal year
—Either 45 days after May 31, 1990 files a transition report on Form 10–Q or 90 days after May 31, 1990 files a transition report on Form 10–K covering the transition period from Jan. 1, 1990 through May 31, 1990
—45 days after Aug. 31, 1990 files a 10–Q covering the first quarter ending Aug. 31, 1990 of the new fiscal year, with regular timing of quarterly and annual reporting continuing thereafter; if the transition report was filed on Form 10–Q, the 10–K covering the full year from June 1, 1990 through May 31, 1991 would include separate audited financial statements covering the transition period from Jan. 1, 1990 through May 31, 1990

d. Decision made early in year to change year end to future date with resulting transition period six months or longer:

On Feb. 1, 1990 the issuer decides to change year end to Sept. 30, 1990
—15 days after Feb. 1, 1990 files an 8–K
—90 days after Dec. 31, 1989 files a 10–K covering full year from Jan. 1, 1989 through Dec. 31, 1989
—45 days after March 31, 1990 and June 30, 1990 files 10–Qs covering the quarters ending March 31, 1990 and June 30, 1990, respectively
—90 days after Sept. 30, 1990 files a transition report on Form 10–K covering the transition period from Jan. 1, 1990 through Sept. 30, 1990
—45 days after Dec. 31, 1990 files a 10–Q covering the first quarter ending Dec. 31, 1990 of the new fiscal year, with regular timing of quarterly and annual reporting continuing thereafter

e. Decision made late in year to change year end to date already past with resulting transition period of one month or less:

On Sept. 1, 1990 the issuer decides to change year end to Jan. 31, 1990
—15 days after Sept. 1, 1990 files an 8–K
—At the option of the issuer, it may file a separate transition report on Form 10–Q 45 days after Sept. 1, 1990 covering the transition period from Jan. 1, 1990 through Jan. 31, 1990
—At the option of the issuer, it may file a separate transition report on Form 10–K 90 days after Sept. 1, 1990 covering the transition period from Jan. 1, 1990 through Jan. 31, 1990
—45 days after Oct. 31, 1990 files a 10–Q covering the quarter ending Oct. 31, 1990 of the new fiscal year; if the issuer has not opted to file a separate transition report on either Form 10–Q or 10–K, the 10–Q for the quarter ending Oct. 31, 1990 must cover the transition period from Jan. 1, 1990 through Jan. 31, 1990 and include separate financial statements, which may be unaudited, covering the transition period from Jan. 1, 1990 through Jan. 31, 1990; the 10–Q for the quarter ending Oct. 31, 1990 also must cover and include separate financial statements for the period from July 1, 1990 through July 31, 1990
—90 days after Jan. 31, 1991 files a 10–K covering the full year from Feb. 1, 1990 through Jan. 31, 1991, with regular timing of quarterly and annual reporting continuing thereafter; if the issuer filed a separate transition report on Form 10–Q or the transition period information was included in the 10–Q for the quarter ending Oct. 31, 1990, the 10–K must include audited financial statements covering the transition period from Jan. 1, 1990 through Jan. 31, 1990

f. Decision made late in year to change year end to date already past with resulting transition period shorter than six months but longer than one month:

On Nov. 1, 1990 the issuer decides to change year end to Feb. 28, 1990
—45 days after Sept. 30, 1990 files an 10–Q covering the quarter ending Sept. 30, 1990 of the old fiscal year
—15 days after Nov. 1, 1990 files an 8–K
—Either 45 days after Nov. 1, 1990 files a transition report on Form 10–Q or 90 days after Nov. 1, 1990 files a transition report on Form 10–K covering the transition period from Jan. 1, 1990 through Feb. 28, 1990
—45 days after Nov. 30, 1990 files a 10–Q covering the quarter ending Nov. 30, 1990 of the new fiscal year
—90 days after Feb. 28, 1991 files a 10–K covering full year from March 1, through Feb. 28, 1991, with regular timing of quarterly and annual reporting continuing thereafter; if the transition report was filed on Form 10–Q, the 10–K must include separate audited financial statements covering the transition period from Jan. 1, 1990 through Feb. 28, 1990

g. Decision made late in year to change year end to date already past with resulting transition period six months or longer:

On Nov. 1, 1990 the issuer decides to change year end to Sept. 30, 1990
—15 days after Nov. 1, 1990 files an 8–K
—90 days after Nov. 1, 1990 files a transition report on Form 10–K covering the transition period from Jan. 1, 1990 through Sept. 30, 1990
—45 days after Dec. 31, 1990 files an 10–Q covering the first quarter ending Dec. 31, 1990 of the new fiscal year, with regular timing of quarterly and annual reporting continuing thereafter

h. Decision made late in year to change year end to date already past with resulting transition period six months or longer where fiscal quarters of newly adopted year do not coincide with those of old fiscal year:

On Nov. 20, 1990 the issuer decides to change year end to Aug. 31, 1990
—15 days after Nov. 20, 1990 files an 8–K
—45 days after Nov. 30, 1990 files a 10–Q covering the first quarter ending Nov. 30, 1990 of the new fiscal year
—90 days after Nov. 20, 1990 files a transition report on Form 10–K covering the transition period from Jan. 1, 1990 through Aug. 31, 1990 with regular timing of quarterly and annual reporting continuing thereafter

*2. Examples of Reporting Under the Amendments for a Successor Issuer that has a Fiscal Year Different from the December 31 Year End of the Predecessor*

a. Succession with resulting transition period shorter than six months but longer than one month:

The date of succession is April 30, 1990
—15 days after April 30, 1990 files an 8–K
—Either 45 days after April 30, 1990 files a transition report regarding the predecessor on Form 10–Q or 90 days after April 30, 1990 files a transition report regarding the predecessor on Form 10–K covering the transition period from Jan. 1, 1990 through April 30, 1990
—If the transition report was filed on Form 10–Q, the next annual report of the successor issuer must include audited statements of income and cash flows for the transition period

b. Succession with resulting transition period six months or longer:

The date of succession is July 31, 1990
—15 days after July 31, 1990 files an 8–K
—90 days after July 31, 1990 files a transition report regarding the predecessor on Form 10–K covering the transition period from Jan. 1, 1990 through July 31, 1990

*3. Examples of Reporting Under the Amendments for a Management Investment Company Issuer With a December 31 Year End that Changes its Fiscal Year*

a. On Feb. 1, 1990 decides to change the year end to April 30
—60 days after April 30 files Form N–SAR covering the period from Jan. 1 to April 30

b. On Feb. 1, 1990 decides to change the year end to Sept. 30
—60 days after March 31 files Form N–SAR covering the period from Jan. 1 to March 31

c. On April 1, 1990 decides to change the year end to Jan. 31
—60 days after April 1 files Form N–SAR covering the period from Jan. 1 to Jan. 31

d. On Oct. 1, 1990 decides to change the year end to Nov. 30
—60 days after Nov. 30 files Form N–SAR covering the period from July 1 to Nov. 30

e. On Nov. 1, 1990 decides to change the year end to Jan. 31
—60 days after Nov. 1 files Form N–SAR covering the period from July 1 to July 31

f. On Nov. 1, 1990 decides to change the year end to Sept. 30
—60 days after Nov. 1 files Form N–SAR covering the period from July 1 to Sept. 30

VI. Codification Update

The "Codification of Financial Reporting Policies" announced in Financial Reporting Release No. 1 (April 15, 1982) (47 FR 21028) is updated to:

1. Add a new § 102.05, "Issuer's Change of Fiscal Year."

2. Include in § 102.05 the text in Part I.B. of this Release, "The Amendments," and the examples set forth in Part V. "Appendix," which are cross-referenced to that text.

The Codification is a separate publication of the Commission. It will not be published in the Federal Register/Code of Federal Regulations Systems.

VII. Statutory Basis

The amendments are being adopted by the Commission pursuant to sections 7 and 19(a) of the Securities Act of 1933, sections 13, 14, 15(d), and 23(a) of the Securities Exchange Act of 1934, and sections 8, 30, and 38 of the Investment Company Act of 1940.

List of Subjects in CFR Parts 210, 240, 249, 270, and 274

Reporting and recordkeeping requirements, Securities.

VIII. Text of Amendments

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

## PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. The authority citation for Part 210 continues to read, in part, as follows:

Authority: Secs. 6, 7, 8, 10, 19 and Schedule A of the Securities Act of 1933 (15 U.S.C. 77f, 77g, 77h, 77j, 77s, 77aa(25) (26)) * * *

2. By adding new § 210.3–06 to read as follows:

**§ 210.3–06 Financial statements covering a period of nine to twelve months.**

Except with respect to registered investment companies, the filing of financial statements covering a period of 9 to 12 months shall be deemed to satisfy a requirement for filing financial statements for a period of 1 year where:

(a) The issuer has changed its fiscal year;

(b) The issuer has made a significant business acquisition for which financial statements are required under § 210.3–05 of this chapter and the financial statements covering the interim period pertain to the business being acquired; or

(c) The Commission so permits pursuant to § 210.3–13 of this chapter.

Where there is a requirement for filing financial statements for a time period exceeding one year but not exceeding three consecutive years (with not more than 12 months included in any period reported upon), the filing of financial

VOL 54 ISS 47 MR 13 1989 UMI

statements covering a period of nine to 12 months shall satisfy a filing requirement of financial statements for one year of that time period only if the conditions described in either paragraph (a), (b), or (c) of this section exist and financial statements are filed that cover the full fiscal year or years for all other years in the time period.

3. By amending § 210.3–12 by redesignating current paragraphs (d) and (e) as paragraphs (e) and (f), respectively, and adding new paragraph (d) to read as follows:

**§ 210.3–12 Age of financial statements at effective date of registration statement or at mailing date of proxy statement.**

* * * * *

(d) The age of the registrant's most recent audited financial statements included in a registration statement filed under the Securities Act of 1933 or filed on Form 10 (17 CFR 249.210) under the Securities Exchange Act of 1934 shall not be more than one year and 45 days old at the date the registration statement becomes effective if the registration statement relates to the security of an issuer that was not subject, immediately prior to the time of filing the registration statement, to the reporting requirements of section 13 or 15(d) of the Securities Exchange Act of 1934.

* * * * *

## PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read, in part, as follows:

Authority: Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w) * * *

2. By amending § 240.12b–25 by revising paragraphs (a) and (b)(2)(ii) to read as follows:

**§ 240.12b–25 Notification of inability to timely file all or any required portion of a Form 10–K, 20–F, 11–K, N–SAR or 10–Q.**

(a) If all or any required portion of an annual or transition report on Form 10–K, 20–F, 11–K or a quarterly or transition report on Form 10–Q required to be filed pursuant to section 13 or 15(d) of the Act and the rules thereunder or if all or any portion of a semi-annual, annual or transition report on Form N–SAR required to be filed pursuant to section 30 of the Investment Company Act of 1940 and the rules thereunder is not filed within the time period prescribed for such report, the registrant, no later than one business day after the due date for such report, shall file a Form 12b–25 (17 CFR 249.322) with the Commission which shall contain disclosure of its inability to file the report timely and the reasons therefor in reasonable detail.

(b) * * *

(2) * * *

(ii) Either the subject annual report, semi-annual report or transition report on Form 10–K, 20–F, 11–K or N–SAR, or portion thereof, will be filed no later than the fifteenth calendar day following the prescribed due date or the subject quarterly report or transition report on Form 10–Q, or portion thereof, will be filed no later than the fifth calendar day following the prescribed due date; and

* * * * *

3. By revising § 240.13a–10 to read as follows:

**§ 240.13a–10 Transition reports.**

(a) Every issuer that changes its fiscal closing date shall file a report covering the resulting transition period between the closing date of its most recent fiscal year and the opening date of its new fiscal year; *Provided, however,* that an issuer shall file an annual report for any fiscal year that ended before the date on which the issuer determined to change its fiscal year end. In no event shall the transition report cover a period of 12 or more months.

(b) The report pursuant to this section shall be filed for the transition period not more than 90 days after either the close of the transition period or the date of the determination to change the fiscal closing date, whichever is later. The report shall be filed on the form appropriate for annual reports of the issuer, shall cover the period from the close of the last fiscal year end and shall indicate clearly the period covered. The financial statements for the transition period filed therewith shall be audited. Financial statements, which may be unaudited, shall be filed for the comparable period of the prior year, or a footnote, which may be unaudited, shall state for the comparable period of the prior year, revenues, gross profits, income taxes, income or loss from continuing operations before extraordinary items and cumulative effect of a change in accounting principles and net income or loss. The effects of any discontinued operations and/or extraordinary items as classified under the provisions of generally accepted accounting principles also shall be shown, if applicable. Per share data based upon such income or loss and net income or loss shall be presented in conformity with applicable accounting standards. Where called for by the time span to be covered, the comparable period financial statements or footnote shall be included in subsequent filings.

(c) If the transition period covers a period of less than six months, in lieu of the report required by paragraph (b) of this section, a report may be filed for the transition period on Form 10–Q (§ 249.308a of this chapter) not more than 45 days after either the close of the transition period or the date of the determination to change the fiscal closing date, whichever is later. The report on Form 10–Q shall cover the period from the close of the last fiscal year end and shall indicate clearly the period covered. The financial statements filed therewith need not be audited but, if they are not audited, the issuer shall file with the first annual report for the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period. The notes to financial statements for the transition period included in such first annual report may be integrated with the notes to financial statements for the full fiscal period. A separate audited balance sheet as of the end of the transition period shall be filed in the annual report only if the audited balance sheet as of the end of the fiscal year prior to the transition period is not filed. Schedules need not be filed in transition reports on Form 10–Q.

(d) Notwithstanding the foregoing in paragraphs (a), (b), and (c) of this section, if the transition period covers a period of one month or less, the issuer need not file a separate transition report if either:

(1) The first report required to be filed by the issuer for the newly adopted fiscal year after the date of the determination to change the fiscal year end is an annual report, and that report covers the transition period as well as the fiscal year; or

(2)(i) The issuer files with the first annual report for the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period; and

(ii) The first report required to be filed by the issuer for the newly adopted fiscal year after the date of the determination to change the fiscal year end is a quarterly report on Form 10–Q; and

(iii) Information on the transition period is included in the issuer's quarterly report on Form 10–Q for the first quarterly period (except the fourth quarter) of the newly adopted fiscal year that ends after the date of the determination to change the fiscal year. The information covering the transition period required by Part II and Item 2 of Part I may be combined with the information regarding the quarter. However, the financial statements

required by Part I, which may be unaudited, shall be furnished separately for the transition period.

(e) Every issuer required to file quarterly reports on Form 10–Q pursuant to § 240.13a–13 of this chapter that changes its fiscal year end shall:

(1) File a quarterly report on Form 10–Q within the time period specified in General Instruction A.1. to that form for any quarterly period (except the fourth quarter) of the old fiscal year that ends before the date on which the issuer determined to change its fiscal year end, except that the issuer need not file such quarterly report if the date on which the quarterly period ends also is the date on which the transition period ends;

(2) File a quarterly report on Form 10–Q within the time specified in General Instruction A.1. to that form for each quarterly period of the old fiscal year within the transition period. In lieu of a quarterly report for any quarter of the old fiscal year within the transition period, the issuer may file a quarterly report on Form 10–Q for any period of three months within the transition period that coincides with a quarter of the newly adopted fiscal year if the quarterly report is filed within 45 days after the end of such three month period, provided the issuer thereafter continues filing quarterly reports on the basis of the quarters of the newly adopted fiscal year;

(3) Commence filing quarterly reports for the quarters of the new fiscal year no later than the quarterly report for the first quarter of the new fiscal year that ends after the date on which the issuer determined to change the fiscal year end; and

(4) Unless such information is or will be included in the transition report, or the first annual report on Form 10–K for the newly adopted fiscal year, include in the initial quarterly report on Form 10–Q for the newly adopted fiscal year information on any period beginning on the first day subsequent to the period covered by the issuer's final quarterly report on Form 10–Q or annual report on Form 10–K for the old fiscal year. The information covering such period required by Part II and Item 2 of Part I may be combined with the information regarding the quarter. However, the financial statements required by Part I, which may be unaudited, shall be furnished separately for such period.

Note to paragraphs (c) and (e): If it is not practicable or cannot be cost-justified to furnish in a transition report on Form 10–Q or a quarterly report for the newly adopted fiscal year financial statements for corresponding periods of the prior year where required, financial statements may be furnished for the quarters of the preceding fiscal year that most nearly are comparable if the issuer furnishes an adequate discussion of seasonal and other factors that could affect the comparability of information or trends reflected, an assessment of the comparability of the data, and a representation as to the reason recasting has not been undertaken.

(f) Every successor issuer with securities registered under Section 12 of this Act that has a different fiscal year from that of its predecessor(s) shall file a transition report pursuant to this section, containing the required information about each predecessor, for the transition period, if any, between the close of the fiscal year covered by the last annual report of each predecessor and the date of succession. The report shall be filed for the transition period on the form appropriate for annual reports of the issuer not more than 90 days after the date of the succession, with financial statements in conformity with the requirements set forth in paragraph (b) of this section. If the transition period covers a period of less than six months, in lieu of a transition report on the form appropriate for the issuer's annual reports, the report may be filed for the transition period on Form 10–Q not more than 45 days after the date of the succession, with financial statements in conformity with the requirements set forth in paragraph (c) of this section. Notwithstanding the foregoing, if the transition period covers a period of one month or less, the successor issuer need not file a separate transition report if the information is reported by the successor issuer in conformity with the requirements set forth in paragraph (d) of this section.

(g)(1) Paragraphs (a) through (f) of this section shall not apply to foreign private issuers authorized to use Form 20–F (§ 249.220f of this chapter) for annual reports required by Rule 13a–1 (§ 240.13a–1 of this chapter).

(2) Every foreign private issuer that changes its fiscal closing date shall file a report covering the resulting transition period between the closing date of its most recent fiscal year and the opening date of its new fiscal year. In no event shall a transition report cover a period longer than 12 months.

(3) The report for the transition period shall be filed on Form 20–F responding to all items to which such issuer is required to respond when Form 20–F is used as an annual report. Such report shall be filed within six months after either the close of the transition period or the date on which the issuer made the determination to change the fiscal closing date, whichever is later. The financial statements for the transition period filed therewith shall be audited.

(4) If the transition period covers a period of six or fewer months, in lieu of the report required by paragraph (g)(3) of this section, a report for the transition period may be filed on Form 20–F responding to Items 3, 9, 15, 16, and 17 or 18 within three months after either the close of the transition period or the date on which the issuer made the determination to change the fiscal closing date, whichever is later. The financial statements required by either Item 17 or Item 18 shall be furnished for the transition period. Such financial statements may be unaudited and condensed as permitted in Article 10 of Regulation S–X (§ 210.10–01 of this chapter), but if the financial statements are unaudited and condensed, the issuer shall file with the first annual report for the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period.

(5) Notwithstanding the foregoing in paragraphs (g)(2), (g)(3), and (g)(4) of this section, if the transition period covers a period of one month or less, a foreign private issuer need not file a separate transition report if the first annual report for the newly adopted fiscal year covers the transition period as well as the fiscal year.

(h) The provisions of this rule shall not apply to investment companies required to file reports pursuant to Rule 30b1–1 (§ 270.30b1–1 of this chapter) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*).

(i) No filing fee shall be required for a transition report filed pursuant to this section.

Note.—In addition to the report or reports required to be filed pursuant to this section, every issuer, except a foreign private issuer authorized to use Form 20–F for annual reports required by Rule 13a–1 or an investment company required to file reports pursuant to Rule 30b1–1 under the Investment Company Act of 1940, that changes its fiscal closing date is required to file a report on Form 8–K responding to Item 8 thereof within the period specified in General Instruction B.1. to that form.

4. By amending § 240.13a–13 by revising paragraph (a) to read as follows:

**§ 240.13a–13 Quarterly reports on Form 10–Q (§ 249.308a of this chapter).**

(a) Except as provided in paragraphs (b) and (c) of this section, every issuer that has securities registered pursuant to section 12 of the Act and is required to file annual reports pursuant to section 13 of the Act on Form 10–K (§ 249.310 of this chapter) or U5S (§ 259.5s of this chapter) shall file a quarterly report on Form 10–Q (§ 249.308a of this chapter)

VOL 54 ISS 47 MR 13 1989 UMI

within the period specified in General Instruction A.1. to that form for each of the first three quarters of each fiscal year of the issuer, commencing with the first fiscal quarter following the most recent fiscal year for which full financial statements were included in the registration statement, or, if the registration statement included financial statements for an interim period subsequent to the most recent fiscal year end meeting the requirements of Article 10 of Regulation S–X, for the first fiscal quarter subsequent to the quarter reported upon in the registration statement. The first quarterly report of the issuer shall be filed either within 45 days after the effective date of the registration statement or on or before the date on which such report would have been required to be filed if the issuer has been required to file reports on Form 10–Q as of its last fiscal quarter, whichever is later.

* * * * *

5. By amending § 240.14a–3 by redesignating the Note to paragraph (b)(1) as Note 1 and adding Note 2 to paragraph (b)(1) to read as follows:

**§ 240.14a–3 Information to be furnished to security holders.**

(b) * * *

(1) * * *

**Note 2.**—For purposes of complying with § 240.14a–3, if the registrant, other than a registered investment company, has changed its fiscal closing date, financial statements covering two years and one period of 9 to 12 months shall be deemed to satisfy the requirements for statements of income and cash flows for the three most recent fiscal years.

* * * * *

6. By revising § 240.15d–10 to read as follows:

**§ 240.15d–10 Transition reports.**

(a) Every issuer that changes its fiscal closing date shall file a report covering the resulting transition period between the closing date of its most recent fiscal year and the opening date of its new fiscal year: *Provided, however,* that an issuer shall file an annual report for any fiscal year that ended before the date on which the issuer determined to change its fiscal year end. In no event shall the transition report cover a period of 12 or more months.

(b) The report pursuant to this section shall be filed for the transition period not more than 90 days after either the close of the transition period or the date of the determination to change the fiscal closing date, whichever is later. The report shall be filed on the form appropriate for annual reports of the issuer, shall cover the period from the close of the last fiscal year end and shall indicate clearly the period covered. The financial statements for the transition period filed therewith shall be audited. Financial statements, which may be unaudited, shall be filed for the comparable period of the prior year, or a footnote, which may be unaudited, shall state for the comparable period of the prior year, revenues, gross profits, income taxes, income or loss from continuing operations before extraordinary items and cumulative effect of a change in accounting principles and net income or loss. The effects of any discontinued operations and/or extraordinary items as classified under the provisions of generally accepted accounting principles also shall be shown, if applicable. Per share data based upon such income or loss and net income or loss shall be presented in conformity with applicable accounting standards. Where called for by the time span to be covered, the comparable period financial statements or footnote shall be included in subsequent filings.

(c) If the transition period covers a period of less than six months, in lieu of the report required by paragraph (b) of this section, a report may be filed for the transition period on Form 10–Q (§ 249.308a of this chapter) not more than 45 days after either the close of the transition period or the date of the determination to change the fiscal closing date, whichever is later. The report of Form 10–Q shall cover the period from the close of the last fiscal year end and shall indicate clearly the period covered. The financial statements filed therewith need not be audited but, if they are not audited, the issuer shall file with the first annual report for the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period. The notes to financial statements for the transition period included in such first annual report may be integrated with the notes to financial statements for the full fiscal period. A separate audited balance sheet as of the end of the transition period shall be filed in the annual report only if the audited balance sheet as of the end of the fiscal year prior to the transition period is not filed. Schedules need not be filed in transition reports on Form 10–Q.

(d) Notwithstanding the foregoing in paragraphs (a), (b), and (c) of this section, if the transition period covers a period of one month or less, the issuer need not file a separate transition report if either:

(1) the first report required to be filed by the issuer for the newly adopted fiscal year after the date of the determination to change the fiscal year end is an annual report, and that report covers the transition period as well as the fiscal year; or

(2)(i) the issuer files with the first annual report for the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period; and

(ii) the first report required to be filed by the issuer for the newly adopted fiscal year after the date of the determination to change the fiscal year end is a quarterly report on Form 10–Q and

(iii) Information on the transition period is included in the issuer's quarterly report on Form 10–Q for the first quarterly period (except the fourth quarter) of the newly adopted fiscal year that ends after the date of the determination to change the fiscal year. The information covering the transition period required by Part II and Item 2 of Part I may be combined with the information regarding the quarter. However, the financial statements required by Part I, which may be unaudited, shall be furnished separately for the transition period.

(e) Every issuer required to file quarterly reports on Form 10–Q pursuant to § 240.15d–13 of this chapter that changes its fiscal year end shall:

(1) File a quarterly report on Form 10–Q within the time period specified in General Instruction A.1. to that form for any quarterly period (except the fourth quarter) of the old fiscal year that ends before the date on which the issuer determined to change its fiscal year end, except that the issuer need not file such quarterly report if the date on which the quarterly period ends also is the date on which the transition period ends;

(2) File a quarterly report on Form 10–Q within the time specified in General Instruction A.1. to that form for each quarterly period of the old fiscal year within the transition period. In lieu of a quarterly report for any quarter of the old fiscal year within the transition period, the issuer may file a quarterly report on Form 10–Q for any period of three months within the transition period that coincides with a quarter of the newly adopted fiscal year if the quarterly report is filed within 45 days after the end of such three month period, provided the issuer thereafter continues filing quarterly reports on the basis of the quarters of the newly adopted fiscal year;

(3) Commence filing quarterly reports for the quarters of the new fiscal year no later than the quarterly report for the first quarter of the new fiscal year that ends after the date on which the issuer determined to change the fiscal year end; and

(4) Unless such information is or will be included in the transition report, or the first annual report on Form 10–K for the newly adopted fiscal year, include in the initial quarterly report on Form 10–Q for the newly adopted fiscal year information on any period beginning on the first day subsequent to the period covered by the issuer's final quarterly report on Form 10–Q or annual report on Form 10–K for the old fiscal year. The information covering such period required by Part II and Item 2 of Part I may be combined with the information regarding the quarter. However, the financial statements required by Part I, which may be unaudited, shall be furnished separately for such period.

**Note to paragraphs (c) and (e):** If it is not practicable or cannot be cost-justified to furnish in a transition report on Form 10–Q or a quarterly report for the newly adopted fiscal year financial statements for corresponding periods of the prior year where required, financial statements may be furnished for the quarters of the preceding fiscal year that most nearly are comparable if the issuer furnishes an adequate discussion of seasonal and other factors that could affect the comparability of information or trends reflected, an assessment of the comparability of the data, and a representation as to the reason recasting has not been undertaken.

(f) Every successor issuer that has a different fiscal year from that of its predecessor(s) shall file a transition report pursuant to this section, containing the required information about each predecessor, for the transition period, if any, between the close of the fiscal year covered by the last annual report of each predecessor and the date of succession. The report shall be filed for the transition period on the form appropriate for annual reports of the issuer not more than 90 days after the date of the succession, with financial statements in conformity with the requirements set forth in paragraph (b) of this section. If the transition period covers a period of less than six months, in lieu of a transition report on the form appropriate for the issuer's annual reports, the report may be filed for the transition period on Form 10–Q not more than 45 days after the date of the succession, with financial statements in conformity with the requirements set forth in paragraph (c) of this section. Notwithstanding the foregoing, if the transition period covers a period of one month or less, the successor issuer need not file a separate transition report if the information is reported by the successor issuer in conformity with the requirements set forth in paragraph (d) of this section.

(g)(1) Paragraphs (a) through (f) of this section shall not apply to foreign private issuers authorized to use Form 20–F (§ 249.220f of this chapter) for annual reports required by Rule 15d–1 (§ 240.15d–1 of this chapter).

(2) Every foreign private issuer that changes its fiscal closing date shall file a report covering the resulting transition period between the closing date of its most recent year and the opening date of its new fiscal year. In no event shall a transition report cover a period longer than 12 months.

(3) The report for the transition period shall be filed on Form 20–F responding to all items to which such issuer is required to respond when Form 20–F is used as an annual report. Such report shall be filed within six months after either the close of the transition period or the date on which the issuer made the determination to change the fiscal closing date, whichever is later. The financial statements for the transition period filed therewith shall be audited.

(4) If the transition period covers a period of six or fewer months, in lieu of the report required by paragraph (g)(3) of this section, a report for the transition period may be filed on Form 20–F responding to Items, 3, 9, 15, 16, and 17 or 18 within three months after either the close of the transition period or the date on which the issuer made the determination to change the fiscal closing date, whichever is later. The financial statements required by either Item 17 or Item 18 shall be furnished for the transition period. Such financial statements may be unaudited and condensed as permitted in Article 10 of Regulation S–X (§ 210.10–01 of this chapter), but if the financial statements are unaudited and condensed, the issuer shall file with the first annual report for the newly adopted fiscal year separate audited statements of income and cash flows covering the transition period.

(5) Notwithstanding the foregoing in paragraphs (g)(2), (g)(3), and (g)(4) of this section, if the transition period covers a period of one month or less, a foreign private issuer need not file a separate transition report if the first annual report for the newly adopted fiscal year covers the transition period as well as the fiscal year.

(h) The provisions of this rule shall not apply to investment companies required to file reports pursuant to Rule 30b1–1 (§ 270.30b1–1 of this chapter) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*).

(i) No filing fee shall be required for a transition report filed pursuant to this section.

**Note:**—In addition to the report or reports required to be filed pursuant to this section, every issuer, except a foreign private issuer authorized to use Form 20–F for annual reports required by Rule 15d–1 or an investment company required to file reports pursuant to Rule 30b1–1 under the Investment Company Act of 1940, that changes its fiscal closing date is required to file a report on Form 8–K responding to Item 8 thereof within the period specified in General Instruction B.1. to that form.

7. By amending § 240.15d–13 by revising paragraph (a) to read as follows:

**§ 240.15d–13 Quarterly reports on Form 10–Q (§ 249.308a of this chapter).**

(a) Except as provided in paragraphs (b) and (c) of this section, every issuer that has securities registered pursuant to the Securities Act of 1933 and is required to file annual reports pursuant to section 15(d) of the Securities Exchange Act of 1934 on Form 10–K (§ 249.310 of this chapter) or U5S (§ 259.5s of this chapter) shall file a quarterly report on Form 10–Q (§ 249.308a of this chapter) within the period specified in General Instruction A.1. to that form for each of the first three quarters of each fiscal year of the issuer, commencing with the first fiscal quarter following the most recent fiscal year for which full financial statements were included in the registration statement, or, if the registration statement included financial statements for an interim period subsequent to the most recent fiscal year end meeting the requirements of Article 10 of Regulation S–X, for the first fiscal quarter subsequent to the quarter reported upon in the registration statement. The first quarterly report of the issuer shall be filed either within 45 days after the effective date of the registration statement or on or before the date on which such report would have been required to be filed if the issuer had been required to file reports on Form 10–Q as of its last fiscal quarter, whichever is later.

number" and revising paragraphs (a) and (b) of, and adding a new paragraph (d) to General Instruction A as set forth below.

Note.—The text of Form 20–F does not appear in the Code of Federal Regulations.

**§ 249.220f Form 20–F, registration of securities of foreign private issuers pursuant to section 12(b) or (g) and annual and transition reports pursuant to sections 13 and 15(d).**

(a) Any non-Canadian foreign private issuer may use this form as a registration statement under section 12 of the Securities Exchange Act (the "Exchange Act"), or as an annual or transition report filed under section 13(a) or 15(d) of the Exchange Act.

(b) A Canadian foreign private issuer may use this form as a registration statement under section 12(g) of the Exchange Act or as an annual or transition report under section 13(a) for a class of securities registered under section 12(g) only if such issuer does not have or has not had during the 12 months prior to the filing of the registration statement or annual or transition report any class of securities registered under section 12(b) of the Exchange Act or a reporting obligation (suspended or active) under section 15(d) of the Exchange Act and if such issuer has not issued its securities in a transaction to acquire by merger, consolidation, exchange of securities or acquisition of assets another issuer that filed or was required to file an annual report on Form 10–K (§ 249.310 of this chapter).

* * * * *

(d) A transition report on this form shall be filed in accordance with the requirements set forth in § 240.13a–10 or § 240.15d–10 applicable when the issuer changes its fiscal year end.

General Instructions

A. Rule as to Use of Form 20–F.

(a) Any non-Canadian foreign private issuer may use this form as a registration statement under section 12 of the Securities Exchange Act of 1934 (the "Exchange Act") or as an annual or transition report filed under section 13(a) or 15(d) of the Exchange Act.

(b) A Canadian foreign private issuer may use this form as a registration statement under section 12(g) of the Exchange Act and as an annual or transition report under section 13(a) for a class securities registered under section 12(g) only if such issuer does not have or has not had during the 12 months prior to the filing of the registration statement or annual or transition report any class of securities registered under section 12(b) of the Exchange Act or a reporting obligation (suspended or active) under section 15(d) of the Exchange Act and if such issuer has not issued its securities in a transaction to acquire by merger, consolidation, exchange of securities or acquisition of assets another issuer that filed or was required to file an annual report on Form 10–K (§ 249.310 of this chapter).

* * * * *

(d) A transition report on this form shall be filed in accordance with the requirements set forth in § 240.13a–10 or § 240.15d–10 applicable when the issuer changes its fiscal year end.

* * * * *

3. By amending Form 8–K (§ 249.308) by adding a sentence to the end of General Instruction B.1. and adding new Item 8 as set forth below.

Note.—The text of Form 8–K does not appear in the Code of Federal Regulations.

General Instructions

* * * * *

B. Events to be Reported and Time for Filing of Reports

1. * * * A report on this form pursuant to Item 8 is required to be filed within 15 calendar days after the date on which the registrant makes the determination to use a fiscal year end different from that used in its most recent filing with the Commission.

* * * * *

Item 8. Change in Fiscal Year

If the registrant determines to change the fiscal year from that used in its most recent filing with the Commission, state the date of such determination, the date of the new fiscal year end, and the Form (e.g., Form 10–K or Form 10–Q) on which the report covering the transition period will be filed.

* * * * *

4. By amending § 249.308a by revising the section heading, the second sentence, and adding two new sentences after the second sentence as set forth below.

Form 10–Q is amended by revising General Instructions A.1. and A.2. and revising the cover sheet above the line beginning with the words "Commission file number" as set forth below.

Note.—The text of Form 10–Q does not appear in the Code of Federal Regulations.

**§ 249.308a Form 10–Q, for quarterly and transition reports under section 13 or 15(d) of the Securities Exchange Act of 1934.**

* * * A quarterly report on this form pursuant to § 240.13a–13 or § 240.15d–13 of this chapter shall be filed within 45 days after the end of the first three fiscal quarters of each fiscal year, but no quarterly report need be filed for the fourth quarter of any fiscal year. Form 10–Q also shall be used for transition and quarterly reports filed pursuant to § 240.13a–10 or § 240.15d–10 of this chapter. Such transition or quarterly reports shall be filed in accordance with the requirements set forth in § 240.13a–10 or § 240.15d–10 applicable when the registrant changes its fiscal year end.

United States
Securities and Exchange Commission
Washington, DC 20549
Form 10–Q

General Instructions

A. Rule as to Use of Form 10–Q.

1. Form 10–Q shall be used for quarterly reports under Section 13 or 15(d) of the Securities Exchange Act of 1934, filed pursuant to Rule 13a–13 (17 CFR 240.13a–13) or Rule 15d–13 (17 CFR 240.15d–13). A quarterly report on this form pursuant to Rule 13a–13 or Rule 15d–13 shall be filed within 45 days after the end of each of the first three fiscal quarters of each fiscal year. No report need be filed for the fourth quarter of any fiscal year.

2. Form 10–Q also shall be used for transition and quarterly reports under section 13 or 15(d) of the Securities Exchange Act of 1934, filed pursuant to Rule 13a–10 (17 CFR 240.13a–10) or Rule 15d–10 (17 CFR 240.15d–10). Such transition or quarterly reports shall be filed in accordance with the requirements set forth in Rule 13a–10 or Rule 15d–10 applicable when the registrant changes its fiscal year end.

## PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. The authority citation for Part 270 continues to read, in part, as follows:

**Authority:** Secs. 38, 40, 54 Stat. 841, 842; 15 U.S.C. 80a–37, 80c–80; the Investment Company Act of 1940, as amended, 15 U.S.C. 80a–1, *et seq.* * * *

2. By revising § 270.8b–16 to read as follows:

**§ 270.8b–16 Amendments to registration statement.**

Every registered management investment company which is required to file a semi-annual report on Form N–SAR, as prescribed by rule 30b1–1 (17 CFR 270.30b1–1), shall amend the registration statement required pursuant to Section 8(b) by filing, not more than 120 days after the close of each fiscal year ending on or after the date upon which such registration statement was filed, the appropriate form prescribed for such amendments.

3. By revising § 270.30b1–2 to read as follows:

**§ 270.30b1–2 Semi-annual report for totally-owned registered management investment company subsidiary of registered management investment company.**

Notwithstanding the provisions of rules 30a–1 and 30b1–1, a registered investment company that is a totally-owned subsidiary of a registered management investment company need not file a semi-annual report on Form N–SAR if financial information with respect to that subsidiary is reported in the parent's semi-annual report on Form N–SAR.

4. By adding § 270.30b1–3 to read as follows:

**§ 270.30b1–3 Transition reports.**

Every registered management investment company filing reports on Form N–SAR that changes its fiscal year end shall file a report on Form N–SAR not more than 60 calendar days after the later of either the close of the transition period or the date of the determination to change the fiscal year end which report shall not cover a period longer than six months. No filing fee shall be required for a transition report filed pursuant to this rule.

## PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

1. The authority citation for Part 274 continues to read, in part, as follows:

**Authority:** The Investment Company Act of 1940, 15 U.S.C. 80a–1 *et seq.* * * *

2. By amending § 274.101 by revising the text of the section as set forth below.

Form N–SAR is amended by revising page 1 above the line indicating whether the filing is in an amendment, and

VOL 54 ISS 47 MR 13 1989 UMI

General instructions A, C (except the last two paragraphs which will remain the same), and F(2).

Note.—The text of Form N-SAR does not appear in the Code of Federal Regulations.

**§ 271.101 Form N-SAR, semi-annual report of registered investment companies.**

This form shall be used by registered investment companies for semi-annual or annual reports to be filed pursuant to rule 30a-1 (17 CFR 270.30a-1) or 30b1-1 (17 CFR 270.30b1-1) in satisfaction of the requirement of section 30(a) of the Investment Company Act of 1940 that every registered investment company must file annually with the Commission such information, documents and reports as investment companies having securities registered on a national securities exchange are required to file annually pursuant to section 13(a) of the Securities Exchange Act of 1934 and the rules and regulations thereunder (same as § 249.330 of this chapter).

Form N-SAR

Semi-Annual Report for registered investment companies

Report for six month period ending: ____ / ____ / ____ (a); or fiscal year ending: ____ / ____ / ____ (b).

Report for the transition period ending: ____ / ____ / ____ (c).

[If transition report also complete (a) or (b) above.]

General Instructions

A. Use of Form N-SAR

Form N-SAR is a combined reporting form that is to be used for semi-annual and annual reports by all investment companies which have filed a registration statement which has become effective pursuant to the Securities Act of 1933 ("1933 Act") with the exception of face amount certificate companies. Face amount certificate companies file periodic reports pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934 ("1934 Act"). Form N-SAR is also used for transition reports pursuant to Rule 30b1-4 under the Investment Company Act of 1940 (the "Act"). The form is divided into four sections and only certain investment companies are to complete each section.

* * * * *

Unit Investment Trusts:

* * * * *

Under section 30(b) of the Act, sections 13 and 15(d) of the 1934 Act, and the rules and regulations thereunder, the Commission is authorized to solicit the information required by Form N-SAR from registered investment companies. Disclosure of the information specified by Form N-SAR is mandatory. Information supplied on Form N-SAR will be included routinely in the public files of the Commission and will be available for inspection by any interested persons.

* * * * *

C. Filing the Report

The report shall be filed with the Commission no later than the sixtieth day after the end of the fiscal period for which the report is being prepared. All registered management investment companies shall file the form semi-annually. All registered UITs shall file the form annually. An extension of time of up to 15 days for filing the form may be obtained by following the procedures specified in Rule 12b-25 under the 1934 Act.

All transition reports shall be filed no later than the sixtieth day after the later of either the close of the transition period or the date of the determination to change the fiscal year. However, the transition report may not cover a period longer than six months.

Rule 30b1-1 under the Act requires a $125 fee to be paid to the Commission at the time of filing each semi-annual report by open- and closed-end management investment companies and a $125 fee to be paid at the time of filing each annual report by a UIT. No fee is required for a transition report.

* * * * *

F. Preparation of the Report by Electronic users

* * * * *

(2) Electronic filers may use the lockbox procedure as described in paragraph 220 of the Edgar User Manual to pay the filing fee required by Rule 30b1-1.

By the Commission.

**Jonathan G. Katz,**

*Secretary.*

## DEPARTMENT OF THE TREASURY

### Customs Service

### 19 CFR Parts 10, 24 and 148

### United States-Canada Free Trade Agreement; Extension of Time for Comments

March 8, 1989.

**AGENCY:** U.S. Customs Service, Treasury.

**ACTION:** Extension of time for comments.

**SUMMARY:** This notice extends the period of time within which interested members of the public may submit comments concerning the interim regulations on the United States-Canada Free Trade Agreement (CFTA). A notice inviting the public to comment on the CFTA was published in the **Federal Register** on December 23, 1988 (53 FR 51762), and comments were to have been received before February 21, 1989. A request has been received to extend the period of time for comments for an additional 30 days. In view of the complexity of issues and subjects involved, the request is granted.

This extension of time to file comments will not affect procedures and practices related to the implementation of duty preferences under the CFTA, since interim regulations governing these areas are currently in effect.

**DATES:** The time for comments is extended through March 23, 1989.

**ADDRESS:** Comments (preferably in triplicate) should be submitted to and may be inspected at the Regulations and Disclosure Law Branch, U.S. Customs Service, Room 2119, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

**FOR FURTHER INFORMATION CONTACT:** Joseph J. DeSanctis, Regulations and Disclosure Law Branch (202-566-8237).

Dated: March 6, 1989.

**Harvey B. Fox,**

*Director, Office of Regulations and Rulings.*

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[FRL-3513-8]

### Approval and Promulgation of Implementation Plans; State of Missouri

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA is approving revised Missouri regulations for the control of volatile organic compound (VOC) emissions in the Kansas City area. These regulations were submitted in response to Part D of the Clean Air Act which requires state implementation plan (SIP) revisions for areas that have not attained the National Ambient Air Quality Standards. Today's action provides federal enforceability for these regulations which assures continued progress toward attainment and maintenance of the ozone air quality standard in Kansas City.

**EFFECTIVE DATE:** This action is effective April 12, 1989.

**ADDRESSES:** The state submittal and EPA's technical support document are available for inspection during normal business hours at the following locations: Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101; Missouri Department of Natural Resources, Air Pollution Control Program, Jefferson State Office Building, 205 Jefferson Street, Jefferson City, Missouri 65101; Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street SW., Washington, DC 20460.

**FOR FURTHER INFORMATION CONTACT:** Larry A. Hacker at (913) 236-2893 (FTS 757-2893).

**SUPPLEMENTARY INFORMATION:** On June 30, 1988, EPA proposed approval of a revised Missouri SIP for attainment of the ozone air quality standard in the Kansas City area (53 FR 24736). Essentially, the plan consists of an attainment demonstration and revised regulations for the control of VOC emissions. For a complete discussion of the state submittal, the reader is directed to the above referenced **Federal Register** notice.

Today's notice takes final action to approve the state's revised Kansas City VOC rules except for the rule pertaining to industrial surface coating. The state adopted further revisions to this rule subsequent to EPA's June 30 proposed rulemaking. Therefore, action on the industrial surface coating rule will be reproposed in a separate **Federal Register** notice.

In addition, EPA is currently reviewing its proposed action on the attainment demonstration portion of the SIP. However, EPA believes that final action on the VOC rules should not be delayed pending the outcome of its review of the attainment demonstration. Expeditious final approval of the revised VOC rules is necessary to provide federal enforceability which will assure continued progress toward attainment and maintenance of the ozone standard. No public comments were received on the June 30 proposed rulemaking insofar as the rules approved herein are concerned.

### EPA Action

In today's notice, EPA takes final action to approve Missouri's revised VOC rules for the Kansas City area, which were included in state submittals of May 21, 1986, and December 18, 1987.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 12, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

### List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone.

Note: Incorporation by reference of the State Implementation Plan for the state of Missouri was approved by the Director of the Federal Register on July 1, 1982.

Date: January 27, 1989.

**John A. Moore,**

*Acting Administrator.*

40 CFR Part 52, Subpart AA, is amended as follows:

## PART 52—[AMENDED]

### Subpart AA—Missouri

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7642.

**§ 52.1320 [Amended]**

2. Section 52.1320 is amended by adding paragraph (c)(65) to read as follows:

* * * * *

(c) * * *

(65) Revised regulations for the control of volatile organic compound emissions in the Kansas City area were submitted by the Missouri Department of Natural Resources on May 21, 1986, and December 18, 1987. The May 21, 1986, submittal also included an ozone attainment demonstration for Kansas City, which will be addressed in a future action. Rule 10 CSR 10-2.290 provides for alternative compliance plans whereby compliance can be determined by a daily weighted average of emissions from a combination of source operations. EPA approves this rule with the understanding that any such alternative compliance plans must be submitted and approved by EPA as individual SIP revisions. In the absence of such approval, the enforceable requirements of the SIP would be the emission limits or reduction requirements stated in the rule.

(i) *Incorporation by reference.* (A) Revision to rule 10 CSR 10-2.260, Control of Emissions from Petroleum Liquid Storage, Loading, and Transfer, effective May 29, 1986, with amendments effective December 24, 1987.

(B) New rule 10 CSR 10-2.300, Control of Emissions from the Manufacturing of Paints, Varnishes, Lacquers, Enamels, and Other Allied Surface Coating Products, effective September 28, 1986, with amendments effective December 12, 1987.

(C) New rules 10 CSR 10-2.310, Control of Emissions from the Application of Automotive Underbody Deadeners, and 10 CSR 10-2.320, Control of Emissions from Production of Pesticides and Herbicides, effective November 23, 1987.

(D) Rescinded rules 10 CSR 10-2.240, Control of Emissions of Volatile Organic Compounds from Petroleum Refinery Equipment, and 10 CSR 10-2.250, Control of Volatile Leaks from Petroleum Refinery Equipment, effective November 23, 1987.

(E) Revision to rule 10 CSR 10-6.030, Sampling Methods for Air Pollution Sources, effective November 23, 1987, with amendments effective December 24, 1987.

(F) Revision to rule 10 CSR 10-2.210, Control of Emissions from Solvent Metal Cleaning, effective December 12, 1987.

(G) Revisions to rules 10 CSR 10-2.290, Control of Emissions from Rotogravure and Flexographic Printing Facilities, and 10 CSR 10-6.020, Definitions, effective December 24, 1987.

[FR Doc. 89-2420 Filed 3-10-89; 8:45 am]

BILLING CODE 6560-50-M

### 40 CFR Part 52

[FRL-3535-1]

### Approval and Promulgation of Implementation Plans; Ohio

**AGENCY:** Environmental Protection Agency (USEPA).

**ACTION:** Final rule.

**SUMMARY:** USEPA is approving a declaration by Ohio that recent revisions to USEPA's stack height regulations do not necessitate revisions to the State Implementation Plans (SIPs) for the Goodyear Tire and Rubber Company, Plant 2 in Akron, Ohio.

Under section 406 of the Clean Air Act, each State was required to review its SIP for consistency with the stack height regulations within 9 months of final promulgation. An intended effect of this action is to document formally that Ohio has satisfied this obligation for this source.

**DATES:** This action will be effective May 12, 1989 unless notice is received by April 12, 1989.

**ADDRESSES:** Copies of the State submittal and other materials related to this rulemaking are available for inspection during normal business hours at the following addresses: (It is recommended that you telephone Maggie Greene, at (312) 886-6088, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch

VOL 54 ISS 47 MR 13 1989 UMI

(5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604.
Ohio Environmental Protection Agency, Office of Air Pollution Control, 1800 WaterMark Drive, P.O. Box 1049, Columbus, Ohio 42366–0149.

Comments on this rule should be addressed to: (Please submit an original and three copies if possible). Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

**FOR FURTHER INFORMATION CONTACT:** Maggie Greene, (312) 886–6066.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

*Recent History of Stack Height Rules*

On February 8, 1982 (47 FR 5864), USEPA promulgated final regulations limiting stack height credits and other dispersion techniques as required by section 123 of the Clean Air Act (the Act). These regulations were challenged in the U.S. Court of Appeals for the District of Columbia Circuit by the Sierra Club Legal Defense Fund, Inc., the Natural Resources Defense Council, Inc., and the Commonwealth of Pennsylvania in *Sierra Club v. USEPA*, 719 F.2d 436 (D.C. Cir. 1983). On October 11, 1983, the court issued its decision ordering USEPA to reconsider portions of the stack height regulations, reversing certain portions and upholding other portions.

On February 28, 1984, the electric power industry filed a petition for a *writ of certiorari* with the U.S. Supreme Court. On July 2, 1984, the Supreme Court denied the petition (104 S.Ct. 3571), and on July 18, 1984, the Court of Appeals' mandate was formally issued, implementing the court's decision and requiring USEPA to promulgate revisions to the stack height regulations within 6 months. The promulgation deadline was ultimately extended to June 27, 1985.

Revisions to the stack height regulations were proposed on November 9, 1984 (49 FR 44878), and finalized on July 8, 1985 (50 FR 27892). The revisions redefine a number of specific terms including "excessive concentrations," "dispersion techniques," "nearby," and other important concepts, and modified some of the bases for determining good engineering practice (GEP) stack height.

The regulations were challenged by environmental groups, affected industries and States (*NRDC vs. Thomas No. 85–1465*). On January 22, 1988, the D.C. Circuit issued its decision which affirmed the regulations in large part. Three provisions, however, were remanded to USEPA for reconsideration. These are:

1. Credit for sources with originally designed and constructed merged stacks (40 CFR 51.100(hh)(2)(ii)(A));
2. Grandfathering of pre-1979 formula GEP stack heights from demonstrations (40 CFR 51.100(ii)(2)); and
3. Grandfathering pre-1983 within formula stack height increases from demonstration requirements (40 CFR 51.100(kk)(2).)

Pursuant to section 406(d)(2) of the Act, all States were required to (1) review and revise, as necessary, their SIPs to include provisions that limit stack height credits and dispersion techniques in accordance with the revised regulations, and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credits above GEP or any other dispersion techniques. For any limitations so affected, States were to prepare revised limitations consistent with their revised SIPs. All SIP revisions and revised emission limits were to be submitted to USEPA within 9 months of promulgation, as required by section 406. Subsequently, USEPA issued detailed guidance on the performance of the required reviews.

*Goodyear Tire and Rubber*

This notice evaluates the review performed by Ohio for one source, the Goodyear Tire and Rubber Company, Plant 2 in Akron, Ohio. Reviews for other sources in Ohio and States in Region V will be addressed in separate **Federal Register** notices. This particular source is being singled out for expedited treatment to help settle outstanding litigation in the United States Court of Appeals for the Sixth Circuit, *Goodyear Tire and Rubber Company v. USEPA*, Case Nos. 76–231, 77–1362, 80–3077. Today's action is not affected by the January 22, 1988, court decision. Ohio's review of the Goodyear Tire and Rubber source was submitted on July 21, 1986. Additional information was submitted on September 16, 1986, and July 7, 1987.

**II. Review of Emission Limitations**

Prior to 1982, Boilers A and B at Goodyear Tire and Rubber's Plant 2 were vented to Stack No. 3 and Boiler C was vented to Stack No. 1. Due to structural deterioration of Stack #1, Goodyear vented the exhaust gas from Boiler C to Stack No. 3 in 1982 and eventually (in 1985) completely removed Stack No. 1. (Note, because of advanced structural decay of Stack No. 1, which was built in 1915, it was necessary to remove 15 feet off the top of this stack twice during its later years.)

The current SIP emission limit for Boilers A–C is based on the merged stack configuration. Ohio reviewed the physical stack height (76.2 meters) and stack parameters used in the dispersion modeling used to set the emission limit for Goodyear.

A. *Physical Stack Height*—(Stack No. 1). Boiler A and Boiler B (Stack No. 3) were installed in 1952, and Boiler C was installed in 1943. The Stack Height Regulations do not apply to stacks (or sources) in existence before December 31, 1970. (Note, in 1970, Stack Nos. 1 and 3 were both 77.4 meters high.) Thus, the use of the actual, grandfathered height is acceptable.

B. *Merged Stacks*—According to the Stack Height Rules, merged stacks are generally regarded as a prohibited dispersion technique. Credit may be granted for mergings implemented before July 8, 1985 (such as Goodyear), if either (a) such merging was part of a change in operation at the facility that included the installation of emissions control equipment (and there was no increase in emissions), (b) such merging was carried out for sound economic or engineering reasons (and there was no increase in emissions), or (c) the source owners or operators demonstrate that a merging was not significantly motivated by an intent to gain emissions credit for greater dispersion.

USEPA issued guidance to prepare and review justifications for merging gas streams in a memorandum entitled, "Implementation of Stack Height Regulations—Exceptions from Restrictions on Credit for Merged Stacks" (October 28, 1985). The Ohio and Goodyear justification was reviewed in accordance with this guidance.

1. *Record of Intent*—A review of USEPA's files uncovered no information showing that merging was conducted specifically to increase final exhaust gas plume rise.

2. *Reason to Replace Stacks*—As stated in Goodyear's July 18, 1986, letter and accompanying documents, Stack No. 1 (which was built in 1915) had structurally deteriorated such that it had reached the end of its useful life. This necessitated the venting of the exhaust gas from Boiler C either to a new stack or an existing stack (e.g., Stack No. 3).

3. *Increase in Emissions*—According to USEPA's October 10, 1985, guidance memorandum ("Questions and Answers on Implementing the Revised Stack Height Regulation"), in cases with no pre-merging allowable emission limitation, such as Goodyear, the post-merging allowable limit cannot exceed the pre-merging actual emission level.

The current post-merging allowable short-term $SO_2$ emission limitation for Goodyear is 4.84 pounds per million British thermal units (lbs/MMBTU). The maximum actual lbs/MMBTU emissions during the 2-year period prior to merging (pre-merging actual) were greater than this value (i.e., annual average on the order of 3.5–4.0 lbs/MMBTU, with maximum short-term values in the 5–6 lbs/MMBTU range). Thus, the merging has not resulted in an increase in emissions.

4. *Affirmative Demonstration* [1]—The October 26, 1985, "Merged Stack" memorandum provides an opportunity to affirmatively demonstrate that merged stacks were not significantly motivated by an intent to obtain emissions credit for increased dispersion. Evidence to support such demonstrations should include construction permits, relevant correspondence, facility records, engineering reports, and/or affidavits.

Goodyear's affirmative demonstration consists of:

(a) In-house memoranda which discuss technical and contractual issues associated with tying Boiler C into Stack No. 3, including a June 20, 1979, memorandum which indicated that Goodyear believed that the merging would not increase plume rise at the plant.

(b) Correspondence between USEPA and Goodyear, including a June 27, 1979, letter from USEPA in which USEPA stated that the merging "has been found to be based on good engineering practice" and a June 18, 1979, letter from Goodyear citing the structural deterioration of Stack No. 1 (necessitating its removal) and the improved aesthetics after Stack No. 1's removal.

(c) Affidavit from a Goodyear environmental engineer which stated the following: (1) that he believed that the effect of merging would make negligible difference in predicted impact from Stack No. 3; (2) it was not his objective or intent to provide any plume rise enhancement; and (3) plume rise enhancement was not a factor in Goodyear's decision to merge gas streams.

USEPA has reviewed and accepts the affirmative demonstration for the Goodyear Tire and Rubber Company. Thus, it is approving granting merged stack credit for Goodyear.

[1] The other two exemption criteria (sound economic or engineering reasons, and installation of pollution control equipment) do not apply to Goodyear.

**III. Conclusion**

The State of Ohio has reviewed the emission limitation for Goodyear's Plant 2, and has found that no revision to the SIP is necessary. As justification for its finding, Ohio (and Goodyear) provided copies of memoranda, letters, and an affidavit. USEPA has reviewed this information with respect to its implementation policy for the Stack Height Regulation. USEPA has determined that Ohio's negative declaration meets all of USEPA's requirements. Therefore, USEPA is approving the declaration by Ohio that the revisions to USEPA's stack height regulations do not necessitate revisions to the SIP for the Goodyear Tire and Rubber Company, Plant 2 in Akron, Ohio.

Because USEPA considers today's action noncontroversial and routine, we are approving it today without prior proposal. The action will become effective on May 12, 1989. However, if we receive notice by April 12, 1989 that someone wishes to submit critical comments, then USEPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new rulemaking by proposing the action and establishing a comment period.

Under 5 U.S.C. section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 12, 1989. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2).)

**40 CFR Part 370**

**[FRL–3536–5]**

**Emergency and Hazardous Chemical Inventory Forms and Community Right-to-Know Reporting Requirements; Clarification of Reporting Dates for Newly Covered Facilities in the Construction Industry**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of reporting dates.

**SUMMARY:** On October 15, 1987, EPA published a final rule for reporting under sections 311 and 312 of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Under sections 311 and 312, facilities required to prepare or have available a material safety data sheet (MSDS) for hazardous chemicals under the Occupational Safety and Health Act and its implementing regulations must submit the MSDS (or a list of the hazardous chemicals) and inventory forms to the State Emergency Response Commission (SERC), Local Emergency Planning Committee (LEPC) and the local fire department. On August 4, 1988, EPA published a notice which clarifies the reporting dates for facilities in the non-manufacturing sector which were covered by the Occupational Safety and Health Administration's (OSHA) Hazard Communication Standard as of June 24, 1988. This notice clarifies the reporting dates for facilities in the construction industry which were covered by the Occupational Safety and Health Administration's (OSHA) Hazard Communication Standard as of January 30, 1989.

**DATES:** 1. Initial submission of MSDSs or alternative list: April 30, 1989.

2. Initial submission of the inventory form containing Tier I information: March 1, 1990.

**FOR FURTHER INFORMATION CONTACT:** Kathleen Brody, Program Analyst, Preparedness Staff, Office of Solid Waste and Emergency Response, OS–120, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC, or the Emergency Planning and Community Right-To-Know Information Line at 1–(800) 535–0202 or in Washington, DC at (202) 479–2449.

**SUPPLEMENTARY INFORMATION:** On August 24, 1987 (52 FR 31852), OSHA revised its Hazard Communication Standard (HCS) to expand the scope of the industries covered by the rule from the manufacturing sector to all industries where employees are exposed to hazardous chemicals. For all

VOL 54 ISS 47 MR 13 1989 UMI

establishments except those in the construction industry. OSHA's August 1987 revised HCS rule became effective on June 24, 1988. On that same date, the United States Court of Appeals for the Third Circuit stayed the application of the revised HCS rule to the construction industry at the request of construction industry representatives. After considering the merits of the construction industry challenge to the revised HCS rule, however, the Third Circuit vacated the stay. This ruling became fully effective on January 30, 1989. In a recently published **Federal Register** notice (54 FR 6888, Feb. 15, 1989), OSHA announced that all provisions of the revised HCS rule were in effect in all segments of industry as of January 30, 1989.

Sections 311 and 312 of Title III of SARA apply to the owner or operator of any facility which is required to prepare or have available a material safety data sheet (MSDS) for a hazardous chemical under the OSHA HCS. Section 311 of Title III requires that owners and operators submit an MSDS for each hazardous chemical at or above threshold amounts at the facility or a list of such chemicals to the SERC, LEPC and local fire department. Section 311(d)(1)(B) of Title III requires that the initial MSDS or list submission be made three months after the owner or operator of a facility is required to prepare or have available an MSDS for the chemical under the OSHA HCS. Therefore, EPA is today clarifying that the date established for section 311 compliance for the construction industry, newly subject to the HCS as of January 30, 1989, is April 30, 1989. Section 312 requires that the same facilities subject to section 311 submit an inventory form containing Tier I information annually on March 1 to the SERC, LEPC and local fire department. Thus, EPA is today clarifying that employers in the construction industry must submit their first Tier I inventory reports to these state and local entities by March 1, 1990.

Regulations for compliance with sections 311 and 312 of Title III were promulgated on October 15, 1987 (52 FR 38344) and codified at 40 CFR Part 370. This final regulation established the minimum threshold quantities applicable to the reporting requirements of all facilities subject to OSHA's MSDS requirements under sections 311 and 312, including facilities newly subject to the requirements at a future date.

The threshold for the first two years of reporting was set in the Agency's October 1987 regulation at 10,000 pounds, except for extremely hazardous substances (EHS). EHS must be reported if present in quantities at or above their chemical-specific threshold planning quantities or 500 pounds, whichever is less. EPA plans to propose a third-year and permanent threshold for reporting under sections 311 and 312 in the near future.

## FEDERAL COMMUNICATIONS COMMISSION

**47 CFR Parts 1, 21, 22, 74, and 94**

**[General Docket 82-343; FCC 89-45]**

### Service and Technical Rules for Government and Non-Government Fixed Service Usage of the Frequency Bands 932–935 MHz and 941–944 MHz

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** This action amends the Commission's Rules to specify service and technical rules for Government and non-Government fixed service usage of the 932–935/941–944 MHz bands. Five megahertz of the allocation is being designated for point-to-point use, with one megahertz designated for point-to-multipoint use. Licenses will be granted to qualified applicants on a first-come, first-served basis after an initial one-week filing period. In the event of mutually exclusive applications being filed during the initial filing period, or on the same day thereafter, lotteries will be used to grant licenses. The objective of this action is to satisfy Government and non-Government demand for a fixed service below one gigahertz.

**EFFECTIVE DATE:** April 1, 1989.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Rodney Small, telephone (202) 653-8116.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Final Rule in General Docket 82-243, FCC 89-45, Adopted February 9, 1989, and Released February 28, 1989.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington DC 20037.

**Summary of Final Rule**

1. In the *First Report and Order* adopted on November 21, 1984 in this proceeding (50 FR 4650; February 1, 1985), the Commission allocated the 932–935/941–944 MHz bands for Government and non-Government fixed service usage on a co-primary basis. A *Third Notice of Proposed Rule Making* in the proceeding adopted on November 25, 1986 (52 FR 11519; April 9, 1987), proposed procedures and rules to be followed in sharing the bands.

2. Specifically, the *Third Notice of Proposed Rule Making* proposed two alternative application processing procedures to provide equitable access to the new fixed bands to both Government and non-Government entities. Under the first alternative, the essential features of the current Government and non-Government procedures would be retained. Under the second alternative, the usual 30-day non-Government filing window would be reduced to a single day, consistent with the procedure employed by the National Telecommunications and Information Administration for Government applications. This modification would allow consideration of mutually exclusive Government and non-Government applications only when filed on the same day. All other aspects of the procedure would be the same as under the first alternative.

3. No point-to-multipoint use of the new fixed bands was proposed. However, it was noted that paired private multiple address frequencies at 928–929/952–953 MHz are becoming saturated in some areas; therefore, comments were requested on whether there is a need for point-to-multipoint use which should be satisfied in this allocation.

4. We also proposed a channeling plan and technical standards in an attempt to guide efficient use of the new fixed bands. The interference protection criteria proposed for new fixed users, as well as existing grandfathered broadcast auxiliary stations that utilize the 942–944 MHz band, was that specified in § 94.63 of the Rules.

5. All commenting parties that addressed the area of permitted services supported a designation of some frequencies for point-to-multipoint use, citing the rapid growth which has occurred and the shortage of frequencies which presently exists in that service. However, since there are also substantial non-Government point-to-point needs and since the Government advocates using the entire 900 MHz fixed allocation in point-to-point applications, we believe that a designation of five megahertz of spectrum for point-to-point use and one megahertz of spectrum for point-to-multipoint use is appropriate.

6. Our proposed channeling plan contemplated point-to-point use only. Thus, there is a need to change the proposed plan to permit point-to-multipoint use as well. We believe that a mix of 25 kHz, 50 kHz, 100 kHz, and 200 kHz channels is appropriate for point-to-point use, since there is a wide variation in information transmission requirements for this type of use. We are establishing 12.5 kHz channels for point-to-multipoint use since it appears that most requirements for this type of use can be accommodated in a 12.5 kHz channel. Applicants will be permitted to combine channels upon a showing that there is a need and sufficient frequencies are available to permit this. Applicants may split channels if they choose to do so.

7. We are adopting the proposed technical standards except for the point-to-multipoint channels. For these channels, we are adopting a 1.5 parts per million frequency tolerance and Part 90 emission roll-off standards. For the point-to-point channels, we are adopting the proposed frequency tolerance of 2.5 parts per million and the proposed emission limitations and antenna standards.

8. Disagreement was expressed concerning the proper length of the filing window. We have concluded that an initial one-week filing period, followed by a daily first-come, first-served procedure, is desirable for both point-to-point and point-to-multipoint applicants. Public notice of the initial filing period shall be given by the Commission, and notice shall also be published in the **Federal Register** at least thirty days prior to the beginning of the filing period. In the event of mutually exclusive applications being filed during the initial filing period, or on the same day thereafter, lotteries shall be used to grant licenses.

9. The rule amendments contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose no new or modified information collection requirement on the public.

**Ordering Clauses**

10. Authority for this Rule Making is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r), and section 553 of the Administrative Procedure Act, 5 U.S.C. section 553.

11. Accordingly, *it is ordered*, That Parts 1, 21, 22, 74, and 94 of the Commission's Rules and Regulations are amended as specified below, effective April 1, 1989.

12. *It is further ordered* That this proceeding is terminated.

**List of Subjects**

*47 CFR Part 1*

Practice and procedure.

*47 CFR Part 21*

Domestic public fixed radio services.

*47 CFR Part 22*

Public mobile service.

*47 CFR Part 74*

Aural broadcast auxiliary stations.

*47 CFR Part 94*

Private operational-fixed microwave service.

13. Part 1 of Title 47 of the Code of Federal Regulations is amended as follows:

**PART 1—PRACTICE AND PROCEDURE**

14. The authority citation for Part 1 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303; Implement, 5 U.S.C. 552, unless otherwise noted.

15. In § 1.962, paragraph (a)(1) is revised to read as follows, and paragraph (i) is added as follows:

**§ 1.962 Public notice of acceptance for filing; petitions to deny applications of specified categories.**

(a) * * *

(1) Fixed point-to-point and point-to-multipoint stations using frequencies above 890 MHz (exclusive of control, relay, and repeater stations used as integral parts of mobile radio systems).

(i) Notwithstanding other provisions of this section, applications for frequencies in the 932–935/941–944 MHz bands shall be filed initially during a one-week period to be announced by public notice. After these applications have been processed, the Commission shall announce by public notice a filing date for remaining frequencies. From this filing date forward, applications shall be processed on a daily first-come, first-served basis. Applications will be considered to be mutually exclusive only if filed for the same frequency in the same geographic location during the initial filing period or, thereafter, on the same day.

16. Part 21 of Title 47 of the Code of Federal Regulations is amended as follows:

**PART 21—DOMESTIC PUBLIC FIXED RADIO SERVICES**

17. The authority citation for Part 21 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303.

18. In § 21.27, paragraph (d) is added as follows:

**§ 21.27 Public notice period.**

* * * * *

(d) Applications for frequencies in the 932.5–935/941.5–944 MHz bands shall be filed initially during a one-week period to be announced by public notice. After these applications have been processed, the Commission shall announce by public notice a filing date for remaining frequencies. From this filing date forward, applications shall be processed on a daily first-come, first-served basis. Applications will be considered to be mutually exclusive only if filed for the same frequency in the same geographic location during the initial filing period or, thereafter, on the same day.

19. In § 21.31, paragraph (f) is added as follows:

**§ 21.31 Mutually exclusive applications.**

(f) Notwithstanding other provisions of this section, applications for frequencies in the 932.5–935/941.5–944 MHz bands will be considered to be mutually exclusive only if filed for the same frequency in the same geographic location during the initial filing period or, thereafter, on the same day.

20. In § 21.101, the table in paragraph (a) is amended by adding the following frequency ranges in numeric order.

**§ 21.101 Frequency tolerance.**

(a) * * *

| Frequency range (MHz) | Frequency tolerance (percent) | | |
|---|---|---|---|
| | All fixed and base stations | Mobile stations over 3 watts | Mobile stations 3 watts or less |
| 512 to 932 * | 0.0005 | 0.0005 | 0.0005 |
| 932.5 to 935 * | 0.00025 | | |
| 941.5 to 944 | 0.00025 | | |
| 944 to 1,000 | 0.0005 | 0.0005 | 0.0005 |

21. In § 21.107, the table in paragraph (b) is amended by adding a footnote reference to the 512 to 2,110 MHz band and revising the footnote to read as follows:

**§ 21.107 Transmitter power.**

(b) * * *

| Frequency Band | Maximum allowable transmitter power | | Maximum allowable EIRP | |
|---|---|---|---|---|
| | Fixed (W) | Mobile (W) | Fixed (dBW) | Mobile (dBW) |
| * | * | * | * | * |
| 512 to 2,110 | 20.0 | 30.0 | (*) | |
| * | * | * | * | * |

[*] The EIRP of stations in the 932.5–935 MHz, 941.5–944 MHz, and 10,600–10,680 MHz bands must not exceed +40 dBW.

22. In § 21.106, the list of frequency bands in paragraph (c) is amended by adding the following new bands in numeric order.

**§ 21.106 Directional antennas.**

(c) * * *

| Frequency (MHz) | Category | Maximum beamwidth to 3 dB points (included angle in degrees) | Minimum antenna gain (dBi) | Minimum radiation suppression to angle in degrees from centerline of main beam in decibels | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | | 5° to 10° | 10° to 15° | 15° to 20° | 20° to 30° | 30° to 100° | 100° to 140° | 140° to 180° |
| 932.5 to 935 and 941.5 to 944 | A | 14.0 | n/a | | 8 | 11 | 14 | 17 | 20 | 24 |
| | B | 20.0 | n/a | | | 8 | 10 | 13 | 15 | 20 |

23. In § 21.701, the list of frequency bands in paragraph (a) is amended by adding the following new bands and footnotes in numeric order; paragraphs (c) through (f) are redesignated as (d) through (g); and paragraph (c) is added as follows:

**§ 21.701 Frequencies.**

(a) * * *

932.5–935 MHz [17]
941.5–944 MHz [17] [18]

* * * * *

(c) *932.5–935 MHz and 941.5–944 MHz.* 200 kHz maximum authorized bandwidth, 9 MHz separation:

(1) 25 kHz bandwidth channels:

| Transmit (receive) (MHz) | Receive (transmit) (MHz) |
|---|---|
| 932.5125 | 941.5125 |
| 932.5375 | 941.5375 |
| 932.5625 | 941.5625 |
| 932.5875 | 941.5875 |
| 932.6125 | 941.6125 |
| 932.6375 | 941.6375 |
| 932.6625 | 941.6625 |
| 934.6375 | 941.6375 |
| 934.6625 | 943.6625 |
| 934.6875 | 943.6875 |
| 934.9125 | 943.9125 |
| 934.9375 | 943.9375 |
| 934.9625 | 943.9625 |
| 934.9875 | 943.9875 |

(2) 50 kHz channels:

| Transmit (receive) (MHz) | Receive (transmit) (MHz) |
|---|---|
| 932.7000 | 941.7000 |
| 932.7500 | 941.7500 |
| 934.8000 | 943.8000 |

(3) 100 kHz channels:

| Transmit (receive) (MHz) | Receive (transmit) (MHz) |
|---|---|
| 932.8250 | 941.8250 |
| 932.8250 | 941.8250 |
| 933.0250 | 942.0250 |
| 934.5250 | 943.5250 |
| 934.6250 | 943.6250 |
| 934.7250 | 943.7250 |

(4) 200 kHz channels:

| Transmit (receive) (MHz) | Receive (transmit) (MHz) |
|---|---|
| 933.1750 | 942.1750 |
| 933.3750 | 942.3750 |
| 933.5750 | 942.5750 |
| 933.7750 | 942.7750 |
| 933.9750 | 942.9750 |
| 934.1750 | 943.1750 |
| 934.3750 | 943.3750 |

* * * * *

24. In § 21.703, the table in paragraph (a) is amended by adding the following bands in numeric order.

**§ 21.703 Bandwidth and emission limitations.**

(a) * * *

| Frequency band (MHz) | Maximum authorized bandwidth (MHz) |
|---|---|
| 932.5 to 935 | 0.2 |
| 941.5 to 944 | 0.2 |

* * * * *

25. Part 22 of Title 47 of the Code of Federal Regulations is amended as follows:

## PART 22—PUBLIC MOBILE SERVICE

26. The authority citation for Part 22 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat. 1066, 1082, as amended (47 U.S.C. 154, 303), sec. 553 of the Administrative Procedure Act (5 U.S.C.), unless otherwise noted.

27. In § 22.27, paragraph (b) is redesignated as paragraph (b)(1) and paragraph (b)(2) is added as follows:

**§ 22.27 Public notice period.**

* * * * *

(b) * * *

(2) Applications for frequencies in the 932–932.5/941.5 MHz bands shall be filed initially during a one-week period to be announced by public notice. After these applications have been processed, the Commission shall announce by public notice a filing date for remaining frequencies. From this filing date forward, applications shall be processed on a daily first-come, first-served basis.

* * * * *

28. In § 22.31, paragraph (g) is added as follows:

**§ 22.31 Mutually exclusive applications.**

* * * * *

(g) Notwithstanding other provisions of this section, applications for frequencies in the 932–932.5/941–941.5 MHz bands will be considered to be mutually exclusive only if filed for the same frequency in the same geographic location during the initial filing period or, therefore, on the same day.

29. In § 22.101, the table in paragraph (a) is amended by adding the following frequency ranges in numeric order.

**§ 22.101 Frequency tolerance.**

(a) * * *

| Frequency range (MHz) | Frequency tolerance (percent) | | |
|---|---|---|---|
| | All fixed and base stations | Mobile stations over 3 watts | Mobile stations 3 watts or less |
| * | * | * | * |
| 932 to 932.5 | 0.00015 | | |
| 941 to 941.5 | 0.00015 | | |

* * * * *

30. In § 22.501, paragraph (g)(1) is revised, and a new paragraph (g)(5) is added as follows:

**§ 22.501 Frequencies.**

* * * * *

(g)(1) The frequencies listed in this paragraph are available to one-way signaling stations utilized within a multiple address system which requires the use of at least four simultaneously operated base stations operated on the same frequency assignments. These frequencies will be assigned only when there are four or more remote sites listed on the application for license. The 928/959 MHz frequencies may be used in paired or unpaired configurations; the 932/941 MHz frequencies are for paired use only. When paired, the higher frequency will be used by the control and the lower by the base station.

| 928–960 MHz Band [18] | |
|---|---|
| 928.8625 | 959.8625 |
| 928.8875 | 959.8875 |
| 928.9125 | 959.9125 |
| 928.9375 | 959.9375 |
| 928.9625 | 959.9625 |
| 928.9875 | 959.9875 |
| 932.00625 | 941.00625 |
| 932.01875 | 941.01875 |
| 932.03125 | 941.03125 |
| 932.04375 | 941.04375 |
| 932.05625 | 941.05625 |
| 932.06875 | 941.06875 |
| 932.08125 | 941.08125 |
| 932.09375 | 941.09375 |
| 932.10625 | 941.10625 |
| 932.11875 | 941.11875 |
| 932.13125 | 941.13125 |
| 932.14375 | 941.14375 |
| 932.15625 | 941.15625 |
| 932.16875 | 941.16875 |
| 932.18125 | 941.18125 |
| 932.19375 | 941.19375 |
| 932.20625 | 941.20625 |
| 932.21875 | 941.21875 |
| 932.23125 | 941.23125 |
| 932.24375 | 941.24375 |
| 932.25625 | 941.25625 |
| 932.26875 | 941.26875 |
| 932.28125 | 941.28125 |
| 932.29375 | 941.29375 |
| 932.30625 | 941.30625 |
| 932.31875 | 941.31875 |
| 932.33125 | 941.33125 |
| 932.34375 | 941.34375 |
| 932.35625 | 941.35625 |
| 932.36875 | 941.36875 |
| 932.38125 | 941.38125 |
| 932.39375 | 941.39375 |
| 932.40625 | 941.40625 |
| 932.41875 | 941.41875 |
| 932.43125 | 941.43125 |
| 932.44375 | 941.44375 |
| 932.45625 | 941.45625 |
| 932.46875 | 941.46875 |
| 932.48125 | 941.48125 |
| 932.49375 | 941.49375 |

[18] Except as indicated above, new control and repeater stations will not be authorized in the 890–940 MHz band. However, stations which were authorized to operate on such frequencies on April 18, 1958, may be granted renewed licenses subject to the following conditions:

Operations shall not be protected against any interference received from the emission of industrial, scientific and medical equipment operating on 915 MHz or from the emission of radiolocation stations in the 890–942 MHz band.

No harmful interference shall be caused to stations operating in the radiolocation service in the 890–942 MHz band.

[19] The paired frequencies between 932–932.5 and 941–941.5 are shared with Government fixed stations and stations in the Private Operational-Fixed Microwave Service (Part 94).

* * * * *

(5) Stations in multiple address systems on the 941–941.5 MHz channels will not be authorized to use transmitter power exceeding 100 watts nor effective isotropic radiated power exceeding +30 dBW. Stations in multiple address systems on the 932–932.5 MHz channels will not be authorized to use transmitter power exceeding 5 watts nor effective isotropic radiated power exceeding +17 dBW.

* * * * *

31. Part 74 of Title 47 of the Code of Federal Regulations is amended as follows:

## PART 74—EXPERIMENTAL, AUXILIARY, AND SPECIAL BROADCAST AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

32. The authority citation for Part 74 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat. 1066, as amended, 1082 as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083 as amended; 47 U.S.C. 301, 303, 307.

33. In § 74.502, paragraphs (a) through (d) are redesignated as paragraphs (b) through (e). In newly redesignated paragraph (e), change the internal reference to read "paragraph (b) of this section".

**§ 74.502 Frequency assignment.**

(a) Except as provided in W.S.C. 302, broadcast auxiliary stations licensed as of November 21, 1984, to operate in the band 942–944 MHz may continue to operate on a co-equal primary basis to other stations and services operating in the band in accordance with the Table of Frequency Allocations. These stations will be protected from possible interference caused by new users of the band by the technical standards specified in § 94.63(d)(3).

* * * * *

34. Part 94 of Title 47 of the Code of Federal Regulations is amended as follows:

## PART 94—PRIVATE OPERATIONAL-FIXED MICROWAVE SERVICE

35. The authority citation for Part 94 continues to read as follows:

**Authority:** Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303, unless otherwise noted.

36. In § 94.61, the table in paragraph (b) is amended by adding the following frequency bands and footnotes in numeric order:

**§ 94.61 Applicability.**

* * * * *

(b) * * *

| | |
|---|---|
| 932 to 932.5 | (32) |
| 932.5 to 935 | (33) |
| 941 to 941.5 | (32) |
| 941.5 to 944 | (33)(34) |

* * * * *

(32) Frequencies in the 932 to 932.5 MHz and 941 to 941.5 MHz bands are shared with Government fixed point-to-multipoint stations and point-to-multipoint stations in the Public Land Mobile Service (Part 22). Frequencies in these bands are paired with one another and are available for point-to-multipoint transmission of the licensee's products and information services, excluding video entertainment material, to the licensee's customers.

(33) Frequencies in the 932.5 to 935 MHz and 941.5 to 944 MHz bands are shared with Government fixed point-to-point stations and stations in the Point-to-Point Microwave Radio Service (Part 21). Frequencies in these bands are paired with one another.

(34) Frequencies in the 942 to 944 MHz band are also shared with broadcast auxiliary stations (Part 74).

* * * * *

VOL 54 ISS 47 MR 13 1989 UMI

37. Section 94.65 is amended by redesignating paragraph (a)(1)(iv) as paragraph (a)(1)(v); adding a new paragraph (a)(1)(iv); redesignating paragraphs (a)(2)(i) through (a)(2)(iii) as paragraph (a)(2)(ii) through (a)(2)(iv) and by adding a new paragraph (a)(2)(i) and additional frequency bands in paragraphs (a)(2)(ii), (a)(2)(iii), and (a)(2)(iv); and revising the headings of the tables in these paragraphs to read as follows:

**§ 94.65 Frequencies.**

* * * * *

(a) * * *

(1) * * *

(iii) * * *

(iv) Frequencies listed in this paragraph are shared with stations in the Public Land Mobile Service (Part 22).

TABLE 7—PAIRED FREQUENCIES

[12.5 kHz bandwidth]

| Remote transmit | Master transmit |
|---|---|
| 932.00625 | 941.00825 |
| 932.01875 | 941.01875 |
| 932.03125 | 941.03125 |
| 932.04375 | 941.04375 |
| 932.05625 | 941.05625 |
| 932.06875 | 941.06875 |
| 932.08125 | 941.08125 |
| 932.09375 | 941.08375 |
| 932.10625 | 941.10825 |
| 932.11875 | 941.11875 |

BILLING CODE 6712-01-M

## NATIONAL TRANSPORTATION SAFETY BOARD

### 49 CFR Part 800

### Organization and Functions of the Board and Delegations of Authority

**AGENCY:** National Transportation Safety Board.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises Part 800 to reflect the current delegations of authority to the Directors of the Bureau of Accident Investigation and the Bureau of Field Operations.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** John M. Stuhldreher, General Counsel, National Transportation Safety Board, 800 Independence Avenue SW., Washington, DC 20594; Telephone: 202–382–6540.

**SUPPLEMENTARY INFORMATION:** The National Transportation Safety Board is amending Part 800 to reflect the current delegations of authority to the Directors of the Bureau of Accident Investigation and the Bureau of Field Operations to determine the probable cause(s) of accidents reported in the "Brief of Accident" format. The delegations currently reserve the determination of cause in any such accident investigations to the Board when (a) requested by a single Board Member or (b) it appears to the Bureau Director that, because of significant public interest, a policy issue, or a safety issue or other matter, the determination of the probable cause(s) should be made by the Board. The Board is adding a third instance where the determination of cause is reserved by the Board: (c) when the accident investigation will be used to support findings in a safety study.

Since this regulatory amendment is not a substantive rule but a rule of agency organization and procedure, notice and public procedure are not necessary and the amendment may be made effective immediately.

**Regulatory Flexibility**

Under the criteria of the Regulatory Flexibility Act, these amendments to Part 800 will not impose any kind of regulatory burden on any entity. These amendments are intended to clarify the Board's procedures in respect to accident/incident investigations, hearings, and reports.

**Paperwork Reduction**

The amendments that are adopted herein will not in any way impose paperwork requirements.

**List of Subjects in 49 CFR Part 800**

Organizations and functions, Authority delegations (government agencies).

Accordingly, Part 800 of the Board's Rules (49 CFR Part 800) is revised to read as follows:

**PART 800—[AMENDED]**

1. The authority citation continues to read as follows:

**Authority:** Independent Safety Board Act of 1974, Pub. L. 93–633, 88 Stat. 2166 (49 U.S.C. 1901 et seq.)

2. Section 800.25 is amended by revising paragraph (c) as follows:

**§ 800.25 Delegation to the Director, Bureau of Accident Investigation.**

* * * * *

(c) Determine the probable cause(s) of accidents in which the determination is issued in the "Brief of Accident" format, except that the Bureau Director will submit the findings of the accident investigation to the Board for determination of the probable cause(s) when (1) any Board Member so requests, (2) it appears to the Bureau Director that, because of significant public interest, a policy issue, or a safety issue or other matter, the determination of the probable cause(s) should be made by the Board, or (3) the accident investigation will be used to support findings in a safety study. Provided, that a petition for reconsideration or modification of a determination of the probable cause(s) made under § 845.41 of the Board's regulations (49 CFR 845.41) shall be acted on by the Board.

3. Section 800.28 is amended by revising paragraph (c) as follows:

**§ 800.28 Delegation to the Director, Bureau of Field Operations.**

* * * * *

(c) Determine the probable cause(s) of accidents in which the determination is issued in the "Brief of Accident" format, except that the Bureau Director will submit the findings of the accident investigation to the Board for determination of the probable cause(s) when (1) any Board Member so requests, (2) it appears to the Bureau Director that, because of significant public interest, a policy issue, or a safety issue or other matter, the determination of the probable cause(s) should be made by the Board, or (3) the accident investigation will be used to support findings in a safety study. Provided, that a petition for reconsideration or modification of a determination of the probable cause(s) made under § 845.41 of the Board's regulations (49 CFR 845.41) shall be acted on by the Board.

Signed in Washington, DC on March 6, 1989.

**James L. Kolstad,**

*Acting Chairman.*

[FR Doc. 89-5701 Filed 3-10-89; 8:45 am]

BILLING CODE 7533-01-M

### 49 CFR Part 805

### Employee Responsibilities and Conduct

**AGENCY:** National Transportation Safety Board.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises § 805.735–2 to alphabetize all definitions.

VOL 54 ISS 47 MR 13 1989 UMI

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** John M. Stuhldreher, General Counsel, National Transportation Safety Board, 800 Independence Avenue, SW., Washington, DC 20594; Telephone: 202–382–6540.

**SUPPLEMENTARY INFORMATION:** This amendment is to alphabetize all definitions in this section, so that in the future, if a definition needs to be added, it can be added alphabetically.

**List of Subjects in 49 CFR Part 805**

Administrative practice and procedure.

Accordingly, Part 805 of the Board's Rules (49 CFR Part 805) is amended to read as follows:

**PART 805—[AMENDED]**

1. The authority citation reads as follows:

**Authority:** E.O. 11222 of May 8, 1965, 30 FR 6469, 3 CFR 1965 Supp.; 5 CFR 735.101 *et seq.*, and 5 CFR 735.404.

1. Section 805.735–2 is revised and reads as follows:

**§ 805.735–2 Definitions.**

As used in this part.

"Executive order" means Executive Order 11222 of May 8, 1965 (30 FR 6469).

"Members and employees" means the Board Members and employees of the National Transportation Safety Board (Board) and active duty officers or enlisted members of the Armed Forces detailed to the Board, but does not include special Government employees.

"Person" means an individual, a corporation, a company, an association, a firm, a partnership, a society, a joint stock company, or any other organization or institution.

"Special Government employee" means an employee of the Board who is retained, designated, appointed, or employed to perform temporary duties, with or without compensation, for a period not to exceed 120 days during any period of 365 consecutive days, on either a full-time or intermittent basis.

**James L. Kolstad,**

*Acting Chairman.*

Signed in Washington, DC, on March 8, 1989.

[FR Doc. 89–5702 Filed 3–10–89; 8:45 am]

BILLING CODE 7533–01–M

**49 CFR Part 826**

**Equal Access to Justice Act; Implementation**

**AGENCY:** National Transportation Safety Board.

**ACTION:** Final rule.

**SUMMARY:** This amendment revises Part 826 to change the authority citation and to change one of the conditions that an applicant must meet to be eligible for an award of attorney fees and other expenses under the Equal Access to Justice Act of 1980, as restored.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** John M. Stuhldreher, General Counsel, National Transportation Safety Board, 800 Independence Avenue, SW. Washington, DC 20594; Telephone: 202–382–6540.

**SUPPLEMENTARY INFORMATION:** By Pub. L. 99–80, adopted August 5, 1985 (99 Stat. 186), effective October 1, 1984, Congress restored Section 504 of Title 5 and repealed Pub. L. 96–481. In doing so, Congress made certain changes to section 504. This amendment revises Part 826 to reflect the change in statutory authority and to reflect the change to section 504 in respect to one item of eligibility, i.e., individual net worth has been revised to $2 million and corporate net worth has been raised to $7 million.

Since this regulatory amendment is mandated by statute, notice and public procedure are not necessary and the amendment can be made effective immediately.

**List of Subjects in 49 CFR Part 826**

Administrative practice and procedure.

Accordingly, Part 826 of the Board's Rules (49 CFR Part 826) is amended as follows:

**PART 826—[AMENDED]**

1. The authority citation is revised to read as follows:

**Authority:** Section 203(a)(1) Pub. L. 99–80, 99 Stat. 186 (5 U.S.C. 504)

2. Section 826.4 is amended by revising paragraphs (b) (1), (2), and (5) as follows:

**§ 826.4 Eligibility of applicants.**

* * * * *

(b) * * *

(1) An individual with a net worth of not more than $2 million;

(2) The sole owner of an unincorporated business who has a net worth of not more than $7 million, including both personal and business interests, and not more than 500 employees;

* * * * *

(5) Any other partnership, corporation, association, or public or private organization with a net worth of not more than $7 million and not more than 500 employees.

* * * * *

Signed in Washington, DC on March 8, 1989.

**James L. Kolstad,**

*Acting Chairman.*

BILLING CODE 7533–01–M

# Proposed Rules

Federal Register
Vol. 54, No. 47
Monday, March 13, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

**DEPARTMENT OF AGRICULTURE**

**Agricultural Marketing Service**

**7 CFR Part 52**

**[FV–88–203]**

**Standards for Grades of Canned Pineapple**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The purpose of this proposed rule is to revise the current voluntary U.S. Standards for Grades of Canned Pineapple. The proposed rule was developed by the U.S. Department of Agriculture (USDA) at the request of major segments of the canned pineapple industry. It is intended to improve the standards and reflect current processing techniques and marketing practices by: (1) Eliminating reference to the sub-styles "small tidbits," "large tidbits," and "symmetrical chunks"; (2) including packing media designations of "extra light sirup" and "artificially sweetened"; (3) changing drained weight values to accommodate the extra densities of the new packing media; (4) modifying the procedure for determining the drained weight and acceptance criteria to reflect other U.S. grade standards and with the Food and Drug Administration (FDA) drained weight procedure and acceptance criteria; (5) eliminating the recommended count and size designations for slices and half slices styles; (6) replacing dual grade nomenclature with single letter designations; (7) adding the new style "whole"; and (8) providing a uniform format consistent with recent revisions of other U.S. grade standards. This proposed rule also includes conforming and miscellaneous nonsubstantive changes for clarity.

**DATE:** Comments must be received on or before May 12, 1989.

**ADDRESS:** Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Office of the Docket Clerk, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 2085, South Building, Washington, DC 20090–6456. Comments should reference the date and page number of this issue of the Federal Register and will be made available for public inspection in the office of the Docket Clerk during regular business hours.

**FOR FURTHER INFORMATION CONTACT:** D. Todd Dulaney, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 0713, South Building, Washington, DC 20090–6456, Telephone (202) 447–6247.

**SUPPLEMENTARY INFORMATION:** This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been designated as a "nonmajor" rule. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost or prices to consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not result in significant effects on competition, employment, investments, productivity, innovations, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Agencies are required to periodically review existing regulations. An objective of the regulatory review is to ensure that the grade standards are serving their intended purpose, the language is clear, and the standards are consistent with AMS policy and authority.

The Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601). The proposed changes reflect current marketing practices.

In addition, these standards are voluntary. A small entity may avoid incurring any additional economic impact by not employing them.

Modern pineapple processing techniques have brought about changes in the procedures used to determine quality grades of canned pineapple since the current grade standards became effective in March 1957.

The Pineapple Growers Association of Hawaii (PGAH), an association representing the majority of the canned pineapple industry in the United States, has requested the U.S. Department of Agriculture to revise the U.S. Standards for Grades of Canned Pineapple and align the grading procedures with current processing techniques and marketing practices. The current U.S. grade standards for canned pineapple provide for the sub-styles, "small tidbits" and "large tidbits" under the style of "tidbits." Also, under the style of "chunks," reference is made to the sub-style "symmetrical chunks." The Food and Drug Administration (FDA) does not include these sub-styles as part of the Canned Pineapple Standard of Identity (21 CFR 145.180(a)(2d)).

In order to simplify the standards and maintain consistency between the definitions of the USDA grade standards and the FDA pineapple standard, this proposal would eliminate all reference to the terms "large tidbits," "small tidbits," and "symmetrical chunks" under the respective styles in the U.S. grade standards. In addition, the definitions for all styles of canned pineapple in the U.S. grade standards would be changed to reflect the style definitions in the current FDA standard of identity.

The canned pineapple industry has begun using packing media with sirup designations in addition to those described in the current U.S. grade standards. The current FDA canned pineapple standard provides for and defines these additional packing media designations (21 CFR 145.180(a)(3) and 145.181). This proposal would align the U.S. grade standards with the FDA standard by providing for two additional sirup designations.

They are described as "extra light sirup," with sirup densities of ten degrees Brix or more but less than 14 degrees Brix, and "artificially sweetened" not defined with sirup density since the packing media contains no additional sucrose. To further clarify usage of the U.S. grade standards, terminology describing existing packing media designations would also be changed to reflect corresponding definitions in the FDA

VOL 54 ISS 47 MR 13 1989 UMI

canned pineapple standard (21 CFR 145(a)(3).

To accommodate the new values for the proposed additional sirup densities, drained weight values for common container sizes for sirup densities less than 14 degrees Brix are provided in the proposed new U.S. grade standard. The new drained weight values and present values would be adjusted to the nearest tenth of an ounce to reflect current manufacturing practices and the accuracy of modern weighing equipment used for drained weight determination. The current U.S. grade standards provide a method for determining drained weights of crushed style canned pineapple by transferring adequately drained pineapple material from the drain screen to a clean dry pan that has previously been weighed. After determining the combined weight of the pineapple material and pan, the weight of the pan is then subtracted from the total weight to reveal the weight of the crushed pineapple material.

This method is cumbersome since the dry pan "tare weight," along with the drain screen "tare weight," can be automatically subtracted from the total weight, without transferring the pineapple material, using scales designed for this purpose. This proposal provides a procedure that streamlines drained weight determinations for crushed style canned pineapple by eliminating the extra steps involved in physically removing the pineapple material from the drain screen and subtracting the predetermined "tare weight" of the pan. The proposed method reflects FDA procedures and acceptance criteria for determining drained weights (21 CFR 145.3) and reflects procedures described in other styles of canned pineapple and other U.S. grade standards.

The coring, cutting, and slicing procedures in modern pineapple processing plants enable processors to uniformly size units for the two styles, "slices" and "half slices" with a controlled degree of accuracy. Uniform counts of units for these two styles are placed in containers as a result. According to the PGAH, the majority of the pineapple processors believe that the section for recommended unit size and count designations for filled containers, as described in the current U.S. grade standards, is redundant and should be removed. This proposal would delete the section, "Recommended Counts and Sizes of Slices and Half Slices," from the U.S. grade standards, as unnecessary.

Consistent with recent or proposed changes to other U.S. grade standards, this proposal also would replace dual grade nomenclature with single letter grade designations. Under the proposal, "U.S. Grade A" or ("U.S. Fancy"), "U.S. Grade B" or ("U.S. Choice") and "U.S. Grade C" or ("U.S. Standard") would simply become "U.S. Grade A," "U.S. Grade B," and "U. S. Grade C."

The proposal would also include the new style "whole", a solid cored and peeled whole fruit, cut into a symmetrical cylinder.

The proposed changes would also provide a uniform format consistent with recent revisions of other U.S. grade standards. The proposed format is designed to provide industry personnel and Agricultural Commodity Graders with simpler and more comprehensive standards. Definitions of terms and easy-to-read tables would replace the textual descriptions in existing grade standards. The changes would be expected to promote better understanding of the grade standards. Other sections would be modified to conform with these changes.

**List of Subjects in 7 CFR Part 52**

Fruits, Vegetables, Food grades and standards.

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 52 is amended as follows:

## PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

1. The authority citation for Part 52 continues to read as follows:

Authority: Agricultural Marketing Act of 1946, Secs. 203, 205, 60 stat. 1087, as amended, 1090, as amended; (7 U.S.C. 1622, 1624).

2. The Subpart—United States Standards for Grades of Canned Pineapple, is revised to read as follows:

**Subpart—United States Standards for Grades of Canned Pineapple**

Sec.

52.1711 Product description.
52.1712 Styles.
52.1713 Definition of terms.
52.1714 Recommended sample unit sizes.
52.1715 Brix measurements.
52.1716 Fill of container of crushed style canned pineapple.
52.1717 Minimum drained weights for canned crushed pineapple.
52.1718 Recommended minimum drained weights for canned pineapple other than crushed style canned pineapple.
52.1719 Grades.
52.1720 Factors of quality and analysis.
52.1721 Requirements for grades.
52.1722 Sample size.
52.1723 Lot quality and analysis requirements.

**Subpart—United States Standards for Grades of Canned Pineapple**

**§ 52.1711 Product description.**

Canned pineapple is the product represented as defined in the Standards of Identity, Quality, and Fill of Container for Canned Pineapple (21 CFR 145.180 and 145.181) issued under the Federal Food, Drug, and Cosmetic Act.

**§ 52.1712 Styles.**

(a) *Whole* consists of whole fruit peeled and cored into reasonably symmetrical pineapple cylinders with both ends cut perpendicular to the cylinder axis.

(b) *Slices* consist of uniformly cut circular slices or rings cut across the axis of the peeled, cored pineapple cylinders.

(c) *Half slices* consist of uniformly cut, approximately semi-circular halves of slices.

(d) *Broken slices* consist of arc-shaped portions which are not required to be uniform in size and/or shape.

(e) *Spears* consist of predominantly 65 mm (2.5 in), or longer, slender sectors cut radially and lengthwise from peeled cored pineapple cylinders.

(f) *Tidbits* consist of predominantly 8 mm (0.31 in) to 13 mm (0.51 in), reasonably uniform wedge-shaped sectors cut from slices or portions thereof.

(g) *Chunks* consist of short, thick units cut from slices and/or from peeled, cored pineapple, are predominantly more than 13 mm (0.51 in) in both thickness and width, and less than 38 mm (1.5 in) in length.

(h) *Cubes* consist of reasonably uniform, cube-shaped units, predominantly 14 mm (0.55 in) or less in the longest edge dimension.

(i) *Crushed* consists of finely cut, finely shredded or grated, or small diced pieces of canned pineapple.

**§ 52.1713 Definition of terms.**

In these U.S. standards, unless otherwise required by the context, the following terms shall be construed, respectively, to mean:

(a) *Acid* means the grams of anhydrous citric acid in 100 mL of the liquid drained from the product 15 days or more after the pineapple is canned, or the blended homogenized slurry of the comminuted entire contents of the container when measured less than 15 days after canning.

(b) *Blemish* means surface areas and spots which contrast strongly in color or texture with the normal pineapple tissue, and are in excess of 2 mm (0.08 in) in the longest dimension of the exposed surface of the unit. Blemishes include deep fruit eyes, fragments of shell, brown spots, bruised portions and other abnormalities that are possible to detect in good commercial practice before sealing in the containers. In crushed pineapple the term applies to each fragment of crushed pineapple that bears a blemish. *Serious blemish* means that the blemish seriously affects the appearance or edibility of the unit.

(c) *Brix measurement* means the total soluble solids content of the product corresponding to a pure sucrose solution of the same specific gravity. It is measured 15 days or more after canning (natural equalization) or less than 15 days after canning on the blended homogenized slurry of the comminuted entire contents of the container (simulated equalization).

(d) *Broken unit* means that the whole slice is definitely severed from the core hole to the outer circumference.

(e) *Character* refers to the degree of ripeness and maturity, the texture of the fruit, and the degree of freedom from core material.

(1) *Good character* (applies to all styles) means the units are of practically uniform ripeness, are reasonably firm with fruitlets appearing as a compact structure, are reasonably free from porosity and there is not more than 11 g (0.4 oz) of core material contained in one pound of drained fruit. Half slices or broken slices that fall within this classification shall not be graded above U.S. Grade C, regardless of the total score for the product.

(2) *Reasonably good character* (applies to all styles) means the units are of reasonably uniform ripeness, the fruitlets are reasonably compact in structure, are fairly free from porosity, and there is not more than 31 g (1.1 oz) of core material contained in one pound of drained fruit. Except for half slices or broken slices styles, canned pineapple that falls within the classification defined as "reasonably good character" shall not be graded above U.S. Grade B, regardless of the total score for the product. Half slices or broken slices styles that fall within this classification shall not be graded above U.S. Grade C, regardless of the total score for the product.

(3) *Fairly good character* (applies only to half slices or broken slices styles) means the units are of fairly uniform ripeness, the fruitlets are fairly compact in structure, the units are fairly free from porosity, and there is not more than 31 g (1.1 oz) of core material contained in one pound of drained fruit. Half slices or broken slices that fall within this classification shall not be graded above U.S. Grade C, regardless of the total score for the product.

(4) *Poor character* means product that fails to meet the requirements of "reasonably good" or "fairly good character" as applicable for the style. Canned pineapple that falls within this classification shall not be graded above Substandard, regardless of the total score for the product.

(f) *Chip* means any unit in cubes style that is less than 8 mm (0.31 in) in the greatest dimension.

(g) *Color* refers to the predominant varietal characteristic color of properly ripened and properly processed pineapple.

(1) *Good color* (applies to all styles) means that the color of the canned pineapple units or mass is bright and is characteristic of properly ripened and properly processed pineapple of similar varieties; and that there may be slight variations in shades of such characteristic color in the units, within each unit or within the mass, and that white radiating streaks may be present: *Provided*, that such variations do not materially affect the appearance or edibility of the product. Half slices or broken slices styles that fall within this classification shall not be graded above U.S. Grade C, regardless of the total score for the product.

(2) *Reasonably good color* (applies to all styles) means that the color of the canned pineapple units or mass may be no more than slightly dull but is characteristic of properly ripened and properly processed pineapple of similar varieties; and that there may be marked variations in shades of such characteristic color in the units, within each unit, or within the mass, and that white radiating streaks may be present: *Provided* that such variations do not seriously affect the appearance or edibility of the product. Canned pineapple that falls within this classification shall not be graded above U.S. Grade B, regardless of the total score for the product, except half slices or broken slices styles which shall not be graded above U.S. Grade C, regardless of the total score for the product.

(3) *Fairly good color* (applies only to half slices or broken slices styles) means that the color of the canned pineapple units or mass may be dull, but is characteristic of properly ripened and properly processed pineapple of similar varieties; and, that there may be marked variations in shades of such characteristic color in the units, within each unit, or within the mass, and that white radiating streaks may be present which may seriously affect the appearance or edibility of the product.

Half slices or broken slices styles of canned pineapple that fall within this classification shall not be graded above U.S. Grade C, regardless of the total score of the product.

(4) *Poor color* (applies to all styles) means product that fails to meet the requirements of "reasonably good color" or "fairly good color," as applicable for the style. Product that falls within this classification shall not be graded above Substandard, regardless of the total score for the product.

(h) *Core material* means the pineapple portion which is identified as definitely hard and characteristic of the center structure of pineapple, normally removed during processing.

(i) *Defect* refers to the degree of freedom, for the applicable style, from trimmed units, blemished units, mashed units and from any other defects, including specks in crushed style, that cannot be weighed which detract from the appearance or edibility of the product.

(1) *Practically free from defects* (applies to all styles) means that the canned pineapple is practically free from any defects including defects not specifically mentioned. Practically free from defects means, for the respective styles:

(i) *Whole.* Not more than 10 percent, by count, of the fruit units (cylinders) may be slightly trimmed, based on the average of all containers in the sample; not more than 10 percent by count of the fruit units (cylinders) may have an area greater than 7 percent of the total surface area which is mashed; however, a sample having less than 10 containers in permitted to have one slightly trimmed unit and one unit with more than 7 percent of the suface area mashed. Not more than 2 blemishes and serious blemishes per fruit unit (cylinder) is permitted.

(ii) *Slices.* Not more than a reasonable amount of units may be insignificantly or slightly trimmed, and no slices may be excessively trimmed. Not more than a total of 5 percent, by count, of the units may be blemished and seriously blemished; or one unit in a container is permitted to be blemished and seriously blemished if such unit exceeds the allowance of 5 percent, by count: *Provided* that in all containers comprising the sample, such blemished units and seriously blemished units do not exceed an average of 5 percent of the total number of units. Not more than one unit in containers of more than 25 units, may be mashed.

(iii) *Tidbits.* Not more than 5 percent of the drained weight may consist of units that are excessively trimmed. Not

VOL 54 ISS 47 MR 13 1989 UMI

more than a total of 5 percent, by count, of the units may be blemished and seriously blemished: *Provided* that not more than 2⅙ percent, by count, may be seriously blemished. Not more than 3 of the units in containers of less than 150 units, or not more than 2 percent of the units in containers of 150 or more, may be mashed.

(iv) *Chunks.* Not more than a total of 5 percent, by count, of the units may be blemished and seriously blemished: *Provided,* that not more than 2⅙ percent, by count, may be seriously blemished. Not more than 3 of the units in containers of less than 70 units, or not more than 5 percent of the units in containers of 70 units or more, may be mashed.

(v) *Cubes.* Not more than a total of 3 percent of the drained weight may be blemished and seriously blemished: *Provided,* that not more than 1 percent of the drained weight may be seriously blemished.

(vi) *Spears.* Not more than a reasonable amount of units may be insignificantly or slightly trimmed, but none may be excessively trimmed. Not more than a total of 5 percent, by count, of the units may be blemished and seriously blemished, or one unit in a container is permitted to be blemished or seriously blemished if such unit exceeds the allowance of 5 percent, by count: *Provided,* that in all containers comprising the sample, such blemished and seriously blemished units do not exceed an average of 5 percent of the total number of units. Not more than one unit per container may be mashed.

(vii) *Crushed.* Not more that ⅓ percent of the drained weight may consist of fragments bearing blemishes, including blemished and seriously blemished fragments. Defects also include dark specks that cannot be weighed, yet affect the appearance or edibility of the product.

(viii) *Half slices.* Not more than a reasonable amount of units may be insignificantly or slightly trimmed, but none may be excessively trimmed. Not more than a total of 5 percent, by count, of the units may be blemished and seriously blemished, or one unit in a container is permitted to be blemished or seriously blemished if such unit exceeds the allowance of 5 percent, by count: *Provided,* that in all containers comprising the sample, such blemished and seriously blemished units do not exceed an average of 5 percent of the total number of units. Not more than one unit in containers of 25 units or less, and not more than 3 units in containers of more than 25 units, may be mashed. Product that falls into this classification, shall not be graded above U.S. Grade C, regardless of the total score for the product.

(ix) *Broken slices.* Not more than 5 percent, by count, of the units may be excessively trimmed. Not more than a total of 5 percent, by count, of the units may be blemished and seriously blemished. Not more than 5 percent of the units, by count, may be mashed. Product that falls into this classification, shall not be graded above U.S. Grade C, regardless of the total score for the product.

(2) *Reasonably free from defects* (applies to all styles) means that the canned pineapple is reasonably free from any defects, including defects not specifically mentioned. Except for half slices and broken slices styles, product that falls into this classification, shall not be graded above U.S. Grade B, regardless of the total score for the product. Reasonably free from defects means, for the respective styles:

(i) *Whole.* Not more than 10 percent, by count, of the fruit units (cylinders) may be excessively trimmed, based on the average of all containers in the sample; not more than 10 percent, by count, of the fruit units (cylinders) may have an area greater than 10 percent of the total surface area which is mashed; however, a sample having less than 10 containers is permitted to have one excessively trimmed unit and one unit with more than 10 percent of the surface area mashed. Not more than 3 blemishes and serious blemishes per fruit unit (cylinder) is permitted.

(ii) *Slices.* Not more than a total of 20 percent, by count, of the units may be slightly and excessively trimmed: *Provided,* that not more than 7⅓ percent, by count, of the units may be excessively trimmed; but in any container having not more than 10 units, one unit may be excessively trimmed; and in any container having more that 10 units, but not more than 27 units, two units may be excessively trimmed. Not more than a total of 12⅓ percent, by count, of the units may be blemished and seriously blemished; but in any container having not more than 5 units, one unit may be blemished or seriously blemished; in containers having more that 5 units, but not more than 10 units, two units may be blemished or seriously blemished; and in containers having more than 10 units, but not more than 32 units, four units may be blemished and seriously blemished. Not more than one unit in containers of 25 units or less, and not more than 3 units in containers of more than 25 units, may be mashed.

(iii) *Tidbits.* Not more than 15 percent of the drained weight may consist of units that are excessively trimmed. Not more than a total of 12⅓ percent, by count, of the units may be blemished and seriously blemished: *Provided,* that not more than 6¼ percent, by count, may be seriously blemished. Not more than 3 of the units in containers of less than 150 units, or not more than 2 percent of the units in containers of 150 units or more, may be mashed.

(iv) *Chunks.* Not more than a total of 12⅓ percent, by count, may be blemished and seriously blemished: *Provided,* that not more than 6¼ percent, by count, may be seriously blemished. Not more than 3 of the units in containers of less than 70 units, or not more than 5 percent of the units in containers of 70 units or more, may be mashed.

(v) *Cubes.* Not more than a total of 12⅓ percent, by count, of the units may be blemished and seriously blemished: *Provided,* that not more than 6¼ percent, by count, may be seriously blemished.

(vi) *Spears.* Not more than a total of 20 percent, by count, of the units may be insignificantly, slightly, and excessively trimmed: *Provided,* that not more than 15 percent, by count, of the units may be excessively trimmed. Not more than 12⅓ percent, by count, of the units may be blemished and seriously blemished; in containers having more than 5 units, but not more than 10 units, two units may be blemished and seriously blemished; and in containers having more than 10 units, but not more than 32 units, four units may be blemished and seriously blemished. Not more than one unit per container may be mashed.

(vii) *Crushed.* Not more than 1¼ percent of the drained weight may consist of blemished and seriously blemished fragments.

(viii) *Half slices.* Not more than a total of 20 percent, by count, of the units may be slightly and excessively trimmed: *Provided,* that not more than 7⅓ percent, by count, of the units may be excessively trimmed; but in any container having not more than 10 units, one unit may be excessively trimmed; and in any container having more than 10 units but not more than 27 units, two units may be excessively trimmed. Not more than a total of 8 percent, by count, of the units may be blemished and seriously blemished; or one unit in a container is permitted to be blemished or seriously blemished if such unit exceeds the allowance of 8 percent, by count: *Provided,* that in all containers comprising the sample such blemished and seriously blemished units do not exceed an average of 8 percent of the total number of units. Not more than one unit in containers of 25 units or less, and not more than 3 units in containers or

more than 25 units, may be mashed. Product that falls within this classification, shall not be graded above U.S. Grade C, regardless of the total score for the product.

(ix) *Broken slices.* Not more than 10 percent, by count, of the units may be excessively trimmed. Not more than 8 percent, by count, of the units may be blemished or seriously blemished. Not more than 5 percent, by count, of the units may be mashed. Product that falls into this classification, shall not be graded above U.S. Grade C, regardless of the total score for the product.

(3) *Fairly free from defect* (applies only to half slices or broken slices styles) means that the canned pineapple is "fairly free from defects," including defects not specifically mentioned. Half slices or broken slices styles that fall into this classification, shall not be graded above U.S. Grade C, regardless of the total score for the product, and, in addition, has the following meanings with respect to the following styles of canned pineapple:

(i) *Half slices.* Not more than 7⅓ percent, by count, of the units may be excessively trimmed; but in any container having not more than 10 units, one unit may be excessively trimmed; and in any container having more than 10 units, but not more than 27 units, two units may be excessively trimmed. Not more than 12⅓ percent, by count, of the units may be blemished and seriously blemished, but in any container having not more than 5 units, one unit may be blemished or seriously blemished; in containers having more than 5 units, but not more than 10 units, two units may be blemished and seriously blemished; and in containers having more than 10 units, but not more than 32 units, four units may be blemished and seriously blemished. Not more than one unit in containers of 25 units or less, and not more than 3 units in containers of more than 25 units, may be mashed.

(ii) *Broken slices.* Not more than 15 percent, by count, of the units may be excessively trimmed. Not more than 12⅓ percent, by count, of the units may be blemished and seriously blemished; but in any container having more than 10 units, but not more than 32 units, four units may be blemished and seriously blemished. Not more than 5 percent, by count, of the units may be mashed.

(4) *Excessive defects* means canned pineapple which fails to meet either "reasonably free from defects" or "fairly free from defects," as applicable for the style. Product that falls into this classification shall not be graded above Substandard, regardless of the total score for the product.

(j) *Eye* means the blossom cup of the pineapple that is normally removed during processing (see blemish).

(k) *Extraneous vegetable material* (EVM) means any objectionable vegetable material regardless of size, from other than the pineapple fruit, which is harmless.

(l) *Flavor and odor*—(1) *Good flavor and odor* means that the flavor and odor is normal for canned pineapple and is free from objectionable flavors and odors of any kind.

(2) *Fairly good flavor and odor* means that the flavor and odor may be lacking in good flavor and odor, but is free from objectionable flavors and odors of any kind.

(m) *Mashed* (in styles other than cube or crushed) means a unit that has lost its normal shape as evidenced by marks of mechanical injury. A unit that has lost its normal shape because of ripeness and which bears no mark of mechanical injury shall not be considered as "mashed."

(n) *Porosity* means the degree of freedom from air spaces in the pineapple unit that gives a spongy texture.

(o) *Sample unit size* means the amount of product specified to be used for grading.

(p) *Shell* means all the outer layer of the fruit that is normally removed during processing (see blemish).

(q) *Tartness* means the taste sensation that is biting, sharp, and sour which is characteristic of the pineapple fruit.

(1) *Excessively tart* means that more than 1.35 g of acid is present in 100 mL of the drained liquid.

(2) *Not excessively tart* means that not more than 1.35 g of acid is present in 100 mL of the drained liquid.

(r) *Trim* means the degree of impairment of the pineapple units from the paring, coring, cutting, or trimming process.

(1) *Insignificantly trimmed* means any trimming that is noticeable but of lesser degree than slightly trimmed.

(2) *Slightly trimmed* (applies only to whole, slices, or half slices styles) means that the portion trimmed away approximates 3 percent to not more than 5 percent of the apparent physical bulk of the perfectly formed unit and if such trimming materially affects the normal circular shape of the outer or inner edge of the unit.

(3) *Excessively trimmed* in whole, slices, or half slices styles means that the portion trimmed away exceeds 5 percent of the apparent physical bulk of the perfectly formed unit and if such trimming destroys the normal circular shape of the outer or inner edge of the unit. In broken slices, spears, or tidbits styles means that the normal shape of the unit is destroyed by trimming.

(s) *Uniformity of size and shape* is not scored for crushed style. The other three factors (color, defects, and character) are scored and the total is multiplied by 100 and divided by 80, dropping any fractions to determine the total score for crushed style canned pineapple. For broken slices style, this quality factor may be scored no higher than 15 points. The four factors (color, uniformity of size and shape, defects, and character) are scored and the total is multiplied by 100 and divided by 95, dropping any fractions to determine the score.

(1) *Radial axis* in whole, slices, and half slices styles, means the measurement along the radius from the inside arc to the outside arc.

(2) *Length.* (i) In tidbits and chunks styles, means the measurement along the radius from the inside arc to the outside arc.

(ii) In spears style, means the longitudinal measurement of the spear.

(3) *No. 8 Sieve* means the meshes of a sieve designated in the American Society for Testing and Materials (ASTM) Standard E-11, Standards for Specifications for Wire Cloth Sieves for Testing Purposes.

(4) *Practically uniform in size and shape* means for the following styles:

(i) *Whole.* The maximum radial axis of the cylinder does not exceed the minimum radial axis of the cylinder by more than 6 mm (0.25 in). The cylinder may be cracked but not broken into separate pieces.

(ii) *Slices.* The diameter of the largest slice does not exceed the diameter of the smallest slice by more than 2 mm (0.08 in). The thickest slice does not exceed the thinnest slice by more than 2 mm (0.08 in) in thickness. The maximum radial axis of any slice does not exceed the minimum radial axis of the same slice by more than 3 mm (0.12 in). The drained weight of the largest slice is not more than 1.4 times the drained weight of the smallest slice.

(iii) *Tidbits.* Not more than 7⅓ percent of the drained weight may consist of units each of which weighs less than three-fourths as much as the average weight of all the untrimmed tidbits.

(iv) *Chunks.* None of the units may have a longest dimension (along any edge) greater than 38 mm (1.5 in). Not more than 10 percent of the drained weight consists of pieces weighing less than 5 g (0.18 oz) each.

(v) *Cubes.* Not more than a aggregate of 10 percent of the drained weight may consist of units of such size that they pass through the meshes of a sieve with

VOL 54 ISS 47 MR 13 1989 UMI

(5/16 in) square openings, and pieces weighing more than 3 g (0.11 oz) each.

(vi) *Spears.* The units are of substantially equal length. Not more than 10 percent, by count, of the units or not more than one unit in a container of less than 10 units, may be less than 19 mm (0.75 in) or more than 45 mm (1.75 in) in the longest edge dimension other than the longitudinal measurement of the spear. The drained weight of the largest spear is not more than 1.4 times the weight of the smallest spear.

(vii) *Half slices.* The diameter of the largest half slice does not exceed the diameter of the smallest half slice by more than 2 mm (0.08 in). The drained weight of the largest half slice is not more than 1.75 times the drained weight of the smallest half slice (except for an occasional broken piece due to splitting or an occasional whole slice not quite completely cut through).

(5) *Reasonably uniform in size and shape* (applies to all styles except broken and crushed styles). Except for half slices style, the applicable styles of canned pineapple that fall into this classification, shall not be graded above U.S. Grade B, regardless of the total score for the product. Reasonably uniform in size and shape has the following meanings with respect to style:

(i) *Whole.* The maximum radial axis of the cylinder does not exceed the minimum radial axis of the cylinder by more than 10 mm (0.31 in). The cylinder may be cracked but not broken into separate pieces.

(ii) *Slices.* The diameter of the largest slice does not exceed the diameter of the smallest slice by more than 3 mm (0.12 in). The thickest slice does not exceed the thinnest slice by more than 3 mm (0.12 in) in thickness. The maximum radial axis of any slice does not exceed the minimum radial axis of the same slice by more than 6 mm (0.25 in). The drained weight of the largest slice is not more than 1.4 times the drained weight of the smallest slice.

(iii) *Tidbits.* Not more than 15 percent of the drained weight may consist of units each of which weighs less than three-fourths as much as the average weight of all the untrimmed tidbits.

(iv) *Chunks.* None of the units may have a longest dimension (along any edge) greater than 38 mm (1.5 in). Not more than 15 percent of the drained weight consists of pieces weighing less than 5 g (0.18 oz) each.

(v) *Cubes.* Not more than 10 percent of the drained weight may consist of units of such size that they pass through the meshes of a sieve with 6 mm (0.31 in) square openings. Not more than 15 percent of the drained weight may consist of pieces weighing more than 3 g (0.11 oz) each.

(vi) *Spears.* The units are of reasonably uniform length. Not more than 20 percent, by count, of the units or not more than one unit in a container of less than 5 units, may be less than 19 mm (0.75 in) or more than 45 mm (1.75 in) in the longest edge dimension other than the longitudinal measurement of the spear. The drained weight of the largest spear is not more than 1.4 times the weight of the smallest spear.

(vii) *Half slices.* The diameter of the largest half slice does not exceed the diameter of the smallest half slice by more than 3 mm (0.12 in). The thickest half slice does not exceed the thinnest half slice by more than 3 mm (0.12 in) in thickness. The drained weight of the largest half slice is not more than 1.75 times the drained weight of the smallest half slice (except for an occasional broken piece due to splitting or an occasional whole slice not quite completely cut through). Product that falls within this classification shall not be graded above U.S. Grade C, regardless of the total score for the product.

(6) *Fairly uniform in size and shape* (applies only to the style of half slices) means that the units fail to meet the requirements of "reasonably uniform in size and shape" and shall not be graded above U.S. Grade C, regardless of the total score for the product. The drained weight of the largest half slice is not more than 1.75 times the weight of the smallest half slice (except for an occasional broken piece due to splitting or an occasional whole slice not quite completely cut through).

(7) *Not uniform in size and shape* (applies only to broken slices style) means:

(i) Not more than 10 percent of the drained weight may consist of pieces having an arc of less than 90 degrees.

(ii) Not more than 5 percent of the drained weight may consist of pieces that measure in thickness less than 6 mm (0.31 in) or more than 25 mm (1 in); or pieces that measure less than 19 mm (0.75 in) in width as measured from the outer edge to the inner edge; and

(iii) Not more than 5 percent of the drained weight may consist of broken slices having an outside diameter differing by as much as 10 mm (0.39 in) from those present in the greatest proportion by weight.

(8) *Poor uniformity of size and shape* (applies to all styles except crushed style) means canned pineapple which fails to meet in some respect; "reasonably uniform in size and shape," "fairly uniform in size and shape, or "not uniform in size and shape," as applicable for the style. Products that fall into this classification, shall not be graded above Substandard, regardless of the total score for the product.

(t) *Unit* means one whole cylinder, slice, half slice, broken slice, spear tidbit, chunk, cube or a specified weight of crushed pineapple.

**§ 52.1714 Recommended sample unit size.**

The requirements for all factors of quality and analysis are based on the following:

(a) The entire contents of a container;

(b) A representative portion of the contents of a container;

(c) A combination of the contents of two or more containers of the same item; or

(d) A representative portion of processed product stored or held in bulk containers.

**§ 52.1715 Brix measurements.**

Cut-out requirements for liquid packing media in canned pineapple are not incorporated in the grades of the finished product since syrup or any other liquid medium, as such, is not a factor of quality for the purposes of these grades. The "cut-out" Brix measurements, as applicable to the respective designations, are as follows:

TABLE I—PACKING MEDIA DESIGNATIONS

| Designations | Brix measurement |
|---|---|
| "Extra heavy syrup"; "extra heavily sweetened pineapple juice and water"; or "extra heavily sweetened pineapple juice." | 22° or more, but not more than 35° |
| "Heavy syrup"; "heavily sweetened pineapple juice and water"; or "heavily sweetened pineapple juice." | 18° or more, but less than 22° |
| "Light syrup"; "lightly sweetened pineapple juice and water"; or "lightly sweetened pineapple juice." | 14° or more, but less than 18° |
| "Slightly sweetened water"; "extra light syrup"; "slightly sweetened pineapple juice and water"; or "slightly sweetened pineapple juice." | 10° or more, but less than 14° |
| "In water" (except crushed style) | Not applicable |
| "In pineapple juice." | Not applicable |
| "In pineapple juice and water." | Not applicable |
| "In clarified pineapple juice." | Not applicable |
| "Artificially sweetened." | Not applicable |

**§ 52.1716 Fill of container for crushed style canned pineapple.**

(a) The standard of fill of container for canned crushed pineapple is a fill of not less than 90 percent of the total water capacity of the container. Crushed style canned pineapple that does not meet this requirement is "Below Standard in Fill."

(b) The recommended fill of container for canned pineapple, other than crushed style canned pineapple, is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of canned pineapple of all styles except crushed style canned pineapple be as full as practicable without impairment of quality and that the product and packing medium occupy not less than 90 percent of the volume of the container.

**§ 52.1717 Minimum drained weights for canned crushed pineapple.**

(a) *General.* The minimum drained weights for crushed style canned pineapple are not incorporated in the grades of the finished product since drained weight is not a factor of quality for the purpose of these grades; however, minimum drained weights for crushed style canned pineapple other than "heavy pack" or "solid pack" are standards of quality, and minimum drained weights for crushed style "heavy pack" and "solid pack" canned pineapple are standards of identity under the Federal Food, Drug, and Cosmetic Act. Crushed style canned pineapple, other than "heavy pack" or "solid pack", which is less than 63 percent of the net weight of the contents of the container is:

(1) Below standard in quality, good food—not high grade; or

(2) Below standard in quality, contains excess liquid.

(b) The minimum drained weights for crushed canned pineapple are shown in Table II of this section.

TABLE II—MINIMUM DRAINED WEIGHTS FOR CRUSHED STYLE CANNED PINEAPPLE

| Container | Other than "heavy pack" or "solid pack" crushed. | "Heavy pack" crushed. | "Solid pack" crushed. |
|---|---|---|---|
| Any Container Size | Drained fruit: not less than 63 percent, by weight, of net contents. | Drained fruit: not less than 73 percent but less than 78 percent, by weight, of net contents. | Drained fruit: not less than 78 percent of net contents. |

**§ 52.1718 Recommended minimum drained weights for canned pineapple other than crushed style pineapple.**

(a) There are no recommended drained weight minimums for whole style canned pineapple since fill for this style is based on volume.

(b) *General.* The recommended minimum drained weights for canned pineapple in styles other than crushed and whole are based on equalization of the product 15 days or more after the product has been canned. The recommended minimum drained weights for canned pineapple in styles other than crushed and whole are not incorporated in the grades of the finished product, since drained weight is not a factor of quality for the purposes of these grades.

(c) *Method for ascertaining drained weight in canned pineapple (including canned crushed pineapple).* The drained weight is determined by emptying the contents of a container upon a United States Standard No. 8 circular sieve of proper diameter so as to distribute the product evenly, inclining the sieve slightly to facilitate drainage, and allowing to drain for two minutes. The drained weight is the weight of the sieve and pineapple less the weight of the dry sieve. A sieve 8 inches in diameter is used for the equivalence of No. 3 size cans (404 X 414) and smaller, and a sieve 12 inches in diameter is used for containers larger than the equivalent of the No. 3 size can.

(d) Recommended minimum drained weights of canned pineapple in styles other than crushed style are shown in Table III of this section.

TABLE III—RECOMMENDED MINIMUM DRAINED WEIGHTS FOR STYLES OF CANNED PINEAPPLE OTHER THAN CRUSHED OR WHOLE STYLE

| Container Designation | Container Dimension | Style | With syrup density 14° Brix or more | With syrup density less than 14° Brix |
|---|---|---|---|---|
| | (inches) | | (ounces) | (ounces) |
| No. 1 Flat | 307 x 203 | All styles | 4.9 | 4.7 |
| 8 oz Tall | 211 x 304 | All styles | 5.0 | 4.8 |
| 211 Cyl | 211 x 414 | All styles | 7.7 | 7.4 |
| No. 1¼ | 401 x 297.5 | All styles | 8.7 | 8.2 |

(e) Conformance with the recommended minimum drained weights for canned pineapple other than crushed style is determined by averaging the drained weights from all the containers which are representative of a specific lot and such lot is considered as meeting the minimum drain weight recommendations if the following criteria are met:

(1) The average of the drained weights from all of the containers in the sample meets the recommended drained weight;

(2) One-half or more of the containers meet the recommended drained weight;

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

(3) The drained weights from the containers which do not meet the recommended minimum drained weights are within the range of variability for good commerical practice.

**§ 52.1719 Grades.**

(a) U.S Grade A is the quality of canned pineapple that meets the applicable requirements of Tables IV and VII.

(b) U.S. Grade B is the quality of canned pineapple that meets the applicable requirements of Tables IV and VII.

(c) U.S. Grade C is the quality of canned pineapple that meets the applicable requirements of Tables V and VI.

(d) Substandard is the quality of canned pineapple that fails to meet the requirements for "U.S. Grade B" or "U.S. C," as applicable for the style.

**§ 52.1720 Factors of quality and analysis.**

(a) The grade of a lot of canned pineapple is based on evaluation and analysis of the product for the following scoreable quality, and non-scoreable quality and analytical factors:

(1) Color;

(2) Uniformity of size and shape (except crushed style);

(3) Defects;

(4) Character;

(5) Flavor and odor; and

(6) Tartness.

(b) The relative importance of each scoreable quality factor is expressed numerically on the scale of 0 to 100. The maximum number of points that may be given each factor is:

| Quality Factors | Points |
|---|---|
| Color | 30 |
| Uniformity of size and shape | 20 |
| Defects | 20 |
| Character | 30 |
| Total Score | 100 |

(c) The essential variations within each scoreable quality factor are so described that the value may be determined for each factor and expressed numerically. The numerical range for the rating of each factor is inclusive (for example, 24 to 26 points means 24, 25, or 26 points) and the score points shall be prorated relative to the degree of excellence for each scoreable quality factor.

**§ 52.1721 Requirements for Grades**

TABLE IV—CANNED PINEAPPLE—WHOLE, SLICES, SPEARS, TIDBITS, CHUNKS, CUBES

| Quality Factors | Factor Description | Grade | Score Point Range |
|---|---|---|---|
| Color | Good | (A) | 27–30 |
| | Reasonably Good | (B) | 24–26 [1] |
| | Poor | (SSTD) | 0–23 [2] |
| Uniformity of Size and Shape | Practically Uniform | (A) | 18–20 |
| | Reasonably Uniform | (B) | 16–17 [1] |
| | Poor Uniformity | (SSTD) | 0–15 [2] |
| Defects | Practically Free | (A) | 18–20 |
| | Reasonably Free | (B) | 16–17 [1] |
| | Excessive | (SSTD) | 0–15 [2] |
| Character | Good | (A) | 27–30 |
| | Reasonably Good | (B) | 24–26 |
| | Poor | (SSTD) | 0–23 [2] |
| Total Score (Range) | | (A) | 90–100 points |
| | | (B) | 80–89 points |
| | | (SSTD) | 0–79 points |
| Flavor and Odor | | (A) | Good |
| | | (B) | Fairly Good |
| | | (SSTD) | Off Flavor |
| Tartness | | (A) | Not Excessively Tart |
| | | (B) | Not Excessively Tart |
| | | (SSTD) | Excessively Tart |

[1] Cannot be graded above U.S. Grade B, regardless of the total score for the product.
[2] Cannot be graded above Substandard, regardless of the total score for the product.

TABLE V—CANNED PINEAPPLE—BROKEN SLICES

| Quality Factors | Factor Description | Grade | Score Point Range |
|---|---|---|---|
| Color | Good | | 27–30 [1] |
| | Reasonably Good | (C) | 24–26 [1] |
| | Fairly Good | | 21–23 [1] |
| | Poor | (SSTD) | 0–20 [2] |
| Uniformity Of Size and Shape | Not Uniform | (C) | 14–15 [1] |
| | Poor Uniformity | (SSTD) | 0–13 [2] |
| Defects | Practically Free | | 18–20 [1] |
| | Reasonably Free | (C) | 16–17 [1] |
| | Fairly Free | | 14–15 [1] |
| | Excessive | (SSTD) | 0–13 [2] |
| Character | Good | | 27–30 [1] |
| | Reasonably Good | (C) | 24–26 [1] |
| | Fairly Good | | 21–23 [1] |
| | Poor | (SSTD) | 0–20 [2] |
| Total Score (Range) [3] | | (A) | 90–100 points |
| | | (B) | 80–89 points |
| | | (SSTD) | 0–79 points |
| Flavor and Odor | | (A) | Good |
| | | (B) | Fairly Good |
| | | (SSTD) | Off Flavor |
| Tartness | | (A) | Not Excessively Tart |
| | | (B) | |
| | | (SSTD) | Excessively Tart |

[1] Cannot be graded above U.S. Grade C, regardless of the total score for the product.
[2] Cannot be graded above Substandard, regardless of the total score for the product.
[3] To determine the total score, the four factors (Color, Uniformity, Defects, and Character) are scored and the total is multiplied by 100 and divided by 95, dropping any fractions.

TABLE VI—CANNED PINEAPPLE—HALF SLICES

| Quality factors | Factor description | Grade | Score point range |
|---|---|---|---|
| Color | Good | | 27–30 [1] |
| | Reasonably Good | (C) | 24–26 [1] |
| | Fairly Good | | 21–23 [1] |
| | Poor | (SSTD) | 0–20 [2] |
| Uniformity Of Size and Shape | Practically Uniform | | 18–20 [1] |
| | Reasonably Uniform | (C) | 16–17 [1] |
| | Fairly Uniform | | 14–15 [1] |
| | Poor Uniformity | (SSTD) | 0–20 [2] |
| Defects | Practically Free | | 18–20 [1] |
| | Reasonably Free | (C) | 16–17 [1] |
| | Fairly Free | | 14–15 [1] |

| Character | Good | | 27–30 [1] |
| | Reasonably Good | (C) | 24–26 [1] |
| | Fairly Good | | 21–23 [1] |
| | Poor | (SSTD) | 0–20 [2] |
| Total Score (Range) | | (C) | 70–100 points |
| | | (SSTD) | 0–69 points |
| Flavor and Odor | | (C) | Good or Fairly Good |
| | | (SSTD) | Off Flavor |
| Tartness | | (C) | Not Excessively Tart |
| | | (SSTD) | Excessively Tart |

[1] Cannot be graded above U.S. Grade C, regardless of the total score for the product.
[2] Cannot be graded above Substandard, regardless of the total score for the product.

TABLE VII.—CANNED PINEAPPLE—CRUSHED

| Quality factors | Factor description | Grade | Score point range |
|---|---|---|---|
| Color | Good | (A) | 27–30 |
| | Reasonably good | (B) | 24–26 [1] |
| | Poor | (SSTD) | 0–23 [2] |
| Defects | Practically free | (A) | 18–20 |
| | Reasonably free | (B) | 16–17 [1] |
| | Excessive | (SSTD) | 0–15 [2] |
| Character | Good | (A) | 27–30 |
| | Reasonably good | (B) | 24–26 [1] |
| | Poor | (SSTD) | 0–23 [2] |
| Total Score (Range) [3] | | (A) | 90–100 points |
| | | (B) | 80–89 points |
| | | (SSTD) | 0–79 points |
| Flavor and Odor | | (A) | Good |
| | | (B) | Fairly Good |
| | | (SSTD) | Off Flavor |
| Tartness | | (A) | Not Excessively Tart |
| | | (B) | Not Excessively Tart |
| | | (SSTD) | Excessively Tart |

[1] Cannot be graded above U.S. Grade B, regardless of the total score for the product.
[2] Cannot be graded above Substandard, regardless of the total score for the product.
[3] To determine the total score, the other three factors (Color, Defects, and Character) are scored and the total is multiplied by 100 and divided by 80, dropping any fractions.

**§ 52.1722 Sample size.**

The sample size used to determine whether canned pineapple meets the requirements of these standards shall be as specified in the sampling plans and procedures in the "Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products" (7 CFR 52.1 through 52.83).

**§ 52.1723 Lot quality and analytical requirements.**

A lot of canned pineapple is considered as meeting the quality and analytical requirements if:

(a) The requirements specified in Tables IV through VII, as applicable, are met; and

(b) The sampling plans and procedures in 7 CFR 52.1 through 52.83 are met.

Dated: March 7, 1989.

**[Docket No. AO F&V 87–1; AMS–FV–88–104]**

## Strawberries Grown in Florida; Termination of Proceedings to Formulate a Marketing Agreement and Order

**AGENCY:** Agricultural Marketing Service USDA.

**ACTION:** Termination of proceedings and withdrawal of proposed rule.

**SUMMARY:** This notice announces termination of proceedings to promulgate a proposed marketing agreement and order program for strawberries grown in Florida. Termination is based on results of a referendum of strawberry producers conducted by USDA from August 17–31, 1988.

**DATE:** Termination of proceedings to promulgate the proposed marketing agreement and order is effective March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** John Toth or William Pimental, Fruit and Vegetable Division, USDA/AMS, P.O. Box 2276, Winter Haven, Florida 33883, telephone (813) 299–4770; or Tom Tichenor, Marketing Order Administration Branch, Room 2531–S, P.O. Box 96456, Washington, DC 20090–6456, telephone (202) 475–3930.

**SUPPLEMENTARY INFORMATION:** Prior documents in this proceeding include the following: The Notice of Hearing was issued May 6, 1987, and published in the **Federal Register** (52 FR 17581) on May 11, 1987. An Extension of Time for Filing Briefs was issued July 13, 1987, and published in the **Federal Register** (52 FR 28369) on July 21, 1987. A Recommended Decision and Opportunity to File Written Exceptions to the Proposed Marketing Agreement and Order was issued March 1, 1988 and published in the **Federal Register** (53 FR 7194) on March 7, 1988. A Decision and

VOL 54 ISS 47 MR 13 1989 UMI

Referendum Order on Proposed Marketing Agreement and Order was issued July 25, 1988, and published in the **Federal Register** (53 FR 28642) on July 29, 1988.

This administrative action is governed by the provisions of Section 556 and 557 of Title 5 of the United States Code and therefore is not subject to the requirements of Executive Order 12291 and Departmental Regulation 1512–1.

**Preliminary Statement**

This action is issued under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674 *et seq.*], hereinafter referred to as the "Act," and the applicable rules of practice and procedure governing formulation of marketing agreements and orders [7 CFR Part 900]. The proposed marketing agreement and order, hereinafter referred to collectively as the "Order," were formulated on the record of a public hearing held May 27–28, 1987, in Valrico, Florida to consider the proposed Marketing Order No. 933 [proposed 7 CFR Part 933] regulating the handling of strawberries grown in Florida. The Notice of Hearing contained the proposed order submitted by the Florida Strawberry Growers Association.

Upon the basis of evidence introduced at the hearing and the record thereof, the Administrator of the Agricultural Marketing Service (AMS), on March 1, 1988, filed with the Hearing Clerk, U.S. Department of Agriculture, and Recommended Decision containing a notice of opportunity to file written exceptions thereto by April 6, 1988. Three exceptions were filed.

The Decision and Referendum Order was issued July 25, 1988, directing that a referendum among Florida strawberry producers be conducted during the period August 17–31, 1988. The referendum was conducted by the Fruit and Vegetable Division's Southeast Regional Marketing Field Office in Winter Haven, Florida, in accordance with 7 CFR Part 900.401–.407 governing procedures for conducting referenda concerning marketing orders. The Act requires that a proposed marketing order must be approved by either at least two-thirds of the producers voting in a referendum, or, by producers of at least two-thirds of the volume of the commodity represented in the referendum.

**Findings and Conclusions**

The proposed order did not receive a two-thirds favorable vote of all those voting. A total of 142 valid ballots were cast in the referendum. Of these, 75 ballots, or 54 percent, favored the proposed order while 66 ballots, or 46 percent, opposed the order.

The proposed order also did not receive the required two-thirds favorable vote of the volume of strawberries produced by those voting. A total production volume of strawberries produced by those voting. At total production volume of 6,511,202 flats was represented by those voting. Of this volume, 3,701,846 flats, or 57 percent of the total volume, was produced by those favoring the order and 2,809,355 flats or 43 percent of the total volume, was produced by those opposed to the order.

Testimony presented at the hearing indicated that there are estimated to be between 130 and 160 Florida strawberry producers. A total of 142 completed ballots indicates a large percentage of producers took part in the referendum.

Therefore, based on the results of the referendum, the proceedings to promulgate the proposed Marketing Order No. 933 regulating the handling of strawberries grown in Florida and hereby terminated, and the proposed rule is withdrawn.

**List of Subjects in 7 CFR Part 933**

Marketing agreement and order, Strawberries, Florida.

Dated: March 6, 1989.

**Farmers Home Administration**

**7 CFR Parts 1901, 1955, and 1980**

**Nonprofit National Corporations Loan and Grant Program**

**AGENCY:** Farmers Home Administration, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Farmers Home Administration (FmHA) is proposing to amend the Agency's policies and procedures governing the Nonprofit National Corporations Loan and Grant Program. The intended effect of this action is to reorganize and supplement the existing interim regulation for better understanding by both FmHA and the public and then to publish the rule as a final rule, also to clarify wording, correct inconsistencies, and where applicable, to delete obsolete material and update references in other program regulations.

**DATE:** Comments must be received on or before April 12, 1989.

**ADDRESSES:** Submit written comments, in duplicate, to the Office of the Chief, Directives and Forms Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address. The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Submit any comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Farmers Home Administration, Washington, DC 22053.

**FOR FURTHER INFORMATION CONTACT:** Susan G. Wieferich, Senior Loan Officer, Program Management Branch, Community Facilities Division, Farmers Home Administration, U.S. Department of Agriculture, Room 6320, South Agriculture Building, 14th and Independence Avenue SW., Washington, DC 20250; telephone (202) 382–1490.

**SUPPLEMENTARY INFORMATION:**

**Classification**

This proposed action has been reviewed under USDA procedures established in Department Regulation 1512–1, which implements Executive Order 12291, and has been determined to be nonmajor. The proposed action is not likely to result in any of the following: (a) An annual effect on the economy of $100 million or more, (b) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

**Environmental Impact**

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

**Intergovernmental Review**

This program is listed in the catalog of Federal Domestic Assistance under No. 10.434 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials [7 CFR 3015, Subpart V, 48 FR 29112, June 24, 1983].

**Regulatory Flexibility Act**

FmHA has determined that this action will not have a significant economic impact on a substantial number of small entities, because the action will not affect a significant number of small entities as defined by the Regulatory Flexibility Act [5 U.S.C. 601].

**Background**

Section 1323 of the Food Security Act of 1985 (Pub. L. 99–198) established a program whereby guaranteed loans and grants are made available to nonprofit national corporations (NNC's) which in turn provide financial and technical assistance to rural businesses for the improvement of business, industry and employment in rural areas.

A first interim rule was published in the **Federal Register** (51 FR 34928) on September 30, 1986, and invited comments for 30 days ending October 30, 1986. Nine comments were received. As a result of these comments and of a statute (H.J. 738—Continuing Resolution), which amended the enabling legislation, a second interim rule was published in the **Federal Register** (52 FR 25586) on July 8, 1987, and invited comments for 30 days ending August 7, 1987. No comments were received and the program was subsequently implemented, although a final rule was never published.

The second interim rule could be published as a final rule with minor modifications. However, the majority of the changes which are necessary if the program is to function effectively and efficiently can only be included in the instruction by means of a proposed rule. With the advice of the Office of General Counsel (OGC), FmHA has decided to proceed with a proposed rule.

This proposed rule will reorganize and supplement the instruction for better understanding by both FmHA and the public, clarify wording, correct inconsistencies and, where applicable, delete obsolete material and update references in other program regulations. The changes will result in more efficient service to the public, while continuing to protect the Government's interest.

A summary of the proposed major changes are as follows:

(1) Subpart E of Part 1901 will be amended to reference Subpart G of Part 1980 of this chapter.

(2) Subpart A of Part 1955 will be amended to reference Subpart G of Part 1980 of this chapter.

(3) Subpart G of Part 1980 includes the following proposed revisions:

(a) Section 1980.605 includes definitions for affiliate, recipient, project, loan agreement, operating agreement, technical and financial assistance.

(b) Section 1980.606 redefines eligibility requirements for an NNC.

(c) Section 1980.612 clarifies equal opportunity and nondiscrimination requirements.

(d) Section 1980.614 clarifies the eligible purposes for which financial assistance can be used.

(e) Section 1980.615 expands and clarifies the ineligible purposes for which financial assistance cannot be used including a new restriction on refinancing of recipient creditors.

(f) Section 1980.628 includes the grant agreement requirement that if a guaranteed loan is not closed within 180 days of receipt of a grant, then FmHA may, at its option, demand repayment of the original principal amount of the grant with interest.

(g) Section 1980.641 includes a filing deadline for loan guarantee and grant applications.

(h) Section 1980.642 redefines the priorities that will be used in selecting the applicants who will receive guaranteed loans and grants.

(i) Section 1980.643 redefines the items which constitute a complete application package.

(j) Section 1980.645 clarifies FmHA actions in reviewing the application package.

(k) Section 1980.646 clarifies the loan guarantee and grant approval/fund obligation process.

(l) Section 1980.647 redefines the items which are necessary for the preguarantee review, including specific items which must be covered by the loan agreement.

(m) Section 1980.648 redefines the items which are necessary to close a loan guarantee and grant.

(n) Section 1980.654 clarifies the process for disbursement of loan guarantee/grant funds.

(o) Section 1980.656 consolidates reporting requirements for the loan guarantee.

(p) Section 1980.658 clarifies field visit requirements for the loan guarantee.

(q) Section 1980.670 clarifies servicing requirements for defaults.

(r) Section 1980.671 clarifies servicing requirements for liquidations.

(s) Section 1980.672 clarifies servicing requirements for protective advances.

(t) Section 1980.697 clarifies servicing requirements for bankruptcies.

(u) Section 1980.698 includes the loan guarantee/grant program under the appeals process contained in Subpart B of Part 1900.

**List of Subjects**

*7 CFR Part 1901*

Civil rights, Compliance reviews, Fair housing, Minority groups.

*7 CFR Part 1955*

Liquidation of loans, Acquisition, Foreclosure, Government acquired property.

*7 CFR Part 1980*

Loan programs—Nonprofit corporations, Grant programs—Nonprofit corporations.

Accordingly, FmHA proposes to amend Chapter XVIII, Title 7, Code of Federal Regulations, as follows:

**PART 1901—PROGRAM-RELATED INSTRUCTIONS**

1. The authority citation for Part 1901 continues to read as follows:

**Authority:** 7 U.S.C. 1989; 42 U.S.C. 1480; 40 U.S.C. 442; 5 U.S.C. 301; 42 U.S.C. 2942; 7 CFR 2.23; 7 CFR 2.70.

**Subpart E—Civil Rights Compliance Requirements "C"**

2. In § 1901.204, paragraph (a)(22) is added and paragraphs (d)(1), (d)(3)(iv), (d)(5), (e)(2)(ii), and (f) are revised to read as follows:

**§ 1901.204 Compliance reviews.**

(a) * * *

(22) Nonprofit National Corporations grants.

* * * * * *

(d) * * *

(1) *Designation of Compliance Review Officer.* The State Director, except for Technical Assistance and Training grants (Pub. L. 99–198) and Nonprofit National Corporations grants, will designate the Compliance Review Officer for recipient organization. County Supervisors may be designated only if they have received approved compliance review training. Otherwise, the Compliance Review Officer must be a member of the State staff. For Technical Assistance and Training grants and Nonprofit National Corporations grants, the Assistant Administrator for Community and Business Programs will designate the

VOL 54 ISS 47 MR 13 1989 UMI

Compliance Review Officer for recipient organizations.

* * * * *

(3) * * *

(iv) Technical Assistance and Training grants (Pub. L. 99-198) and Nonprofit National Corporations grants. The Compliance Review Officer will record in the running record information obtained during the compliance review and the determination of recipient's compliance or noncompliance. A report will be prepared and sent to the Assistant Administrator, Community and Business Programs, for each recipient.

* * * * *

(5) *Forwarding noncompliance report.* The State Director will see that the reports are complete. If the recipient was found in noncompliance, the State Director will immediately send a copy of the report to the Administrator, Attention: Equal Opportunity Officer, with action proposed to bring the recipient into compliance. For Technical Assistance and Training grants and Nonprofit National Corporations grants, the Assistant Administrator, Community and Business Programs, will send a copy of the report to the Equal Opportunity Officer.

* * * * *

(e) * * *

(2) * * *

(ii) Technical Assistance grants, Technical Assistance and Training grants (Pub. L. 99-198) and Nonprofit National Corporations grants. The initial compliance review will be conducted before the grant is closed.

* * * * *

(f) State Office summary reports. The State Director will keep a list of all compliance reviews conducted during the reporting year so as to schedule each year's reviews. The State Director will submit a copy of this list to the Administrator, Attention: Equal Opportunity Office, no later than July 31 of each year. Recipients found in noncompliance will also be listed on the summary report. Exhibit B is a sample report. For Technical Assistance and Training grants and Nonprofit National Corporations grants, the Assistant Administrator, Community and Business Programs, will submit a summary report, using Exhibit B of this subpart as a guide, to the Equal Opportunity Officer by July 31 of each year.

## PART 1955—PROPERTY MANAGEMENT

3. The authority citation for Part 1955 continues to read as follows:

**Authority:** 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.2222; 7 CFR 2.70.

### Subpart A—Liquidation of Loans Secured by Real Estate and Acquisition of Real and Chattel Property.

4. Section 1955.1 is revised to read as follows:

**§ 1955.1 Purpose.**

This subpart delegates authority and prescribes procedures for the liquidation of Farmers Home Administration (FmHA) loans identified in § 1955.3 of this subpart and acquisition of property by voluntary conveyance to the Government, by foreclosure of security instruments, by exercise of the Government's redemption rights, and certain other actions which result in acquisition of property by the Government. When FmHA elects to liquidate a guaranteed loan other than Business and Industrial (B&I) and Nonprofit National Corporations (NNC) under the contract of guarantee, the liquidation will be completed according to this subpart. Liquidations of guaranteed B&I and NNC loans will be effected upon direction from the Assistant Administrator, Community and Business Programs. For Community Programs and insured B&I and NNC actions involving loans secured by other than real or chattel property, such loans will be handled in accordance with the provisions of this subpart which do not deal specifically with real or chattel property. Prior to liquidation these cases will be submitted to the National Office for prior review and guidance. Community Program loans sold without insurance by the FmHA to the private sector will be serviced in the private sector and will not be serviced under this subpart. The provisions of this subpart are not applicable to such loans. Future changes to this subpart will not be made applicable to such loans.

## PART 1980—GENERAL

5. The authority citation for Part 1980 continues to read as follows:

**Authority:** 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

6. Subpart G is amended by revising §§ 1980.601 through 1980.7800, removing and reserving Appendix B, and adding Appendix D to read as follows:

### Subpart G—Nonprofit National Corporations Loan and Grant Program

**§ 1980.601 Purpose.**

This subpart prescribes the policies and procedures for processing and servicing guaranteed loans and grants made by the Farmers Home Administration (FmHA) to nonprofit national corporations (NNC).

**§ 1980.602 Objective.**

The objective of this program is to improve business, industry and employment, specifically the direct retention and/or creation of jobs in rural areas. This program is expected to stimulate and encourage loan guarantees and/or grants made by public or private organizations to NNCs, which will affiliate with State rural development and finance organizations to deliver a program of financial and/or technical assistance to local businesses (recipients). The funds generated by this program are intended to stimulate innovative business and entrepreneurial practices and to assist in the diversification of the economy in rural areas. It is anticipated that businesses assisted through this program will, to the maximum extent practicable, provide services to the farm community, provide opportunities for employment for displaced farm families, and supplement farm family income through the use of farm labor and products.

**§ 1980.603 Program administration.**

The Administrator for FmHA is responsible for the administration of the program and may redelegate duties and responsibilities as authorized in this subpart to appropriate FmHA employees. The Assistant Administrator, Community and Business Programs, is the contact person for processing and servicing activities.

**§ 1980.604 Administrative provisions.**

Certain sections of this subpart contain a reference to Appendix A—Administration Provisions. Appendix A of this subpart provides FmHA personnel with directions on how to process and administer loan guarantee and grant program. This information is not considered as material the public needs to know in order to obtain the benefit of program assistance. Appendix A is not published in the **Federal Register** nor is it contained in the Code of Federal Regulations (CFR).

(Refer to Appendix A to Subpart G—Administrative Provisions.)

**§ 1980.605 Definitions**

(a) *Affiliate.* A state rural development and finance organization, profit or nonprofit, which has the authority to do business in part of all of one or more states. Although the affiliate is a separate and distinct legal entity from the NNC, the affiliate is not precluded from being a legally organized subsidiary to the NNC. An affiliate may also be a lender as defined in paragraph (c) of this section.

(b) *Application.* A reference to Form FmHA 1980-60, "Application for Loan Guarantee" and supporting documentation. The NNC applicant uses this form to apply for both the loan guarantee and the grant. Part A is completed by the NNC applicant. Part B is completed by the proposed lender.

(c) *Financial assistance.* A loan to a recipient. The recipient loan funds are derived in part from the loan guarantee and/or grant funds made available by FmHA to the NNC.

(d) *Lender.* The lender is the public agency or private organization (including financial institutions such as insurance companies) which is to process and service the loan to the NNC, guaranteed by FmHA under the provisions of this subpart. The lender is the legal entity which along with the NNC applicant requests the loan guarantee from FmHA.

(e) *Loan agreement.* An agreement which defines the working relationship between the NNC and an FmHA approved lender, including the conditions under which the lender will make and service the FmHA guaranteed loan to the NNC. The loan agreement is subject to FmHA review and concurrence.

(f) *Nonprofit National Corporation* (NNC). The legal entity which receives FmHA guaranteed loan and grant funds for the purpose of improving business, industry, and employment opportunities in rural areas.

(g) *Operating agreement.* An agreement which defines the working relationship between the NNC and its affiliates. The agreement is subject to FmHA review and concurrence. An affiliate may execute an operating agreement with more than one NNC. Likewise, an NNC may execute an agreement with more than one affiliate per State. As a result, part or all of a particular State may be served by one or more affiliates and/or NNCs.

(h) *Principals.* An officer, director, stockholder, other owner or individual (including immediate family members) and/or any parent, subsidiary or affiliate which is directly involved in the operation and management of that legal entity.

(i) *Project.* The specific proposal for which the recipient (local business) seeks financial and/or technical assistance from the NNC.

(j) *Recipient.* The legal entity (local business), profit or nonprofit, receiving financial and/or technical assistance through the efforts of the NNC, under the provisions of this subpart.

(k) *Rural area.* All areas of a State that are not included within any city having a population of twenty thousand or more as determined by the Secretary of Agriculture according to the latest decennial census of the United States.

(l) *State.* Any of the fifty States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, American Somoa, and the Commonwealth of the Northern Mariana Islands.

(m) *Technical assistance.* A problem solving *activity* performed for the benefit of the recipient by the NNC and/or others (including the affiliate). Technical assistance is paid for with grant funds, made available by FmHA to the NNC . FmHA will determine whether a specific activity qualifies as technical assistance.

**§ 1980.606 NNC eligibility.**

To be eligible for this program, an applicant must fulfill the following criteria:

(a) Be a nonprofit corporation in good standing and legally authorized to conduct business in at least three States.

(b) The general purpose of the corporation, as stated in its organizational documents (e.g., articles of incorporation), must include the stimulation of business, industry, and employment opportunities in rural areas.

(c) Be legally authorized to borrow and to lend money in at least three States, as well as to give and to accept security for said monies.

(d) Have written approval by the governors of at least three States in which the NNC intends to administer a loan program.

(e) Possess a recent audit, conducted by an independent public accountant, which demonstrates that the NNC has the financial solvency and resources necessary to carry out the intent of this program.

**§ 1980.607 Citizenship requirements.**

(a) *NNC.* At least 51 percent of the membership of any NNC or 51 percent of the outstanding interest in any NNC must be owned by those who are either citizens of the United States or reside in the United States after being legally admitted for permanent residence.

(b) *Recipient.* At least 51 percent of the membership of any recipient or 51 percent of the outstanding interest in any recipient must be owned by those who are either citizens of the United States or reside in the United States after being legally admitted for permanent residence.

**§ 1980.608 Case and identification (ID) numbers.**

(a) *FmHA case number.* The case number will be the NNC's Internal Revenue Service (IRS) tax number preceded by the FmHA State and County Code Numbers. The case number will be used on all FmHA forms.

(b) *ID number of lender.* The lender's IRS tax number will be used as its ID number in correspondence and on FmHA forms relating to the loan guarantee.

**§ 1980.609 Use of forms.**

FmHA forms will be used as indicated by this subpart. Otherwise, lenders and NNC's should use their own forms, mortgages, security instruments and other agreements, provided such documents do not contain any provisions that are in conflict or are inconsistent with the provisions of this subpart. All forms and legal documents executed by the NNC should carry the NNC's corporate seal.

**§ 1980.610 Intergovernmental review.**

The NNC's recipients are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. The intergovernmental review process is further described in Subpart J of Part 1940 of this chapter, available in any FmHA office.

(a) *NNC applicant.* The approval of Form FmHA 1980-60 is not subject to intergovernmental consultation.

(b) *Recipient.* Unless the State point of contact for intergovernmental consultation elects to limit or to eliminate the intergovernmental review in writing, the point of contact must be notified of each technical assistance activity and each loan to be received by each recipient under this subpart within that State. Notification can be initiated by the NNC, by the affiliate or by the recipient. The NNC will submit to the FmHA State Office copies of the notification to, and the comments from, the State point of contact. The FmHA State Office will determine if compliance with Executive Order 12372 has been demonstrated and, if so, will then forward an appropriate notification to the FmHA National Office. The National Office must receive State Office clearance on the intergovernmental review process before it authorizes the NNC and/or the lender to advance funds to that recipient. In those instances where FmHA determines that comments from the point of contact cannot be accommodated, the FmHA State Office will provide the point of contact with a

VOL 54 ISS 47 MR 13 1989 UMI

timely explanation of the basis for its decision. FmHA will not implement its decision for 15 days after the point of contact receives the explanation, unless unusual circumstances make the 15-day waiting period unreasonable. The explanation will be in writing and may be supplemented by telephone, meeting or other telecommunication.

**§ 1980.611 Environmental requirements.**

(a) *General.* Unless specifically modified by this section, the requirements of Subpart G of Part 1940 of this chapter apply to this subpart. Although the purpose of the program established by this subpart is to improve business, industry and employment in rural areas, this purpose is to be achieved, to the extent practicable, without adversely affecting important farmlands and forest lands, prime rangelands, wetlands and floodplains. Therefore, prospective lenders, NNCs and recipients must consider the potential environmental impacts of their applications at the earliest planning stages and develop plans and projects that minimize the potential to adversely impact the environment.

(b) *NNC applicant.* As part of Form FmHA 1980–60 and when required by Subpart G of Part 1940 of this chapter, the NNC applicant must provide a completed Form FmHA 1940–20, "Request for Environmental Information, for each recipient for which the applicant's plan proposes financial assistance, as defined in § 1980.605(c) of this subpart. FmHA will review the complete application and initiate a Class II environmental assessment. This assessment will focus on the potential cumulative impacts of the projects as well as any environmental concerns or problems that are associated with individual projects that can be identified at this time from the information submitted. Because neither the completion of the Class II environmental assessment nor the approval of the application is an FmHA commitment to the use of funds for a specific project and because such funds can eventually be used in several States, no public notification requirements for a Class II assessment will apply to the application. The affected public has not been sufficiently identified at this stage of the FmHA review. Should an application be approved, each recipient to be assisted would undergo the applicable environmental review and public notification requirements in Subpart G of Part 1940 of this chapter prior to FmHA's consent to financial assistance for that recipient. FmHA will prepare an Environmental Impact Statement for any application where financial assistance is a major Federal action determined to have a significant effect on the quality of the human environment. Technical assistance is considered a categorical exclusion under FmHA's environmental review process. However, as further specified in Subpart G of Part 1940 of this chapter, the NNC, in the process of providing technical assistance, must consider the potential environmental impacts of the recommendations provided to the recipient.

(c) *Recipient.* Once the loan guarantee has been closed and/or the grant agreement executed, the NNC will submit to the FmHA State Office, when required by Subpart G of Part 1940 of this chapter, a properly completed Form FmHA 1940–20, executed by each recipient for which the NNC intends to provide financial assistance as defined by § 1980.605(c) of this subpart. The FmHA State Office will complete, for each recipient, the environmental review required by Subpart G of Part 1940 of this chapter. Appropriate notification will then be transmitted to the FmHA National Office. The National Office must receive State Office clearance on the environmental review process before it can authorize a commitment of financial assistance to the recipient by the NNC and/or the lender.

**§ 1980.612 Equal opportunity and nondiscrimination requirements.**

(a) The Federal Equal Credit Opportunity Act, prohibits creditors (e.g., the lender, the NNC, and the FmHA) from discriminating against credit applicants on the basis of race, color, religion, national origin, sex, marital status, age and physical or mental handicap (provided that the credit applicant has the capacity to enter into a binding contract).

(b) Executive Order 11246 provides for equal employment opporunity without regard to race, color, religion, sex, or national origin and the elimination of all facilities segregated on the basis of race, color, religion, or national origin on construction work financed by FmHA involving a construction contract of more than $10,000. To comply with Executive Order 11246, the NNC applicant will be required to execute Form FmHA 400–1, "Equal Opportunity Agreement," prior to receipt of a loan guarantee and/or grant. The recipient, as defined by § 1980.605(j) of this subpart, will be required to execute Form FmHA 400–1 prior to receipt of financial assistance, as defined by § 1980.605(c) of this subpart.

(c) Title VI of the Civil Rights Act of 1964 states that no person in the United States shall on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. In compliance with this Act, the NNC applicant will be required to execute Form FmHA 400–4, "Assurance Agreement," prior to receipt of a loan guarantee and/or grant. The recipient, as defined by § 1980.605(j) of this subpart will be required to execute Form FmHA 400–4 prior to receipt of financial assistance, as defined by § 1980.605(c) of this subpart.

(d) For complete details on equal opportunity and discrimination requirements, including the conduct of compliance reviews (grant only), refer to Subpart E of Part 1901 of this chapter.

(Refer to Appendix A to Subpart G—Administrative Provisions)

**§ 1980.613 Technical assistance.**

Technical assistance, as defined by § 1980.605(m) of this subpart, is a problem solving activity performed for the benefit of the recipient by the NNC and/or others (e.g. the affiliate). Grant funds may be used to pay for the actual cost of providing a specific technical service to a recipient. Market research, product testing, financial feasibility, and management development are considered examples of problem solving activities, as opposed to such activities as the acquisition of physical assets, debt repayment, the provision of working capital, and loan closing expenses. FmHA will determine whether a specific activitiy qualifies as technical assistance. It is expected that technical assistance will be provided only when necessary to ensure project success. However, the actual provision of technical assistance does not necessarily mean that a loan to the recipient will follow.

**§ 1980.614 Financial assistance—eligible purposes.**

Financial assistance, as defined by § 1980.605(c) of this subpart, must be used by the NNC to assist recipients in projects which will improve business, industry and employment in rural areas, and meet the objectives of this program as stated in § 1980.602 of this subpart. Financial assistance to the recipients may be used for, but is not limited to:

(a) Business and industrial acquisitions, construction, conversion, enlargement, repair, modernization, or development cost.

(b) Purchasing and development of land, easements, rights-of-way, building, facilities, leases, or materials.

(c) Purchasing of equipment, leasehold improvements, machinery or supplies.

(d) Pollution control and abatement.

(e) Transportation services incidental to industrial development.

(f) Startup operating costs and working capital.

(g) Sites for housing development provided the community demonstrates a need for additional housing to prevent a loss of jobs in the area, or to house families moving to the area as a result of new employment opportunities.

(h) Assistance, other than for working capital or debt refinancing, for meat processing facilities and integrated meat and poultry operations. Assistance may not be for agricultural production as defined in § 1980.615(g) of this subpart. However, recipients which are in the business of processing, marketing, or packaging of agricultural products, as well as agricultural production, may be eligible for assistance for that portion of the business other than agricultural production, provided the agricultural production aspect is separate from the rest of the business; e.g., the production aspects are handled through separate legal business entities or through maintenance of the accounting system in such manner as to clearly identify the use of and future accounting of the assistance proceeds and operation of the business.

(i) Aquaculture including conservation, development, and utilization of water for aquaculture. Aquaculture means the culture or husbandry of aquatic animals or plants by private industry for commercial purposes including the culture and growing of fish by private industry for the purpose of granting or augmenting publicly-owned or regulated stock of fish.

(j) The growing of mushrooms or hydroponics.

(k) Commercial nurseries primarily engaged in the production of ornamental plants and trees and other nursery products such as bulbs, florists' greens, flowers, shrubbery, flower and vegetable seeds, sod, the growing of vegetables from seed to the transplant stage.

(l) Project forestry which includes establishments primarily engaged in the operation of timber tracts, tree farms, forest nurseries, and related activities such as reforestation.

(m) For the recipient only, interest (including interest on interim financing) during the period before the first principal payment becomes due or the facility becomes income producing, whichever occurs first.

(n) Industrial sites or parks, provided there exists current and firm written commitments from businesses to locate in the park, which will adequately and directly retain and/or create jobs.

(o) Feasibility studies.

(p) Reasonable fees and charges to the recipient *only* as specifically listed in this paragraph. Authorized fees include loan packaging fees and loan closing costs, environmental data collection fees, and other professional fees rendered by professionals generally licensed by individual State or accreditation associations, such as Engineers, Architects, Lawyers, Accountants, and Appraisers. The amount of fee will be what is reasonable and customary in the community or region where the recipient is located. For example, Architects and Engineers customarily charge fees based on a percentage of estimated project costs. Lawyers, Accountants, and Appraisers customarily charge for services on an hourly basis. Any fees for professional or expert services are to be fully documented and justified on Form FmHA 1980–60. The fees and charges referred to in this paragraph may be funded only from loan proceeds and are subject to review and concurrence by FmHA.

(q) Subject to the limitations defined in § 1980.615 (e) and (f), of this subpart refinancing recipient creditors may be allowed in connection with viable projects, when it is determined that refinancing is necessary to create and/or retain jobs or when it is necessary to convert short-term debt into longer term debt to allow the recipient to improve its cash flow position in such a manner that the recipient can expand to provide additional employment opportunities.

**§ 1980.615 Financial assistance—ineligible purposes.**

Financial assistance, as defined by § 1980.605(c) of this subpart, may not be used by the NNC for the following:

(a) To pay the NNC's own salaries for office or clerical assistance, NNC administrative, transportation, or publication costs and expenses.

(b) For distribution or payment to the owners, partners, shareholders, or beneficiaries of the recipient or members of their families when such persons will retain any portion of their equity in the project.

(c) For assistance to government employees, military personnel, or principals or employees of the NNC who are directors, officers or have ownership or hold stock in the business.

(d) For the transfer of ownership of the recipient unless the loan will keep the business from closing, or prevent the loss of employment opportunities in the area, or provide expanded job opportunities.

(e) To refinance creditors in excess of the market value of the collateral.

(f) To refinance a recipient creditor if the recipient creditor is the affiliate, a lender, or the NNC as defined in § 1980.605 (a), (d), and (f) of this subpart, or if the recipient creditor is an agency of the Federal Government.

(g) For agricultural production, which means the cultivation, production (growing), and harvesting, either directly or through integrated operations of agricultural products (crops, animals, birds and marine life either for fiber or food for consumption), and the disposal or marketing thereof; and the raising, housing, feeding (including commercial, custom feedlots), breeding, hatching, control and/or management of farm and domestic animals.

(h) For any legitimate business activity when more than 10 percent of the annual gross revenue is derived from legalized gambling activity.

(i) For any illegal project activity.

(j) For hotels, motels, tourist homes or convention centers.

(k) For any tourist, recreation or amusement facility, including ski areas and scenic gondolas.

(l) For financing community antenna television services or related facilities.

(m) Charitable and educational institutions, churches, organizations affiliated with or sponsored by churches, and fraternal organizations.

(n) For any project in a city or town with a population in excess of twenty thousand as determined by the latest decennial census.

(o) For any otherwise eligible project that is in violation of either a Federal, State or local environmental protection law or regulation or an enforceable land use restriction unless the financial assistance required will result in curing or removing the violation.

**§§ 1980.616 through 1980.620 [Reserved]**

**§ 1980.621 Availability of other credit.**

The inability to obtain credit from other sources is not a requirement for assistance under this subpart.

**§ 1980.622 Limitations on FmHA assistance.**

(a) FmHA guaranteed loan and/or grant funds will not be used to finance more than 75 percent of the total cost of a recipient's project. The total combined outstanding FmHA assistance from all programs may not exceed $500,000 to any one recipient. The difference between the total project cost and the funds provided by FmHA must come from other sources of financing and/or

VOL 54 ISS 47 MR 13 1989 UMI

NNC or recipient contributions. In no event, will grant and/or guaranteed loan funds from the NNC program exceed $500,000 to any one recipient during that recipient's lifetime.

(b) Normally, the percentage of guarantee will be 80 percent or less, but never more than 90 percent.

(c) Once FmHA has released grant funds or has authorized the release of guaranteed loan funds, in amounts equal to the grant or loan(s) guaranteed by FmHA, as applicable, the requirements imposed on the NNC under this subpart shall not be applicable to any new projects thereafter financed by the NNC. Such new projects shall not be considered as being derived from Federal funds.

**§ 1980.623 The guaranteed loan.**

(a) *Documentation.* The interest rate and term of the guaranteed loan must be specifically documented and justified on Form FmHA 1980–60 or on an addendum to the form at the time the application is submitted to FmHA. Interest rate and term will be subject to FmHA approval.

(b) *Interest rate.* Interest rates, fixed, variable or a combination of the two, will be negotiated between the lender and the NNC applicant. Interest rates will be those rates reasonably and customarily charged loan recipients in similar circumstances in the ordinary course of business.

(c) *Interest rate changes.*

(1) Any change in the interest rate between the date of issuance of the commitment for guarantee and the date of issuance of the loan guarantee must be fully justified in writing and is subject to FmHA review and approval.

(2) A variable interest rate must be a rate that is tied to a base rate published periodicially in a recognized national or regional financial publication specifically agreed to by the lender and the NNC applicant on Form FmHA 1980–60. The interest rate must rise and fall with the selected base rate. Changes in the rate cannot be retroactive and can be made no more often than quarterly. Floors and ceilings on variable interest rates will be allowed at the option of the NNC.

(3) The NNC and the lender may effect a permanent reduction in the interest rate of the FmHA guaranteed loan at any time during the life of the loan upon written agreement between the two parties. FmHA must be notified by the lender, in writing, within ten calendar days of the change.

(i) A fixed rate cannot be changed to a variable rate unless the variable rate has a ceiling which is less than the original fixed rate.

(ii) A variable rate can be changed to a reduced fixed rate.

(4) No increases in interest rates will be permitted under the FmHA loan guarantee except the normal fluctuations in FmHA approved variable interest rate loans.

(d) *Term.* The maximum time allowable for final maturity for an FmHA guaranteed loan is ten years.

(e) *Promissory note.* (1) The lender must incorporate within the variable rate promissory note, a provision for adjustment of payment installments coincident with an interest rate adjustment. This will assure that the outstanding principal balance is properly amortized within the prescribed loan maturity to eliminate the possibility of a balloon payment at the end of the loan. Balloon payments are not permissible for any financial assistance provided to either an NNC or a recipient under this program.

(2) The lender is responsible for the legal documentation of interest changes by an allonge attached to the promissory note(s) or any other legally effective amendment of the rate(s); however, no new note may be issued.

(3) In a final loss settlement, when qualifying rate changes were made in accordance with paragraph (c)(3) of this section, the interest will be calculated for the periods the given rates were in effect, except that interest claimed on a loan which originated at a variable rate can never exceed the amount which would have been eligible for claim had the variable interest remained in force. The lesser cost to the Government will always prevail. The lender must maintain records which adequately document the accrued interest claimed.

(4) FmHA will not guarantee any loan in which the promissory note or any other document provides for the payment of interest upon interest.

(5) Ordinarily, monthly payments of principal and interest are expected. However, the first repayment of principal may be scheduled for payment after the NNC has begun to generate income from projects financed with FmHA funds, but no later than three years from the date of the promissory note and at least annually thereafter. Payments on interest will not be deferred and will be due at least annually from the date of the note.

(Refer to Appendix A to Subpart C—Administrative Provisions)

**§ 1980.624 Full faith and credit.**

The loan guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which the lender has actual knowledge at the time it becomes such lender or which lender participates in or condones. A note which provides for payment of interest on interest is void. The loan guarantee will be unenforceable by the lender to the extent any loss is occasioned by violation of usury laws, negligent servicing or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing. Any losses occasioned will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by FmHA in its Form FmHA 1980–61, "Commitment for Guarantee." Negligent servicing is defined as the failure to perform those services which a reasonable, prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonable, prudent lender would act up to the time of loan maturity or until a final loss is paid.

**§§ 1980.625 through 1980.627 [Reserved]**

**§ 1980.628 The grant—general.**

(a) A grant may be made to complement a loan guarantee to an NNC, subject to the terms and conditions of this subpart.

(b) A grant may be used for technical assistance purposes as defined by § 1980.613 of this subpart and/or for financial assistance purposes as defined by § 1980.614 of this subpart.

(c) Grants will be awarded only from appropriated funds specifically allocated for this program.

(d) Before assistance in the form of an FmHA grant will be considered, one or more of the following criteria must be present and evidence thereof included as supporting documentation for Form FmHA 1980–60:

(1) A critical employment situation exists as measured by unemployment, underemployment, and low family income levels.

(2) Significant financial support from public agencies and/or private organizations exists as evidenced by the applicant's plan.

(3) Use of loan funds and funds from other sources alone will not make the applicant's plan economically feasible.

(e) Once Form FmHA 1940–1, "Request for Obligation of Funds," has been executed by FmHA and the NNC, the NNC has 180 calendar days to close the guaranteed loan. If the loan is not closed within this time period, FmHA may, at its option, demand repayment of the original principal amount of the grant with interest.

**§ 1980.629 Lenders—general.**

(a) As supporting documentation for Part B of FmHA Form 1980–60, each proposed lender must provide FmHA with:

(1) Evidence of lender's organizational structure, including evidence of which agency or authority, if any, supervises the lender, and

(2) A copy of the lender's most recent annual report or audit, conducted by an independent public accountant, which demonstrates that the lender has the necessary financial solvency and resources to carry out its responsibilities under this program.

(b) A lender may use agents, correspondents, branches, financial experts or other institutions or persons to provide expertise and assistance in performing its responsibilities under this program.

(c) If there is more than one lender, the lenders in conjunction with the NNC, may select one to be the lead lender, whose responsibility it will be to coordinate part or all of the loan processing and servicing functions between the NNC, FmHA and the other lenders.

**§ 1980.630 Security.**

(a) It is the responsibility of the lender to obtain and to maintain in existence and of record, adequate security to protect the interests of the lender and FmHA.

(b) Security must be of a nature that repayment of the loan is reasonably assured when considered in conjunction with the integrity and ability of NNC management, the fiscal solvency of the NNC and the NNC's prospective earnings.

(c) Security may include, but is not limited to: land, buildings, machinery, equipment, furniture, fixtures, inventory, accounts receivable, cash or special cash security accounts, marketable securities, and cash surrender value of life insurance. Security may also include assignments of leases or leasehold interest, revenues, patents, and copyrights. However, lease assignments taken as security will not be guaranteed by FmHA under this program.

(d) All security must secure the entire loan. The lender will not take separate security to secure only that portion of the loan or loss not covered by the guarantee. The lender will not require compensating balances or certificates of deposit as a means of eliminating the lenders exposure on the guaranteed portion of the loan. However, compensating balances as used in the ordinary course of business may be used.

(e) Normally acceptable security for FmHA guaranteed loans would consist of an assignment of notes and related security instruments securing the financial assistance from the NNC to the recipients, as well as a security interest in cash held by the NNC and its affiliates stemming from FmHA-related funds, cash from the repayments of recipient loans, and any other security as required by the lender.

**§ 1980.631 Conflict of interest.**

When Form FmHA 1980–60 is submitted to FmHA, FmHA requires written disclosure of any legal ownership or financial interest, and any existing financial transactions between the NNC applicant and the proposed lender or between principals of these two legal entities. FmHA shall determine whether such ownership or financial transaction is sufficient to create a potential conflict of interest. In the event FmHA determines there is a conflict of interest, the FmHA assistance to the NNC applicant will not be approved until such conflict is eliminated. If a conflict of interest is discovered after a commitment for guarantee has been issued but before the loan guarantee has been issued, the conflict of interest must be eliminated or the loan will not be guaranteed.

**§ 1980.632 Fees and charges.**

All fees and charges between the lender, the NNC, the affiliate, and the recipient, must be specifically documented and justified on Form FmHA 1980–60, or on an addendum to the application at the time the application is submitted to FmHA for processing. All fees and charges are subject to FmHA review and concurrence.

(a) *Recipient.* Fees and charges to the recipient may be made only as specifically listed in § 1980.614(p) of this subpart.

(b) *NNC.* Fees and charges to the NNC will be those reasonably and customarily charged loan recipients in similar circumstances in the ordinary course of business and may be paid with loan funds at the time the FmHA guaranteed loan is closed.

(c) *Late payment charges.* Under no circumstances will late payment charges and any interest accruing to such charges be covered by the FmHA loan guarantee or be added to the principal and interest due under any guaranteed note. However, these conditions do not preclude there being a charge for late payment provided:

(1) Late payment charges are routinely made by the lender/NNC in all types of loan transactions.

(2) Payment has not been received within the customary timeframe allowed by the lender/NNC. The term "payment received" means that the payment in cash or by check money order, or similar medium has been received by the lender/NNC at its main Office, branch Office, or other designated place of payment.

(3) The parties involved agree in writing that the rate or method of calculating the late payment charges will not be changed to increase charges while the loan guarantee is in effect.

(d) *Packaging fee.* The NNC may contract with the lender or another party, including the affiliate, to assist in the preparation and submission of the NNC's application to FmHA, Form FmHA 1980–60. A fee for this packaging service may be charged to the NNC and paid with loan funds at the time the FmHA guaranteed loan is closed. The maximum allowable packaging fee is 2 percent of the total principal amount of the loan as reflected by the commitment(s) for guarantee issued by FmHA.

**§ 1980.633 The NNC plan and scope of work.**

FmHA requires that technical and financial assistance to recipients be administered in accordance with a plan, developed by the NNC applicant and approved by FmHA. The NNC plan must define specific objectives (refer to § 1980.602 of this subpart) and operating procedures, including standards and selection criteria for technical and/or financial assistance. The plan will be submitted to FmHA as part of Form FmHA 1980–60. The proposed lender will be provided with a copy of the plan and will attach its written evaluation of the plan to Part B of Form FmHA 1980–60. At a minimum, the plan must cover the following items:

(a) Demonstrate a need for guaranteed loan and grant funds. At a minimum, the applicant must identify a sufficient number of recipients requiring assistance equal to the amount of assistance requested from FmHA.

(b) Demonstrate the applicant's ability to administer a national rural development loan program in accordance with the provisions of this subpart. The applicant must provide a complete listing of all personnel responsible for administering this program along with a statement of their qualifications and experience. The personnel may be either members or

VOL 54 ISS 47 MR 13 1989 UMI

employees of the applicant's organization or contract personnel hired for this purpose. If the personnel are contracted for, the contract between the applicant and the entity providing such service will be submitted for FmHA's review.

(c) Demonstrate to FmHA's satisfaction that the applicant is affiliated with or has a working relationship with State rural development and finance organizations (affiliates) in three or more States.

(d) Provide evidence to FmHA's satisfaction that the applicant has a successful record of obtaining and managing private and/or philanthropic funds.

(e) Demonstrate the applicant's ability to commit financial resources under the control or the applicant to assist in the establishment of a rural development and finance program. This should include a statement of the source(s) of funding for the guaranteed loan(s) and source(s) of non-FmHA funds for administration of the applicant's operations, as well as financial and technical assistance for projects.

(f) Demonstrate to FmHA's satisfaction that the applicant has secured commitments of significant financial support from public agencies and/or private organizations for the establishment of a rural development and finance program.

(g) Include a proposal for providing adequate security for the FmHA guaranteed loan. The proposal should specifically address those items of security outlined in § 1980.630 of this subpart.

(h) Include a detailed statement of the proposed use of FmHA grant funds. Grant funds will be advanced in reasonable proportion to the use of loan guarantee funds. Therefore, an outline is required describing what will constitute project eligibility for grant related financial and technical assistance as a complement to the FmHA guaranteed loan funds the applicant will make available to recipients (refer to § 1980.628(d) of this subpart for other criteria which must be addressed).

(i) Identify what activities will constitute technical assistance to projects it assists (refer to § 1980.613 of this subpart for further details).

(j) Include a list of proposed fees and other charges it will assess the recipients it funds (refer to §§ 1980.614(p) and 1980.632 of this subpart for further details).

(k) The applicant's plan for relending the grant and/or guaranteed loan funds must be of sufficient detail to provide FmHA with a complete understanding of what the applicant will accomplish by lending the funds to the recipient. A scope of work, prepared by the applicant, will provide the complete mechanics of how the funds will get from the applicant to the recipient. The eligibility criteria, the application process, method of disposition of the funds to the recipient, monitoring of the recipient's accomplishments and reporting requirements by the recipient's management are examples of the items that must be addressed. The scope of work must require all recipients to provide a certification similar to that provided in §1980.643(p).

**§§ 1980.634 through 1980.640 [Reserved]**

**§ 1980.641 Filing application deadline.**

Subject to the availability of funds, applicants and lenders desiring FmHA assistance as provided in this subpart should file applications with the FmHA National Office, Assistant Administrator, Community and Business Programs, Washington, DC 20250 between January 1 and March 31 each fiscal year.

**§ 1980.642 Priority.**

The application and supporting documentation will be used to determine the applicant's priority for available funds. The following specific criteria will be considered in the competitive selection of loan guarantee and/or grant recipients:

(a) The proposal will improve business, industry and employment, specifically the direct retention and/or creation of jobs in rural areas.

(b) The proposal will provide financial and technical assistance to projects that wil provide services to the farm community, provide opportunities for employment for displaced farm families, and supplement farm family income through the use of farm labor and products.

(c) The proposal will stimulate and involve financial and technical assistance from public or private organizations in the development of projects under this program.

(d) The applicant has a proven record of successfully assisting rural business and industry. Such proof will normally consist of:

(1) The number of past and present loans the applicant has made and serviced that are similar in nature to the purpose of this program.

(2) The delinquency rate on the loans in the applicant's portfolio.

(3) The background and expertise of the applicant's staff that will be making and servicing the portfolio.

(4) The capitalization of the NNC applicant for making such loans.

(e) The proposal will be cost effective, including but not limited to: the ratio of projects to total cost of the proposal and the ratio of total jobs directly retained and/or created to the total cost of the proposal.

**§ 1980.643 Developing the application.**

A complete application will consist of the following:

(a) Form FmHA 1980–60, Part A completed by the NNC applicant and Part B completed by the lender with lender's evaluation and recommendations.

(b) Form FmHA 1940–20, as defined by § 1980.611 of this subpart and by Subpart G of Part 1940 of this chapter.

(c) Projected balance sheets, cash flow and earnings statements for at least 3 years supported by a list of assumptions showing the basis for the projections.

(d) Financial statements for the past 3 years or since the inception of the organization, and a recent audit prepared by an independent public accountant which demonstrates the applicant has financial solvency and resources necessary to carry out the intent of this program.

(e) A certificate of indebtedness detailing outstanding debt by name and address of creditor, account number, original principal amount, rate, term, installment amount and frequency, outstanding principal and interest, security, and current status.

(f) NNC applicant's plan and scope of work as defined by § 1980.633 of this subpart.

(g) Certified copies of the applicant's organizational documents (i.e., articles of incorporation and bylaws) and a certificate of good standing from the State in which the applicant is incorporated. The organizational documents must reflect that the applicant is authorized to carry out the provisions of the NNC program; which includes the authorization to borrow and to lend money, as well as to give and accept security for said monies.

(h) List of all members of the governing body including officers and term of office.

(i) Resolution of members authorizing appropriate officials to apply for FmHA assistance and to execute the necessary documents to obtain such assistance.

(j) Certificates of authority to do business in three or more States.

(k) Written approval to administer a loan program, as provided for in this subpart, by the Governor of each State in which the applicant intends to operate.

(l) A list of recent creditors (by name, address and account number) with whom FmHA may check to verify credit history.

(m) Preliminary opinion of lender's legal counsel relative to applicant's organizational structure and legal authority necessary to become involved with a loan guarantee.

(n) Preliminary opinion of applicant's legal counsel relative to applicant's organizational structure and legal authority necessary to become involved with a loan guarantee and/or grant.

(o) For the proposed affiliate(s), evidence of organizational structure (e.g. articles of incorporation) and documentation relative to that organization's goals and accomplishments.

(p) Applicant will certify that it is not presently suspended, debarred, proposed for debarment, declared ineligible or voluntarily excluded from any Federal program, has not had a Federal program terminated for cause or does not presently have an officer, major shareholder, partner or owner under indictment or conviction for fraud or criminal offense in connection with any Federal program in accordance with Executive Order 12549 and USDA Uniform Assistance Regulation Part 3017. Federal program includes activities involving Federal financial and nonfinancial assistance and benefits. If such a certification cannot be provided, the applicant will submit a written explanation.

(q) Any additional information requested by FmHA.

**§ 1980.644 [Reserved]**

**§ 1980.645 FmHA review of application.**

The "Lists of Parties Excluded from Federal Procurement or Nonprocurement Programs" will be reviewed in connection with all NNC applications.

(a) All loan guarantee and/or grant applications will be approved or rejected, and both the NNC applicant and the proposed lender (when appropriate) will be notified in writing by FmHA, normally within 45 calendar days after March 31 of each year.

(b) If an application is not complete, the NNC applicant and the proposed lender (when appropriate) will be notified in writing of the specific items missing from the application, not later than 20 calendar days after the receipt of the application by FmHA.

(c) NNC applicants who are eligible, but do not have the priority necessary for further consideration will be notified with a letter which includes the following statements:

(1) "Your proposal cannot be funded within the available funds."

(2) "You are advised against incurring obligations which cannot be fulfilled without FmHA funds."

(d) NNC applicants that are eligible for funding within the available funds will be provided with further processing instructions.

(e) If an application is rejected, the NNC applicant and the proposed lender (when appropriate) will be notified in writing of the specific reasons for the rejection. The notification will state that a review of this decision by FmHA may be requested in accordance with § 1980.698 of this subpart and Subpart B of Part 1900 of this chapter.

(Refer to Appendix A to Subpart G—Administrative Provisions)

**§ 1980.646 Loan guarantee and/or grant approval and fund obligation.**

(a) *Commitment for guarantee.* (1) If an application for a loan guarantee is approved, FmHA will issue Form FmHA 1980–61 along with an attachment containing any additional requirements of the commitment, including, but not limited to: percent guarantee, repayment terms, security, guarantee fee, loan agreement, use of loan proceeds, loan servicing, inspections, lender's certification, limitations on sale of guarantee, intergovernmental reviews, environmental reviews, and conditions for issuance of Forms FmHA 1980–62 "Loan Guarantee," and FmHA 1980–63 "Nonprofit Lender's Agreement." The attachment to Form FmHA 1980–61 will include a requirement that the NNC obtain the lender's and FmHA's concurrence in the proposed use of loan funds, *prior* to making a commitment to a specific recipient (refer to § 1980.654 of this subpart for further details).

(2) The applicant and the lender must review Form FmHA 1980–61 along with any additional requirements issued by FmHA. To accept the commitment and its requirements, the lender completes that portion of Form FmHA 1980–61 entitled "Acceptance of Conditions," and returns a dated and signed copy to FmHA. If certain conditions cannot be met, the applicant and the lender may propose alternative conditions to FmHA.

(3) It is the intent of FmHA that once Form FmHA 1980–61 is issued and accepted by the lender, the application may not be modified as to the scope of the project, overall work plan concept, project purpose, use of proceeds or terms and conditions. All changes require the prior concurrence of FmHA. Only minor changes will be considered, unless otherwise provided for in this subpart. Changes in the organizational structure and/or membership of the NNC applicant (legal entity) will not be approved. If such changes within the NNC applicant do take place, FmHA will not issue a loan guarantee to the lender who holds Form FmHA 1980–61 for that applicant.

(4) If the lender accepts Form 1980–61 and subsequently decides that it no longer wants a loan guarantee, the lender will immediately advise both the NNC applicant and FmHA in writing.

(b) *Grant.* (1) If an application for a grant is approved, the revised scope of work, and Forms FmHA 400–1, FmHA 400–4, and FmHA 1940–1 will be forwarded to the applicant for execution and return to FmHA.

(2) As with the loan guarantee, FmHA will require that the NNC obtain FmHA's concurrence in the proposed use of grant funds, prior to making a commitment to a specific recipient (refer to § 1980.654 of this subpart for further details).

(c) *Fund obligation.* Once the conditions set forth in paragraphs (a) or (a) and (b) of this section have been complied with, notice of approval of a loan guarantee and/or grant will be accomplished by sending the NNC applicant and the lender (if a guarantee is involved) copies of Form FmHA 1940–1, executed by FmHA on the obligation date.

(Refer to Appendix A to Subpart G—Administrative Provisions)

**§ 1980.647 Preguarantee review.**

Prior to loan closing and to issuance of the loan guarantee, the applicant and/or the lender will provide information for a preguarantee review by FmHA. Upon receipt of the documents listed below, FmHA will forward appropriate copies to the Office of the General Counsel (OGC) with a request for closing instructions. If the OGC requires additional information or revisions to proposed documents before issuing closing instructions, FmHA will notify the applicant and the lender (when appropriate). The advice and counsel of OGC is for the benefit of FmHA only and does not relieve the lender, NNC, or recipient from their respective responsibilities under FmHA regulations or agreements. The information for the preguarantee review will include, but is not limited to:

(a) Final draft of the loan agreement, which must include, but is not limited to:

(1) A description of loan amortization, including as an exhibit the proposed form of the promissory note (or other evidence of debt) and the structure of repayments, the interest rate, term, and conditions of the loan.

VOL 54 ISS 47 MR 13 1989 UMI

(2) A detailed description of all fees and charges to the NNC applicant.

(3) The lender's plan for servicing the loan and providing management assistance to the NNC applicant (including on-site visits to the NNC applicant as defined in § 1980.656 of this subpart).

(4) All requirements set forth by FmHA in Form FmHA 1980–61.

(5) The requirement for quarterly financial statements prepared by management and an annual audit in accordance with § 1980.656 of this subpart.

(6) General record and book-keeping requirements, including a requirement that the records be made available to the lender and/or FmHA upon request.

(7) Limitations on purchase or sale of equipment and fixed assets.

(8) Limitations on compensation of officers and members.

(9) Prohibition against the NNC applicant assuming the liabilities of any other person or entity.

(b) Final draft of operating agreements with affiliates.

(c) Proposed copy of note, mortgage, financing statement, security agreement, assignment, resolution, and any other documents which the lender expects the applicant to sign on the day of loan closing.

(d) Evidence that the lender has met or will meet all requirements attached to the Form FmHA 1980–61.

(e) Draft copy of Form FmHA 1980–63.

(f) Proposed final opinion of lender's legal counsel to include counsel's review of security instruments and closing documents.

(g) Proposed final opinion of applicant's legal counsel to include counsel's review of security instruments and closing documents.

(h) Draft copy of Form FmHA 1980–10, "Guaranteed Loan Closing Report."

(i) A proposed timetable for visits to the NNC by the lender as defined in § 1980.658 of this subpart.

(j) Evidence of fidelity bond coverage for the positions of person entrusted with the receipt and disbursement of its funds and the custody of valuable property. The amount of the bond will be at least equal to the maximum amount of money that the applicant will have on hand at any one time, exclusive of funds deposited in a bank account where the withdrawal of funds is contingent upon the countersignature of a person outside the applicant organization. A certified power of attorney, with effective date, will be attached to each bond.

(Refer to Appendix A to Subpart G—Administrative Provisions)

**§ 1980.648 Loan guarantee and/or grant closing.**

(a) *Loan guarantee.* Once loan closing instructions have been received from OCG, FmHA will work with the applicant and the lender to complete loan closing plans and to establish a mutually acceptable closing date.

(1) At loan closing, the following items will be executed and appropriate copies provided to FmHA.

(i) Forms FmHA 400–1 and FmHA 400–4 unless previously executed by the applicant.

(ii) Lender's certification to the following:

(A) No major changes have been made in the lender's loan conditions and requirements since the issuance of the commitment for guarantee except those approved in the interim by FmHA in writing.

(B) Truth in lending requirements have been met.

(C) All equal employment opportunity and nondiscrimination requirements have been or will be met at the appropriate time.

(D) The loan has been properly closed, and the required security instruments have been obtained, or will be obtained on any after acquired property that cannot be covered initially under State law.

(E) All other requirements of the commitment for guarantee have been met.

(F) Lien priorities are consistent with requirements of the commitment for guarantee.

(G) The loan proceeds have been, or will be, disbursed for purposes and in amounts consistent with this subpart, the commitment for guarantee, and Form FmHA 1980–60. A copy of a detailed loan settlement statement of the lender will be attached to support this certification.

(H) There has been no material adverse change(s) in the NNC's financial condition nor any other adverse change in the NNC during the period of time from FmHA's issuance of the commitment for guarantee to issuance of the loan guarantee. The lender's certification must address all adverse changes of the NNC and be supported by financial statements of the NNC not more than 60 days old at the time of certification. For purposes of this paragraph, the term "NNC" includes additionally any parent, affiliate, or subsidiary of the NNC. A copy of the financial statements must be submitted to FmHA.

(iii) Final loan agreement.

(iv) Note, mortgage, financing statement, security agreement, assignment, resolution, and all other documents required by the lender.

(v) Final opinion of lender's legal counsel.

(vi) Final opinion of applicant's legal counsel.

(vii) Any additional items required by FmHA.

(2) If FmHA determines that all closing requirements have been met, FmHA will:

(i) Execute Form FmHA 1980–63. FmHA will retain the original and a signed duplicate original will be retained by the lender. A Form FmHA 1980–63 must be executed for all loans guaranteed by FmHA.

(ii) Execute Form FmHA 1980–62. The original of Form FmHA 1980–62 will be attached to the original note and delivered to the lender, who will concurrently deliver the guarantee fee. A conformed copy of the form with a copy of the note attached will be retained by FmHA.

(iii) Execute Form FmHA 1980–19 which will be sent to the FmHA Finance Office with the guarantee fee. The fee will be one percent (1%) of the principal loan amount multiplied by the percent of guarantee, paid one time only at the time the loan guarantee is issued. The fee will be paid to FmHA by the lender and is nonrefundable. The fee may be passed on to the NNC.

(b) *Grant.* (1) Grants will be closed in accordance with this subpart, applicable parts of Subpart G of Part 1942 of this chapter, and any closing instructions from the Regional Attorney, OGC.

(2) Grants will be considered closed when Form FmHA 1940–1 is executed by the NNC and by FMHA.

(Refer to Appendix A to Subpart G—Administrative Provisions)

**§ 1980.649 FmHA refusal to execute loan guarantee or grant.**

If FmHA determines that it cannot execute the loan guarantee or grant because all requirements have not been met, it will promptly inform the lender or NNC applicant, as appropriate, of the reason(s) for the refusal in writing. FmHA will give the lender or NNC applicant a reasonable period within which to satisfy FmHA objections. If the lender or NNC applicant writes FmHA within the period allowed requesting additional time to satisfy the objections, FmHA may, in writing, allow such additional time as it considers necessary and reasonable under the circumstances. If the objections are satisfied within the time allowed, the guarantee or grant, as appropriate, may be executed.

**§§ 1980.650 through 1980.653 [Reserved]**

**§ 1980.654 Disbursement of FmHA loan guarantee and/or grant funds.**

(a) *General.* FmHA grant funds will be disbursed by FmHA in accordance with the provisions of USDA Uniform Federal Assistance Regulation Part 3015. FmHA guaranteed loan funds will be disbursed by the lender to the NNC upon completion of all or part of the project(s). Funds will be disbursed to the NNC in amounts corresponding to the proportionate quantity of work completed and in accordance with the loan agreement. For each project, a final written certification from the NNC to the lender is required, stating that the acquisition of property, plant, and equipment in an amount equal to the guaranteed loan funds disbursed to the NNC by the lender has been completed.

(b) *Release of technical assistance funds.* (1) The NNC is responsible for providing the FmHA State Office with a project description (refer to Appendix D of this subpart) and intergovernmental review data as defined in § 1980.610 of this subpart.

(2) Once the National Office has received intergovernmental review clearance from the State Office, the NNC may request grant funds from the National Office by submission of Standard Form (SF) 270 "Request for Advance or Reimbursement." An SF–270 should be submitted not more than once a month. Ordinarily, payment will be made within 30 days after receipt of proper request for reimbursement. When the NNC submits an SF–270, it will also submit, simultaneously, a statement identifying the recipients to be assisted and the type of assistance they are to receive.

(c) *Release of financial assistance funds.* (1) The NNC is responsible for providing the FmHA State Office with a project description (Appendix D of this subpart), intergovernmental review data (as defined by § 1980.610 of this subpart), environmental data (as defined by § 1980.611 of this subpart) and the following:

(i) A lender certification (only if guaranteed loan funds are involved). For each recipient, the lender must require and certify to each of the following:

(A) Security will be adequate in accordance with § 1980.630 of this subpart.

(B) No claim or liens of laborers, materialmen, contractors, subcontractors, suppliers of machinery and equipments or other parties are against the collateral of the NNC, and that no suits are pending or threatened that would adversely affect the collateral of the NNC when the security instruments are filed.

(C) Hazard insurance with a standard mortgage clause naming the NNC as beneficiary will be required on every recipient in an amount that is at least the lesser of the depreciated replacement value of the property being insured or the amount of the loan. Hazard insurance includes fire, windstorm, lightning, hail, business interruption, explosion, riot, civil commotion, aircraft, vehicle, maring, smoke, builder's risk, public liability, property damage, flood or mudslide, or any other hazard insurance that may be required to protect the collateral. The NNC's interest in the insurance will be assigned to the lender.

(D) Ordinarily, life insurance, which may be decreasing term insurance, is required for the principals and key employees of the recipient and will be assigned or pledged to the NNC and subsequently to the lender. A schedule of life insurance available for the benefit of the loan will be included as part of the recipient's application.

(E) Workmen's compensation insurance on projects is required in accordance with State law.

(F) If other financing is involved with the FmHA-related assistance to the NNC or the recipient, then the FmHA assistance will be secured with a lien position superior to or on a parity basis with that of the other source of financing.

(G) Provide concurrence in the project to be funded.

(ii) An NNC certification (if guaranteed loan and/or grant funds are involved). For each recipient, the NNC will be required to certify to the following, plus the requirements in paragraphs (c)(1)(i) (A) through (G) of this section.

(A) Recipient's project is located in an eligible area.

(B) At least 51 percent of the outstanding interest in the recipient has membership or is owned by those who are either citizens of the United States or reside in the United States after being legally admitted for permanent residence.

(C) FmHA grant/guaranteed loan funds will not exceed 75 percent of total project cost.

(D) Recipient does not have a total combined outstanding amount of FmHA assistance (grant and/or guaranteed loan) in excess of $500,000.

(E) Funds will be used for eligible purposes as defined by § 1980.614 of this subpart.

(F) Recipient meets objective and purpose of program.

(G) Recipient has other public and/or private investment funds.

(H) Recipient will, to the maximum extent possible, use local labor and resources (agricultural, if possible).

(I) Recipient will, to the maximum extent possible, be innovative in providing services and/or products to the public.

(J) Recipient will, whenever possible, involve the maximum use of agricultural or agricultural-related producs and services.

(K) Forms FmHA 400–1 and FmHA 400–4 will be executed by the recipient organization at project loan closing.

(2) Once the National Office has received clearance from the State Office regarding intergovernmental review, environmental assessment, NNC and, when applicable, lender certifications, the NNC may request authorization from the National Office to close the recipient loan and, if applicable, may request grant funds for that purpose by use of SF–270.

**§ 1980.655 FmHA's access to records.**

(1) *Lender records.* Upon request by FmHA, the lender will permit authorized representatives of FmHA to inspect and make copies of any of the records of the lender pertaining to FmHA guaranteed loans. Such inspection and copying may be made during regular office hours of the lender, or any other time the lender and FmHA find convenient.

(b) *NNC records.* The FmHA and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the NNC which are pertinent to the loan guarantee and/or grant program for the purpose of making an audit, examination, excerpts and transcripts.

**§ 1980.656 Loan guarantee reporting requirements.**

(a) The NNC is required to furnish quarterly financial statements during the first year after loan closing and organization-wide audited financial statements each year. Submission dates to FmHA and the lender are twenty (20) days after the end of each of the first three quarters and 90 days following the year-end.

(b) The lender will furnish FmHA with its analysis of the NNC's operations and financial statement within 30 days of receipt of such statement. FmHA in turn will evaluate the lender's analysis and follows up with the lender on servicing action(s) required or negative observations not detected through the lender's analysis.

VOL 54 ISS 47 MR 13 1989 UMI

(c) All audits are to be performed in accordance with USDA Uniform Assistance Regulation Part 3015 and with generally accepted government auditing standards (GAGAS), using the publication, "Standards for Audit of Governmental Organizations, Programs, Activities and Functions," developed by the Comptroller General of the United States in 1981, and any subsequent revisions.

**§ 1980.657 Grant reporting requirements.**

(a) A grantee (the NNC) must maintain financial management systems and retain financial records in accordance with the USDA Uniform Assistance Regulation Part 3015.

(b) Grantee records must include an accurate accounting and documentation of how these funds are used.

(c) SF-269, "Financial Status Report" and a project performance activity report will be required of all grantees on a quarterly basis. A final project performance report will be required with the last SF-269. Grantees shall constantly monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. Grantees should submit an original and one copy of each report to the FmHA National Office, Assistant Administrator, Community and Business Programs, Washington, DC 20250. The project performance reports shall include but need not be limited to the following:

(1) A comparison of actual accomplishments to the objectives established for that period. This should be based on The FmHA approved plan and scope-of-work;

(2) Reasons why established objectives were not met;

(3) Problems, delays, or adverse conditions which will materially affect attainment of planned project objectives, prevent the meeting of time schedules or objectives, or preclude the attainment of project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or contemplated to resolve the situation;

(4) Objectives established for the next reporting period; and

(5) Status of compliance with any special conditions on the use of grant funds.

(d) Grantee must report and remit interest earned on advances of grant funds deposited in interest accounts to FmHA on a quarterly basis in accordance with the USDA Uniform Assistance Regulation Part 3015.

(e) The grantee will be required to submit an audit report prepared in accordance with the USDA Uniform Assistance Regulation Part 3015.

**§ 1980.658 Loan guarantee servicing.**

The lender is responsible for servicing the guaranteed loan in accordance with the terms of Forms FmHA 1980-62 and FmHA 1980-63.

(a) *Field visits.* (1) The lender will visit the NNC quarterly during the first year after loan closing and annually each year thereafter unless problems develop. Problem and/or delinquent NNCs will be visited as frequently as need demands. The lender will also make visits upon special written request of FmHA.

(2) The lender will notify FmHA of any scheduled visits or field inspections of the NNC's operations, which may include projects after issuance of the loan guarantee. To the extent possible, FmHA will attend such inspections.

(3) Any inspections or reviews conducted by FmHA, including those with the lender, are for the benefit of FmHA only and not for other parties of interest. FmHA inspections do not relieve any parties of interest of their responsibilities to conduct necessary inspections, nor can these parties rely on FmHA's inspections in any manner whatsoever.

(b) *Annual lender/FmHA meeting.* FmHA may conduct an annual meeting with each lender or its agent with whom a loan guarantee is outstanding. The meeting may be scheduled at the time FmHA makes a periodic field inspection to the NNC's place of business. At the meeting, a review will be made of the lender's performance in loan servicing, including enforcement of conditions and covenants in the loan agreement. The observations and results of the meeting will be documented on Form FmHA 449-39, "Field Visit Review (Business and Industrial Loans)," or in similar format. Servicing exceptions on the part of the lender which are noted by FmHA will be confirmed by letter to the lender.

(Refer to Appendix A to Subpart G—Administrative Provisions and to Appendix C to Subpart G—Form FmHA 1980-63.)

**§ 1980.659 Grant servicing.**

Grants will be serviced in accordance with Subpart E of Part 1951 of this chapter.

**§ 1980.660 Transfer between lenders.**

(a) *Prior to issuance of the loan guarantee.* FmHA may approve the transfer of an outstanding commitment for guarantee from the present lender to a new eligible lender, provided there are:

(1) No changes in ownership or control of the NNC applicant,

(2) No changes in the NNC applicant's written plan or scope of work, and

(3) The new lender agrees in writing to accept all original loan conditions and agreements.

(i) To effect such a transfer, the present lender will provide FmHA with a letter stating the reasons for withdrawal from the program. The new proposed lender will execute and submit a new Part B of Form FmHA 1980-60.

(ii) If the transfer is approved, FmHA will issue a letter amending the original Form FmHA 1980-61. The new lender will acknowledge acceptance of the amendment in writing.

(b) *Subsequent to issuance of the loan guarantee.* FmHA may approve the transfer of an outstanding loan guarantee from the present lender to a new eligible lender, provided the new lender agrees to assume all original loan requirements including liabilities, servicing responsibilities, and acquiring legal title to the unguaranteed portion of the loan. Such approval will be granted only in extreme circumstances (e.g., when a lender discontinues lending operations).

(Refer to Appendix A to Subpart G—Administrative Provisions)

**§ 1980.661 Transfer between NNC's.**

The guaranteed loan and/or grant to the NNC cannot be transferred to or assumed by another NNC.

**§ 1980.662 Sale of loan guarantee.**

(a) The loan guarantee with the full faith and credit of the United States cannot be sold by the lender into the secondary market.

(b) Sale of participation interests in the guaranteed loan are acceptable, subject to the following:

(1) The lender retains the note and legal title thereto, all security for the note, and all responsibility for servicing and liquidation, and

(2) The FmHA guarantee extends only to the lender and not to participants, and

(3) Participation cannot be sold to an NNC or to a principal of an NNC, and

(4) The lender must retain in its own portfolio a minimum of five percent of the total guaranteed loan and this amount must be from the unguaranteed portion of the loan.

**§§ 1980.663 through 1980.669 [Reserved]**

**§ 1980.670 Defaults by NNC.**

(a) The lender will notify FmHA when an NNC is thirty (30) days past due on a payment or if the NNC has not met its responsibilities of providing the required financial statements to the lender or is otherwise in default. The lender will notify FmHA of the status of an NNC's default on Form FmHA 1980-44, "Guaranteed Loan Borrower Default Status."

(b) In case of any monetary or material non-monetary default under the loan agreement, the lender is responsible for arranging a meeting with FmHA and the NNC to resolve the problem. A memorandum of the meeting, individuals who attend, and a summary of the problem and proposed solutions will be prepared by the FmHA representative and retained in the loan file. The lender and the NNC will be notified in writing of any decision reached by FmHA.

(c) In considering servicing options, the prospects for providing a permanent cure without adversely affecting the risks of FmHA and the lender must become the paramount objective. Temporary curative actions such as payment deferments, moratoriums on payments or collateral subordination, if approved, must strengthen the loan and be in the best interests of the lender and FmHA.

(d) Consultant services may be used to assist FmHA and the lender in determining which servicing action is appropriate. Any servicing actions taken by the lender must have the prior written concurrence of FmHA and will be paid for by the lender.

(e) The National Office may, at its option, assume the servicing responsibility on individual cases.

(Refer to Appendix A to Subpart G—Administrative provisions and to Appendix C to Subpart G—Form FmHA 1980-63.)

**§ 1980.671 Liquidation.**

(a) If the lender concludes that liquidation of a guaranteed loan account is necessary because of one or more defaults or third party actions that the NNC cannot or will not cure or eliminate within a reasonable period of time, a meeting will be arranged by the lender with FmHA. When FmHA concurs with the lender's conclusion or at any time concludes independently that liquidation is necessary, it will notify the lender and the matter will be handled in accordance with Form FmHA 1980-63.

(b) If a lender acquires title to property either through voluntary conveyance or foreclosure proceeding, FmHA may elect to permit the lender the option to calculate the final loss settlement using the net proceeds received at the time of ultimate disposition of such property. The lender must submit its written request for this option to FmHA, and FmHA must agree, prior to the lender submitting any request for estimated loss payment.

(Refer to Appendix A to Subpart G—Administrative Provisions and Appendix C to Subpart G—Form FmHA 1980-63.)

**§ 1980.672 Protective advances.**

Protective advances are advances made by the lender for the purpose of preserving and protecting the collateral where the NNC has failed to and will not or cannot meet its obligations. Generally, protective advances are made only when liquidation is under consideration or in process. Protective advances must constitute an indebtedness of the NNC to the lender and be secured by the security instrument(s). Written authorization by FmHA is required on all protective advances which exceed a total cumulative advance of $500 to the same NNC. Protective advances include, but are not limited to, advances made for taxes, annual assessments, ground rent, hazard or flood insurance premiums affecting the collateral, and other expenses necessary to preserve or protect the security. Attorney fees are not a protective advance. Protective advances will not be made in lieu of additional loans, in particular, working capital loans.

(Refer to Appendix C—Form FmHA 1980-63.)

**§§ 1980.673 through 1980.696 [Reserved]**

**§ 1980.697 Bankruptcy.**

(a) It is the lender's responsibility to protect the guaranteed loan debt and all the collateral securing it in bankruptcy proceedings. These responsibilities include but are not limited to the following:

(1) When the potential for bankruptcy becomes apparent, the lender will promptly inform FmHA and will keep FmHA adequately and regularly informed in writing of all aspects of any backruptcy proceedings.

(2) The lender will file a proof of claim where necessary and all the necessary papers and pleadings concerning the case.

(3) The lender will attend and where necessary participate in meetings of the creditors and all court proceedings.

(4) The lender, whose collateral is subject to being used by the trustee in bankruptcy, will immediately seek adequate protection of the collateral.

(5) Where appropriate, the lender should seek involuntary conversion to a liquidating proceeding or seek dismissal of the proceedings.

(b) In a Chapter 11 reorganization, if an independent appraisal is necessary in FmHA opinion, FmHA and the lender will share such appraisal fee equally.

(c) Expenses on Chapter 11 reorganization cases are not to be deducted from the collateral proceeds. Reasonable and customary liquidation expenses may be deducted from the collateral proceeds in liquidation cases under Chapter 7 or section 1123(b)(4) *liquidations* provided the lender presents a written justification for each expense, secures FmHA's written concurrence prior to incurring the expense, and the lender conducts the liquidation.

(d) An estimated loss payment may be filed by the lender at the initiation of a Chapter 7 proceeding or after a Chapter 11 proceeding becomes a liquidation proceeding. On loans in bankruptcy, any loss payment must be handled in accordance with the Form FmHA 1980-63 and be approved by the Administrator.

(e) The Administrator or designee, with the assistance of the Regional Attorney for the area in which the NNC is located, will perform the required functions necessary to protect the interest of the Government for the grant only.

(Refer to Appendix A to Subpart G—Administrative Provisions.)

**§ 1980.698 Appeals.**

Any adverse decision made by FmHA relative to the loan guarantee and/or grant may be appealed by the NNC or lender under Subpart B of Part 1900 of this chapter.

(Refer to Appendix A to Subpart G—Administrative Provisions.)

**§ 1980.699 Exception authority.**

The Administrator may, in individual cases, make an exception to any requirement or provision of this subpart which is not inconsistent with the authorizing statute, an applicable law or decision of the Comptroller General, if the Administrator determines that application of the requirement or provision would adversely affect the Government's interest. The basis for this exception will be fully documented. The documentation will identify the particular requirement involved, explain the adverse effect on the Government's interest and show how the adverse impact will be eliminated or minimized if the exception is made.

**§ 1980.700 OMB Control Number.**

The collection of information requirements in this regulation have been approved by the Office of Management and Budget and assigned OMB Control Number 0575-0121.

VOL 54 ISS 47 MR 13 1989 UMI

**Appendix D to Subpart G—Project Description**

1. Name of recipient.
2. Address (provide address for both recipient and project if they differ).
3. Contact person and telephone number for recipient.
4. Funding source/amount.

(a) FmHA:
Technical assistance grant ..... $ _____
Loan (from grant funds) ..... $ _____
Loan guarantee ..... $ _____
(b) _____: Non-NNC loan ..... $ _____
(Name)
(c) _____: Other source ..... $ _____
(Name)
(d) Total: ..... $ _____

5. Purpose of Loan (detailed description of proposal).
6. Business—new or existing and for how long.
7. Number of jobs created, saved or benefited by assistance.

Dated: February 14, 1989.

**Animal and Plant Health Inspection Service**

**9 CFR Part 92**

**[Docket No. 88-162]**

## Importation of Horses From Argentina

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** We are proposing to amend the regulations by removing the requirment that horses imported into the United States from Argentina be quarantined for not less than seven days. This quarantine period is needed to determine if the horses are infected with Venezuelan equine encephalomyelitis (VEE). We are proposing to remove this particular quarantine requirement because we have determined that VEE does not exist in Argentina. The adoption of this proposal would allow horses imported into the United States from Argentina that meet all the requirements for importation, in most cases, to qualify for a shortened quarantine period (usually three days) upon importation into the United States.

**DATE:** Consideration will be given only to comments postmarked or received on or before April 12, 1989.

**ADDRESSES:** Send an original and two copies of written comments to Helen R. Wright, Chief, Regulatory Analysis and Development, PPD, APHIS, USDA, Room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 88-162. Comments received may be inspected at USDA, Room 1141, South Building, 14th and Independence Ave. SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** Dr. Harvey A. Kryder, Senior Staff Veterinarian, Import-Export Products Staff, VS, APHIS, USDA, Room 753, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-7885.

**SUPPLEMENTARY INFORMATION:**

### Background

Regulations of the Animal and Plant Health Inspection Service (APHIS) on animal importations in 9 CFR Part 92 (referred to below as the regulations) prohibit or restrict the importation of horses that could introduce various diseases, including Venezuelan equine encephalomyelitis (VEE), into the United States. VEE, a viral disease of the central nervous system, progresses rapidly in horses and is frequently fatal. The last outbreak of VEE in the United States was eradicated in 1972.

Section 92.11(d)(1)(i) of the regulations requires that horses imported into the United States from the Western Hemisphere, except those from Canada and Mexico, be quarantined at designated ports of entry for not less than seven days. The purpose of this requirement is to prevent the introduction into the United States of horses infected with VEE; the quarantine period of not less than seven days was instituted because symptoms of VEE in infected horses become apparent within seven days of infection.

Horses from Canada and Mexico are not subject to this quarantine period because VEE does not exist in these countries. Recently, veterinary officials of the Argentine government have provided APHIS with survey results and animal testing data [1] demonstrating that VEE does not exist in Argentina. Therefore, we are proposing to remove the requirement that horses imported into the United States from Argentina undergo a quarantine of not less than seven days to prevent the introduction of VEE into the United States. Horses from Argentina would continue, however, to be subject to the other applicable import requirements of 9 CFR Part 92, including the requirement in (92.8 concerning inspection of horses at the port of entry and the requirements in ( 92.11(d) concerning the testing of imported horses, the quarantine of horses until test results are obtained, and the certification by a port veterinarian that horses are free from clinical evidence of disease.

[1] Copies of this material may be obtained by writing to the Administrator, c/o Import-Export Products Staff, VS, APHIS, Room 753, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

### Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Our proposal would generally reduce the time that horses imported from Argentina must spend in quarantine at the port of arrival, and would, therefore, reduce the cost to importers of expenses related to this quarantine. The number of horses imported from Argentina annually is small compared with the total number of horses imported annually. In 1987, of 21,500 imported horses, approximately 600 were imported from Argentina. These importations involved several hundred individuals importing one or a few horses, with no importations of large groups of horses. Because horses imported from Argentina under this proposed rule would usually be quarantined for no more than three days while test results are obtained, the main economic effect of this rule would be to save importers the costs of quarantining their horses for four days, a savings of approximately $237 per horse.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

### Paperwork Reduction Act

The regulations in this proposal contain no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*),

**Executive Order 12372**

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

**List of Subjects in 9 CFR Part 92**

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, we are proposing to amend 9 CFR Part 92 as follows:

## PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation would continue to read as follows:

**Authority:** 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102-105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

**§ 92.11 [Amended]**

2. In § 92.11(d)(1)(i) the words "and except with respect to horses from Argentina," would be added immediately following the word "Mexico,".

Done in Washington, DC, this 8th day of March 1989.

**James W. Glosser,**

*Administrator, Animal and Plant Health Inspection Service.*

**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION**

**14 CFR Part 1259**

**National Space Grant College and Fellowship Program**

**AGENCY:** National Aeronautics and Space Administration (NASA).

**ACTION:** Proposed rule.

**SUMMARY:** This proposed rule establishes NASA policies, responsibilities, and procedures relative to the National Space Grant College and Fellowship Program established by Title II of the National Aeronautics and Space Administration Authorization Act of 1988. This program, through the designation of Space Grant colleges/consortia and the establishment of Space Grant programs and fellowships, is designed to broaden the base of universities and individuals contributing to and benefiting from aerospace science and technology and ultimately contribute to the development and utilization of space resources.

**DATE:** Comments must be submitted on or before April 12, 1989.

**ADDRESS:** Educational Affairs Division, Code XE, NASA Headquarters, Washington, DC 20546. Comments may be inspected in FB6, Room 6127, between 8:00 a.m. and 4:30 p.m.

**FOR FURTHER INFORMATION CONTACT:** Elaine T. Schwartz, 202/453-8344.

**SUPPLEMENTARY INFORMATION:** The National Aeronautics and Space Administration has determined that this proposed rule does not constitute a major rule for the purposes of Executive Order 12291 and it will not have a significant economic impact on a substantial number of small business entities under the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 1259**

Aerospace, Consortium, Fellowship Program, Higher Education, Space, Grant College.

Part 1259 is added to Title 14, Chapter V, to read as follows:

## PART 1259—NATIONAL SPACE GRANT COLLEGE AND FELLOWSHIP PROGRAM

**Subpart 1—Basic Policy**

Sec.
1259.100 Scope of part.
1259.101 Definitions.
1259.102 General policy.
1259.103 Special authorities—gift acceptance and other Federal funding.

**Subpart 2—Space Grant Program and Project Awards**

1259.200 Description.
1259.201 Types of Space Grant program and project awards—regular and special.
1259.202 Application procedures.
1259.203 Limitations.

**Subpart 3—National Needs Grants**

1259.300 Description.
1259.301 Identification of national needs.
1259.302 Application procedures.
1259.303 Limitations.

**Subpart 4—Space Grant College and Consortium Designation**

1259.400 Description.
1259.401 Responsibilities.

1259.501 Responsibilities.
1259.502 Application procedures.
1259.503 Limitations.

**Subpart 6—Space Grant Review Panel**

1259.600 Panel description.
1259.601 Establishment and composition.
1259.602 Conflict of interest.
1259.603 Responsibilities.

Authority: Pub. L. 100-147, 101 Stat. 869-875, 42 U.S.C. 2486; 42 U.S.C. 2452.

**Subpart 1—Basic Policy**

**§ 1259.100 Scope of part.**

(a) This Part 1259 establishes the policies, responsibilities, and procedures relative to the National Space Grant College and Fellowship Program established by Title II of the National Aeronautics and Space Administration Authorization Act of 1988. (Pub. L. 100-147, Oct. 30, 1987, 101 Stat. 869-875, 42 U.S.C. 2486). This statute authorizes the Administrator of the National Aeronautics and Space Administration (NASA), in order to carry out the purposes of the National Space Grant College and Fellowship Act (the Act), to accept conditional or unconditional gifts and donations, to accept and use funds from other Federal departments, agencies and instrumentalities, to make awards with respect to such needs or problems and to designate Space Grant colleges. It further directs the Administrator to establish a graduate fellowship program to provide educational assistance to qualified individuals in fields related to space, and to establish an independent committee known as the Space Grant Review Panel to review and advise the Administrator with respect to Space Grant programs.

(b) The regulations of this part do not apply to awards made by NASA under any other authority.

**§ 1259.101 Definitions.**

For the purposes of this part, the following definitions shall apply:

(a) "Field related to space" means any academic discipline or field of study (including the physical, natural and biological sciences, and engineering, space technology, education, economics, sociology, communications, planning, law, international affairs and public administration) which is concerned with or likely to improve the understanding, assessment, development, and utilization of space.

(b) "Institution of higher education" means any college or university in any State which:

(1) Admits as regular students only individuals who have a certificate of

VOL 54 ISS 47 MR 13 1989 UMI

graduation or equivalent from a secondary school;

(2) Is legally authorized within such State to provide a program of education beyond secondary education;

(3) Provides an educational program for which a bachelor's degree or other higher degree is awarded;

(4) Is a public or other nonprofit institution; and

(5) Is accredited by a nationally recognized accrediting agency or association.

(c) "National of the United States" means a citizen of the United States or a native resident of a possession of the United States. It does not refer to or include a citizen of another country who has applied for United States citizenship.

(d) "Panel" means the Space Grant Review Panel established pursuant to section 210 of the Act.

(e) "Person" means any individual, public or private corporation, partnership or other association or entity (including any Space Grant college, Space Grant consortium, institution of higher education, institute, or laboratory), or any State, political subdivision thereof, or agency or officer of a State or political subdivision thereof.

(f) "Space" means "aeronautical and space activities" which has the meaning given to such term in section 103(1) of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2452).

(g) "Space Grant college" means any public or private institution of higher education which is designated as such by the Administrator or designee pursuant to section 208 of the Act.

(h) "Space Grant regional consortium" means any association or other alliance which is designated as such by the Administrator or designee pursuant to section 208 of the Act.

(i) "Space Grant program" means any program which:

(1) Is administered by any Space Grant college, Space Grant regional consortium, institution of higher education, institute, laboratory or State or local agency; and

(2) Includes two or more projects involving education and one or more of the following activities in the fields related to space:

(i) Research;

(ii) Training; or

(iii) Advisory services.

(j) "Space Grant program award" means any award contemplated under section 208(a) of the Act.

(k) "Special Space Grant program award" means any award extended under section 208(b) of the Act.

(l) "Specific national need grant" means any award extended under section 207 of the Act.

(m) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and any other territory or possession of the United States.

(n) "State Space Grant cooperating institution" means any institution of higher education in a State which does not have a designated Space Grant college that is named by the Administrator or designee to provide selected Space Grant program functions within that State.

### § 1259.102 General policy.

(a) In accordance with subsections 103(a)(2) and (3) of the National Aeronautics and Space Act of 1958, as amended, (42 U.S.C. 2457(a)(3)), it is NASA's policy, through various educational programs, to provide direct support for and encouragement to teachers, students, and prospective students in fields related to space.

(b) In compliance with the National Space Grant College and Fellowship Act (42 U.S.C. 2486), it shall be NASA's purpose to:

(1) Increase the understanding, assessment, development, and utilization of space resources by promoting a strong educational base, responsive research and training activities, and broad and prompt dissemination of knowledge and techniques;

(2) Utilize the abilities and talents of the universities of the Nation to support and contribute to the exploration and development of the resources and opportunities afforded by the space environment;

(3) Encourage and support the existence of interdisciplinary and multidisciplinary programs of space research, to engage in activities of training (including teacher education), research and public service and to have cooperative programs with industry;

(4) Encourage and support the existence of consortia, composed of university and industry members, to advance the exploration and development of space resources in cases in which national objectives can be better fulfilled than through the programs of single universities;

(5) Encourage and support Federal funding for graduate fellowships in fields related to space;

(6) Support activities in colleges and universities generally for the purpose of creating and operating a network of institutional programs that will enhance achievements resulting from efforts under this Act; and

(7) Encourage cooperation and coordination among Federal agencies and Federal programs concerned with space issues.

(c) It shall be NASA's policy to designate Space Grant colleges, State Space Grant cooperating institutions and Space Grant regional consortia and award fellowships, grants, contracts, and other transactions competitively in a merit-based review process.

(d) It shall be NASA's policy to designate and make awards without discriminating on the basis of sex, race, color, religion, national origin, or handicap.

### § 1259.103 Special authorities—gift acceptance and other Federal funding.

(a) *Acceptance of gifts.* (1) In order to carry out the provisions of the Act, the Administrator is authorized to accept conditional or unconditional gifts or donations of services, money or property, real, personal or mixed, tangible or intangible. This authority is delegated to the Director, Educational Affairs Division.

(2) The Administrator or designee may decline any gift or donation that the Administrator determines is not in accord with the purposes of the program. Also, conditional gifts or donations that are not in compliance with the Act or the implementing regulations shall be declined. NASA may use a reasonable amount from a gift or donation to cover any administrative costs associated with such gift or donation.

(b) *Acceptance and use of funds from other Federal agencies.* (1) To carry out the provisions of the Act, the Administrator is authorized to accept and use funds from other Federal departments, agencies, and instrumentalities to pay for awards under this program. This authority is delegated to the Director, Educational Affairs Division.

(2) The Administrator or designee may decline any such funds when the Administrator determines acceptance would not be in accord with the purposes of the program. NASA may use a reasonable amount from transferred Federal funds to cover any administrative costs associated with such transfers.

## Subpart 2—Space Grant Program and Project Awards

### § 1259.200 Description.

Awards are authorized to establish any Space Grant and/or fellowship program or project if such program or project will further the purposes of the Act.

### § 1259.201 Types of Space Grant program and project awards—regular and special.

(a) A regular Space Grant program or project award shall:

(1) Be funded by NASA up to 66 percent of the total cost of the Space Grant award and/or fellowship program involved; or

(2) Be funded up to 100 percent of its cost if funded by another Federal entity.

(b) A special Space Grant program or project award may be funded up to 100 percent of the total cost of the special project if the Administrator or designee, the Director, Educational Affairs Division, finds that:

(1) No reasonable means is available through which the applicant can meet the matching requirements for a regular Space Grant award under paragraph (a) of this section;

(2) The probable benefit of such project outweighs the public interest in such matching requirement; and

(3) The same or equivalent benefit cannot be obtained through the award of a regular Space Grant program or project award under paragraph (a) of this section or the award of a specific national need grant under section 207 of the Act.

### § 1259.202 Application procedures.

(a) The opportunity to apply shall be announced by the Director, Educational Affairs Division.

(b) The application procedures and evaluation guidelines for awards under this section will be included in the announcements of such programs.

(c) The applications will be reviewed by a peer review merit selection panel appointed by the Director, Educational Affairs Division.

### § 1259.203 Limitations.

Public Law 100-147, section 206(d) (2) and (3), states that:

(a) Funds for awards made under this section may not be used to:

(1) Purchase land;

(2) Purchase, construct, preserve, or repair any building; or

(3) Purchase or construct any launch facility or launch vehicle.

(b) Funds may be used to lease any of the items listed in paragraph (a) of this section as long as prior written approval is obtained from the Administrator or designee.

## Subpart 3—National Needs Grants

### § 1259.300 Description.

National needs awards may be awarded by the Administrator or designee to meet such needs or problems relating to aerospace identified by the Space Grant Review Panel, by NASA officials or by any person. Such awards may be up to 100 percent of the total cost of the program or project.

### § 1259.301 Identification of national needs.

National needs shall be identified by the Administrator who shall consider specific national needs and problems relating to space proposed by the space Grant Review Panel, any NASA official or any person.

### § 1259.302 Application procedures.

(a) The Administrator or designee has the authority to make awards to meet identified national needs.

(b) The Director, Educational Affairs Division, shall establish a competitive, merit-based review process to examine unsolicited national needs proposals.

### § 1259.303 Limitations.

The same limitations shall apply as are stated in § 1259.203.

## Subpart 4—Space Grant College and Consortium Designation

### § 1259.400 Description.

(a) The Administrator may designate Space Grant colleges, Space Grant college consortia, and Space Grant regional consortia in order to establish Federal/university partnerships to promote a strong educational base in the space and aeronautical sciences. These designated colleges and consortia will provide leadership for a network of American colleges and universities, industry, and State and local governments in space-related fields. The Administrator hereby delegates this authority to the Director, Educational Affairs Division.

(b) Designation of Space Grant colleges, Space Grant college consortia, and Space Grant regional consortia shall be for 5 years. Designation of Space Grant colleges and consortia may be continued based on a merit review at the beginning of the fifth year.

(c) Each designated Space Grant college or consortium will receive:

(1) A Space Grant award that requires a 100 percent match; and

(2) Funds for fellowships.

(d) Each Space Grant college or consortium will be funded annually.

### § 1259.401 Responsibilities.

Each designated Space Grant college or consortium shall:

(a) Designate a Space Grant Program Director;

(b) Establish a Space Grant Office;

(c) Administer a fellowship program;

(d) Develop and implement programs of public service, interdisciplinary space-related programs, advisory activities, and cooperation with industry, research laboratories, State and local governments, and other colleges and universities, particularly institutions in their State and/or region with significantly large enrollments of racial minorities who are under-represented in science and technology; and

(e) Provide nonfederal matching funds (exclusive of in-kind contributions) for the Space Grant program equal to that provided by NASA.

### § 1259.402 Basic criteria and application procedures.

(a) Any institution of higher education may be designated a Space Grant college if the Administrator or designee finds that it has a balanced program of research, education, training and advisory services in fields related to space, as further defined in the program announcement.

(b) Any association or other alliance of two or more persons may be designated a Space Grant regional consortium, if the Administrator or designee finds that such association or alliance:

(1) Is established for the purpose of sharing expertise, research, educational or training facilities, and other capabilities in order to facilitate research, education, training, and advisory services, in any field related to space; and

(2) Will encourage and follow a regional approach to solving problems or meeting needs relating to space, in cooperation with other institutions of higher education, Space Grant program grantees, and other persons in the region.

(c) The opportunity to apply for designation shall be announced by the Director, Educational Affairs Division. The application procedures and evaluation guidelines for designation shall be included in the designation announcement.

(d) Designation will be decided by a competitive merit review of the program proposal measured against the purposes of the Act and including, but not limited to, proposed linkages with other colleges and universities (particularly institutions with significant enrollments of under-represented minority groups), public service, and collaboration with space-related industry.

VOL 54 ISS 47 MR 13 1989 UMI

**§ 1258.403 Limitations.**

The same limitations shall apply as are stated in § 1259.203.

**§ 1258.404 Suspension or termination of designation.**

The Administrator or designee, the Director, Educational Affairs Division, may, for cause, and after an opportunity for a hearing before an Administrative Judge appointed by the Deputy Administrator, suspend or terminate the Space Grant designation of any institution or consortium.

**Subpart 5—Space Grant Fellowships**

**§ 1258.500 Description.**

The Space Grant fellowship program will provide educational and training assistance to qualified individuals at the graduate level in fields related to space. Awards will be made to institutions of higher education for fellowships. The student recipients shall be known as NASA Space Grant Fellows.

**§ 1258.501 Responsibilities.**

(a) All institutions which receive Space Grant fellowships will be expected to use the awards to increase the pool of graduate students in fields related to space.

(b) The overall fellowship program shall be cognizant of institutional diversity and geographical distribution.

**§ 1258.502 Application procedures.**

(a) All applicants for designation as Space Grant colleges and consortia must apply for Space Grant fellowships.

(b) Applicants for Space Grant program or project grants (under 1258.200) and for national needs grants (under 1258.300) may also apply for Space Grant fellowships.

(c) There will be a merit review selection of Space Grant fellowship awards.

**§ 1258.503 Limitations.**

(a) Fellowships shall be awarded only to Nationals of the United States.

(b) Any students supported under this fellowship program shall not be funded for more than 4 years unless the Director, Educational Affairs Division, makes an exception.

**Subpart 6—Space Grant Review Panel**

**§ 1258.600 Panel description.**

An independent committee, the Space Grant Review Panel, which is not subject to the Federal Advisory Committee Act, shall be established to advise the Administrator with respect to Space Grant program and project awards, the Space Grant fellowship program, and the designation and operation Space Grant colleges and consortia. A majority of the voting members shall be individuals who, by reason of knowledge, experience, or training are especially qualified in one or more of the fields related to space. The other voting members shall be individuals who, by reason of knowledge, experience or training, are especially qualified in, or representative of, education, extension services, State government, industry, economics, planning, or any other activity related to the purposes of the Space Grant program.

**§ 1258.601 Establishment and composition.**

(a) The Panel, to be located at NASA Headquarters in Washington, DC, will be composed of ten voting members who are not current NASA employees.

(b) It shall include four from Federal departments, agencies or entities that have an interest in space programs or science and education, and six nonfederal representatives.

(c) The nonfederal representatives shall include two persons who are directly involved with the Space Grant program at a Space Grant college or consortium, one person involved with the Space Grant program at a university that is not a designated Space Grant college, a university president or chancellor, one representative of a space-related industry, and the last person to be from whatever field the Administrator determines to be of greatest concern.

(d) The Panel members shall be appointed by the Administrator or designee.

(e) The relevant organizations and associations in aerospace and science education fields will be asked to provide three names for each position on the panel. The Administrator shall consider them, but not be limited to them, in the selection process.

(f) The Administrator or designee shall select a Chair and a Vice Chair. The Vice Chair shall act as Chair in the absence or incapacity of the Chair.

(g) The Administrator or designee may select NASA officials to serve as ex officio, nonvoting members of the panel.

**§ 1258.602 Conflict of interest.**

Any member of the Panel who has a personal or financial interest in an issue before the Panel shall abstain from voting on such issue.

**§ 1258.603 Responsibilities.**

(a) The Panel shall advise the Administrator and the Director, Educational Affairs Division, with respect to:

(1) Applications or proposals for, and performance under, awards made pursuant to sections 206 and 207 of Title II of the Act;

(2) The Space Grant fellowship program;

(3) The designation and operation of Space Grant colleges and Space Grant regional consortia, and the operation of Space Grant and fellowship programs;

(4) The formulation and application of the planning guidelines and priorities pursuant to section 205(a) and (b)(1) of Title II of the Act; and

(5) Such other matters as the Administrator refers to the Panel for review and advice.

(b) The Panel shall meet biannually and at any other time at the call of the Chair or upon a request from a majority of the voting members or at the call of the Administrator.

(c) The Panel may exercise such powers as are reasonably necessary in order to carry out the duties enumerated in paragraph (a) of this section.

(d) The Director, Educational Affairs Division, shall appoint an Executive Secretary who shall perform administrative duties for the Panel.

(e) Federal members of the Panel will have their agencies reimbursed by NASA for any travel costs and per diem expenses required to attend Panel meetings.

(f) Nonfederal members of the Panel will be reimbursed by NASA for travel costs and per diem expenses required to attend Panel meetings.

March 1, 1989.

## SECURITIES AND EXCHANGE COMMISSION

**17 CFR Part 240**

**[Rel. No. 34-26590; File No. S7-6-89]**

### Disclosure of Equity Participants in Control Transactions

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Securities and Exchange Commission ("Commission") today is publishing for comment proposals to revise the instructions to certain schedules filed in connection with control transactions. The proposals are intended to provide shareholders with material information concerning significant equity participants in limited partnerships, closely-held corporations, and similar entities engaged in control transactions.

**DATE:** Comments should be received on or before May 12, 1989.

**ADDRESS:** Comments should be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7-6-89. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

**FOR FURTHER INFORMATION CONTACT:** David A. Sirignano or Richard E. Baltz at (202) 272-3097, Office of Tender Offers, Division of Corporation Finance.

**SUPPLEMENTARY INFORMATION:** The Commission is proposing for comments amendments to Schedule 13D,[1] 14D-1,[2] 14B [3] and 13E-3.[4]

### I. Executive Summary

The Commission is proposing to amend the instructions to certain schedules required to be filed in connection with major acquisitions of securities, tender offers, proxy contests, and going private transactions to require disclosure of information concerning the identity and background of limited partners and other participants holding significant investments in limited partnerships or other closely-held entities or groups of such entities engaged in these transactions. The Commission is concerned that the current instructions, which require a demonstration of control before disclosure concerning an equity participant is mandated, do not adequately provide shareholders and the marketplace with material information about the identity and background of significant participants in the transaction. Accordingly, the Commission proposes to amend Instruction C to Schedules 13D, 14D-1 and 13E-3 and Instruction 2 to Schedule 14B. The revised instructions would require responses to specified items of the schedules relating to the identity, background, funding, and purposes of the filing person with respect to each person who (i) contributes more than 10 percent of the equity capital or (ii) has the right to receive, in the aggregate, more than 10 percent of the profits or assets upon liquidation or dissolution of the filing person. If the filing person is a group, for the purposes of the instructions, only the group would be considered the filing person. The disclosure would be required concerning persons contributing 10 percent or more of the group's capital or entitled to 10 percent or more of the profits or assets of the group upon liquidation or dissolution. The revised instructions would not apply if the filing person has a class of equity securities registered under section 12 of the Securities Exchange Act of 1934 ("Exchange Act").[5]

### II. Background

The disclosure requirements for persons engaged in corporate control transactions are designed to publicize material facts concerning the nature of the transaction and the participants so that security holders have the opportunity to make informed investment decisions. Disclosure of this information is required primarily by the rules adopted under the Williams Act amendments [6] to the Exchange Act and the proxy rules [7] promulgated under section 14(a) of the Exchange Act.

Section 13(d) of the Exchange Act serves a pivotal role in this disclosure scheme. It requires that a Schedule 13D [8] be filed by any person that acquires beneficial ownership [9] of more than five percent of a class of equity securities.[10] Sections 14(d) and 14(e) of the Exchange Act provide for the regulation of tender offers and the filing of a Schedule 14D-1 by the bidder. Schedule 14D-1 requires that the bidder provide information about its identity and background, past contracts and transactions with the subject company, source and amount of funds, and purposes, plans, or proposals, among other items. A summary of the information contained in the Schedule 14D-1 must be adequately disseminated to security holders.[11] When corporate control is sought through a proxy contest for the election of directors, the proxy rules require that each participant in a contested solicitation to file with the Commission a Schedule 14B containing specified information about the persons conducting the solicitation. Shareholders of the affected issuer must receive a summary of this information.[12] Rule 13e-3[13] prescribes the filing, disclosure and dissemination requirements in connection with a going private transaction by an issuer or an affiliate. The Schedule 13E-3 is the primary disclosure document that must be filed with the Commission. The information presented in the Schedule 13E-3 must be disseminated to security holders.[14]

While the specific requirements of each of these disclosure schemes differ, each serves to provide material information to the marketplace, the shareholders, and to the issuer. This information includes the identity and background of the participants, the purpose of the acquisition or solicitation, any future plans or proposals for the company, the source and the amount of funds, and any borrowing to acquire the securities or engage in the solicitation.

Instruction C to Schedule 13D specifies the persons for whom information must be provided when making a required filing:

If the statment is filed by a general or limited partnership, syndicate, or other group, the information called for by items 2-6 shall be given with respect to (i) each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such partner or member. If the statement is filed by a corporation or if a person referred to in (i), (ii), (iii) or (iv) of this Instruction is a corporation, the information called for by the above-referenced items shall

be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation.

The language of Instruction C to Schedules 14D–1 and 13E–3 is identical in all relevant respects. Instruction 2 to Schedule 14B specifies that the information shall be given for each partner, officer, and director of a partnership, corporation or other business entity, and each person controlling such entity who is not a participant. Although this instruction does not distinguish between general and limited partners, the instruction has been construed consistently with Instruction C of the other schedules.

### III. Discussion of Proposals

It has become a common practice to use limited partnerships, similar closely-held entities, or groups of such entities [16] to raise the capital to finance and conduct the acquisition of corporate control. Under the current regulatory framework, the acquiring entity is the person required to comply with the applicable disclosure provisions rather than the persons actually financing, benefiting from and, in some instances, structuring the transaction.[16] These persons (collectively, "substantial equity participants") directly or indirectly may contribute significant capital or be entitled to receive a significant interest in the profits or assets, including shares of the acquired entity, upon liquidation or dissolution of the filing entity. The items to the schedules, however, do not require disclosure concerning substantial equity participants, as such, because the current regulations elicit disclosure only from persons acting in an express *or de facto* control relationship with the acquiring entity.

Limited partnerships and similar closely-held entities are often used in hostile takeovers. In fiscal year 1988, approximately 27 percent of the hostile tender offers commenced used limited partnerships as a source of financing for the transaction.[17] In some cases, the bidder or purchaser is a newly formed entity with no operations and whose single purpose is to acquire control of the subject company. The controlling persons of the bidder may be identified as limited partnerships or similar closely-held entities for which information is reported only for the general partners, as is required by current Instruction C to the Schedule 14D–1. In many instances, related limited partnerships or other entities provide financing to the entity identified as the bidder.

Similar issues may arise in proxy contests. The identity and control exercised by the limited partners financing the proxy contest for Gillette Co., Inc., conducted by The Coniston Group,[18] became a central issue in the proxy contest subsequent litigation between the parties. Even after The Coniston Group amended its Schedule 13D to reveal the identify of limited partners of the filing persons, the amendment merely revealed another level of limited partnerships.[19] No information was provided about the limited partners, other than that capital contributions provided a source of funds for the acquisition of securities.

Although absent an actual control relationship additional disclosure may not be required under the current rules, information about significant equity participants and the terms and conditions of their participation may be material to shareholders and the market.[20] In many instances, the mere agreement to provide a significant equity contribution to a transaction may provide a form of implicit control or potential influence that may be difficult to quantify, describe, or define. Moreover, upon liquidation or dissolution of the filing entity or group, equity participants could become beneficial owners of a significant block of the acquired issuer's stock, without any prior disclosure of these persons' identities, backgrounds, or plans and proposals for the issuer. Information concerning equity participants also may be particularly material where the investor is participating in the transaction in another capacity, because without full disclosure of the entire interest of that person, investors may be misled as to the actual nature of that person's interest.[21] The continuing use of limited partnerships and similar entities to shield persons engaging in or otherwise benefiting from control transactions raises questions about the access of shareholders and of the marketplace to this important information.

In light of its experience in administering its disclosure requirements under the Williams Act and the proxy rules, the Commission has concluded that additional disclosure concerning significant equity participants in control transactions may be necessary in order to assure that security holder receive complete information about the persons participating in a control transaction. The proposed revisions to the current form of Instruction C would serve to assure that material information about significant equity participants would be disclosed. In addition, a person whose equity participation in the acquiring entity could provide an indirect form of influence over management, which may be difficult factually to prove, also would be identified.

The Commission proposes amendments to Instruction C of Schedules 13D, 14D–1, and 13E–3. Instruction 2 to the Schedule 14B also would be revised to conform to Instruction C. The proposals would apply a uniform standard of disclosure for schedules filed in connection with

[16] Such entities include, but are not limited to, corporations, trusts or other vehicles that are not subject to the reporting provisions of the Exchange Act.

[17] *See, e.g., City Capital Associates Ltd v. Interco, Inc.*, 860 F.2d 60, 64 (2d Cir. 1988).

[18] *See, e.g.*, Schedules 14D–1 filed during FY 1988 relating to the tender offers for Telex Corp. (10/9/87); Singer Co., (11/13/87); Duratest (11/12/87); Wherehouse Entertainment, Inc. (11/24/87); High Voltage Engineering Corp. (1/0/88); Stop & Shop companies, Inc. (2/1/88); UBG Corp. (2/1/88); J.P. Stevens (9/23/88); Wm. Carter Cos. (4/7/88); Arkansas Best Corp. (8/0/88); MacMillan & Co. (7/12/88); Interco (8/15/88); MacMillan & Co. (8/19/88); Damon Corp. (8/18/88); Polaroid Corp. (9/9/88).

[19] On February 1, 1988, RB Partners, a Bahamian limited partnership, the principal limited partner of which is Coniston Partners, and RB Associates of New Jersey, a New Jersey limited partnership, filed, and thereafter amended on several occasions, a Schedule 13D. The general partner of RB Partners and RB Associates is Colliet, Tierney and Oliver, a New Jersey general partnership. All three partnerships and related entities are known collectively as "The Coniston Groups."

[20] Amendment No. 4 to Schedule 13D filed April 11, 1988.

[20] The concept *of* control is intended to require disclosure regardless of whether the person otherwise falls within one of the enumerated categories in the instructions. Control, however, is a question of fact, difficult to verify absent extensive inquiry. As the Federal Trade Commission ("FTC") found in an analogous context, at the very least, it seems unlikely that an entity would continue to exist if it operated in a way that was adverse to the interests of a significant equity participant. *See* Adopting Release, 52 FR 20800, 20801 (May 29, 1987) (amending § 801.1(b) [16 CFR 801.1(b)] to define 50 percent ownership as "control" with respect to partnerships and other entities that do not have voting securities). The proposed amendments to the Schedules 13D, 14D–1, 14B and 13E–3 differ from the FTC rule because the revisions would not create a presumption of control.

[21] Failure to disclose the full nature of the equity participation of investment banking firms that also provide financial advice and arrange financing has been held to be a material omission. *MAI Basic Four, Inc.* v. *Prime Computer, Inc.*, No. 88–2513–MA (Mass. Dist. Ct. Dec. 29, 1988); *Koppers Co. Inc.* v. *American Express Co.*, 689 F. Supp. 1271 (W.D. Pa. 1988); and *Arkansas Best Corp.* v. *Pearlman*, 688 F. Supp. 976 (D. Del. 1988). *See also Polaroid Corp.* v. *Disney*, No. 88–3978, slip op. at n. 2 (2d Cir. Nov. 23, 1988); *City Capital Associates Limited Partnership* v. *Interco Inc.*, 860 F.2d 60.

change of control transactions. The proposed amendments would require disclosure concerning any person who contributes more than 10 percent of the equity capital of the filing person, or who, directly or indirectly, has a right to receive, through an ownership interest, capital contribution or otherwise, more than 10 percent of the profits or the assets (upon liquidation or dissolution) of the filing person, where the filing person does not have a class of equity securities registered with the Commission under section 12 of the Exchange Act. If the filing person is a group, disclosure would be required from persons contributing 10 percent or more of the group's capital or entitled to receive 10 percent or more in profits or assets upon liquidation or dissolution of the group. The instructions would focus on the assets and profits of the group rather than each individual filing person in order to limit the number of equity participants about whom disclosure would be required.

The instruction would apply to capital contributions to prevent evasion of the disclosure requirements by using special allocations to avoid a 10 percent interest in profits or assets upon liquidation or dissolution. The proposed instructions also would require aggregation of interests to determine whether disclosure is required. Thus, if a person contributes capital through a series of limited partnerships or closely-held entities, no one of which exceeds a 10 percent interest, ownership would be disclosed only on an aggregate basis, if the total interest in profits or assets of the filing person or group (upon liquidation or dissolution) exceeds 10 percent.

The Commission recognizes that application of the instructions to complicated financing schemes will, in many instances, present difficult interpretive issues. The Commission intends that the instructions be interpreted to require disclosure if information about a significant participant in the transaction would otherwise be omitted.

The revised instructions would not require disclosure of substantial participants in filing persons that are reporting entities with a class of equity securities registered under section 12 of the Act. Information concerning substantial equity participants is otherwise required to be disclosed under the beneficial ownership reporting requirements of sections 13(d) and 13(g) [22] of the Exchange Act, as well as in periodic reports and proxy materials filed by the issuer.[23]

The information called for by the revised instructions would be required regardless of whether the entity participant otherwise would be deemed a controlling person of the entity engaged in the control transaction. Controlling persons of a filing entity would continue to be disclosed as under the current instructions. The Commission also is proposing to revise Instruction C to Schedules 13D, 13E–3, 14D–1, and Instruction 2 to Schedule 14B to clarify that the instruction applies to any person who controls a limited partnership or other non-corporate entity. This revision is consistent with the application of the instruction to corporations and staff interpretation.

Commentators should address whether 10 percent is an appropriate level of participation at which to require disclosure, or whether a lower or higher threshold, *e.g.*, 5 percent, 15 percent, or 20 percent, should apply. The Commission also observes that more complex formulations can be used. For example, if there are two 25 percent participants, two 20 percent participants, and a 10 percent participant in a limited partnership, it is unlikely that the 10 percent participant will be able to assert significant equity-like influence in comparison with the influence asserted by the 20 percent participants. In order to focus disclosure requirements on persons most likely to assert direct or indirect influence, the disclosure requirement could be made to apply only to a specified number of the filing entity's largest participants, provided that each holds at least a 10 percent interest. For example, the amended rule could require disclosure from the four largest participants, provided that each has at least a 10 percent interest. The number of participants required to be disclosed by such a formulation can be increased or decreased, and the minimum threshold for disclosure can also be increased (to 15 percent or 20 percent) or decreased (to 7 percent or 5 percent). The Commission requests comment as to whether such more complex threshold reporting requirements are desirable, the appropriate parameters for such requirements, and the costs and benefits of relying on such more intricate threshold reporting criteria.

The Commission also requests comments on whether additional criteria should be considered in imposing a disclosure obligation, such as whether the acquiring entity was formed generally for acquisition purposes or solely for the acquisition of a single issuer. In addition, the Commission requests comments on the additional costs the revised instructions would impose on reporting persons and whether the proposals would result in duplicative or unnecessary disclosure of equity participation in the transaction. Specific cost data should be provided. Conversely, comment is required on whether the proposals, as drafted, would benefit shareholders and the marketplace, and whether the proposals would be subject to evasion.

The proposed revisions would neither subject additional persons to individual reporting requirements, nor amend the existing items of the relevant schedules to broaden the type of disclosure required.[24] Rather, the information required from the reporting person would be increased solely because information would be required concerning additional significant equity participants in the transaction. The information required by these items in most cases will have to be requested by the filing person from its equity participants. The filing person must certify that after reasonable inquiry and to the best of its knowledge and belief, the information provided concerning the equity participants is true, complete and correct.[25]

The information required by Instruction C to the Schedule 13D would apply only to Items 2–6, inclusive, as under the current instruction. Item 2 would require that the identity and background of the significant equity participants be provided. The revision also would require, under Item 3, a description of the terms under which the

[22] 15 U.S.C. 78m(d) and 78m(g).

[23] *See, e.g.*, Form 10–K, Item 12 (17 CFR 249.310) and Schedule 14A, Item 6(d).

[24] The identification of significant equity participants and certain additional information currently may be required under circumstances pursuant to specific items of the schedules. For example, Item 6 to the Schedule 13D requires the filing person to describe "any contracts, arrangements, understandings or relationships (legal or otherwise) among the persons named in Item 2 and between such persons and any person with respect to any securities of the issuer . . . naming the persons with whom such contracts, arrangements, understandings or relationships have been entered into." Item 7 requires that there be filed as an exhibit copies of all written agreements, contracts, arrangements, understandings, plans or proposals relating to the borrowing of funds or the acquisition, liquidation, sale of assets, merger, or change in business or corporate structure of the issuer. This item would require the filing, as an exhibit, of limited partnership agreements and any offering memoranda used to syndicate limited partnership interests in the filing person if the memoranda constitute a plan or proposal relating to these matters. Items 7 and 11, respectively, elicit similar disclosure in the Schedule 14D–1.

[25] *See generally* signature requirements with respect to the affected schedules.

VOL 54 ISS 47 MR 13 1989 UMI

equity contribution was made, and the terms of any financing arrangements to fund the contributions.[38] In response to Item 4, "Purpose of the Transaction," the filing person would be required to describe the purpose and any plans or proposals of a significant equity investor. Any interest in the securities of the issuer held by any significant equity participant would be described in response to Item 5, and any understandings or relationships with the filing person or other equity participants would be identified in Item 6. Similar responses would be required from the filing person responding to Items 2–7 of the Schedule 14D–1.

The proposed revisions would not necessarily require the disclosure of financial information from a significant equity participant. As under current rules,[37] if the interest and the control exercised by the equity participant were sufficient to render it a bidder,[38] financial information, if material, would be required. Item 9 of Schedule 14D–1 provides that adequate financial information concerning the bidder must be provided, where a bidder is other than a natural person and the bidder's financial condition is material to a decision by a security holder on whether to sell, tender, or hold the securities being sought.[39] In addition, Item 9 provides that entities controlling a bidder formed for the sole purpose of making a tender offer may have to provide adequate financial information.

The required disclosure in the Schedule 14B would be restricted to the information called for by Items 2, 3, 4(b), and 4(c). Those items require disclosure of the person's identity and background, interests in the securities of the issuer, transactions with management and others,[40] and any arrangements or understandings with respect to future employment or future transactions with the issuer or its affiliates. Revised Instruction C to the Schedule 13E–3 would apply only to Items 2, 3, 5, 6, 10 and 11, as under the current instruction. Items 7, 8 and 9, requiring, respectively, a discussion of the purpose, alternatives, reasons and effects of the transaction, a statement of belief as to the fairness of the transaction, and the identification and summary of any reports, opinions, appraisals and certain negotiations, would continue to affect only the issuer or affiliate engaging in the transaction.

## IV. Cost-Benefit Analysis

To evaluate the benefits and costs associated with the proposed revisions to Schedules 13D, 14D–1, 14B and 13E–3, the Commission requests commentators to provide views and data as to the costs and benefits associated with amending the disclosure requirements. The proposed revisions would not subject additional persons to the reporting requirements, but could require that filing persons gather and disclose additional data, and could lead to additional information being disclosed about substantial investors in filing entities. Only the information required by the filer would be increased.

## V. Initial Regulatory Flexibility Analysis

The Initial Regulatory Flexibility Analysis concerns the proposed amendments to Instruction C to Schedules 13D, 14D–1 and 13E–3 and Instruction 2 to Schedule 14B. The analysis has been prepared by the Commission in accordance with 5 U.S.C. 604.

The analysis notes that the proposed amendments would not increase the number of small entities required to file Schedules 13D, 14D–1, 13E–3 and 14B. Although a person otherwise required to file may incur an increased reporting obligation, the Commission does not believe that there will be a significant economic impact on a substantial number of small entities.

A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Richard E. Baltz in the Office of Tender Offers, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

## VI. Request for Comments

Any interested persons wishing to submit written comments on the proposals, to suggest additional changes, or to submit comments on other matters that might have an impact on the proposals, are requested to do so. In addition to the specific inquiries made throughout this release, the Commission solicits comments on the usefulness of the proposed revisions to Instruction 2 to Schedule 14B and Instruction C to Schedules 13D, 14D–1, and 13E–3 to reporting persons, registrants and the marketplace at large. The Commission also requests comment on whether the proposed rule, if adopted, would have an adverse effect on competition or would impose a burden on competition that is neither necessary nor appropriate in furthering the purposes of the Exchange Act. Comments on this inquiry will be considered by the Commission in complying with its responsibilities under section 23(a)(2) of the Exchange Act.[41]

The Commission also encourages the submission of written comments with respect to any aspect of the initial regulatory flexibility analysis. Such written comments will be considered in the preparation of the final regulatory flexibility analysis if the proposed rules are adopted.

Persons wishing to submit written comments should file three copies thereof with Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comment letters should refer to File No. S7–9–89. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

## VII. Statutory Basis and Text of Amendments

The amendments are being proposed pursuant to the authority set forth in sections 3(b), 13, 14 and 23 of the Securities Exchange Act of 1934.

### List of Subjects in 17 CFR Part 240

Reporting and Recordkeeping Requirements, Securities.

---

[36] Item 3 provides that "If any part of the purchase price is or will be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, trading or voting the securities, [provide] a description of the transaction and the names of the parties thereto." When capital is furnished by a limited partnership, disclosure of the source of funds often is restricted to stating that funds are derived from the working capital of the partnership. One court, addressing the question of whether the identities of limited partners must be provided in response to Item 3 on Schedule 13D, concluded that the "specific instruction, requiring information only from the general partner in a limited partnership controls over the more general instruction in Item 3 * * *." *HUBCO Inc. v. Rappaport*, 628 F. Supp. 945, 357–58 (D.N.J. 1986). To the extent that the court suggested that Instruction C does not require disclosure of limited partners even if control is demonstrated, the Commission disagrees and is proposing to revise the instruction to eliminate any confusion on that point. *See* Securities Exchange Act Release No. 13787 (July 21, 1987) (43 FR 36348).

[37] *See* Schedule 14D–1, Item 9; Rule 14d–6(e) [17 CFR 14d–6(e)].

[38] *See generally* cases cited *supra* n. 32.

[39] Courts also have required natural persons who are bidders in a transaction to provide financial information. *See, e.g., Riggs National Bank of Washington, D.C. v. Allbritton*, 516 F. Supp. 164 (D.D.C. 1981). *But see Simon v. Culverhouse*, 609 F. Supp. 1080 (D. Fla. 1985) (in order for a natural person to be subject to the financial disclosure requirement of Item 9, special circumstances must be present).

[40] Item 401(a), Regulation S–K [17 CFR 229.401(a)].

[41] 15 U.S.C. 78w(a)(2).

## VIII. Text of Proposals

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

## PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. The authority citation for Part 240 continues to read, in part, as follows:

**Authority:** Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w) * * *

2. By amending § 240.13d–101 by revising General Instruction C as follows:

**§ 240.13d–101 Schedule 13D—Information to be included in statements filed pursuant to § 240.13d–1(a) and amendments thereto filed pursuant to § 240.13d–2(a).**

* * * * *

*General Instructions.*

* * * * *

C. If the statement is filed by a general or limited partnership, syndicate, or other group, the information called for by Items 2–6, inclusive, shall be given with respect to: (i) Each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such general or limited partnership, syndicate or other group or any partner or member thereof. If the statement is filed by a corporation or if a person referred to in (i), (ii), (iii) or (iv) of this Instruction is a corporation, the information called for by the above-referenced items shall be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation. If the person filing the statement is other than a natural person and does not have a class of equity securities registered under Section 12 of the Act, or if the statement is filed by a group that includes such entities, in addition to the information required above, information for Items 2–6, inclusive, shall be provided for each person who contributes more than 10 percent of the equity capital, or has a right to receive in the aggregate, directly or indirectly, more than 10 percent of the profits, or upon dissolution or liquidation, 10 percent of the assets of that person or group. Such disclosure shall be required notwithstanding the absence of a control relationship.

* * * * *

3. By amending § 240.13e–100 by revising General Instruction C as follows:

**§ 240.13e–100 Schedule 13E–3 [240.13e–3], Rule 13e–3 transaction statement pursuant to section 13(e) of the Securities Exchange Act of 1934 and rule 13e–3 [240.13e–3] thereunder.**

* * * * *

General Instructions

* * * * *

C. If the statement if filed by a general or limited partnership, syndicate, or other group, the information called for by Items 2, 3, 5, 6, 10, and 11, inclusive, shall be given with respect to: (i) each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such general or limited partnership, syndicate or other group or any partner or member thereof. If the statement is filed by a corporation or if a person referred to in (i), (ii), (iii), or (iv) of this Instruction is a corporation, the information called for by the above-referenced items shall be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation. If the person filing the statement is other than a natural person and does not have a class of equity securities registered under section 12 of the Act, or if the statement is filed by a group that includes such entities, in addition to the information required above, information for Items 2, 3, 5, 6, 10, and 11, inclusive, shall be provided for each person who contributes more than 10 percent of the equity capital, or has a right to receive in the aggregate, directly or indirectly, more than 10 percent of the profits, or upon dissolution or liquidation, 10 percent of the assets of that person or group. Such disclosure shall be required notwithstanding the absence of a control relationship.

* * * * *

4. By amending 240.14a–102 by revising Instruction 2 as follows:

**§ 240.14a–102 Schedule 14B. Information to be included in statements filed by or on behalf of a participant (other than the issuer) pursuant to 240.14a–11(c) (Rule 14a–11(c)).**

*Instructions.* * * *

2. If the participant filing the statement is a general or limited partnership, syndicate, or other group, the information called for by Items 2, 3, and 4(b) and (c), inclusive, shall be given with respect to: (i) each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such general or limited partnership, syndicate or other group, or any partner or member thereof, who is not a participant. If the participant filing the statement is a corporation or if a person referred to in (i), (ii), (iii), or (iv) of this Instruction is a corporation, the information called for by the above-referenced items shall be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation. If the person filing the statement is other than a natural person and does not have a class of equity securities registered under section 12 of the Act, or if the statement is filed by a group that includes such entities, in addition to the information required above, information for Items 2–7, inclusive, shall be provided for each person who contributes more than 10 percent of the equity capital, or has a right to receive in the aggregate, directly or indirectly, more than 10 percent of the profits, or upon dissolution or liquidation, 10 percent of the assets of that person or group. Such disclosure shall be required notwithstanding the absence of a control relationship.

* * * * *

5. By amending § 240.14d–100 by revising General Instruction C as follows:

**§ 240.14d–100 Schedule 14D–1. Tender offer statement pursuant to section 14(d)(1) of the Securities Exchange Act of 1934.**

* * * * *

*General Instruction.* * * *

C. If the statement is filed by a general or limited partnership, syndicate, or other group, the information called for by Items 2–7, inclusive, shall be given with respect to (i) each partner of such general partnership; (ii) each partner who is denominated as a general partner or who functions as a general partner of such limited partnership; (iii) each member of such syndicate or group; and (iv) each person controlling such general or limited partnership, syndicate or other group or any partner or member thereof. If the statement is filed by a corporation or if a person referred to in (i), (ii), (iii), or (iv) of this Instruction is a corporation, the information called for by the above-referenced items shall be given with respect to (a) each executive officer and director of such corporation; (b) each person controlling such corporation; and (c) each executive officer and director of any corporation or other person ultimately in control of such corporation. If the person filing the statement is other than a natural person and does not have a class of equity securities registered under section 12 of the Act, or if the statement is filed by a group that includes such entities, in addition to the information required above, information for Items 2–7, inclusive, shall be provided for each person who contributes more than 10 percent of the equity capital, or has a right to receive in the aggregate, directly or indirectly, more than 10 percent of the profits, or upon dissolution or liquidation, 10 percent of the assets of that person or group. Such disclosure shall be required notwithstanding the absence of a control relationship.

BILLING CODE 8810-01-M

## DEPARTMENT OF THE TREASURY

### Fiscal Service

### 31 CFR Parts 235, 240, 245, and 248

### Indorsement and Payment of Checks Drawn on the United States Treasury

**AGENCY:** Financial Management Service, Fiscal Service, Treasury.

**ACTION:** Proposed rule.

**SUMMARY:** The proposed rule invites comments on changes to existing regulations governing the indorsement and payment of checks drawn on the United States Treasury and the processing of claims on Treasury checks. The changes are required by Title X of the Competitive Equality Banking Act of 1987 which (1) provides that Treasury may decline payment on a Treasury check unless it is negotiated within one year, (2) provides for the cancellation of Treasury checks outstanding after one year, and (3) decreases the time limit for claims on Treasury checks to be brought by or against the United States.

**DATE:** Comments must be received no later than May 12, 1989.

**ADDRESSES:** Send comments on the proposed rule to Joan Pesata, Director, Limited Payability Project, Financial Management Service, Room 816–C, Prince Georges Center II Building, 3700 East-West Highway, Hyattsville, Maryland 20782.

**FOR FURTHER INFORMATION CONTACT:** Joan Pesata, Director, Limited Payability Project, Financial Management Service, Room 816–C, Prince Georges Center II Building, 3700 East-West Highway, Hyattsville, Maryland 20782; telephone (301) 436–7172, (FTS) 436–7172.

**SUPPLEMENTARY INFORMATION:** On August 10, 1987, Congress enacted the Competitive Equality Banking Act of 1987 (CEBA), Pub. L. No. 100–86, 101 Stat. 552, 659. Title X of CEBA changes the existing laws with respect to the indorsement and payment of checks drawn on the United States Treasury. At present, Treasury checks may be negotiated at any time after they are issued. Under CEBA, Treasury is not required to pay a Treasury check issued on or after the effective date of the legislation unless it is negotiated to a financial institution within 12 months after the date of issuance of the check. Treasury is not required to pay a Treasury check issued before the effective date of the legislation unless it is negotiated to a financial institution within 12 months after the effective date. The legislation provides for the cancellation of Treasury checks which are outstanding for more than one year.

Title X of CEBA changes the existing laws concerning the filing of claims on account of Treasury checks. Under existing law, a claimant may bring a claim on a Treasury check for 6 years from the date of issuance. Under CEBA, a claim is barred unless presented to the agency that authorized the issuance of the check within one year after the date of issuance of the check. Claims on checks issued before the effective date of the legislation must be filed within one year after the effective date. The new law also reduces the time period during which Treasury may reclaim the amount of a check which has been paid over a forged or unauthorized indorsement.

Congress provided that the amendments contained in Sections 1002, 1003, and 1004 of Title X of CEBA would become effective 6 months after enactment or on such later date as the Secretary of the Treasury may prescribe. On February 8, 1988, Treasury published a Policy statement in the **Federal Register** (53 FR 3584) which extended the effective date of the statute to October 1, 1989. Section 1005 of Title X of CEBA authorizes the Secretary of the Treasury to prescribe rules, regulations and procedures as he deems necessary to implement the amendments made by Sections 1002, 1003 and 1004, including the recertification of Treasury checks which have been cancelled or for which a claim has been asserted or barred. In the proposed rule, Treasury amends the existing regulations concerning the payment of checks and check claims to implement the changes required by the statute. The proposed rule also provides explicit authority for agency recertification of payments. It is anticipated that the Final rule will be effective on October 1, 1989, which is the same date that the statutory provisions become effective.

### Summary of Proposed Rule

*Part 235*

Part 235 governs the issuance of settlement checks for checks drawn on the United States Treasury and drawn on designated depositaries that have been negotiated and paid on a forged or unauthorized indorsement. Title X of CEBA addresses Treasury checks only and is silent on the subject of depositary checks. Therefore, the regulation preserves the existing authority in Part 235 for the issuance of settlement checks for checks drawn on depositaries. The authority to issue replacement checks for forged Treasury checks is found in Part 245 of the proposed rule.

*Part 240*

Part 240 governs the payment and indorsement of Treasury checks. Both § 240.3—*Limitations on payments* and § 240.4—*Cancellation and distribution of the proceeds of checks* are new. The time limitations on the payment of Treasury checks are contained in § 240.3. The regulation requires all Treasury checks issued after October 1, 1989 to bear the legend, "VOID AFTER ONE YEAR." Sections 240.3(c), (d) and (e) restate Treasury's existing rights with respect to Treasury checks: (1) Treasury has the right to examine checks and refuse payment of any check; (2) Treasury checks are deemed paid only after first examination by Treasury has been completed; and (3) If Treasury has notice of a question of law of fact about whether a check is properly payable, Treasury may defer payment until the Comptroller General settles the question.

Section 240.4 provides for the cancellation of checks which have been outstanding more than one year. The proceeds of checks issued on or after October 1, 1989 which are subsequently cancelled shall be returned to the agency which authorized the issuance of the check. The proceeds of checks issued before October 1, 1989 which are subsequently cancelled shall be applied as provided in Title X of CEBA (31 U.S.C. 3334) to eliminate the balances in accounts that represent uncollectible accounts receivable and other costs associated with the payment of checks and check claims by the Department of Treasury on behalf of all payment certifying agencies. Any remaining proceeds shall be deposited to the miscellaneous receipts of the Treasury.

Section 240.6 is renamed *Reclamation of amounts of paid checks* to reflect the usage of the term "reclamation" by Treasury for an action by Treasury to recover from the presenting bank or other endorser the amount of a check that has been paid over a forged or unauthorized endorsement. Section 240.6(d) contains the new time limits on reclamation actions. Treasury may reclaim within one year after the date of payment. The date of payment to the date on which the Federal Reserve Bank gives provisional credit for the item to the member bank or clearing bank. The one year period for reclamations is extended by 180 days if a timely check claim is filed with the agency that authorized the issuance of the check.

The other changes in Part 240 are relatively minor. There are definitions for two additional terms—"Certifying official" and "Commissioner". In addition, several sections in the existing Part 240 have been renumbered to accomodate the new material, but the text of these sections remains unchanged. Sections 240.11 through 240.15 concerning Indorsement of Checks is essentially unchanged from the existing regulation. However, the proposed rule in § 240.11(f) deletes a provision in the existing § 240.10(f) permitting the presentation of Social Security benefit checks to the Treasury Regional Financial Center in certain cases. The provision is being deleted because, after the effective date, all claims on Treasury checks must originate with the agency that authorized the issuance of the check.

*Part 245*

The proposed rule would change Part 245 substantially. The title of the part would become "Claims on Account of Treasury Checks," which more accurately reflects the subject matter of the part.

The central feature of Part 245 is contained in § 245.5—*Recertification of Payment.* Section 1005 of CEBA authorizes the Secretary of Treasury to write regulations implementing the amendments made by sections 1002, 1003 and 1004 of the law, including recertification of Treasury checks which have been cancelled or for which a claim has been asserted or barred. Under existing law, Treasury can, subject to certain conditions, issue substitute checks when the original check is lost, destroyed, mutilated or defaced. 31 U.S.C. 3331. When the original check is forged, Treasury can, under existing law, issue a settlement check. 31 U.S.C. 3343. The Introductory section explains that Part 245 covers the issuance of replacement checks when (a) the original check has been lost, stolen, destroyed, or mutilated, (b) the original check has been negotiated and paid on a forged or unauthorized indorsement, and (c) the original check has been cancelled.

The proposed rule gives Federal agencies broad authority to recertify payments when there is a claim of non-receipt, loss, destruction, mutilation or defacement of a Treasury check. The regulation provides a certifying agency may recertify a new payment at any time after receipt of a claim. Therefore, Treasury will only issue a second check, which is called a "replacement check," pursuant to the recertification of the payment by the certifying agency. After the effective date, Treasury will no longer issue settlement checks or substitute checks.

Section 245.3 contains the basic time limit for filing a claim on a Treasury check. A claim must be filed within one year after the date of issuance of the check. Claims on checks issued before October 1, 1989, must be filed before October 1, 1990. In addition, the regulation states that claims must originate with the agency that authorized the issuance of the check. However, a claim by an indorser may be presented directly to Treasury.

After the effective date, Treasury will maintain checks and check records for 18 months from the date of issuance. During that 18 month period, Treasury will provide both information on the status of the check and a copy of the check to the agency that authorized its issuance. After 18 months, Treasury will transfer custody of the checks and check records to the agency that autorized the issuance of the check for its use in the settlement of any claim for an obligation represented by a check.

*Part 248*

The proposed rule contains minor changes to Part 248. Part 248 preserves the existing authority to issue substitutes for lost, stolen, or destroyed checks drawn on foreign depositary banks. Title X of CEBA does not address depositary checks.

### Executive Order 12291

The Treasury Department has determined that the proposed regulation is not a "major rule" within the meaning of Executive Order 12291 (46 FR 13193, February 19, 1981). It is not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Therefore, preparation of a Regulatory Impact Analysis is not required.

### Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603 and 604) are not applicable to this proposal because the proposed rule, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this proposed rule, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

### Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the collection of information contained in this proposed rule has been submitted to the Office of Management and Budget for review. Comments on the collection of information should be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Financial Management Service, with copies to the Financial Management Service at the address previously specified.

The collection of information in this regulation is in 31 CFR 245.4. The proposed rule requires that a person making a claim on a Treasury check provide information concerning the check to the government agency which authorized the issuance of the check. The information will be used by the agency to determine whether the claimant is entitled to a replacement check. The likely respondents are individuals.

The proposed rule imposes no new collection of information requirement nor does it increase the collection of information burden. The reporting burden is attributable to the various agencies that receive the information from check claimants. The estimated total reporting burden for all government agencies is as follows:

Estimated total annual reporting burden: 160,320 hours.

Estimated average annual burden per respondent: .167 hour.

Estimated number of respondents: 960,000.

Estimated annual frequency of responses: On occasion.

VOL 54 ISS 47 MR 13 1989 UMI

List of Subjects

*31 CFR Part 235*

Banks, Banking, Claims, Forgery.

*31 CFR Part 240*

Banks, Banking, Forgery.

*31 CFR Part 245*

Banks, Banking, Claims.

*31 CFR Part 248*

Banks, Banking, Claims, Foreign banking.

For the reasons set forth in the preamble, Treasury proposes to amend Title 31, Chapter II, Subchapter A of the Code of Federal Regulations as follows:

## PART 235—ISSUANCE OF SETTLEMENT CHECKS FOR FORGED CHECKS DRAWN ON DESIGNATED DEPOSITARIES

1. Part 235 is amended by revising the part heading as set forth above.

2. The authority citation for Part 235 is revised to read as follows:

Authority: 31 U.S.C. 3343

**§ 235.1 [Amended]**

3. Section 235.1 is amended by removing "drawn on the United States Treasury and".

**§ 235.3 [Amended]**

4. Section 235.3 is amended by removing "the Commissioner, Financial Management Service, with respect to a check drawn on the United States Treasury, or".

5. Section 235.6 is revised to read as follows:

**§ 235.6 Implementing instructions.**

Procedural instructions implementing these regulations will be issued by the Commissioner of the Financial Management Service in Volume I, Part 4 of the Treasury Financial Manual.

Parts 240 and 245 are revised to read as follows:

## PART 240—INDORSEMENT AND PAYMENT OF CHECKS DRAWN ON THE UNITED STATES TREASURY

### General Provisions

Sec.

240.1 Scope of regulations.
240.2 Definitions.
240.3 Limitations on payments.
240.4 Cancellation and distribution of proceeds of checks.
240.5 Guaranty of indorsements.
240.6 Reclamation of amount of paid checks.
240.7 Demand and protest.
240.8 Offset.
240.9 Processing of checks.
240.10 Release of original checks.

### Indorsement of Checks

240.11 Indorsement by payees.
240.12 Checks issued to incompetent payees.
240.13 Checks issued to deceased payees.
240.14 Checks issued to minor payees in certain cases.
240.15 Powers of attorney.

### Appendix—Standard Forms for Power of Attorney and Their Application.

Authority: 5 U.S.C. 301; 12 U.S.C. 391; 31 U.S.C. 3328; 31 U.S.C. 3331; 31 U.S.C. 3343, 31 U.S.C. 3711; 31 U.S.C. 3716; 31 U.S.C. 3717; 332 U.S. 234 (1947); 316 U.S. 393 (1943).

### General Provisions

**§ 240.1 Scope of regulations.**

The regulations in this part prescribe the requirements for indorsement and the conditions for payment of checks drawn on the United States Treasury. These regulations also establish procedures for collection of amounts due the United States Treasury because of payments on checks bearing forged or other unauthorized indorsements or other material defects or alterations.

**§ 240.2 Definitions.**

(a) "Certifying agency" means an agency for whom a Treasury disbursing officer or a non-Treasury disbursing officer makes payment in accordance with 31 U.S.C. 3325. The responsibilities of a certifying official are set forth at 31 U.S.C. 3528.

(b) "Check" or "checks" means a check or checks drawn on the United States Treasury.

(c) "Check payment" means the amount paid to a presenting bank in accordance with § 240.9(a)(3) of this part.

(d) "Commissioner" means the Commissioner of the Financial Management Service, Department of the Treasury, 401 14th Street, SW., Washington, DC 20227.

(e) "Days" means calendar days.

(f) "Financial institution" means any bank, savings bank, savings and loan association, Federal or State chartered credit union, or similar institution.

(g) "Item" means a reference in a monthly interest billing statement to a check for the amount of which Treasury has demanded refund from a presenting bank.

(h) "Monthly interest billing statement" means a statement prepared by Treasury and sent to a presenting bank which includes the following information regarding each outstanding demand for refund:

(1) The reclamation date;

(2) The reclamation number;

(3) Check identifying information; and

(4) The balance due, including interest.

(i) "Person" or "persons" means an individual or individuals, or an institution or institutions including all forms of financial institutions.

(j) "Presenting bank" means (1) a financial institution which, either directly or through a correspondent banking relationship, presents checks to and receives provisional credit from a Federal Reserve Bank, or (2) a depositary which is authorized to charge checks directly to the General Account of the United States Treasury and present them to Treasury for payment through a designated Federal Reserve Bank.

(k) "Protest" means a presenting bank's written statement and any supporting documentation tending to prove that it is not liable for refund of the reclamation balance.

(l) "Reclamation" means a demand by Treasury for refund of the amount of a check payment.

(m) "Reclamation date" means the date on which a demand for refund was prepared. Normally, demands are sent to presenting banks within two working days of the reclamation date.

(n) "Treasury" means the United States Treasury.

(o) "U.S. securities" means securities of the United States and securities of Federal agencies and wholly or partially Government-owned corporations for which the Treasury acts as the transfer agent.

(p) "Unauthorized indorsement" means (1) an indorsement made by a person other than the payee, except as authorized by and in accordance with § 204.5 and § 240.11 through § 240.15 of this part, (2) an indorsement by a financial institution under circumstances in which the financial institution breaches the guaranty required of it by 31 CFR 209.9(a) (*see*, 31 CFR 209.8), or (3) a missing indorsement where the depositary bank had no authority to supply the indorsement.

**§ 240.3 Limitations on payment.**

(a) As a general rule,

(1) The Commissioner shall not be required to pay a Treasury check issued on or after October 1, 1989 unless it is negotiated to a financial institution within 12 months after the date on which the check was issued; and

(2) The Commissioner shall not be required to pay a Treasury check issued before October 1, 1989 unless it is negotiated to a financial institution no later than October 1, 1990.

(b) All checks drawn on the United States Treasury and issued on or after October 1, 1989 shall bear a legend, stating "VOID AFTER ONE YEAR". The legend is notice to payees and indorsers of a general limitation on the payment of Treasury checks. The legend, or the

inadvertent lack thereof, does not limit, or otherwise affect, the rights of the Commissioner under the law.

(c) The Treasury shall have the usual right of a drawee to examine checks presented for payment and refuse payment of any checks. The Treasury shall have a reasonable time to make such examination.

(d) Checks shall be deemed to be paid by the United States Treasury only after first examination has been completed.

(e) If the Treasury is on notice of a question of law or fact about whether a Treasury check is properly payable when the check is presented for payment, the Commissioner may defer payment until the Comptroller General settles the question.

**§ 240.4 Cancellation and distribution of proceeds of checks.**

(a) *Checks issued on or after October 1, 1989.* (1) Any check issued on or after October 1, 1989 that has not been paid and remains outstanding for more than 12 months shall be cancelled by the Commissioner.

(2) The proceeds from checks cancelled pursuant to paragraph (a) of this section shall be returned to the agency which authorized the issuance of the check and credited to the appropriation or fund account initially charged for the payment.

(3) Beginning January 1, 1991, and monthly thereafter, the Commission shall provide to each agency that authorizes the issuance of Treasury checks a list of those checks issued for such agency which were cancelled during the preceding month pursuant to paragraph (a) of this section.

(b) *Checks issued before October 1, 1989.* (1) Any check issued before October 1, 1989 that has not been paid and remains outstanding for more than 12 months shall be cancelled by the Commissioner no later than April 1, 1991.

(2) The proceeds from checks cancelled pursuant to paragraph (b) of this section shall be applied as required by 31 U.S.C. 3334.

**§ 240.5 Guaranty of indorsements.**

The presenting bank and the indorsers of a check presented to the Treasury for payment are deemed to guarantee to the Treasury that all prior indorsements are genuine, whether or not an express guaranty is placed on the check. When the first indorsement has been made by one other than the payee personally, the presenting bank and the indorsers are deemed to guarantee to the Treasury, in addition to other warranties, that the person who so indorsed had unqualified capacity and authority to indorse the check on behalf of the payee.

**§ 240.6 Reclamation of amounts of paid checks.**

(a) If, after a check has been paid by Treasury, it is found to:

(1) Bear a forged or unauthorized indorsement, or

(2) Contain any other material defect or alternation which was not discovered upon first examination, then, upon demand by the Treasury in accordance with the procedures specified in § 240.7 of this part, the presenting bank or other indorser shall refund the amount of the check payment.

(b) Interest on any unpaid item shall commence to accrue on the sixty-first day after the reclamation date. Interest shall be calculated at the rate set from time to time for purposes of 31 U.S.C. 323. Interest shall continue to accrue until the amount demanded is paid or the reclamation is abandoned by Treasury.

(c) In addition to its right to recover interest, Treasury shall have the right to recover such other applicable charges (*e.g.*, administrative collection costs, late payment penalties) as may be authorized or required by law.

(d) If the Treasury determines that a check has been paid over a forged or unauthorized indorsement, the Commission may reclaim the amount of the check from the presenting bank or any other indorser that breached its guarantee of indorsement prior to:

(1) The end of the one-year period beginning on the date of payment; or

(2) The expiration of the 180-day period beginning on the close of the period described in paragraph (d)(1) of this section if a timely claim under 31 U.S.C. 3702 is presented to the agency which authorized the issuance of the check.

**§ 240.7 Demand and protest.**

(a) For all reclamations an initial demand for refund of the amount of a check payment will be made by sending a "Request for Refund (Reclamation)," to the presenting bank or any other indorser. This Request shall advise the presenting bank of the amount demanded and the reason for the demand. Treasury will make follow-up demands by including each unpaid item on at least three monthly interest billing statements sent to the presenting bank. Monthly interest billing statements will identify any unpaid reclamation demands and will also show the amount of any accrued interest for each outstanding reclamation. Any discrepancies should be brought to Treasury's attention immediately at the address listed in paragraph (b) of this section. Monthly interest billing statements will contain or be accompanied by notice to the bank:

(1) That Treasury intends to collect the debt through administrative offset if the reclamation is not paid within 120 days of the reclamation date,

(2) That the bank has an opportunity to inspect and copy Treasury's records with respect to the reclamation,

(3) That the bank may, by filing a protest, request Treasury to review its decision that the bank is liable for the reclamation, and

(4) That the bank has an opportunity to enter into a written agreement with Treasury for the repayment of the amount of the reclamation. A request for a payment agreement must be accompanied by proof that satisfies the Treasury that the requesting bank is unable to repay the entire amount owed at the time that it is due.

(b) Requests for an appointment to inspect and copy Treasury's records with respect to a reclamation and requests to enter into repayment agreements should be sent in writing to: Department of the Treasury, Financial Management Service, Operations Division, Reclamation Branch, Room 700–D, 3700 East-West Highway, Hyattsville, MD 20782.

(c)(1) If a presenting bank wishes to contest its liability for the principal amount demanded, it shall send a protest, *i.e.*, a written statement and copies of all documentary evidence (*e.g.*, affidavits, account agreements, signature cards) and other written information raising a question of law or fact which, if resolved in the Bank's favor, would show that the bank is not liable, to: Department of the Treasury, Financial Management Service, Operations Division, Reclamation Branch, Room 700–D, 3700 East-West Highway, Hyattsville, MD 20782. The Director, Operations Division, who has supervisory authority over the Reclamation Branch, or his authorized subordinate, shall consider and decide any protest properly submitted under this paragraph. Neither the Director, Operations Division, nor any of his subordinates, shall have any involvement in the process of making findings or demands under § 240.6(a). In order to be considered, and to be timely, a protest must be received not later than 90 days after the reclamation date. Treasury will refrain from collection in accordance with § 240.8 while a timely protest is being considered. Unresolved protested items will be appropriately annotated on the monthly interest billing statement.

VOL 54 ISS 47 MR 13 1989 UMI

(2) If Treasury accepts the protest, the presenting bank shall be notified in writing that efforts to collect the item and any accrued interest have been abandoned.

(3) If the evidence sent by the presenting bank does not satisfy Treasury that refund of the amount demanded is not required under § 240.6(a), Treasury will notify the presenting bank in writing of its decision that the bank is liable for the amount demanded and the reasons for its decision. If the presenting bank fails to send the amount demanded within 30 days of the date of Treasury's decision, Treasury shall proceed to collect the amount owed in accordance with § 240.8, provided that no offset shall be taken sooner than 120 days after the reclamation date.

(4) If an item, and/or accrued interest relating to that item remains unpaid for 90 days after the reclamation date and if there is no unresolved protest associated with the item, the monthly interest billing statement will be annotated with a notice that the presenting bank has until the next billing date to make payment on the item or be subject to offset thereon.

**§ 240.8 Offset.**

(a) If an item, and/or accrued interest relating to that item, remains unpaid for 120 days after the reclamation date and the presenting bank has been sent at least one monthly interest billing statement informing it that Treasury intends to collect that item by offset, Treasury may refer the matter to any federal agency and request that agency to offset the indebtedness and other applicable charges against amounts otherwise owed by the federal agency to the presenting bank. Monthly interest billing statements will be annotated to identify those specific items that are to be referred to an agency for offset.

(b) If a bank wishes to make payment on an item referred to an agency for offset, it should contact Treasury at the address listed in § 240.7(b) of this part to reduce the possibility of a double collection. If an agency to which an indebtedness is referred in accordance with this paragraph is unable to effect offset in whole or in part, Treasury may then refer the debt to any other agency and request offset in accordance with this paragraph. Treasury designates each agency acting under this paragraph as its designee for the sole purpose of effecting offset. No such designee shall be liable to any party for any any loss resulting from its action under this paragraph.

(c) If Treasury is unable to collect an amount owed by use of the offset described in paragraph (a), Treasury shall take such action against the presenting bank as may be necessary to protect the interests of the United States, including referral to the Department of Justice.

(d) If Treasury effects offset under this section and it is later determined that the presenting bank paid the amount of the reclamation and accrued interest thereon, or that a presenting bank which had timely filed a protest was not liable for the amount of the reclamation, Treasury shall promptly refund to the presenting bank the amount of its payment.

**§ 240.9 Processing of checks.**

(a) *Federal Reserve Banks.* (1) Federal Reserve Banks shall cash checks for government disbursing officers when such checks are drawn by the disbursing officers to their own order. Payment of such checks shall not be refused except for alteration or counterfeiting of the check, or or forged signature of the drawer.

(2) Federal Reserve Banks shall be expected to cash government checks presented direct to them by the general public.

(3) As a depository of public funds, each Federal Reserve Bank shall: (i) Receive checks from its member banks, nonmember clearing banks, or other depositors, when indorsed by such banks or depositors who guarantee all prior indorsements thereon; (ii) give immediate credit therefor in accordance with their current Time Schedules and charge the amount of the checks cashed or otherwise received to the account of the Treasury, subject to examination and payment by the United States Treasury; (iii) forward payment records and copies of checks to Treasury; and (iv) upon notification from Treasury, release the original checks to a designated Federal Records Center. The Treasury shall return to the forwarding Federal Reserve Bank a photocopy of any check the payment of which is refused upon first examination. Federal Reserve Banks shall give immediate credit therefor in the United States Treasury's account, thereby reversing the previous charge to the account for such check.

(b) *Depositaries outside of the mainland of the United States.* Banks outside of the mainland of the United States designated as depositaries of public money and permitted to charge checks to the General Account of the United States Treasury shall be governed by the operating instructions contained in the letter of authorization to them from Treasury and shall assume the obligations of presenting banks set forth in §§ 240.5 and 240.6. Checks charged to the General Account of the United States Treasury along with the supporting credit voucher shall be shipped to the Federal Reserve Bank of Richmond. The Treasury shall return to the presenting depository bank a photocopy of any check the payment of which is refused. The depositary bank shall give immediate credit therefor in the General Account of the United States Treasury, thereby reversing the previous charge to the Account for such check.

**§ 240.10 Release of original checks.**

An original check may be released to a responsible indorser upon receipt of a properly authorized request showing the reason it is required and that the request is in conformity with all applicable law including the Privacy Act.

## Indorsement of Checks

**§ 240.11 Indorsement by payees.**

(a) *General requirements.* Checks shall be indorsed by the payee or payees named, or by another on behalf of such payees as set forth in this part.

(b) *Checks indorsed by the payee or payees named.* When a check is indorsed by the payee or payees named, the forms of indorsement shall conform to those recognized by general principles of law and commercial usage for negotiation, transfer or collection of negotiable instruments.

(c) *Checks indorsed by another on behalf of the named payee or payees—*(1) *Acceptable indorsement.* The only acceptable indorsement of a check by another on behalf of the named payee or payees (except when a check is indorsed by a financial institution under the payee's or payees' authorization) is one which indicates that the person indorsing is doing so on behalf of the named payee or payees. Such an acceptable indorsement shall include the signature of the indorser and sufficient wording to indicate that the indorser is indorsing on behalf of the named payee or payees, pursuant to authority expressly conferred by or under law or other regulation. An example would be: "John Jones by Mary Jones". This example states the minimum indication acceptable. However, §§ 240.12(a)(1), 240.13(a)(1) and 240.15(d) specify the addition of an indication in specified situations of the actual capacity in which the person other than the named payee is indorsing. Checks indorsed "for collection" or "for deposit only to the credit of the within named payee or payees", are acceptable without any signature. However, in the absence of a signature, the presenting bank will be deemed to guarantee its good title to such checks to all subsequent indorsers and to Treasury.

(2) *Unacceptable indorsement.* The indorsement by another on behalf of the named payee or payees, which consists of the name(s) of the payee(s), whether as purported signature(s) or otherwise, and *not* the signature of the person other than the named payee or payees indorsing the check, regardless of the relationship between the indorser and the named payee or payees, will be rebuttably presumed to be a forgery and is unacceptable. The indorsement by a person who purports to indorse for the named payee(s) with an indorsement consisting of the name(s) of the payee(s), whether as purported signature(s) or otherwise, and the indorsing person's signature and no indication of the indorsing person's representative capacity, will create a rebuttable presumption that the indorsing person was not authorized to indorse for the named payee(s). In these circumstances it is the responsibility of the individual or institution accepting a check from a person other than the named payee(s) to determine that such person is authorized and has the capacity to indorse and negotiate the check. Evidence of the basis for such a determination may be required by the Treasury in the event of a dispute.

(d) *Indorsement of checks by a financial institution under the payee's authorization.* When a check is credited by a financial institution to the payee's account under the payee's or payees' authorization, the financial institution may use an indorsement substantially as follows: "Credit to the account of the within-named payee in accordance with the payee's or payees' instructions. XYZ". A financial institution using this form of indorsement will be deemed to guarantee to all subsequent indorsers and to the Treasury that it is acting as an attorney-in-fact for the payee or payees, under the payee's or payees' authorization, and that this authority is currently in force and has neither lapsed nor been revoked either in fact or by the death or incapacity of the payee or payees.

(e) *Indorsement of checks drawn in favor of financial institutions.* All checks drawn in favor of financial institutions, for credit to the accounts of persons designated payment so to be made, shall be indorsed in the name of the financial institutions as payee in the usual manner. Financial institutions receiving and indorsing such checks shall comply fully with Part 209 of this chapter.

(f) *Social Security benefit checks issued jointly to individuals of the same family.* A social security benefit check issued jointly to 2 or more individuals of the same family shall, upon the death of 1 of the joint payees prior to the negotiation of such check, be returned to the Social Security District Office. Payment of the check to the surviving payee or payees may be authorized by placing on the face of the check a stamped legend signed by an official of the Social Security Administration, redesignating such survivor or survivors as the payee or payees of the check. A check bearing such stamped legend, signed as herein prescribed, may be indorsed and negotiated by the person or persons named as if such check originally had been drawn payable to such person or persons.

**§ 240.12 Checks issued to incompetent payees.**

(a) *Classes of checks which may be indorsed by guardian or fiduciary.* Where the payee of a check of any class listed in § 240.11(a) has been declared incompetent:

(1) If a check is indorsed by a legal guardian or other fiduciary, such legal guardian or fiduciary shall include, as a part of the indorsement, an indication of the capacity in which the legal guardian or fiduciary is indorsing. An example would be: "John Jones by Mary Jones, guardian of John Jones". When a check indorsed in this fashion is presented for payment by a bank, it will be paid by the Treasury without submission to the Treasury of documentary proof of the authority of the guardian or other fiduciary, with the understanding that evidence of such claimed authority to indorse may be required by the Treasury in the event of a dispute.

(2) If a guardian has not been or will not be appointed, and if the check: (i) Was issued in payment of goods and services, tax refunds or redemption of currency, it shall be forwarded for advice to the certifying agency; or

(ii) Was issued in payment of principal or interest on U.S. securities, it shall be forwarded to the Bureau of the Public Debt, Division of Loans and Currency, Washington, DC 20226, with a full explanation of the circumstances.

(b) *Classes of checks which may not be indorsed by guardian or fiduciary.* Where the payee of a check of any other class has been declared incompetent, the check shall not be indorsed by a guardian or other fiduciary. The check shall be returned to the government agency for which issued with information as to the incompetency of the payee and submission of documentary evidence showing the appointment of the guardian or other explanation in order that a replacement check, and others to be issued subsequently, may be drawn in favor of the guardian.

**§ 240.13 Checks issued to deceased payees.**

(a)(1) *Classes of checks which may be indorsed by an executor or administrator.* Checks issued for the classes of payments indicated below, the right to which under law does not terminate with the death of the payee, when indorsed by an executor or administrator, shall include, as part of the indorsement, an indication of the capacity in which the executor or administrator is indorsing. An example would be: "John Jones by Mary Jones, executor of the estate of John Jones". Such checks, when presented for payment by a bank, will be paid by the Treasury without the submission of documentary proof of the authority of the executor or administrator, with the understanding that evidence of such claimed authority to indorse may be required by the Treasury in the event of a dispute. The classes of payments to which this subsection refers are:

(i) Payments for the redemption of currencies or for principal or interest on U.S. securities;

(ii) Payments for tax refunds; and

(iii) Payments for goods and services.

(2) If an executor has not been appointed, persons claiming as owners shall return the checks for appropriate handling to the Government agency that certified the payment. If there is doubt as to whether the proceeds of the check or checks pass to the estate of the deceased payee, the checks shall be handled in accordance with paragraph (b) of this section.

(b) *Classes of checks which may not be indorsed by an executor or administrator.* Checks issued for classes of payment other than those specified in paragraph (a) of this section may not be negotiated after the death of the payee, but must be returned to the Government agency that certified the payment for determination whether, under applicable laws, payment is due and to whom it may be made.

**§ 240.14 Checks issued to minor payees in certain cases.**

Checks issued to minors in payment of principal or interest on U.S. securities may be indorsed by either parent with whom the minor resides, or, if the minor does not reside with either parent, by the person who furnishes his chief support. The parent or other person indorsing in behalf of the minor shall present with the check his signed statement giving the minor's age, stating

VOL 54 ISS 47 MR 13 1989 UMI

that the payee either resides with the parent or receives his chief support from the person indorsing in his behalf, and that the proceeds of the checks will be used for the minor's benefit.

**§ 240.15 Powers of attorney.**

(a) *Specific powers of attorney.* Any check may be negotiated under a specific power of attorney executed after the issuance of the check and describing it in full.

(b) *General powers of attorney.* Checks issued for the following classes of payments may be negotiated under a general power of attorney in favor of an individual, financial institution or other entity:

(1) Payments for the redemption of currencies or for principal or interest on U.S. securities.

(2) Payments for tax refunds, but subject to the limitations concerning the mailing of internal revenue refund checks contained in 26 CFR 601.506(b).

(3) Payments for goods and services.

(c) *Special powers of attorney.* Under decisions of the Comptroller General of the United States, classes of checks other than those specified in paragraph (b) of this section may be negotiated under a special power of attorney which names a financial institution as attorney-in-fact, and recites that it is not given to carry into effect an assignment of the right to receive payment, either to the attorney-in-fact or to any other person.

(d) *Proof of authority.* Check indorsed by an attorney-in-fact shall include, as part of the indorsement, an indication of the capacity in which the attorney-in-fact is indorsing. An example would be: "John Jones by Paul Smith, attorney-in-fact for John Jones." Such checks when presented for payment by a bank, will be paid by Treasury without the submission of documentary proof of the claimed authority, with the understanding that evidence of such claimed authority to indorse may be required by the Treasury in the event of a dispute.

(e) *Revocation of powers of attorney.* Powers of attorney are revoked by the death of the grantor and may also be revoked by notice from the grantor to the parties known, or reasonably expected, to be acting on the power of attorney. Notice of revocation to the Treasury will not ordinarily serve to revoke the power.

(f) *Acknowledgment of powers of attorney.* Where desirable or where required by foreign, state or local law, powers of attorney shall be acknowledged before a notary public or other officer authorized by law to administer oaths generally.

(g) *Seal or certificate of attesting officers.* Where acknowledgment of powers of attorney is desirable or required pursuant to paragraph (f) of this section, seals of attesting officers shall be impressed or stamped upon the power of attorney form, or the power of attorney shall be accompanied by a certificate from an appropriate official showing that the officer was in commission on the date of acknowledgment.

(h) *Forms.* Power of attorney forms issued under this part are listed in the appendix to this part. They may be obtained from the Financial Management Service, Property and Supply Section, Ardmore East Business Center, 3361–L 75th Avenue, Landover, MD 20785.

**Appendix—Standard Forms For Power of Attorney and Their Application.**

*Standard Form 231.* A general power of attorney on this form may be executed by an individual, firm, or sole owner, for checks drawn on the United States Treasury, in payment: (1) For redemption of currencies or for principal or interest on U.S. securities, (2) for tax refunds, and (3) for goods and services.

*Standard Form 232.* A specific power of attorney on this form, which must be executed after the issuance of the check, describing the check in full, may be used to authorize the indorsement of any class of check drawn on the United States Treasury.

*Standard Form 233.* A special power of attorney on this form naming a financial organization as attorney-in-fact and reciting that it is not given to carry into effect an assignment of the right to receive payment, either to the attorney in fact or to any other person, may be used for classes of payments other than those shown under Standard Form 231.

*Standard Form 234–5.* A general power of attorney may be executed by a corporation for the classes of payment listed under Standard Form 231.

*Standard Form 236–7.* A specific power of attorney may be executed on this form by a corporation to cover a specific check for any class of payment.

## PART 245—CLAIMS ON ACCOUNT OF TREASURY CHECKS

Sec.
245.1 Introductory.
245.2 Definitions.
245.3 Time limit for check claims.
245.4 Advice of nonreceipt or loss.
245.5 Recertification of payment.
245.6 Claim by an indorser.
245.7 Check status inquiry.
245.8 Receipt or recovery of original check.
245.9 Procedural instructions.
245.10 Performance of functions of the Commissioner.

**Authority:** R.S. 3646, as amended; 31 U.S.C. 3328; 31 U.S.C. 3331

**§ 245.1 Introductory.**

This part governs the issuance of replacement checks for checks drawn on the United States Treasury, when

(a) The original check has been lost, stolen, destroyed or mutilated or defaced to such an extent that it is rendered non-negotiable;

(b) The original check has been negotiated and paid on a forged or unauthorized indorsement, and

(c) The original check has been cancelled pursuant to § 240.4

**§ 245.2 Definitions.**

For purposes of this part:

(a) "Agency" means each authority of the United States for which the Treasury of the United States issues checks or for which checks drawn on the Treasury of the United States are issued.

(b) "Check" means a check drawn on the United States Treasury.

(c) "Certifying agency" means an agency for whom a Treasury disbursing officer or a non-Treasury disbursing officer makes payment in accordance with 31 U.S.C. 3325. The responsibilities of a certifying official are set forth at 31 U.S.C. 3528.

(d) "Commissioner" means the Commissioner of the Financial Management Service, Department of the Treasury, 401 14th Street, SW., Washington, DC 20227.

(e) "Person" means an individual, a partnership, a corporation, a labor organization, a government or a subdivision or instrumentality thereof, and any other entity to which a check may be issued.

(f) "Replacement check" means a check issued pursuant to the recertification of payment by a certifying official.

(g) "Secretary" means the Secretary of the Treasury.

**§ 245.3 Time limit for check claims.**

(a) Any claim on account of a Treasury check must be presented to the agency that authorized the issuance of such check within one year after the date of issuance of the check or within one year after October 1, 1989, whichever is later.

(b) Any claim by an indorser under § 245.6 will be considered timely if presented to the Commissioner within one year after the date of issuance of the check or within one year after October 1, 1989, whichever is later.

(c) Nothing in this subsection affects the underlying obligation of the United States, or any agency thereof, for which a Treasury check was issued.

**§ 245.4 Advice of nonreceipt or loss.**

(a) In the event of the nonreceipt, loss or destruction of a check drawn on the United States Treasury, or the mutilation or defacement of such a check to an extent which renders it nonnegotiable, the claimant should immediately notify the agency that authorized the issuance of such check, describing the check, stating the purpose for which it was issued and giving, if possible, its date, amount, Treasury symbol and number.

(b) In cases involving mutilated or defaced checks, the claimant should enclose the mutilated or defaced check with his communication to the agency.

**§ 245.5 Recertification of payment.**

Upon receipt of a claim concerning the nonreceipt, loss, destruction, mutilation or defacement of a check, or the cancellation of a check pursuant to § 240.4, the certifying agency may certify a new payment.

**§ 245.6 Claim by an indorser.**

When one or more Treasury checks are lost, stolen or destroyed in a single incident while in the possession of a person to whom the checks have been negotiated by the payee, and if the checks have not been paid, the Commissioner may issue a replacement check to the person to whom the checks had been negotiated.

**§ 245.7 Check status inquiry.**

(a) For a period not exceeding 18 months from the date of issuance of a Treasury check, the Commissioner will provide the status and a copy of the check, upon request, to the agency which authorized the issuance of the check.

(b) Upon expiration of the 18-month period beginning with the date of issuance of the check custody of the records concerning Treasury checks will be transferred to the agency which authorized the issuance of the check.

**§ 245.8 Receipt or recovery of original check.**

(a) If the original check is received or recovered by the claimant after he has requested the agency to issue a replacement check, but before a replacement check has been received, he should immediately advise the agency and hold such check until receipt of instructions with respect to the negotiability of such check.

(b) If the original check is received or recovered by the claimant after a replacement check has been received by him, the original shall not be cashed, but shall be forwarded immediately to the agency that authorized the issuance of such check. Under no circumstances should both the original and replacement checks be cashed.

**§ 245.9 Procedural instructions.**

The Commissioner of the Financial Management Service may issue procedural instructions, implementing these regulations, in Volume I, Part 4 of the Treasury Financial Manual.

**§ 245.10 Performance of functions of the Commissioner.**

The Commissioner of the Financial Management Service may authorize any officer of the Treasury Department to perform any of his functions under this part and to redelegate such authority within such limits as the Commissioner may prescribe.

## PART 248—ISSUE OF SUBSTITUTES OF LOST, STOLEN, DESTROYED, MUTILATED AND DEFACED CHECKS OF THE UNITED STATES DRAWN ON ACCOUNTS MAINTAINED IN DEPOSITARY BANKS IN FOREIGN COUNTRIES OR UNITED STATES TERRITORIES OR POSSESSIONS

1. The authority citation for Part 248 is revised to read as follows:

**Authority:** 31 U.S.C. 3331.

2. Section 248.1 is revised to read as follows:

**§ 248.1 Introductory.**

This part governs the issuance of substitutes for checks of the United States drawn on United States dollar or foreign currency accounts, maintained with designated depositaries in foreign countries or territories or possessions of the United States. Checks of the United States drawn on such depositaries are hereafter referred to as "depositary checks."

**§ 248.5 [Amended]**

3. Section 248.5 is amended by removing "§ 368.4" and adding in its place § 248.4".

**W. E. Douglas,**

*Commissioner.*

## DEPARTMENT OF TRANSPORTATION

**Coast Guard**

**33 CFR Part 100**

**[CGD 05–89–06]**

## Special Local Regulations for Marine Events, Approaches to Annapolis Harbor, Spa Creek, and Severn River, Annapolis, MD

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Coast Guard is proposing to establish permanent special local regulations for the approaches to Annapolis Harbor, Spa Creek, and the Severn River, north to the Route 450 Bridge. This area is the site of several marine events each year, such as the Blue Angels and Insertion/Extraction Demonstrations and the Naval Academy Sailing Squadron Safety-at-Sea Seminar. The proposed regulations would govern vessel activities during these events. Notice of the precise dates and times that the regulations are effective will be published in the Local Notice to Mariners and by Federal Register Notice. The special local regulations are necessary to control vessel traffic due to the confined nature of the waterway and the expected congestion at the time of the events.

**DATES:** Comments should be received on or before April 27, 1989.

**ADDRESSES:** Comments should be mailed or hand delivered to Commander (bb), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004. The comments will be available for inspection and copying at Room 209 of that address. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** B.J. Stephenson, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004 (804) 398–6204.

**Drafting Information**

The drafters of this notice are Billy J. Stephenson, project officer, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, and Lieutenant Commander Robin K. Kutz, project attorney, Fifth Coast Guard District Legal Staff.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names

VOL 54 ISS 47 MR 13 1989 UMI

and addresses, identify this notice (CGD 05–89–08) and the specific section of the proposal to which their comments apply, and give reasons for each comment.

The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on the proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process. The receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

**Discussion of Regulation**

The area covered by this proposal is the same as that covered by special local regulations issued for several events in 1988, such as the Blue Angels and Insertion/Extraction Demonstrations. Federal Aviation Administration regulations require, as a prerequisite to issuing permits for such demonstrations, that the waterway over which aircraft will fly be closed to vessel traffic for the duration of the demonstrations. For this reason, the Commander, Fifth Coast Guard District, will close portions of the regulated area to all vessel traffic during all airshows, airshow practice sessions, and helicopter rescue demonstrations. The special local regulations will provide safety for spectator craft during the events.

If adopted, this proposal will apply to the 10th Annual Safety-at-Sea Seminar scheduled from 11:40 a.m. to 12:40 p.m. on April 1, 1989. It also will apply to future Safety-at-Sea Seminars, and an annual notice of the precise dates and times of the seminar would be published in a Local Notice to Mariners and by **Federal Register** Notice.

**Economic Assessment and Certification**

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). Because closure of the waterway is not anticipated for any extended period, commercial marine traffic will be inconvenienced only slightly. The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

**Federalism Assessment**

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment. Although closure of the proposed regulated area during marine events might have some small negative impact on the city of Annapolis, this impact pales when compared to the loss of revenue the local economy would face if these events could not be held due to a lack of regulation.

**Environmental Impact**

This rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.c of Commandant Instruction (COMDTINST) M16475.1B. A categorical Exclusion Determination statement has been prepared and has been placed in the rulemaking docket.

**List of Subjects in 33 CFR Part 100**

Marine safety, Navigation (water).

**Proposed Regulations**

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations as follows:

**PART 100—[AMENDED]**

1. The authority citation for Part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233; CFR 1.46 and 33 CFR 100.35.

2. A new § 100.511 is added to read as follows:

**§ 100.511 Approaches to Annapolis Harbor, Spa Creek, and Severn River, Annapolis, Maryland.**

(a) *Definitions*—(1) *Regulated Area.* The approaches to Annapolis Harbor, the waters of Spa Creek, and the Severn River, shore to shore, bounded on the south by a line drawn from Carr Point, at latitude 38°58'58.0" North, longitude 76°27'40.0" West, thence to Horn Point Warning Light (LLNR 17935), at 38°58'24.0" North, longitude 76°28'10.0" West, thence to Horn Point, at 38°58'20.0" North, longitude 76°28'27.0" West, and bounded on the north by the State Route 450 Bridge.

(2) *The Coast Guard Patrol Commander.* The Coast Guard Patrol Commander is a commissioned, warrant, or petty officer of the Coast Guard who has been designated by the Commander, Group Baltimore.

(b) *Special Local Regulations.* (1) Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area.

(2) The operator of any vessel in the immediate vicinity of this area shall:

(i) Stop the vessel immediately upon being directed to do so by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard ensign.

(ii) Proceed as directed by any commissioned, warrant, or petty officer.

(3) Any spectator vessel may anchor outside of the regulated area specified in paragraph (a) of this section but may not block a navigable channel.

(c) *Effective Period.* The Commander, Fifth Coast Guard District publishes a notice in the **Federal Register** and the Fifth Coast Guard District Local Notice to Mariners that announces the times and dates that the section is in effect.

Dated: February 21, 1989.

**A.D. Breed,**

*Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.*

**33 CFR Part 100**

**[CGD 05–89–08]**

**Special Local Regulations; Marine Event; American Diabetes Association, Choptank River Swim, Choptank River Bridge, Cambridge, MD**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Coast Guard is considering a proposal that would establish permanent regulations for the swim portion of the American Diabetes Association Triathalon, an annual event held in May. Annual notice of the precise name, dates and times of the swim will be published in the Local Notice to Mariners and a **Federal Register** Notice. The special local regulations will restrict general navigation in the regulated area during the event to provide for the safety of the swimmers and accompanying safety personnel.

**DATE:** Comments must be received on or before April 27, 1989.

**ADDRESS:** Comments should be mailed or hand carried to Commander (bb), Fifth Coast Guard District, 431 Crawford Street, Portsmouth Virginia 23704–5004.

The comments will be available for inspection and copying at Room 209 of this address. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** Billy J. Stephenson, Chief, Boating Affairs Branch, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004 (804) 398–6204.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD 05–89–08) and the specific section of the proposal to which their comments apply, and give reasons for each comment. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on the proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process. The receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

**Drafting Information**

The drafters of this notice are Mr. Billy J. Stephenson, project officer, Chief, Boating Affairs Branch, Fifth Coast Guard District, and Lieutenant Commander Robin K. Kutz, project attorney, Fifth Coast Guard District Legal Staff.

**Discussion of Proposed Regulation**

The area covered by this proposal is the same as that covered by the special local regulations for the American Diabetes Association Choptank River Swim (53 FR 16255; May 6, 1988) that was held on May 29, 1988. The swim portion of the triathalon is an annual event consisting of from 300 to 400 swimmers racing across the Choptank River from the north shore in front of the Ferry Boat Restaurant on the Talbot County side thence parallel to and within 200 feet of the Choptank River Bridge and ending at the south shore. It is necessary to close a portion of the Choptank River to all traffic except participants and their accompanying personnel for the safety of those competing in the swim. If adopted, this proposal will apply to the swim portion of the 1989 Reach the Beach Triathalon scheduled from 8:00 a.m. to 9:45 a.m. on May 28, 1989.

**Economic Assessment and Certification**

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). Because closure of the waterway is not anticipated for any extended period, commercial marine traffic will be inconvenienced only slightly. The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. Since the impact of this proposal is expected to be minimal the Coast Guard certifies that if adopted it will not have a significant economic impact on a substantial number of small entities.

**Federalism Assessment**

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the proposed rulemaking does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

**Environmental Impact**

This proposed rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with section 2.B.2.c of Commandant Instruction (COMDTINST) M16475.1B. A Categorical Exclusion Determination statement has been prepared and has been placed in the rulemaking docket.

**List of Subjects in 33 CFR Part 100**

Marine safety, Navigation (water).

**Proposed Regulations**

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations as follows:

**PART 100—[AMENDED]**

1. The authority citation for Part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. A new § 100.512 is added to read as follows:

**§ 100.512 American Diabetes Association Reach the Beach Triathalon, Choptank River, Cambridge, MD.**

(a) *Definitions*—(1) *Regulated Area.* The waters of the Choptank River, from shore to shore, between the Choptank River Bridge and a line drawn from the north shore at latitude 38°37'37" North, longitude 76°03'08" West, and the south shore at latitude 38°34'25" North, longitude 76°04'03" West.

(2) *Coast Guard Patrol Commander.* The Coast Guard Patrol Commander is a commissioned, warrant, or petty officer of the Coast Guard who has been designated by the Commander, Group Baltimore.

(b) *Special Local Regulations.* (1) Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area.

(2) The operator of any vessel in the immediate vicinity of this area shall:

(i) Stop the vessel immediately upon being directed to do so by any commissioned, warrant, or petty officer on board a vessel displaying a Coast Guard ensign.

(ii) Proceed as directed by any commissioned, warrant, or petty officer.

(3) Any spectator vessel may anchor outside of the regulated area specified in paragraph (a) of these regulations but may not block a navigable channel.

(c) *Effective Period.* The Commander, Fifth Coast Guard District publishes a notice in the **Federal Register** and the Fifth Coast Guard District Local Notice to Mariners that announces the times and dates that the section is in effect.

**33 CFR Part 100**

**[CGD13–89–02]**

**Marine Parade: Seattle Yacht Club, Opening Day**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Notice of proposed rule making.

**SUMMARY:** The Coast Guard is considering a proposal to close Portage Cut (Montlake Cut) to all vessel traffic during the annual parade of boats which transits this waterway during Seattle Yacht Club's Opening Day. This parade consists of several hundred vessels transiting from west to east, through the cut in a solid stream of vessels, thus restricting any opportunity for non

VOL 54 ISS 47 MR 13 1989 UMI

participating vessels to transit from east to west. This event is normally held the first weekend in May of each year. Although an inconvenience to non-participating vessels, the duration of this progression of vessels is approximately eight hours. Mass media attention is apparent weeks prior to this event, thus giving the general boating public ample time to plan alternate transit times.

**DATES:** Comments must be received on or before April 12, 1989.

**ADDRESSES:** Comments should be mailed to Commander, Coast Guard Group Seattle, 1519 Alaskan Way South, Seattle, WA 98134–1192. Attn: LTJG Ramsey. The comments and other materials referenced in this notice will be available for inspection and copying at Coast Guard Group Seattle, Operations Division. Normal office hours are between 8:00 a.m. and 3:00 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

**FOR FURTHER INFORMATION CONTACT:** LTJG R.T. Ramsey (206) 286–5412.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD13 89–02) and the specific section of the proposal to which their comments apply, and give reasons for each comment. A 30-day comment period will be provided in order to meet the time restraints of the upcoming 1989 parade. Only local interest in this event is anticipated. The regulations may be changed in light of comments received. All comments received before the expiration of the 30-day comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

**Drafting Information**

The drafters of this notice are LTJG R.T. Ramsey, project officer, and LT D. Schram, project attorney, Coast Guard District Legal Office.

**Discussion of Proposed Regulations**

Seattle Yacht Club's Opening Day has become a community event which has been in effect for more than thirty years. Public viewing of the event is estimated to exceed 300,000 people. In addition, there are an estimated 1000 vessels which observe the event as non-participants. Prior to the start of the parade a crew race is held through the Portage Cut. The Portage Cut is ideal for crew racing and has historically been used by the University of Washington's crew team. Planning meetings for this event begin 3–4 months prior to the parade. These meetings include but are not limited to the following organizations; U.S. Coast Guard, local military officials, Seattle police, state police, local media, Seattle fire department, Washington State Bridge officials, state and city transportation officials, U.S. Army Corps of Engineers and local commercial marine industry officials.

**Economic Assessment and Certification**

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that full regulatory evaluation is unnecessary. The Portage Cut is generally utilized by pleasure craft. The limited commercial traffic affected by this event are given several months warning via the local media and local Notice to Mariners, to schedule their transits prior to or after the parade. Local businesses welcome the economic benefits of the estimated 300,000 spectators. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant negative economic impact on a substantial number of small entities.

**List of Subjects in 33 CFR Part 100**

Regattas and Marine parades, Safety of life on navigable waters.

**Proposed Regulations**

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations as follows:

**PART 100—[AMENDED]**

1. The authority citation for Part 100 continues to read as follows:

**Authority:** 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Section 100.1304 is added to read as follows:

**§ 100.1304 Annual Seattle Yacht Club's "Opening Day" Marine Parade.**

(a) *Regulated area.* All of Portage Bay, with the northwestern limit being the University Bridge, through the Portage Cut (Montlake Cut) into and including Union Bay, with the southeastern limit being an imaginary line from Webster Point to the eastern corner of Foster Island.

(b) *Effective period.* This regulation will be in effect from 8:00 a.m. to 3:00 p.m. on the first Saturday of May each year unless otherwise specified in the Thirteenth District Local Notice to Mariners.

(c) *Special Local regulations.* (1) The regulated area shall be closed for the duration of the event to all vessel traffic not participating in the event and authorized by the event sponsor or Coast Guard Patrol Commander.

(2) All persons or vessels not registered with the sponsor as participants or not part of the regatta patrol are considered spectators. Spectator vessels must be at anchor within a designated spectator area or moored to a waterfront facility in a way that will not interfere with the progress of the event. The following are established as spectator areas:

(i) Northwest of the University Bridge.

(ii) North of the log boom which will be placed in Union Bay.

(iii) East of Webster Point so as not to interfere with the participating vessels departing Union Bay.

(3) No spectators shall anchor, block, loiter in, or impede the through transit of participants or official patrol vessels in the regulated area during the effective dates and times unless cleared for such entry by the Patrol Commander.

(4) Due to the large number of craft confined within this small body of water, all vessels, both spectator and participants, will maintain a "NO WAKE" speed. This requirement will be strictly enforced to preserve the safety of both life and property.

(5) A succession of sharp, short signals by whistle or horn from vessels patrolling the area under the direction of the Patrol Commander shall serve as a signal to stop. Vessels signaled shall stop and shall comply with the orders of the patrol vessel. Failure to do so may result in expulsion from the area, citation for failure to comply, or both.

Dated: March 3, 1989.

**R. E. Kramek,**

*Rear Admiral, U.S. Coast Guard, Commander, Thirteenth Coast Guard District.*

[FR Doc. 89–5657 Filed 3–10–89; 8:45 am]

BILLING CODE 4910-14-M

**33 CFR Part 117**

**[CGD7–89–04]**

**Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Proposed rule.

**SUMMARY:** At the request of Congressman Tom Lewis, the Coast Guard is considering adding regulations governing the PGA and Parker drawbridges at North Palm Beach by permitting the number openings to be limited during certain periods. This proposal is being made because of complaints received from highway users. This action should accommodate the needs of vehicular traffic and still provide for the reasonable need of navigation.

**DATE:** Comments must be received on or before April 27, 1989.

**ADDRESSES:** Comments should be mailed to Commander (oan), Seventh Coast Guard District, 909 SE. 1st Avenue, Miami, Florida 33131–3050. The comments and other materials referenced in this notice will be available for inspection and copying on the 4th Floor, of the Brickell Plaza Federal Building 909 SE. 1st Ave. Miami, Florida. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments also may be hand-delivered to this address.

**FOR FURTHER INFORMATION CONTACT:** Mr. Walt Paskowsky (305) 536–4103.

**SUPPLEMENTARY INFORMATION:** Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Seventh Coast Guard District, will evaluate all communications received and determine a final course of action on this proposal. The proposed regulations may be changed in light of comments received.

**Drafting Information**

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

**Discussion of Proposed Regulations**

The PGA and Parker drawbridges presently open on signal, except that, from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m. Monday through Friday, the PGA opens on the quarter and three quarter-hour while Parker opens on the hour and half-hour. On weekends and federal holidays both bridges open on the hour, 20 minutes after the hour, and 40 minutes after the hour between 8 a.m. and 6 p.m. This change which adds 15-minute scheduled opening from 9 a.m. to 4 p.m., Monday through Friday, during the busy Winter months is intended to space draw openings and virtually eliminate "back to back" opening which can contribute significantly to vehicular traffic delays during these periods.

**Economic Assessment and Certification**

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulations and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of this proposal is expected to be minimal, the Coast Guard Certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

**List of Subjects in 33 CFR Part 117**

Bridges.

**Proposed Regulations**

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

**PART 117—DRAWBRIDGE OPERATION REGULATIONS**

1. The authority citation for Part 117 continues to read as follows:

**Authority:** 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.261 (s) and (t) is revised to read as follows:

**§ 117.261 Atlantic Intracoastal Waterway from St. Marys River to Key Largo**

* * * * *

(s) *PGA Boulevard bridge, Mile 1012.6.* The draw shall open on signal; except that, from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m., Monday through Friday except federal holidays, the draw need open only on the quarter and three-quarter-hour. From November 1 through April 30 from 9 a.m. to 4 p.m. Monday through Friday, except federal holidays, the draw need open only on the hour, quarter-hour, half-hour and three quarter-hour. On Saturdays, Sundays, and federal holidays from 8 a.m. to 6 p.m. the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour.

(t) *Parker (US 1) bridge, mile 1013.7.* The draw shall open on signal; except that, from 7 a.m. to 9 a.m. and 4 p.m. to 7 p.m., Monday through Friday except federal holidays, the draw need open only on the hour and half hour. From November 1 through April 30 from 9 a.m. to 4 p.m. Monday through Friday, except federal holidays, the draw need open only on the hour, quarter-hour, half-hour and three quarter-hour. On Saturdays, Sundays, and federal holidays from 8 a.m. to 6 p.m., the draw need open only on the hour, 20 minutes after the hour, and 40 minutes after the hour.

* * * * *

Dated: February 27, 1989.

**Martin H. Daniell,**

*Rear Admiral, U.S. Coast Guard Commander, Seventh Coast Guard District.*

[FR Doc. 89–5658 Filed 3–10–89; 8:45 am]

BILLING CODE 4910-14-M

**VETERANS ADMINISTRATION**

**38 CFR Part 21**

**Dependents Education; Eligibility of Stepchildren**

**AGENCY:** Veterans Administration.

**ACTION:** Proposed Regulation.

**SUMMARY:** The stepchildren of a veteran whose children are eligible for dependents' educational assistance are also eligible for that assistance on the same basis as those children. Occasionally, while such a stepchild is receiving assistance, the veteran will separate from or divorce his or her spouse. The child in question then ceases to be eligible for dependents' educational assistance, because he or she is no longer the veteran's stepchild. This proposal states how the Veterans Administration (VA) will determine when to discontinue the child's assistance.

**DATES:** Comments must be received on or before April 12, 1989. Comments will be available for public inspection until April 24, 1989.

**ADDRESSES:** Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received

VOL 54 ISS 47 MR 13 1989 UMI

will be available for public inspection only in the Veterans Services Unit, room 132 of the above address, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) until April 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** William G. Susling, Jr., Acting Assistant Director for Educational Policy and Program Administration, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, (202) 233-2092.

**SUPPLEMENTARY INFORMATION:** The VA is proposing to amend § 21.3041 to state that when an individual ceases to be the stepchild of a veteran, his or her eligibilty to dependents' educational assistance ends. The proposed amendment to § 21.4135 states when payments will be terminated in this situation.

The VA has determined that these proposed regulations do not contain a major rule as that term is defined by Executive Order 12291, Federal Regulation. The proposed regulations will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans Affairs has certified that these proposed regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the proposed regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the proposed regulations affect only individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by these regulations is 64.117.

**List of Subjects in 38 CFR Part 21**

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: February 17, 1989.

**Thomas E. Harvey,**

*Acting Administrator.*

38 CFR Part 21, Vocational Rehabilitation and Education, is proposed to be amended as follows:

**PART 21—[AMENDED]**

1. In § 21.3041, paragraph (d) introductory text is revised and paragraph (d)(9) is added to read as follows:

**§ 21.3041 Periods of eligibility; child.**

* * * * *

(d) *Modified ending date.* When one of the following occurs between ages 18 and 26, the ending date will be the eligible person's 26th birthday or 8 years from the date of happening specified in paragraphs (d)(1) to (7) of this section and 10 years in paragraph (d)(8) of this section; whichever is later. When paragraph (d)(9) of this section is applicable, the ending date will be as stated in paragraph (d)(9) of this section. Where the ending date is subject to modification under more than one of paragraph (d)(3), (4), (5), 6 or (7) of this section, the more favorable date will apply. In no case will the modified ending date extend beyond the eligible person's 31st birthday.

(Authority: 38 U.S.C. 1712)

* * * * *

(9) The child may lose eligibility through ceasing to be the veteran's stepchild either because the veteran and the child's natural parent divorce or because the veteran and the child's natural parent separate and the child is no longer a member of the veteran's household. If this occurs, the ending date of the child's period of eligibility will be determined as follows:

(i) If the child ceases to be the veteran's stepchild while the child is not in training the ending date of the child's eligibility shall be the date on which the child ceases to be the veteran's stepchild.

(ii) If the child ceases to be the veteran's stepchild while the child is in training in a school organized on a semester or quarter basis, the ending date of the child's eligibility will be the last date of the semester or quarter during which the child ceases to be the veteran's stepchild.

(iii) If the child ceases to be the veteran's stepchild while the child is in training in a school not organized on a semester or quarter basis, the ending date of the child's period of eligibility will be the end of the course or 12 weeks from the date on which the child ceases to be the veteran's stepchild, whichever is earlier. See § 21.4135(z).

Authority: 38 U.S.C. 1701.

2. In § 21.4135, paragraph (z) is added to read as follows:

**§ 21.4135 Discontinuance dates.**

* * * * *

(z) *Eligible child ceases to be a stepchild.* When an eligible child loses eligibility because he or she ceases to be the stepchild of the veteran, the VA will discontinue the dependent's educational assistance allowance on the last day of the child's eligibility as determined by § 21.3041(d)(9).

**38 CFR Part 21**

**Due Process in Loss of Dependency Benefits**

**AGENCY:** Veterans Administration.

**ACTION:** Proposed regulatory amendments.

**SUMMARY:** This proposed regulatory amendment sets out procedural protections to be followed when the Veterans Administration (VA) is considering reduction of the veteran's subsistence allowance because the VA has received evidence that the veteran has lost a dependent. This proposal will bring the procedures followed in these cases into agreement with procedural protections of due process when a veteran is receiving disability compensation or pension and the VA receives evidence that the veteran has lost a dependent. The effect of this proposal will be to improve and more clearly define procedural protections afforded the veteran.

**DATES:** Comments must be received on or before April 12, 1989. Comments will be available for public inspection until April 24, 1989. It is proposed to make these amendments effective upon final publication.

**ADDRESSES:** Send written comments to: Administrator of Veterans Affairs, Veterans Administration, 810 Vermont Avenue NW., Washington, DC, 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 132 of the above address, between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until April 24, 1989.

**FOR FURTHER INFORMATION CONTACT:** Morris Triestman, Rehabilitation Consultant, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, (202) 233-2886.

**SUPPLEMENTARY INFORMATION:** The VA recently proposed regulatory amendments to 38 CFR Part 3 in order to provide additional procedural protections of due process for disability compensation and pension claimants and beneficiaries. At that time the VA indicated that its review was ongoing and that it might propose additional amendments to existing regulations in the future.

As a result of this ongoing review, the Agency has decided that when the VA receives evidence that the veteran has lost a dependent, the same procedural protections will be provided a veteran who is receiving subsistence allowance as when that event occurs while a veteran is receiving disability compensation. This proposal will provide these same procedural protections for veterans receiving benefits under the vocational rehabilitation program.

The current rule governing due process under the vocational rehabilitation program is contained in § 21.420. This rule is proposed to be amended to eliminate references to changes in dependency status due to the loss of a dependent. A new rule (§ 21.422) is established to govern due process procedural protections where there is a proposed reduction in the veteran's subsistence allowance because of the loss of a dependent.

These proposed regulatory amendments do not meet the criteria for a major rule as that term is defined by Executive Order 12291, Federal Regulation. These proposed regulatory amendments will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices and will not have any other significant adverse effects on the economy.

The Administrator of Veterans Affairs certifies that these proposed regulatory amendments, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the proposed regulatory amendments, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of §§ 603 and 604. This proposal concerns only VA procedural protections followed in making certain adjustments in awards to individual beneficiaries. This certification can be made because the proposed regulatory amendments will have no significant economic impact on small entities, i.e., small business, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by the proposed regulatory amendments is 64.116.

**List of Subjects in 38 CFR Part 21**

Civil rights, Claims, Educational, Grant programs, Loan programs, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: February 21, 1989.

**Thomas E. Harvey**

*Acting Administrator.*

38 CFR Part 21, Vocational Rehabilitation and Education, is proposed to be amended as follows:

**PART 21—[AMENDED]**

1. in § 21.420, paragraph (d) introductory text is revised to read as follows:

**§ 21.420 Informing the veteran.**

* * * * *

(d) *Prior notification of adverse action.* The VA shall give the veteran a period of a least 30 days to indicated his or her disagreement with an adverse action other than one which arises as a consequence of a change in training time or other such alteration in circumstances. If the veteran disagrees, he or she shall be given the opportunity, before appealing the adverse action as provided in § 21.59 of this part, to:

* * * * *

2. Section 21.422 is added to read as follows:

**§ 21.422 Reduction in subsistence allowance following the loss of a dependent.**

(a) *Notice of redution required when a veteran loses a dependent.* (1) Except as provided in paragraph (a)(2) of this section, the VA not reduce an award of subsistence allowance following the veteran's loss of a dependent unless:

(i) The VA has notified the veteran of the adverse action, and

(ii) The VA has provided the veteran with a period of 60 days in which to submit evidence for the purpose of showing that subsistence allowance should not be reduced.

(2) When the reduction is based solely on written, factual, unambiguous information as to dependency provided by the veteran or his or her fiduciary with knowledge or notice that the information would be used to determine the monthly rate of subsistence allowance;

(i) The VA is not required to send a pre-reduction notice as stated in paragraph (a)(1) of this section, but;

(ii) The VA will send notice contemporaneous with the reduction in subsistence allowance.

(Authority: 38 U.S.C. 3012, 3013)

(b) *Pre-reduction notice.* Where a reduction in subsistence allowance is proposed by reason of information concerning dependency received from a source other than the veteran, the VA will: (1) Prepare a proposal for the reduction of subsistence allowance, setting forth material facts and reasons;

(2) Notify the veteran at his or her latest address of record of the proposed action;

(3) Furnish detailed reasons for the proposed reduction;

(4) Inform the veteran that he or she has an opportunity for a predetermination hearing, provided that the VA receives a request for such a hearing within 30 days from the date of the notice; and

(5) Give the veteran 60 days for the presentation of additional evidence to show that the subsistence allowance should be continued at its present level.

(Authority: 38 U.S.C. 3012, 3013)

(c) *Predetermination hearing.* (1) If the VA receives a timely request for a predetermination hearing as indicated in paragraph (b)(4) of this section:

(i) The VA will notify the veteran in writing of the date, time and place for the hearing; and

(ii) Payments of subsistence allowance will continue at the previously established level pending a final determination concerning the proposed reduction.

(2) The hearing will be conducted by a VA employee who:

(i) Did not participate in the preparation of the proposal to reduce the veteran's subsistence allowance, and

(ii) Will bear the decision-making responsibility.

(Authority: 38 U.S.C. 3012, 3013)

(d) *Final action.* The VA will take final action following the predetermination procedures specified in paragraph (c) of this section. (1) If a predetermination hearing was not requested or if the veteran failed to report for a scheduled predetermination hearing, the final action will be based solely upon the evidence of record at the expiration of 60 days. (2) If a predetermination hearing was conducted, the VA will base final action upon:

(i) Evidence presented at the hearing;

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

(ii) Evidence contained in the claims file at the time of the hearing; and

(iii) Any additional evidence obtained following the hearing pursuant to necessary development.

(3) Whether or not a predetermination hearing was conducted, a written notice of the final action shall be issued to the veteran setting forth the reasons for the decision, and the evidence upon which it is based. The veteran will be informed of his or her appellate rights and right of representation. (For information concerning the conduct of the hearing see § 3.103 (c) and (d) of this chapter).

(4) When a reduction of subsistence allowance is found to be warranted following consideration of any additional evidence submitted, the effective date of the reduction or discontinuance shall be as specified under the provisions of § 21.324 of this part.

(Authority: 38 U.S.C. 3012, 3013)

BILLING CODE 8320-01-M

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[FRL 3534-8]

### Approval and Promulgation of Implementation Plans; Ohio

**AGENCY:** U.S. Environmental Protection Agency, (USEPA).

**ACTION:** Proposed rulemaking.

**SUMMARY:** USEPA is proposing to disapprove a plan submitted purusant to Section 111(d) of the Clear Air Act by the State of Ohio. Section 111(d) requires that each State submit plans to control emissions of designated pollutants These rules are for the control of total reduced sulfur (TRS) from existing Kraft Pulp Mills. USEPA is proposing to disapprove this plan because it does not meet all of USEPA's requirements for an approvable 111(d) plan. Portions of the rule that USEPA proposes action on today are in draft form. Therefore, before USEPA can take final action on the plan, the State would have to submit a final plan.

**DATE:** Comments on this revision and on the proposed USEPA action must be received by April 12, 1989.

**ADDRESSES:** Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Debra Marcantonio, at (312) 886-6066, before visiting the Region V office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Ohio Environmental Protection Agency, Office of Air Pollution Control, 1800 Water Mark Drive, P.O. Box 1049, Columbus, Ohio 43266-0149.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.) Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

**FOR FURTHER INFORMATION CONTACT:** Debra Marcantonio, Air and Radiation Branch (5AR-26), Environmental Protection Agency , Region V, Chicago, Illinois 60604, (312) 886-6066.

**SUPPLEMENTARY INFORMATION:** Section 111(d) of the Clear Air Act requires control of existing sources emitting pollutants that are or may be harmful to the public health or welfare, but are not controlled under Sections 108-110 or 112 of the Act. Such pollutants are referred to as "designated pollutants", and existing facilities emitting such pollutants are referred to as "designated facilities." On February 28, 1978, the standards of performance for eight source categories in the Kraft pulp industry were promulgated. The standards include emission limits for particulates and TRS, a designated pollutant. Subpart B of 40 CFR Part 60 requires the States to develop plans for the control of designated pollutants within Federal guidelines. A notice of availability of these Federal guidelines for the control of IRS emissions for existing sources was published on May 22, 1979 (44 FR 29828).

Specifically, 40 CFR 60.23(a)(2) requires that each State shall adopt and submit to USEPA and Plan revisions necessary to meet the requirements of this Subpart, unless no designated facilities exist within the State. Pursuant to this requirement, the State of Ohio submitted to USEPA on December 7, 1984, a plan to conrol emissions of TRS from Mead Paper in Chillicothe, Ohio, the only existing Kraft pulp mill in Ohio. On April 23, 1986, Ohio withdrew the emission test method portion of the submittal (OAC 3745-73-04) and resubmitted a revised draft rule for USEPA's review.

### Review of Proposed Rules

*1. Rule 3745-73-01—Definitions*

—This section conforms with USEPA's guidelines for control of TRS emissions from existing Kraft pulp mills.

*2. Rule 3745-13-02—Certification and Compliance Schedules*

—This section states that compliance schedules shall commence from the effective date of the rules. This is consistent with the requirements of 40 CFR 60.24 for designated facilities.

—This section also requires that all owners or operators of designated facilities certify that they are in compliance with all the requirements of the proposed rules and submit to OEPA an application for an operating permit.

This section is consistent with the requirement of 40 CFR 60.23(b).

—Additionally, this section sets schedules of compliance for all sources emitting TRS that are currently in violation of the proposed emission limitation.

There appears to be a typewritten error in OAC 3745-73-02(C)(4)(d). The compliance schedule shows the source must complete construction within 24 months and achieve final compliance within 20 months. The State should correct or clarify this error.

This section is consistent with the requirements of 40 CFR 60.24.

*3. Rule 3745-73-03—General Emission Limits*

The numerical values of the emission limits are the same as the Federal emission guidelines for TRS in existing Kraft pulp mills. However, the proposed limits are based on a 24-hour averaging time, while the Federal emission guidelines are based on 12-hour averages. For this reason, the proposed emission limits are effectively less stringent than the Federal emission guideline for TRS emissions from Kraft pulp mills. Under 40 CFR 60.24, a State may apply a less stringent requirement if sufficient justification is proven. Such justification may include unreasonable control cost and physical limitation. Because Ohio has not made such a demonstration, the proposed limits are not approvable.

OAC Rule 3745-73-03(C) appears to be a "bubble" alternative control plan. It would allow a 111(d) source to establish an alternative emission limit which is different from the emission limit established in the 111(d) plan, in order to comply with the applicable standard. Because, if approved, the 111(d) plan would be the federally approved standard by which to define compliance, only a revision to the plan (approved by USEPA) could change the terms. Additionally, USEPA does not have a bubble policy applicable to 111(d) plans.

Therefore, before USEPA can approve this plan, Rule 3745-/3-03 (C) must be deleted or revised to include a statement that any changes in the applicable limits would not be effective until they are submitted to and approved by USEPA.

*4. Rule 3745-73-04—Test Methods and Procedures*

The proposed test method references the method described in 40 CFR Part 60, Appendix A. This is consistent with the requirements of 40 CFR 60.24(b)(2) for determining compliance of designated pollutants. USEPA cannot, however, approve this rule independent of the entire plan. Therefore, USEPA also is proposing to disapprove this portion of the plan. Moreover, because this portion of the revision is a draft rule, before USEPA can take final action on the plan, the State must submit a final rule.

*5. Monitoring Requirements*

This plan does not contain monitoring requirements to ensure proper operation and maintenance of the affected facility. The regulations at 40 CFR 60.25(b) requires that the 111(d) plan shall provide for monitoring the status of compliance with the applicable standard. USEPA cannot approve this 111(d) plan without the appropriate monitoring requirements.

### Proposed Action

For the reasons discussed above, USEPA is proposing to disapprove these rules for the control of TRS from existing Kraft pulp mills, pursuant to Section 111(d) of the Clean Air Act.

Under 5 U.S.C. 605(b), this action will not have a significant economic impact on a substantial number of small entities. These rules apply to Mead Paper in Chillicothe, Ohio, the only existing Kraft pulp mill in Ohio.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMR) for review.

### 40 CFR Part 52

[FRL-3534-6]

### Approval and Promulgation of Implementation Plans; Federal Assistance Limitations and Construction Moratorium State of Indiana

**AGENCY:** U.S. Environmental Protection Agency (USEPA).

**ACTION:** Proposed rulemaking.

**SUMMARY:** On November 18, 1988 (53 FR 46608), USEPA disapproved the Ozone State Implementation Plan (SIP) for Lake and Porter Counties, Indiana. Today, USEPA is proposing to also disapprove the enforcement program in the vehicle inspection and maintenance (I/M) portion of Indiana's Ozone plan for Lake and Porter Counties, the I/M enforcement program in Indiana's carbon monoxide (CO) plan for the CO nonattainment area in Lake County, and the overall CO SIP for the nonattainment area in Lake County (USEPA will address the I/M portion of Indiana's Ozone plan for Clark and Floyd Counties in future **Federal Register** notice(s).) It is retaining its July 14, 1987 (52 FR 26404) proposed approval of the remainder of Indiana's I/M program. Based on its proposed disapproval of the enforcement portion of the I/M program, USEPA is proposing to limit certain Federal highway, air quality, and sewage treatment funding assistance for Lake and Porter Counties and to impose in these same Counties under Section 173(4) of the Clean Air Act (Act), a volatile organic compound (VOC) major stationary source construction moratorium for failure to implement the I/M program as part of the 1979 Ozone SIP, and a CO major stationary source construction moratorium in the nonattainment area of Lake County for failure to implement the 1979 CO SIP. In addition, pursuant to Section 110(a)(2)(I) of the Act, USEPA is proposing to impose a ban on the construction of major sources of CO in the Lake County CO nonattainment area. (This construction ban has already been imposed in Lake and Porter Counties for major VOC sources.) USEPA's proposed actions today are based on Indiana's failure to submit an adequate permanent I/M enforcement program as part of its 1982 Ozone and CO SIP (Ozone/CO SIP) submittals for the respective counties.

The funding limitations apply to Federal funds provided under the Clean Air Act (Act) and Title 23 of the United States Code. The USEPA is reproposing to impose Federal funding and construction restrictions pursuant to sections 176(a), 176(b), and 173(4), of the Act. USEPA is also proposing to impose Federal sewage treatment funding restrictions pursuant to section 316(b) of the Act.

**DATES:** The public hearings on the proposed Federal funding restrictions will be held at the locations listed below. The hearing in Lake and Porter Counties, Indiana will be held on April 13, 1989, starting at 10:30 a.m. USEPA is keeping the public comment period open until May 13, 1989, to provide an opportunity for submission of rebuttal information and supplementary information. Written comments must be submitted by: May 15, 1989.

**ADDRESS:** The public hearing on these issues will be held at:

Lake and Porter Counties Public Hearing:

County Commissioners Court Room, Board of Commissiners of Lake County, 2293 North Main Street, Crown Point, Indiana 46307.

Copies of Indiana's SIP revision submittal, USEPA's proposals and rulemakings, and other documents pertinent to today's proposal are available at the following addresses for review: (It is recommended that you telephone Robert B. Miller, at (312) 353-0396, before visiting the Region V office.

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604.

Indiana Department of Environmental Management, 105 South Meridian Street, P.O. Box 6015, Indianapolis, Indiana 64206-6015.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.)

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

**FOR FURTHER INFORMATION CONTACT:** Jay Bortzer, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886-1430.

**SUPPLEMENTARY INFORMATION:** Congress amended the Clean Air Act, 42 U.S.C. 7401 *et seq.*, in 1977 to address the major health problems posed by the failure of certain areas to attain the NAAQS. Congress required States to revise their SIPs to provide for attainment of the standards by December 31, 1982, and to submit the revised plans to USEPA by January 1, 1979. For areas with serious ozone or carbon monoxide (CO)

VOL 54 ISS 47 MR 13 1989 UMI

problems where the States demonstrated they were unable to attain these standards by the end of 1982, even with the implementation of all reasonably available measures, Congress allowed an extension of the attainment date to December 31, 1987 (section 172(a)(2)).

In return for this extension, the Act requires States to submit additional air pollution control measures in their 1979 ozone/CO SIP revisions (section 172(b)(11)). One such additional measure was a schedule for implementation of an I/M program, which included certification that the State and local governments had the legal authority to implement and enforce the program (sections 110(a)(2)(f), 172(b)(10), and 172(b)(11)(B)).

The State of Indiana requested an extension of the ozone attainment deadline to 1987 for Clark, Floyd, Lake and Porter Counties, and for carbon monoxide for a subportion of Lake County. USEPA approved the request on February 11, 1982 (47 FR 6274). Therefore, the Act requires Indiana to implement an I/M program in these counties.

On January 2, 1981 (46 FR 96), USEPA conditionally approved the revised 1979 Indiana ozone/CO SIP, including the State's commitment to implement I/M. The Indiana SIP included certification that the State had legal authority to implement and enforce an I/M program, and also contained a schedule for the completion of all actions necessary to implement the program by January 1, 1983. However, USEPA required the State, as part of the conditional approval, to submit a detailed description of its enforcement mechanism, including procedures, penalties, letters of commitment from responsible enforcement agencies, and other elements required in USEPA's I/M policy (see January 19, 1981 memorandum from the Deputy Assistant Administrator for Mobile Source Air Pollution Control to the Air and Hazardous Materials Division Directors, Region I–X; September 24, 1980; memorandum from the Assistant Administrator, Office of Air, Noise, and Radiation, to the Regional Administrator, Regions I–X; February 21, 1979; memorandum from the Assistant Administrator for Air, Noise, and Radiation, to the Regional Administrators, I–X; July 17, 1978; memorandum from the Assistant Administrator for Air and Waste Management to the Regional Administrators, Regions I–X; and the January 22, 1981, **Federal Register**, 46 FR 7182).

Indiana submitted its draft 1982 revisions to its ozone/CO SIP on September 2, 1982. If adopted, this plan would have formally withdrawn the 1979 commitment to implement an I/M program. The plan additionally stated that a new I/M program would not be readopted unless attainment would not otherwise occur by December 31, 1987, as indicated by future air quality data.

In a letter dated November 10, 1982, USEPA provided its evaluation of and comments on Indiana's September 2, 1982, submittal. In the letter, USEPA stated that the I/M portion of Indiana's September 2, 1982, plan did not contain the various elements required under USEPA's 1982 SIP policy, in that there were no commitments to implement I/M by December 31, 1982, and no rules and regulations for I/M were included.

On February 3, 1983 (48 FR 5108), USEPA proposed to disapprove the I/M portion of the 1982 Indiana ozone/CO SIP for these same reasons. On March 22, 1983, USEPA notified affected Federal, State, and local agencies, that the USEPA/Department of Transportation (DOT) procedures for imposing funding limitations under section 176(a) were being initiated. This notification started a 30-day consultation period in accordance with these procedures.

To ensure that Federal funds do not further contribute to the already serious air pollution problem and to encourage state cooperation, Congress adopted section 176(a) of the Act. Section 176(a) of the Act requires withholding of certain Federal assistance funds for highway construction and air quality programs, if the USEPA Administrator finds that a State has failed to submit, or to make reasonable efforts to submit, a SIP which considers each of the elements of section 172 of the Act, including the requirement for I/M. On April 10, 1980, after prior notice and public comment, USEPA and the Department of Transportation published their final policies and procedures for imposing funding restrictions under section 176(a) (45 FR 24692).

On August 3, 1983, USEPA proposed air quality funding restrictions and a construction moratorium under sections 176(b) and 173(4) of the Act for the State's failure to implement the approved 1979 Indiana ozone/CO SIP, in particular, the I/M commitment USEPA had approved and incorporated into the State's 1979 SIP (48 FR 35316).

Subsequently, the State of Indiana renewed its commitment to implement an I/M program and adopted Indiana rule 325 IAC 13.1–1, Motor Vehicle Inspection and Maintenance Requirements. A contract was established with Indiana Vocational Technical College to conduct the testing program. The program began inspecting vehicles on May 31, 1984. Throughout the development period, USEPA sought a detailed description of the I/M endorcement mechanism for review prior to the start of testing. The State explored several possible mechanisms, but failed to adopt any of them. Indiana submitted its final 1982 zone/CO SIP on December 2, 1983, and this SIP addressed I/M. However, the SIP lacked the required detailed I/M enforcement description. USEPA documented its concern regarding the I/M program in a memorandum dated January 23, 1984, which was forwarded to the State, as well as in direct correspondence to the State on September 28, 1984, and December 21, 1984. Additionally, USEPA published a revised Notice of Proposed Rulemaking (NPR) in the **Federal Register** on October 9, 1984 (49 FR 39574) addressing this issue. A Technical Support Document dated June 29, 1984, in support of the October 9, 1984, NPR extensively reviewed these issues.

Besides addressing I/M deficiencies, the October 9, 1984, NPR also proposed to approve Indiana's CO SIP for the nonattainment area of Lake County because the State's plan provided for an emissions reduction of over 50% from 1980 to 1987, which would result in NAAQS attainment in the nonattainment area by 1987.

On February 6, 1985, Governor Robert D. Orr proposed to enforce the I/M program by establishing a $100 fine to be shared evenly by the State and the local law enforcement agency issuing the citation. The Governor also proposed a one-time $5 vehicle excise tax credit to the owners of tested vehicles. The State included these two I/M enforcement elements in its February 6, 1985, official response to the October 9, 1984, NPR. The State also indicated its intention to pursue vehicle registration suspension for noncomplying vehicles.

On March 13, 1985, USEPA informed Governor Orr that the proposed July 1986 implementation of the shared fine was unacceptable since it potentially allowed violators to avoid compliance for longer than two years. USEPA indicated that a registration suspension of denial system would be more effective; however, USEPA acknowledged that such a program could not be started before January 1986. Therefore, USEPA informed the Governor that an interim enforcement mechanism was necessary to increase

compliance until the State established a permanent means of enforcement. USEPA subsequently notified the Federal Highway Administration (FHWA) on April 15, 1985, that the 30-day consultation period under Section 176(a) procedures was being reinitiated for the State of Indiana (45 FR 24692).

A meeting was held on May 9, 1985, between USEPA, FHWA, and the State to discuss the Federal highway funding restriction process and any action by the State to satisfactorily resolve the problem. At the conclusion of the meeting USEPA informed FHWA and the State that USEPA must continue its projected schedule to impose restrictions, due to the lack of concrete action by the State to immediately begin enforcement of the I/M program.

Because the State failed to submit a detailed description of an enforcement mechanism, USEPA proposed on January 21, 1986, (see 51 FR 2732) to disapprove the I/M portion of the ozone/CO SIP and to impose Federal funding restrictions on Clark, Floyd, Lake, and Porter Counties, pursuant to section 176(a) of the Act.

On March 7, 1986, Governor Orr signed legislation authorizing suspension of registration of non-complying vehicles. On April 7, 1986, (51 FR 11756), further action to limit Federal funding assistance and to impose the construction moratorium was indefinitely postponed because the State enacted the suspension of registration authorizing legislation.

A letter was sent to Indiana by USEPA on September 24, 1986, informing the State that it was acceptable to begin enforcement of the I/M program against non-compliers beginning with the then-current test cycle, which commenced on March 1, 1986. Accordingly, the Indiana Department of Environmental Management (IDEM) targeted December 15, 1986, as the date to send out the first non-compliance notices. Since then, the two agencies responsible for sending out the warning notices (IDEM) and the suspension notices (the Bureau of Motor Vehicles (BMV)), have fallen increasingly behind the notice schedule.

According to the State's calculations, the overall compliance rate for the second cycle of the program was 67.6%, and the State had only suspended 38 vehicle registrations.

On January 26, 1987, USEPA reproposed to approve Indiana's attainment demonstration for the CO nonattainment area in Lake County based on an estimated 35% emission reduction from 1981 to 1987 provided by the Federal Motor Vehicle Control Program through pollution controls on late-model vehicles. Available monitoring data showed that a CO emission reduction of 10% from 1981 levels was necessary to achieve the NAAQS by 1987. (Because of the deficiencies in the I/M program discussed below, however, USEPA today is reproposing to disapprove the CO SIP for the nonattainment area of Lake County.)

On July 14, 1987, (52 FR 26404), USEPA proposed to disapprove the Indiana 1982 ozone plan as not meeting all the requirements of Part D.[1] This notice included a proposed disapproval of that portion of the I/M program which addresses funding and resources for enforcement, because of a failure by the State to provide funding for program enforcement. USEPA further proposed to approve all other portions of the I/M program because the State's submittal of September 30, 1986, and February 18, 1987, addressed the outstanding issues cited in the October 9, 1984, **Federal Register**. The State had not, however, adequately addressed funding and resources for enforcement.

On August 12, 1987, USEPA notified Indiana Governor Orr that because of the lack of an effective enforcement program, low compliance rate, and lack of program funding, USEPA was beginning the process to impose Federal highway and air quality funding restrictions, to impose a construction moratorium, and to initiate the 30-day consultation period as specified in the previously cited April 10, 1980, **Federal Register**. The 30-day consultation period was initiated in a letter dated August 12, 1987, to the Regional Administrator of the FHWA.

In a letter dated September 8, 1987, Governor Orr indicated that approximately $56,000 in new funds were being provided for the enforcement effort, and that IDEM and BMV had agreed to a new streamlined enforcement process. At Indiana's request, on September 11, 1987, the USEPA met with representatives of IDEM and the FHWA to discuss the reasons why USEPA was pursuing Federal funding and construction restrictions. USEPA representatives explained that, while the State's efforts are important steps towards enforcing the Emission Testing Program, USEPA will proceed to impose Federal highway and air quality funds, as well as a major stationary source construction moratorium, because the State's efforts, by themselves, do not assure that the suspension of registrations for noncomplying vehicles will be routine and expeditious, and that a sufficiently high level of compliance will be achieved and maintained.

In a December 23, 1987, letter to the Regional Administrator, Governor Orr informed USEPA that an additional $258,000 was being made available to enforce the program. In a response dated January 15, 1988, USEPA informed Governor Orr that while additional funding has been provided, the State must demonstrate that enforcement will be routine and expeditious.

Compliance and enforcement statistics from the first two cycles (May 1984 to December 1987) demonstrates that the State has failed to implement an enforcement program. Only 38 registrations have been suspended over the four years and each cycle has had in excess of 100,000 non-compliers. Further, even though significant amounts of additional funds for enforcement have been provided, no other enforcement action of a routine and expeditious nature has occurred.

USEPA believes that the State of Indiana (1) has failed to implement the I/M program approved as part of the 1979 Ozone/CO SIP in Lake and Porter Counties and (2) has also failed to submit an adequate enforcement mechanism as part of the 1982 Ozone/CO SIP. While it appeared that the September 30, 1986, enforcement mechanism was approvable, USEPA has concluded that the enforcement mechanism is not approvable because it has not met USEPA's requirement that violations are cited and prosecuted as routinely and expeditiously as are vehicle registration violations. (See January 19, 1981, policy memoranda from the Deputy Assistant Administrator for Mobile Source Air Pollution Control to Air and Hazardous Materials Division Directors, Regions I–X).

The State had initially pointed to the fact that insufficient resources was the reason registration suspensions did not occur in a routine and expeditious manner. However, even after additional resources were provided suspensions have not occurred. USEPA concludes that the enforcement mechanism established by the State is not workable due to systemic problems particular to the State of Indiana.

Prior to a vehicle's registration being suspended seven distinct steps must take place. The steps include: (1) An initial notice; (2) a determination of noncompliance after notices are returned; (3) IDEM notifies BMV by computer tape of violators; (4) BMV

[1] USEPA disapproved Indiana's overall Part D ozone plan for Lake and Porter Counties on November 18, 1988 (53 FR 46808). It will take action on the Clark and Floyd Counties plan in future **Federal Register** notice(s).

UMI

sends notices of registration suspensions and provides a listing of notices mailed to IDEM; (5) responses to notices of registration suspensions are returned to BMV by citizens; (6) BMV gives notices to IDEM after sorting into two categories; (7) IDEM determines and notifies BMV by computer tape of noncompliance after processing the notices provided by BMV; and, 8) BMV suspends registrations. Additional steps are required if a citizen requests an administrative hearing.

This process has proved to be cumbersome and lengthy and has not resulted in routine and expeditious enforcement. Even with additional enforcement resources, the enforcement process has not became routine and expeditious.

USEPA believes that the Indiana process cannot be routine and expeditious due to the following process characteristics: the large amounts of information that must be transferred between two State agencies; the assignment of comparable priority to the enforcement action by two State agencies; the necessary sorting and processing that each State agency must perform; and the quality control checks to ensure that the State does not inadvertently suspend the registration of a citizen who ultimately came into compliance. Therefore, the State has failed to submit an enforcement mechanism that results in routine and expeditious enforcement. Consequently, the State did not submit an enforcement mechanism that can be approved by USEPA as meeting the Ozone/CO SIP approval criteria.

**Clark and Floyd Counties**

This proposed rulemaking does not apply to Clark and Floyd Counties. Over the past few months local law enforcement officials in Clark and Floyd Counties have initiated a local enforcement program consisting of issuing citations to motorists not displaying a valid windshield sticker. Roadblocks have also been set up to check vehicles for valid windshield stickers. When a citation is issued the violator(s) must appear in court and is subject to a minimum $100.00 fine.

In a March 1988 letter to Governor Orr, the Governor was informed that, "If the State is to avoid the imposition of Federal construction and funding restrictions, State and Local law enforcement agencies need to * * * aggressively issue citations for I/M noncompliance * * *". The Governor was further informed that an interim enforcement mechanism was necessary to increase compliance until the State established a permanent means of enforcement.

Clark and Floyd Counties are not included in this proposal because local law enforcement officials are aggressively pursuing enforcement through an interim enforcement mechanism. However, for Federal funding and construction restrictions to be ultimately avoided by Clark and Floyd Counties, the State must establish a permanent means of enforcement. If the State fails to do this, then Federal restrictions will be imposed in Clark and Floyd Counties in addition to those proposed in Lake and Porter Counties. Were Lake and Porter Counties to initiate a similar sticker enforcement effort, USEPA would continue to view it as an interim measure and would only delay the imposition of sanctions in response to State establishment of a permanent, approvable mechanism. USEPA will rulemake on Indiana's ozone plan, including I/M and any possible sanctions, for Clark and Floyd Counties in future **Federal Register** notice(s).

**Proposed Findings**

On July 14, 1987 (52 FR 26404), USEPA proposed to find that the State of Indiana failed to appropriate adequate resources and funding for enforcement and oversight of the I/M program portion of the 1982 Ozone/CO SIP as required by section 172(b)(7) of the Act. Adequate resources and funding have been provided, but the State continues to experience serious problems with enforcement. The State has only suspended 38 vehicle registrations while tens of thousands of vehicles are not in compliance with program requirements. USEPA is proposing to disapprove Indiana's enforcement program in Lake and Porter Counties because it does not meet USEPA policy requirements that enforcement be as routine and expeditious as are vehicle registration violations. Consequently, USEPA, is:

1. Proposing to find that the State has failed to implement the I/M program approved as part of its 1979 Ozone/CO SIP in Lake and Porter Counties.

2. Re-proposing to impose the construction moratorium under section 173(4) and re-proposing to impose the air quality funding restrictions under 176(b) in Lake and Porter Counties for the State's failure to implement its approved 1979 Ozone/CO SIP.

The construction moratorium is for the construction of major sources of volatile organic compound emissions and the major modification of such existing major sources in Lake and Porter Counties, and the construction of new major sources and the major modification of such CO sources in the nonattainment area of Lake County.

3. Retaining its July 14, 1987, proposed approval of all elements of Indiana's 1982 I/M program, except for the enforcement program.

4. Proposing to find that the State has failed to submit an adequate enforcement program as part of its 1982 Ozone/CO SIP.

5. Proposing to disapprove the CO SIP for the nonattainment area of Lake County for the failure to submit an adequate I/M enforcement progam as part of its 1982 CO SIP.

6. Proposing to impose a construction ban for major new CO sources and major modifications of existing CO sources in the CO nonattainment area in Lake County, as required by section 110(a)(2)(I) of the Act. (This construction ban was imposed on December 18, 1988, in Lake and Porter Counties for major VOC sources. See USEPA's November 18, 1988, ozone plan disapproval notice.)

7. Re-proposing to impose the Federal highway and air quality funding restrictions in Lake and Porter Counties, under Section 176(a), for the State's failure to submit or to make reasonable efforts to submit an adequate 1982 Ozone/CO SIP revision.

8. Proposing to impose the section 316(b) sewage treatment funding restrictions in Lake and Porter Counties for the State's failure to implement the approved 1979 Ozone/CO SIP, and for failure to submit an approvable 1982 Ozone/CO SIP.

During the public comment period, USEPA will consider any comments on this issue. If Indiana fails to remedy this situation before USEPA takes final action, the resulting funding limitations and construction restrictions pursuant to sections 110(a)(2)(I), 176(a), 176(b), 173(4), and 316(b) will become effective 30 days after the final rulemaking is published in the **Federal Register**. Upon the effective date of the final rulemaking, the Secretary of Transportation will not approve any projects nor award any grants in Lake and Porter Counties, under Title 23 of the United States Code, except for safety, mass transit, or transportation improvement projects related to air quality improvement or maintenance.

On August 3, 1983, USEPA discussed the formulas for withholding Clean Air Act Section 105 air pollution control funds if that became necessary for any particular State (48 FR 35312). The formula USEPA proposed as the preferred formula, would add all Clean Air Act funds which would normally be awarded to all levels of government in the State, and would withhold from that

total a percentage which is equal to the percentage of the State's population residing in the nonimplementation I/M urbanized areas. Direct grants made to local government agencies responsible for I/M implementation would be affected first, with any remaining restrictions to be applied against State funds. If the State is the only level of government responsible for I/M implementation, which USEPA believes is the case for Lake and Porter Counties, USEPA would subtract from the amount to be withheld from the State any funds that are granted directly to local government agencies in the urbanized areas, because USEPA believes these local funds are exempt from the funding restrictions. This is the formula which will be used for Indiana. The U.S. Court of Appeals for the Tenth Circuit upheld this approach in *New Mexico Environmental Improvement v. Thomas*, 789 F.2d 825 (10th Cir. 1986).

In the August 11, **Federal Register** (45 FR 53382), USEPA published its policy and procedures for implementing the municipal wastewater treatment works construction grants limitations provided in section 316 of the CAA. Section 316 allows the Administrator of USEPA to withhold, condition or restrict grants for construction of sewage treatment works under the following situation: (1) Where the treatment works will not comply with new source performance standards or with National Emission Standards for Hazardous Air Pollutants; (2) where the State is not carrying out the SIP or there is not an USEPA approved SIP that provides for the increase of each pollutant that is reasonably anticipated to result either directly or indirectly from proposed new sewage treatment construction; (3) where construction of the proposed treatment works will create new sewage treatment capacity that may reasonably be anticipated to cause or contribute to, directly or indirectly, an increase in emissions of any pollutant in excess of the increase provided for under the SIP; (4) where the proposed new sewage treatment capacity will otherwise not be in conformity with the SIP; and, (5) where the increased emissions associated with the proposed new sewage treatment capacity will interfere with, or be inconsistent with the SIP for any other State. The reader should refer to the August 11, 1988, **Federal Register** in conjunction with today's proposal.

It is noted that because of the period of time since the above policy and procedures were first published and because of changes in USEPA's construction grants program, USEPA is giving consideration to revising the policy to update it. Any such revisions will be the subject of a future **Federal Register**. However, the current policy will remain in effect until any new policy is published.

USEPA solicits comments on what action the State would have to take before USEPA should lift these restrictions, if it is the Agency's final decision to impose these restrictions.

**Opportunity for Public Hearing**

USEPA is announcing a public hearing on its proposed actions regarding Federal funding and construction restrictions for Lake and Porter Counties. The hearing will be held on April 13, 1989 at 10:30 am, County Commissioners Courtroom, Board of Commissioners of Lake County, 2293 North Main Street, Crown Point, Indiana 46307.

**Request for Public Comment**

Interested parties are invited to comment on all aspects of the proposed findings including USEPA's proposed action to impose Federal funding and construction restrictions. USEPA will consider all testimony received at the public hearing. Additionally, USEPA will keep the public comment period open until 30 days after the last public hearing date to provide an opportunity for submission or rebuttal information and supplementary information.

**Regulatory Impact**

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. Under 5 U.S.C. 605(6), this requirement may be waived if the Agency certifies that the rule will not have a significant economic effect on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and governmental entities with jurisdiction over populations of less than 50,000.

If USEPA takes final action, a moratorium on construction and modification of major stationary sources of the pollutant for which an attainment extension was granted for a specific area will go into effect. A major stationary source for this purpose is any source which emits, or has the potential to emit, 100 tons per year or more of the relevant pollutant (see 40 CFR 52.24(f)(4) (1988)). The moratorium would also prohibit major modifications, which are physical changes in the operation of a source that would result in a significant net increase of a pollutant. (See 40 CFR 52.24(f)(5) (1986).) Thus, some small entities might be affected by final Agency action.

USEPA has, in the past, made efforts to quantify the impact of the Act rules on the construction and modification of sources, but has been unable to do so. USEPA's lack of success is due, in part, to the need to obtain information on future plans for business growth. This information is difficult to obtain, as businesses are understandably reluctant to make their plans public. Consequently, USEPA is making no quantified assessment of the potential economic impact on small entities from today's proposal.

Although USEPA believes that a final action to impose the construction restrictions might have some impact on small entities, this impact cannot affect the Agency's actions. Under the Clean Air Act, the imposition of the construction moratorium is automatic and mandatory whenever the Agency determines that an approved or promulgated SIP is not being implemented in a nonattainment area.

Final action on today's proposal also could result in withholding of portions of air pollution control funds, provided for under Section 105 of the Act, from certain areas in Indiana. However, since today's proposal does not affect any areas with populations of less than 50,000, the governmental entities affected by any funding limitations do not fall within the definition of "small entities".

If USEPA takes final action and finds that the State has failed to submit, and is not making reasonable efforts to submit, a SIP that considers each of the elements required by Section 172, certain highway construction funds under Title 23 of the United States Code, and air quality planning funds under the Clean Air Act, and certain sewage treatment plant funds will be withheld. Thus, some small entities probably will be affected by final USEPA action.

USEPA cannot predict reliably the impact of Clean Air Act restrictions under Section 176(a) because of the exemptions authorized for highway and air quality planning projects. Careful review and evaluation of each project is necessary to determine whether or not a project is exempt. Consequently, USEPA is making no quantified assessment of the potential economic impact on small entities that may result from today's proposal.

While a final action to impose Federal highway and air quality funding restrictions might have some impact on small entities this impact cannot affect the Agency actions under the Act because the imposition of Section 176(a)

VOL 54 ISS 47 MR 13 1989 UMI

funding restrictions are automatic and mandatory whenever the Agency determines that a State has failed to submit or made reasonable efforts to submit a SIP which addresses each of the elements of Section 172. Similarly, USEPA can not reliably predict the impact of the Clean Water Act restrictions under Section 316(b), because growth projections specifically related to impact projects are not available. However, the Agency believes that the number of small entities (cities and towns) affected by these restrictions will not be substantial.

Under Executive Order 12291, this action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review.

[FRL-3634-1]

## Ocean Dumping; Proposed Designation of Sites

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA today proposes to designate two new dredged material disposal sites located in the Gulf of Mexico offshore of Freeport Harbor, Texas. One site is for the one time disposal of 5.1 million cubic yards (mcy) of construction material; the other site is for the disposal of 2.1 mcy of future maintenance material dredged annually for the expanded and relocated Freeport Harbor Entrance and Jetty Channels. This action is necessary to provide acceptable ocean dumping sites for the disposal of material from the Army Corps of Engineers 45-Foot Project at Freeport Harbor, Texas. This proposed site designation is for an indefinite period of time.

DATE: Comments must be received on or before April 27, 1989.

ADDRESSES: Send comments to: Norm Thomas, Chief, Federal Activities Branch (6E–F), U.S. E.P.A., 1445 Ross Avenue, Dallas, Texas 75202–2733.

Information supporting this proposed designation is available for public inspection at the following locations:

EPA, Region 6 (E–FF), 1445 Ross Avenue, 10th Floor, Dallas, Texas 75202–2733.

Corps of Engineers, Galveston District, 444 Barracuda Avenue, Galveston, Texas 77550.

FOR FURTHER INFORMATION CONTACT: Norm Thomas 214/655–2260 or FTS/255–2260.

SUPPLEMENTARY INFORMATION:

### A. Background

Seciton 102(c) of the Marine Protection, Research, and Sanctuaries Act of of 1972, as amended, 33 U.S.C. 1401 et seq. ("the Act") gives the Administrator of EPA the authority to designate sites where ocean dumping may be permitted. On December 23, 1986, the Administrator delegated the authority to designate ocean dumping sites to the Regional Administrator of the Region in which the site is located. This proposed site designation is being made pursuant to that authority.

The EPA Ocean Dumping Regulations (40 CFR Chapter I, Subchapter H, § 228.4) state that ocean dumping sites will be designated by publication in Part 228. This site designation is being published as proposed rulemaking in accordance with § 228.4(e) of the Ocean Dumping Regulations, which permits the designation of ocean disposal sites for dredged material. Interested persons may participate in this proposed rulemaking by submitting written comments within 45 days of the date of this publication to the EPA Region 6 address given above.

### B. EIS Development

Section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, ("NEPA") requires that Federal agencies prepare Environmental Impact Statements (EISs) on proposals for major Federal actions significantly affecting the quality of the human environment. While NEPA does not apply to EPA activities of this type, EPA has voluntarily committed to prepare EISs in connection with its ocean dumping site designations (30 CFR 16186, May 7, 1974).

EPA has prepared a Draft Environmental Impact Statement entitled "Environmental Impact Statement (EIS) for the Freeport Harbor, Texas (45-Foot Project) Ocean Dredged Material Disposal Site Designation." On February 17, 1989 a notice of availability of the Draft EIS for public review and comment was published in the Federal Register. The public comment period of this Draft EIS closes on April 3, 1989. Limited copies of the Draft EIA are available from the EPA address given above.

The proposed action discussed in the EIS is designation of two ocean disposal sites for dredged material. The purpose of the designation is to provide environmentally acceptable locations for ocean disposal. The appropriateness of ocean disposal is determined on a case-by-case basis.

The EIS discusses the need for the action and examines ocean disposal sites and alternatives to the proposed action. The general alternatives examined were the no-action alternative; upland disposal; and ocean disposal, including a mid-shelf site, a continental slope site, and three near-shore sites, including the existing or historically-used site. The no-action alternative would require the Corps to develop an alternative disposal method (e.g., land based) or modify or cancel the project. The no action alternative was not considered feasible. Upland disposal was determined not practicable because there are not sufficient upland sites available to accomodate both the virgin and maintenance material from the 45-Foot Project and the Corps routine maintenance material.

The mid-shelf and continental slope alternatives were not considered feasible because of safety and economic considerations, limits on monitoring and surveillance, and the lack of any environmental benefits by utilizing sites that far offshore.

Ocean disposal sites were identified by determining a zone of siting feasibility (ZSF) and then screening out those sites which impacted biologically sensitive areas, beaches and recreational areas, the navigation channel, cultural or historical resources, etc.

Evaluation of the historically-used disposal site, which is still utilized by the Corps for disposal of routine maintenance material, showed the site to be located in the biological buffer zone area and that it contained an inappropriate grain-size regime for disposal of the construction material. Because of these reasons the existing, historically-used site is not being proposed for designation.

The preferred ocean disposal site for the virgin material is located in the 55-foot isobath and in the silty-clay regime. The preferred size of the virgin ocean dredged material disposal site (ODMDS) was determined, based on models of the ocean discharge of dredged material, to be 5,280 feet in a direction parallel to the Channel (northwest/southeast) and 11,380 feet in a direction perpendicular to the Channel (northeast/southwest). The maintenance material disposal site is located in a silty-sand regime closer to shore. The preferred size of the maintenance material ODMDS is 4,500 feet parallel to the Channel and 12,500 feet perpendicular to the Channel.

EPA is coordinating with the National Marine Fisheries Service in accordance with the requirements of Section 7 of the Endangered Species Act. EPA is also coordinating, as a part of the NEPA/EIS process, with the State of Texas regarding any requirements under the Coastal Zone Management Act.

### C. Proposed Site Designation

The preferred site for disposal of the virgin material is located about six miles from the coast and occupies an area of 2.64 square nautical miles. The coordinates of the site are as follows:

28°51'22" N, 95°14'25" W; 28°50'28" N, 95°13'30" W; 28°48'58" N, 95°15'24" W; 28°49'55" N, 95°16'19" W.

The preferred site for disposal of the maintenance material is located about three miles from the coast and occupies an area of 1.53 square nautical miles. The coordinates of the site are as follows:

28°54'00" N, 95°15'49" W; 28°53'28" N, 95°15'16" W; 28°52'00" N, 95°16'50" W; 28°52'32" N, 95°17'32" W.

### D. Regulatory Requirements

Five general criteria are used in the selection and approval of ocean disposal sites for continuing use. Sites are selected so as to minimize interference with other marine activities, to keep any temporary perturbations from the dumping from causing impacts outside the disposal site, and to permit effective monitoring to detect any adverse impacts at an early state. Where feasible, locations off the continental shelf are chosen. If disposal operations at a site cause unacceptable adverse impacts, further use of the site may be terminated or limitations placed on the use of the site to reduce the impacts to acceptable levels. The general criteria are given in § 228.5 of the EPA Ocean Dumping Regulations; § 228.6 lists eleven specific factors used in evaluating a proposed disposal site to assure that the general criteria are met. The characteristics of the proposed sites are reviewed below in terms of the eleven factors.

*1. Geographical Position, Depth of Water, Bottom Topography and Distance from Coast (40 CFR 228.6(a)(1).)*

The geographical positions of the sites are given above. The water depth at the site for the construction material is from 54 to 63 feet; the topography is flat; and the site is located about six miles from the coast at its closest point. The water depth at the site for the maintenance material ranges from 31 to 38 feet; the topography is flat; and the site is located about three miles from shore at its closest point.

*2. Location in Relation to Breeding, Spawning, Nursery, Feeding, or Passage Areas of Living Resources in Adult or Juvenile Phases (40 CFR 228.6(a)(2).)*

At the southeast border of the ZSF, there is a white shrimp breeding area, a sport and commercial fishing harvest area, and a reef area. At the northeast border, there is a small collection of coral heads (reefs), providing habitat which improves fishing. This area and the jetties, plus buffer zones are excluded from consideration. Also excluded are lighted platforms and non-submerged shipwrecks which improve fishing.

*3. Location in Relation to Beaches and Other Amenity Areas (40 CFR 228.6(a)(3).)*

The preferred sites for virgin and maintenance material disposal are roughly six miles and three miles, respectively, from beaches or other amenity areas.

*4. Types and Quantities of Wastes Proposed to be Disposed of, and Proposed Methods of Release, Including Methods of Packing the Wastes, If Any (40 CFR 228.6(a)(4).)*

Virgin construction material (5.1 mcy) only will be discharged into the virgin material disposal site. Only maintenance dredged material from the Freeport Harbor Entrance and Jetty Channels will be disposed in the maintenance material disposal site. Historically, an average of one mcy/yr is dredged from the channel at roughly ten-month intervals. This material has historically been transported by hopper dredges but could be transported by pipeline. With the proposed modifications, it is anticipated that future maintenance material will equal 2.1 mcy annually.

*5. Feasibility of Surveillance and Monitoring (40 CFR 228.6(a)(5).)*

The preferred sites are amendable to surveillance and monitoring. The proposed monitoring and surveillance program for the virgin material consists of: 1) a method for recording the location of each discharge; 2) bathymetric surveys; and 3) grain size analysis, sediment chemistry characterization and benthic infaunal analysis at selected stations. For future maintenance material, the program consists of water, sediment and elutriate chemistry; bioassays; bioaccumulation studies; and bethic infaunal analyses.

*6. Dispersal, Horizontal Transport and Vertical Mixing Characteristics of the Area, Including Prevailing Current Direction and Velocity, If Any (40 CFR 228.6(a)(6).)*

Predominant longshore currents, and thus predominant longshore transport, is to the southwest. Long-term mounding has not historically occurred. Therefore, steady longshore transport and occasional storms, including hurricanes, remove the disposed material from the site. Both proposed disposal sites were sized on the basis of modeling of short-term transport.

*7. Existence and Effects of Current and Previous Discharges and Dumping in the Area (Including Cumulative Effects) (40 CFR 228.6(a)(7).)*

The discussion of the results of chemical and bioassay testing of past maintenance material and material from the existing disposal site plus chemical analyses of water from the area concluded that there were no indications of water or sediment quality problems in the ZSF, including the preferred sites. Testing of past maintenance material indicates that it was acceptable for ocean disposal under 40 CFR Part 227. Studies of the benthos at the existing site and nearby areas have not indicated any significant decrease or change in composition of the benthos.

*8. Interference with Shipping, Fishing, Recreation, Mineral Extraction, Desalination, Fish and Shellfish, Culture, Areas of Special Scientific Imporance and Other Legitimate Uses of the Ocean (40 CFR 228.6(a)(8).)*

Legitimate uses of the ocean which are pertinent to the Freeport disposal area are shipping, mineral extraction, commercial and recreational fishing, recreational areas and historic sites. The preferred sites were selected so that their use will not interfere with other legitimate uses of the ocean since the alternative screening process was designed to prevent the selection of sites which would interfere. Disposal operations in the past have not interfered with other uses.

VOL 54 ISS 47 MR 13 1989 UMI

*9. The Existing Water Quality and Ecology of the Site as Determined by Available Data or by Trend Assessment or Baseline Surveys (40 CFR 228.6(a)(9).)*

Monitoring studies indicated only short-term water column perturbations of turbidity, and perhaps Chemical Oxygen Demand (COD), have resulted from disposal operations. No short-term sediment quality perturbation could be directly related to disposal operations. In general, the water and sediment quality is good throughout the ZSF, including the historically-used disposal site. This indicates that there have been no long-term impacts on water and sediment quality. There also appear to be no long-term impact on the benthos at the existing site.

*10. Potentiality for the Development or Recruitment of Nuisance Species in the Disposal Site (40 CFR 228.6(a)(10).)*

With a disturbance to any benthic community, initial recolonization will be by opportunistic species. However, these species are not nuisance species in the sense that they would interfere with other legitimate uses of the ocean or that they are human pathogens. The disposal of virgin or maintenance material in the past has not, and disposal of the proposed material should not, attract or promote the development or recruitment of nuisance species.

*11. Existence at or in Close Proximity to the Site of Any Significant Natural or Cultural Features of Historical Importance (40 CFR 228.6(a)(11).)*

The nearest site of historical importance to the virgin material preferred site is approximately 0.5 miles away from the edge of this site in a cross-current direction. For the maintenance material site, the nearest site of historical importance is roughly 1.2 miles from the edge of the site in a cross-current direction. Therefore, use of the preferred sites would not adversely impact known sites of historical importance.

**E. Proposed Action**

Based on the Draft EIS, EPA proposes to designate two new Freeport Harbor (45-Foot Project) sites for future use for the ocean disposal of dredged material. The sites are compatible with the five general criteria and eleven specific factors used for site evaluation.

Before ocean dumping of dredged material at the sites may occur, the Corps of Engineers must evaluate the project according to EPA's ocean dumping criteria. EPA has the authority to approve or to disapprove or to propose conditions upon dredged material permits for ocean dumping. While the Corps does not administratively issue itself a permit, the requirements that must be met before dredged material derived from Federal projects can be discharged into ocean waters are the same as where a permit would be required.

**F. Regulatory Assessments**

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. EPA has determined that this action will not have a significant impact on small entities since the site designation will only have the effect of providing a disposal option for dredged material. Consequently, this rule does not necessitate preparation of a Regulatory Flexibility Analysis.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action will not result in an annual effect on the economy of $100 million or more or cause any of the other effects which would result in its being classified by the Executive Order as a "major" rule. Consequently, this rule does not necessitate preparation of a Regulatory Impact Analysis.

This Proposed Rule does not contain any information collection requirements subject to the Office of Management and Budget review under the paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

**List of Subjects in 40 CFR Part 228**

Water pollution control.

Date: February 28, 1989.

**Robert E. Layton, Jr.,**

*Regional Administrator of Region 6.*

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is proposed to be amended as set forth below.

**PART 228—[AMENDED]**

1. The authority citation for Part 228 continues to read as follows:

**Authority:** 33 U.S.C. 1412 and 1418.

2. Section 228.12 is amended by removing the entry for "Freeport Harbor, Texas" from paragraph (a)(3) and by adding paragraphs (b) (76) and (77) to read as follows:

**§ 228.12 Delegation of management authority for interim ocean dumping sites.**

* * * * *

(b) * * *

(76) Freeport Harbor (45-Foot Project), Texas—Region 6

Location: 28°51'22" N, 95°14'25" W; 28°50'28" N, 95°13'30" W; 28°48'58" N, 95°15'24" W; 28°49'55" N, 95°16'19" W.
Size: 2.64 square nautical miles.
Depth: 54 to 63 feet.
Primary Use: Construction (new work) dredged material.
Period of Use: Indefinite period of time.
Restriction: Disposal shall be limited to dredged material from the Freeport Harbor Entrance and Jetty Channels, Texas.

(77) Freeport Harbor (45-Foot Project), Texas—Region 65.

Location: 28°54'00" N, 95°15'49" W; 28°53'28" N, 95°15'16" W; 28°52'00" N, 95°16'59" W; 28°52'32" N, 95°17'32" W.
Size: 1.53 square nautical miles.
Depth: 31 to 38 feet
Primary Use: Maintenance dredged material.
Period of Use: Indefinite period of time.
Restriction: Disposal shall be limited to dredged material from the Freeport Harbor Entrance and Jetty Channels, Texas.

**[FRL-3534-7]**

**Hazardous Waste Management System; Testing and Monitoring Activities**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of extension of comment period.

**SUMMARY:** The purpose of this notice is to extend the public comment period on a Notice of Proposed Rulemaking (NPRM) published on January 23, 1989 (54 FR 3212). The NPRM proposed to: (1) Incorporate the Third Edition of "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," (SW-846) into the RCRA regulations; (2) update SW-846 with additional methods and information; and (3) mandate minimum Quality Control (QC) procedures for all RCRA testing.

The reason for this extension is to give interested persons additional time to review the many SW-846 analytical methods and the incumbent QC requirements in order to develop meaningful comments. In addition, the Government Printing Office was unable to supply SW-846 subscribers and other interested parties with the proposed update to SW-846 for more than a month following the publication of the NPRM.

Therefore, to ensure that commenters have adequate time to understand the proposed rule, review the proposed update package, and prepare their comments, we are extending the comment period from March 9, 1989 to April 24, 1989.

**DATES:** The deadline for submitting written comments on the January 23, 1989 notice is extended from March 9, 1989 to **April 24, 1989.**

**ADDRESSES:** The public should submit an original and two copies of their comments on this proposed rule to: Docket Number F-89-WTMP-FFFFF, EPA RCRA Docket, OS-305, (Room SE-205), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Please place Docket number on all comments. The collected comments and other information regarding this rulemaking are available for public review in the EPA RCRA docket. The EPA RCRA Docket is located in Room M-2427 at the above address and is open from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays. The public must make an appointment to review docket materials by calling (202) 475-9327. The public may copy 100 pages of material from any one regulatory docket at no cost; additional copies cost $0.15 per page.

Copies of the Third Edition of SW-846 of the proposed first update to the Third Edition are available from the Government Printing Office, Superintendent of Documents, Washington, DC 20402, (202) 783-3238. The document number is 955-001-00000-1 and the cost is $110.00 for the four-volume set plus updates. Update packages are being mailed to all subscribers. The proposed first update package may also be ordered from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161, (703) 487-4600. The document number is PB89-148-076 and the cost is $61.95 for paper copies and $15.50 for microfiche.

Copies of the Second Edition of SW-846 are also available from NTIS. The document number is PB87-120-291 and the cost is $48.95 for paper copies and $13.50 for microfiche.

**FOR FURTHER INFORMATION CONTACT:** For general information contact the RCRA Hotline at (800) 424-9346 (toll free) or (202) 382-3000. For information on the technical aspects of this proposed rule contact Charles Sellers, Office of Solid Waste, OS-331, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, (202) 382-3282.

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

### Feed Grain Donations for the Fort Peck Tribe Indian Reservation in Montana

Pursuant to the authority set forth in section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Fort Peck Tribe Indian Reservation in Montana has been materially increased and become acute because of severe and prolonged drought, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Fort Peck Tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation (CCC) for livestock feed for such needy members of the Tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the Tribe to be acute distress areas and authorize the donation of feed grain owned by the CCC to livestock owners who are determined by the Bureau of Indian Affairs, United States Department of the Interior, to be needy members of the Tribe utilizing such lands. These donations by the CCC may commence upon March 1, 1989, and shall be made available through May 15, 1989, or such other date as may be stated in a notice issued by the USDA.

Signed at Washington, DC on March 7, 1989.

## Foreign-Trade Zones Board

**[Order No. 425]**

### Resolution and Order Approving the Application of the Indianapolis Airport Authority for a Special-Purpose Subzone at the Subaru-Isuzu Plant in Tippecanoe County, IN

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

**Resolution and Order**

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zone Board (the Board) has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Indianapolis Airport Authority, filed with the Foreign-Trade Zone Board (the Board) on November 6, 1987, requesting special-purpose subzone status for the automobile and truck manufacturing plant of Subaru-Isuzu Automotive, Inc., located in Tippecanoe County, Indiana (Lafayette area), the Board, finding that the requirements of the Foreign-Trade Zone Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

**Grant of Authority To Establish a Foreign-Trade Subzone at the Subaru-Isuzu Plant in Tippecanoe County, Indiana**

*Whereas,* by an act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a-81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

*Whereas,* the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

*Whereas,* the Indianapolis Airport Authority, grantee of Foreign-Trade Zone 72, has made application (filed November 6, 1987, FTZ Docket 31-87, 52 FR 44620), in due and proper form to the Board for authority to establish a special-purpose subzone at the automobile and pickup truck manufacturing plant of Subaru-Isuzu Automotive, Inc. (SIA), located in Tippecanoe County, Indiana (Lafayette area);

*Whereas,* notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and

*Whereas,* the Board has found that the requirements of the Act and the Board's regulations are satisfied;

*Now, Therefore,* in accordance with the application filed November 6, 1987, the Board hereby authorizes the establishment of a subzone at the Subaru-Isuzu plant, designated on the records of the Board as Foreign-Trade Subzone No. 72H at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and regulations, and also to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto the Grantee shall obtain all necessary permits from federal, state, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and thoughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve the Grantee from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the Army District Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

*In witness whereof,* the Foreign-Trade Zone Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, DC, this 6th day of March, 1989, pursuant to Order of the Board.

Foreign-Trade Zone Board.

**Jan W. Mares,**

*Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates.*

Attest:

**John J. Da Ponte, Jr.,**

*Executive Secretary.*

## International Trade Administration

**[A-401-802]**

### Initiation of Antidumping Duty Investigation; Dry Aluminum Sulfate from Sweden

**AGENCY:** Import Administration, International Trade Administration; Commerce.

VOL 54 ISS 47 MR 13 1989 UMI

**ACTION:** Notice.

**SUMMARY:** On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating an antidumping duty investigation to determine whether imports of dry aluminum sulfate from Sweden are being, or are likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of dry aluminum sulfate materially injure, or threaten material injury to, a U.S. industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before March 30, 1989. If that determination is affirmative, we will make a preliminary determination on or before July 24, 1989.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jim Terpstra, or Kathleen Doering, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–4103 or (202) 377–8498, respectively.

**SUPPLEMENTARY INFORMATION:**

### The Petition

On February 13, 1989, we received a petition filed in proper form by the Delta Chemical Corporation on behalf of the domestic dry aluminum sulfate industry. In compliance with the filing requirements of 19 CFR 353.36, petitioner alleges that imports of dry aluminum sulfate from Sweden are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

If any interested party as described under paragraphs (C), (D), (E), or (F) of section 771(9) of the Act wishes to register support of or opposition to this petition, please file written notification with the Commerce officials cited in the **"FOR FURTHER INFORMATION CONTACT"** section of this notice.

### United States Price and Foreign Market Value

Petitioner's estimate of United States price (USP) is the declared F.A.S value per ton of aluminum sulfate imported from Sweden. This figure is based on IM–145 statistics for November 1988. Petitioner made no adjustments to USP. Petitioner's estimate of foreign market value (FMV) is based on a home market F.O.B. price quote for November 1988. Petitioner made no adjustments to FMV. Based on a comparison of FMV to the USP, petitioner alleges a dumping margin of 60.80 percent.

Petitioner also alleges that "critical circumstances" exist, within the meaning of section 733(e) of the Act, with respect to imports of dry aluminum sulfate from Sweden.

### Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping duty investigation, and whether it contains information reasonably available to the petitioner supporting the allegations.

We examined the petition on dry aluminum sulfate from Sweden and found that it meets requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether imports of dry aluminum sulfate from Sweden are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make a preliminary determination by July 24, 1989.

### Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the United States fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s). The product covered by this investigation is dry aluminum sulfate from Sweden, a dry white granular material used in water purification, waste water treatment, and for industrial uses. Petitioner has specifically excluded liquid aluminum sulfate from the scope of the investigation. The dry aluminum sulfate covered by this investigation has a minimum of 17 percent aluminum oxide content, a maximum of 0.2 percent iron, a maximum of 0.5 percent water insolubles, and a range of from 6 to 200 mesh in particle size. Prior to January 1, 1989, such merchandise was classifiable under item 417.1600 of the *Tariff Schedules of the United States Annotated* (TSUSA). This merchandise is currently classifiable under HTS item 2833.22.00. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

### Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonproprietary information. We will allow the ITC access to all privileged and business proprietary information in our files, provided it confirms in writing that it will not disclose such information either publicly or under administrative protective order without the written consent of the Assistant Secretary for Import Administration.

### Preliminary Determination by ITC

The ITC will determine by March 30, 1989, whether there is a reasonable indication that imports of dry aluminum sulfate from Sweden materially injure, or threaten material injury to, a U.S. industry. If its determination is negative, the investigation will terminate; otherwise, it will proceed according to the statutory and regulatory procedures.

This notice is published pursuant to section 732(c)(2) of the Act.

March 6, 1989.

**Jan W. Mares,**

*Assistant Secretary for Import Administration.*

## Certain Carton-Closing Staples and Staple Machines From Sweden, Final Results of Antidumping Duty Administrative Review

**AGENCY:** International Trade Administration/Import Administration/ Commerce.

**ACTION:** Notice of final results of antidumping duty administrative review.

**SUMMARY:** On October 25, 1988, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on certain carton-closing staples and staple machines from Sweden. The review covers Josef Kihlberg AB and the period December 1, 1985 through November 30, 1986.

We gave interested parties an opportunity to comment on our preliminary results. We received comments from the respondent. Based on our analysis of comments received, the final results are changed from those presented in the preliminary results of review.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Barbara Victor or Laurie A. Lucksinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5222/ 5253.

**SUPPLEMENTARY INFORMATION:**

### Background

On October 25, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 42991) the preliminary results of its administrative review of the antidumping duty order on certain carton-closing staples and staple machines from Sweden (48 FR 38250, December 20, 1983). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

### Scope of the Review

Imports covered by the review are shipments of certain carton-closing staples in strip form and certain non-automatic carton-closing staple machines. Carton-closing staples are U-shaped wide crown fastening devices used to secure and close the flaps of corrugated paperboard cartons. They are commonly referred to as wide-crown staples and are available in either 50 or 60 piece sticks of 2,000 or 2,500 per box.

Staples are made of steel, most often copper coated or galvanized. Carton-closing wide crown staples differ from office, desk-type, and other industrial staples primarily in the width of the crown and wire dimensions. Carton-closing wide crown staples have crown widths of 1¼ inches or more. The cross-sectional dimensions vary from .037–.040 inches by .074–.092 inches.

Non-automatic wide crown carton-closing staple machines use the wide crown staples described above and divided into two categories, hand-held top closing staple machines and free-standing bottom closing machines.

During the review period, such merchandise was classifiable under items 646.2000 and 662.2065, respectively, of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under item numbers 8305.20.00 and 8422.30.90 of the Harmonized Tariff Schedule (HTS). The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers one manufacturer/ exporter of certain carton-closing staples and staple machines from Sweden and the period December 1, 1985 through November 30, 1986.

### Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received comments from Josef Kihlberg AB ("Kihlberg").

*Comment 1:* Kihlberg maintains that the Department misinterpreted its quantity discount policy. The Department did not compare Kihlberg's U.S. sales to home market sales at comparable quantities and didn't make the correct deduction for discounts.

*Department's Position:* We agree. In the preliminary determination we applied the quantity discount based on quantities shipped. We have revised our calculations applying the discount based on the total quantity ordered and invoiced.

*Comment 2:* Kihlberg argues that the Department erred in deducting export selling expenses in its calculation of exporter's sales price. Kihlberg has documented in the past that none of the indirect selling expenses of Kihlberg's export department in Sweden are incurred "by or for the account of the exporter in the United States".

*Department's Position:* After review of the record in this case, we agree that Kihlberg's export department in Sweden does not incur any expenses in selling to the United States. Therefore, we have not accounted for those expenses in our calculation of exporter's sales price.

*Comment 3:* Kihlberg points out a clerical error made in the credit calculation for five invoices.

*Department's Position:* We agree and have corrected this error in our final determination. We have also corrected two programming errors found after publication of the preliminary determination.

### Final Results of Review

Based on our analysis of comments received, we determine that the following margins exist:

| Manufacturer/ Exporter | Period | Margin (Percent) |
|---|---|---|
| Josef Kihlberg AB | | |
| Staples | 12/01/85–11/30/86 | 0.57 |
| Staple Machines | 12/01/85–11/30/86 | 0.57 |

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, as provided for in section 751(a)(1) of the Tariff Act, a cash deposit of estimated antidumping duties of 0.57 percent shall be required. For any future entries of this merchandise from a new exporter, not covered in this or prior administrative reviews, whose first shipments occurred after November 30, 1986, and who is unrelated to Josef Kihlberg AB or any previously reviewed firm, a cash deposit of 0.57 percent shall be required. These deposit requirements are effective for all shipments of Swedish carton-closing staples and staple machines entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

## Preliminary Determination of Sales at Less Than Fair Value: New Steel Rail, Except Light Rail, From Canada

**AGENCY:** Import Administration, International Trade Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We preliminarily determine that new steel rail, except light rail, (hereinafter referred to as new steel rail) from Canada is being, or is likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to suspend liquidation of all entries of new steel rail from Canada as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make a final determination by May 22, 1989.

**EFFECTIVE DATE:** March 13, 1989.

**FOR FURTHER INFORMATION CONTACT:** Kate Johnson or Louis Apple, Office of Antidumping Investigations, Import Administration, International Trade

VOL 54 ISS 47 MR 13 1989 UMI

Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230; telephone: (202) 377-0060 or (202) 377-1760.

SUPPLEMENTARY INFORMATION:

**Preliminary Determination**

We preliminarily determine that new steel rail from Canada is being, or is likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The estimated weighted-average margins are shown in the "Suspension of Liquidation" section of this notice.

**Case History**

Since our notice of initiation (53 FR 41392, October 21, 1988), the following events have occurred. On November 10, 1988, the ITC determined that there is a reasonable indication that imports of new steel rail from Canada are materially injuring a U.S. industry (USITC Pub. No. 2135, November 1988).

On November 4, 1988, a questionnaire was presented to The Algoma Steel Corporation, Ltd. ("Algoma"), which accounts for a substantial portion of exports from Canada to the United States during the period of investigation. We received replies to the questionnaire from Algoma on November 23, 1988 and December 12, 1988. We sent deficiency letters to Algoma on December 2, 1988, January 10, 1989 and February 9, 1989. We received responses to the deficiency letters during the period December 12, 1988 through February 28, 1989.

On January 19, 1989, petitioner requested that the Department initiate a cost of production investigation pursuant to section 773(b) of the Act to determine whether Algoma was selling the subject merchandise at prices below the cost of production. Petitioner supplemented this request on February 3 and February 14, 1989. We have determined from available information that there are reasonable grounds to believe or suspect that sales of new steel rail in Canada were being made at less than the cost of production and we have presented Algoma with a cost of production questionnaire. Analysis of the reply will be taken into account for the final determination.

**Scope of Investigation**

Steel rail, whether of carbon, high carbon, alloy or other quality steel, includes, but is not limited to, standard rails, all main line sections (over 60 pounds per yard), heat-treated or head-hardened (premium) rails, transit rails, contact rail (or "third rail") and crane rails. Rails are used by the railroad industry, by rapid transit lines, by subways, in mines and in industrial applications.

Specifically excluded from this investigation are light rails which are 60 pounds or less per yard. Also excluded are relay rails which are used rails taken up from a primary railroad track and relaid in a railroad yard or on a secondard track.

Prior to January 1, 1989, such merchandise was classifiable under items 610.2010, 610.2025, 610.2100 and 688.4280 of the *Tariff Schedules of the United States Annotated* (TSUSA). This merchandise is currently classifiable under HTS items 7302.10.1020, 7302.10.1040, 7302.10.5000, 8548.00.0000. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

**Period of Investigation**

The period of investigation is April 1, 1988, through September 30, 1988.

**Fair Value Comparisons**

To determine whether sales of new steel rail from Canada to the United States were made at less than fair value, we compared the United States price to the foreign market value.

**United States Price/Purchase Price**

As provided in section 772(b) of the Act, we used the purchase price to represent the United States price for sales of new steel rail where sales were made to unrelated purchasers prior to importation of the product into the United States. We also used the purchase price to represent the United States price for sales of the subject merchandise where sales were made to an indirectly related purchaser, who was the end-user of the product, prior to importation of the product into the United States.

We calculated purchase price based on packed, F.O.B. prices. We made deductions, where appropriate, for inland freight, duty, and brokerage and handling. We made an addition, where appropriate, for duty drawback in accordance with section 772(d)(1)(B) of the Act. We also made an addition, where appropriate, for sales taxes which were not collected because the product was being exported, in accordance with section 772(d)(1)(C) of the Act. The adjustment for taxes was based on the weighted-average tax rate for each category of such or similar merchandise in the home market. The one U.S. sale of industrial rail was not included in our analysis as it represented a small portion of the total value of rail sales during the period of investigation and because no industrial rail was sold in the home market during this period.

**Foreign Market Value**

In accordance with section 773(a) of the Act, we calculated foreign market value based on the packed, delivered or ex-works prices to related and unrelated customers in the home market. For purposes of this preliminary determination, we included sales to related customers, pursuant to 19 CFR 353.22(b), since we preliminarily determine that the prices paid by those customers were comparable to the prices paid by unrelated customers. If we are unable to ascertain at verification that the prices to related and unrelated customers in the home market are comparable, we will use only the sales to unrelated customers in calculating the foreign market value in our final determination.

We made deductions from the home market price, where appropriate, for inland freight. We deducted the home market packing cost from the foreign market value and added all U.S. packing costs. We made circumstance of sale adjustments, where appropriate, for differences in credit terms and sales taxes between the two markets.

Where appropriate, we made further adjustments to the home market price to account for differences in the physical characteristics of the merchandise, in accordance with § 353.16 of the Regulations.

**Currency Conversion**

We made currency conversions in accordance with 19 CFR 353.56(a)(1). All currency conversions were made at the rates certified by the Federal Reserve Bank.

**Verification**

We will verify the information used in making our final determination in accordance with section 776(b) of the Act.

**Suspension of Liquidation**

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of new steel rail from Canada that are entered or withdrawn from warehouse for consumption on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of new steel rails from Canada exceeds the United States price as shown below. This suspension of liquidation will remain in effect until further notice. The weighted-average margins are as follows:

| Manufacturer/Producer/ Exporter | Weighted-average margin percentage |
|---|---|
| Algoma Steel Corporation, Ltd. | 2.72 |
| All others | 2.72 |

This suspension of liquidation covers imports of new steel rail meeting the definition outlined in the "Scope of Investigation" section of this notice.

**ITC Notification**

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

The ITC will determine whether these imports are materially injuring, or threaten material injury to, a U.S. industry before the later of 120 days after the date of this determination, or 45 days after the final determination, if affirmative.

**Public Comment**

In accordance with 19 CFR 353.47, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 9:30 a.m. on April 20, 1989, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Assistant Secretary for Import Administration, Room B-099, at the above address within ten days of the publication of this notice. Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; (3) the reasons for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least ten copies must be submitted to the Assistant Secretary by April 13, 1989. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, at the above address, in at least ten copies, not less than 30 days before the date of the final determination, or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)).

March 6, 1989.

**Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From Italy; Termination of Antidumping Duty Administrative Review**

AGENCY: International Trade Administration/Import Administration/ Commerce.

ACTION: Notice of termination of antidumping duty administrative review.

SUMMARY: On September 27, 1988, the Department of Commerce initiated an administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished and unfinished, from Italy. The Department has now determined to terminate that review.

*Background:* On September 27, 1988, the Department of Commerce published a notice of initiation of administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished and unfinished, from Italy (53 FR 37817). That notice stated that we would review RIV-SKF for the period February 1, 1987 through July 31, 1988.

RIV-SKF subsequently withdrew its request for review on November 30, 1988. As a result, the Department has determined to terminate the review.

EFFECTIVE DATE: March 13, 1989.

FOR FURTHER INFORMATION CONTACT: Eugenio Parisi or John R. Kugelman, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202)377-3601.

SUPPLEMENTARY INFORMATION: This notice is in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and 19 CFR 353.53a.

**Fresh Cut Roses From Israel; Preliminary Results of Countervailing Duty Administrative Review**

AGENCY: International Trade Administration/Import Administration; Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on fresh cut roses from Israel. We preliminarily determine the total bounty or grant to be 10.58 percent *ad valorem* for the period October 1, 1985 through September 30, 1986. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: March 13, 1989.

FOR FURTHER INFORMATION CONTACT: Cynthia Sewell or Paul McGarr, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

**Background**

On December 10, 1986, the Department of Commerce ("the Department") published in the **Federal Register** (51 FR 44498) the final results of its last administrative review of the countervailing duty order on fresh cut roses from Israel (45 FR 58516; September 4, 1980). On September 30, 1987, the Government of Israel requested in accordance with section 355.10 of the Commerce Regulations on administrative review of the order. We published the initiation on October 20, 1987 (52 FR 38952). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

**Scope of Review**

The United States, under the auspices of the Customs Cooperation Council, has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS) as provided for in section 1201 et seq. of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

VOL
54
ISS

13
1989
UMI

Imports covered by the review are shipments of Israeli fresh cut roses. During the review period, such merchandise was classified under item numbers 192.1810 and 192.1890 of the Tariff Schedules of the United States Annotated. Such merchandise is currently classifiable under item number 0603.10.60 of the Harmonized Tariff Schedule. The review covers the period October 1, 1985 through September 30, 1986 and twelve programs.

**Analysis of Programs**

*(1) Government-Guaranteed Minimum Price Program*

The Ministry of Agriculture ("MOA") operates this program to guarantee a minimum price to farmers for their crops in case of bad marketing conditions. The MOA determines a national level of production to be covered by the guarantee program, sets a minimum (guaranteed) price based on export market conditions, and pays 50 percent of the difference between the guaranteed price and the actual average market price if the market price is lower than the guaranteed price. Payments are based on claims submitted to the MOA after the close of the growing season.

Because these payments are available only to growers that export, we preliminarily determine that they are countervailable. We calculated the benefit from this program by dividing the total payments received for roses by the total value of rose exports to all markets during the review period. On this basis, we preliminarily determine the benefit from this program to be 0.95 percent *ad valorem*.

*(2) Export Promotion Financing Fund*

The MOA operates the Export Promotion Financing Fund to promote the development of export markets for Israeli agricultural products. Exporters submit proposals to the MOA for promotional expenses, and the MOA determines whether to approve the request based on the development potential for the product and the availability of funds. For proposals that are approved, exporters receive reimbursements for up to 50 percent of actual expenses. We verified that during the review period Agrexco, Bickel and Hillron received funds for the promotion of flowers to all markets.

Because this program provides assistance only to exporters, we preliminarily determine that it is countervailable. To calculate the benefit, we divided total payments received by each company by the value of its total flower exports to all markets during the period of review. We then weight-averaged the resulting benefits by each company's proportion of total rose exports to the United States during the period of review. On this basis, we preliminarily determine the benefit from this program to be 0.14 percent *ad valorem*.

At verification, we found that the Export Promotion Committee had renounced funding of promotional activities for flowers exported to the United States, and that no funds had been budgeted for the 1987/88 growing season for the promotion of flowers in the U.S. market. Therefore, for purposes of cash deposit of estimated countervailing duties, we preliminarily determine the benefit from this program to be zero.

*(3) Insurance From Israel Foreign Trade Risks Insurance Corporation (IFTRIC)*

The Exchange Rate Risks Insurance Scheme ("EIS"), which is operated by IFTRIC, insures exporters against losses occurring when the rate of devaluation of the shekel does not keep pace with the rate of inflation. If the rate of inflation is higher than the rate of devaluation, the exporter is compensated in an amount equal to the difference between the two rates multiplied by the value added by each exporter to the exported merchandise.

In determining whether an export insurance program provides a countervailable benefit, we examine whether the premiums and other charges are adequate to cover the program's long-term operating costs and losses. We determined in the *Final Affirmative Countervailing Duty Determination: Certain Fresh Cut Flowers from Israel* ("Flowers") (52 FR 3316, February 3, 1987) that this program conferred a countervailable benefit on exports of cut flowers from Israel because the EIS operated at a loss in the five years from 1981 through 1985, and that five years is a sufficiently long period to establish that the premiums and other charges are inadequate to cover the long-term operating costs and losses of the program.
Based on this determination, we preliminarily determine that this program is countervailable.

We calculated the benefit from this program by dividing the amount of compensation each company received by the value of its total flower exports to all markets during the period of review. We then weight-averaged the resulting benefits by each company's proportion of total rose exports to the United States during the period of review. On this basis, we preliminarily determine the benefit from this program to be 9.18 percent *ad valorem*.

*(4) Short-Term Fuel Advances to Rose Growers*

In 1982, the Israeli Institute for Farm Research published a survey on the profitability of rose production in the 1980/81 season. This study stated that gross income for rose growers included grants for fuel expenses and interest savings on low-cost credit. In past reviews, we determined on the basis of best information available that these grants conferred a countervailable benefit.

At verification, we found that on December 12, 1980, the MOA had disbursed short-term interest-free loans or advances to four rose growers for the purchase of fuel. Three of the four growers repaid their fuel advances before the current review period. The remaining grower had an outstanding debt balance for fuel advances during the review period. We consider the balance outstanding during the review period to be a short-term interest-free loan. To calculate the benefit, we used as our benchmark the nominal annual short-term commercial interest rate for Israeli shekels, as published in the Bank of Israel Annual Report. We then allocated the total interest savings over total rose production during the review period. On this basis, we preliminarily determine the benefit from this program to be 0.32 percent *ad valorem*.

*(5) Government Funding of Agrexco and Purchase of Agrexco Shares*

In 1978/79 and 1979/80, the MOA provided funds to Agrexco specifically to finance the expansion of Agrexco's air freight terminal at Ben Gurion Airport. In past administrative reviews, we determined on the basis of the best information available that these funds were grants and, therefore, countervailable. In the current administrative review, we verified that these government funds to Agrexco consisted of government purchases of shares in the company.

When Agrexco was established in 1957, the Israeli government purchased 50 percent of the company's founders (voting) shares. From 1957 through 1979, the purchase of all subsequent issues of nonvoting (ordinary) shares was equally split between government and nongovernment entities (*i.e.*, growers and producer organizations). Between 1980 and 1982, the government's percentage of new shares purchased dropped slightly below 50 percent and then substantially declined in 1983 and 1984. All shares issued in 1985 and 1986 were purchased entirely by nongovernment investors. However,

Agrexco remains 50 percent government-controlled because no new voting shares have been issued since Agrexco's founding.

Agrexco is a nonprofit company that acts as a seller, marketer and distributor of all types of Israeli agricultural products. While precluded from making a profit, Agrexco always covers its operating costs. If Agrexco had surplus funds in any one year, the company may redistribute such funds to the growers and producer organizations that are shareholders. Agrexco does not pay dividends to its shareholders, and shares may be sold by individual investors only at the normal share value (original purchase price).

We have consistently held that government equity ownership *per se* does not confer a subsidy. Government ownership confers a subsidy only when it is on terms inconsistent with commercial considerations. When a government and private investors purchase shares in a company at the same price, we normally do not consider such government provision of capital to confer a subsidy. In this case, however, both government and private investors paid the same price for Agrexco shares, but with different prospects.

Producer organizations and growers invest in Agrexco with the expectation of benefiting from the use of Agrexco's export facilities and services. Most growers are too small to export on their own.

The growers' ability to export and the profits from those export sales constitute the "return" on their investment in Agrexco.

The Israeli government, on the other hand, could anticipate no such benefit because it does not use the services of the company (*i.e.*, Agrexco's export facilities). Moreover, the Israeli government could not expect any return on its investment either from dividends or an increase in the value of Agrexco's shares (because the shares can only be sold at their nominal value). In effect, the rate of return for the nonuser investor is always zero. Thus, the purchase of shares in Agrexco by the Israeli government cannot be considered a reasonable commercial investment. We preliminarily determine that the government's purchases of Agrexco shares were inconsistent with commercial considerations and, therefore, countervailable.

For commercially unreasonable equity infusions, we normally apply our "rate of return shortfall" methodology (a comparison of the company's rate of return on equity with the national average rate of return on equity). Such a methodology, however, is inappropriate when applied to a nonprofit company such as Agrexco. Absent the possibility of earning a rate of return, the Israeli government's ownership of shares in Agrexco does not fit the normal characteristics of equity. Because the Israeli government has held these shares, some of them for more than 30 years, without receiving any return or exercising any claim on them, the benefit somewhat resembles a grant. On the other hand, the benefit to Agrexco is not truly a grant because the Israeli government still has a claim on Agrexco and could redeem the shares.

As a practical matter, however, we note that the amount of benefit from any program can be no greater than if the program were an outright grant. Were we to consider this program a grant, our allocation period would be the average useful life of agricultural assets according to the "Asset Guideline Classes" of the U.S. Internal Revenue Service (which is 10 years), and our declining balance grant methodology would yield a benefit of 0.0066 percent *ad valorem*.

Because this maximum possible benefit has an inconsequential effect on the total bounty or grant to Agrexco (because we carry out the countervailing duty rate to only two decimal places), we believe it is unnecessary to determine the methodology that would be more appropriate for calculating the benefit to Agrexco from the Israeli government's ownership of shares in Agrexco. Therefore, for purposes of these preliminary results, our calculation of the total bounty or grant does not include the benefit from this program.

*(6) Government Support of the Flower Board of Israel*

The Flower Board of Israel ("FBI") was established by the Ornamental Plants Production and Marketing Board Law of 1970. The FBI is appointed by the Israeli Cabinet acting through the Ministers of Agriculture and Commerce and Industry.

In the final determination on Flowers, we determined, on the basis of best information available, that the Government of Israel provided financial support to the FBI and that such financial support is countervailable.

At verification, we found that beginning in the 1985/86 growing season, the government no longer funds the FBI. On this basis, we preliminarily determine that this program is not countervailable.

*(7) Rebate of Export Insurance Premiums*

This program, which was administered by IFTRIC, operated to rebate insurance premiums to exporters. At verification, we established that this program was terminated on June 1, 1985, and that no claims for rebates of premiums were accepted after that date. Therefore, we preliminarily determine that there were no countervailable benefits received under this program.

*(8) Long-Term Industrial Development Loans to Agrexco*

Agrexco received four long-term industrial development loans which had outstanding balances during the review period. In the *Final Affirmative Countervailing Duty Determination: Industrial Phosphoric Acid from Israel* (52 FR 25448; July 7, 1987), we determined that long-term industrial development loans are countervailable only to the extent that the applicable interest rates are less than those on loans to companies located in the Central Zone (*i.e.*, the heavily populated and developed zone). Because Agrexco is located in the Central Zone, it paid the highest rate charged for long-term loans at that time. Therefore, we preliminarily determine that these loans to Agrexco are not countervailable.

*(9) Other Programs*

In past reviews, we found that the programs listed below conferred countervailable benefits on the basis of best information available. In the final determination on Flowers (which covered the same period of review and the same companies), we found that these programs were not countervailable. Therefore, we did not reinvestigate the following programs in this review:

1. Encouragement of Capital Investment Law (Agriculture) (ECILA)
   (a) Investment Grants
   (b) Accelerated Depreciation Tax Reductions/Exemptions
   (c) Drawback Grants
   (d) Reduction of Corporate Tax Liability
   (e) Interest Subsidy Payments
2. Preferential Short-term Financing under the Export Credit Funds
   (a) Export Shipments Fund
   (b) Imports-for-Exports Fund
   (c) Export Production Fund
3. Cash Payments to Growers for Greenhouses
4. Cash Payments to Packing Houses

**Preliminary Results of Review**

As a result of the review, we preliminarily determine the total bounty

VOL 54 ISS 47 MR 13 1989 UMI

or grant to be 10.59 percent *ad valorem* for the period October 1, 1985 through September 30, 1986.

The Department intends to instruct the Customs Service to assess countervailing duties of 10.59 percent of the f.o.b. invoice price on all shipments of this merchandise exported on or after October 1, 1985 and on or before September 30, 1986.

Further, due to the elimination of the Export Promotion Financing Fund, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, of 10.45 percent of the f.o.b. invoice price on all shipments of Israeli fresh cut roses entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the following workday. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.22 of the Commerce Regulations published in the **Federal Register** on December 27, 1988 (53 FR 53206) (to be codified at 19 CFR 355.22).

## National Oceanic and Atmospheric Administration

### Announcement of Western Washington Outer Coast, Washington as an Active Candidate for National Marine Sanctuary Designation; Intent To Prepare a Draft Environmental Impact Statement and Management Plan; Intent To Hold Public Scoping Meetings.

**AGENCY:** Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

**ACTION:** Notice.

**SUMMARY:** NOAA is naming the Western Washington Outer Coast as an Active Candidate for designation as a National Marine Sanctuary and will proceed with the subsequent steps in the designation process. The study area extends from Duntze Rock (north of Tatoosh Island on the northwestern tip of Washington State), 90 mi (145 km) southward along the coast to Point Grenville. For purposes of gathering information for developing a Draft Environmental Impact Statement (DEIS) and Draft Management Plan, the study area will extend landward to mean high water adjacent to State or federally owned lands, and to mean low water where such boundary is contiguous to the Makah, Quileute, Quinault, Hoh, and Ozette Indian Reservations, and include the waters seaward to the 12 mile limit of the territorial sea. The Western Washington Outer Coast study area encompasses an area of approximately 1,242 square nautical miles (2,432 km$^2$).

Selection of a site as an Active Candidate formally begins the National Environmental Policy Act (NEPA) process; NOAA will prepare an environmental impact statement and management plan to examine the management, boundary, and regulatory alternatives associated with Sanctuary designation. To initiate this process NOAA will hold scoping meetings in Washington State to solicit information and comments on the range of issues related to Sanctuary designation and management. Individuals and representative of interested organizations and government agencies, including tribal governments are invited and encouraged to attend.

Scoping meetings will be held on April 10, 11, 12, and 13, 1989. The first scoping meeting will be held on April 10, 1989 at 7:00 p.m. in Phillips Lecture Hall, Aberdeen High School, 414 North I Street, Aberdeen, Washington. The second scoping meeting will be held on April 11, 1989 at 7:00 p.m. in the Little Theater, Peninsular College, 502 E. Lauridsen Boulevard, Port Angeles, Washington. A third scoping meeting will be held on April 12, 1989 at 7:00 p.m. in the multi-purpose room in Forks Intermediate School, First Avenue and A Street, SE., Forks, Washington. A fourth scoping meeting will be held on April 13, 1989 at 7:00 p.m. in the NOAA Auditorium, Building 9, 7600 Sand Point Way, NE., Seattle, Washington.

**FOR FURTHER INFORMATION CONTACT:** Joseph A. Uravitch, Chief, or Franklin Christhilf, Regional Manager, Marine and Estuarine Management Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, 1825 Connecticut Avenue NW., Suite 714, Washington, DC 20235, (202/673-5128).

**SUPPLEMENTARY INFORMATION**

### Selection Procedures

Title III of the Marine Protection, Research, and Sanctuaries Act of 1972, 16 U.S.C. 1431 *et seq.*, authorizes the Secretary of Commerce to designate discrete areas of the marine environment as National Marine Sanctuaries to protect their special conservation, recreational, ecological, historical, research, educational, or esthetic qualities. The Act is administered by the National Oceanic and Atmospheric Administration (NOAA) through the Office of Ocean and Coastal Resource Management (OCRM), Marine and Estuarine Management Division (MEMD). Selection of a site as an an Active Candidate formally triggers the National Environmental Policy Act (NEPA) environmental impact assessment process.

On November 7, 1988, Pub. L. 100-627 was signed into law. Pub. L. 100-627 reauthorized, with amendments, Title III of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1431 *et seq.*) (the "Act"). Section 205 of Pub. L. 100-627 directs the Secretary of Commerce to designate a Western Washington Outer Coast National Marine Sanctuary not later than June 30, 1990. This notice of Active Candidate status for the Western Washington Outer Coast is the formal initiation of the documentation development phase of the Sanctuary designation process.

Initially, a draft designation document, including terms of the proposed designation, a draft management plan to implement the proposed designation, and any proposed regulations needed to implement the terms of the proposed designation are prepared. Subsequent steps include scoping meetings; public hearings; preparation of a final environmental impact statement, final management plan, and final regulations; preparation of Designation Documentation and Findings; and designation by the Secretary of Commerce. Opportunities for comment exist throughout this process and will be announced in the **Federal Register**, the local media, and other appropriate channels.

In the development of Sanctuary designation materials, NOAA will describe the extent to which designation will fulfill the purposes and policies of the Act, and discuss the degree to which:

(1) The area is of special national significance due to its resource or human-use values;

(2) Existing State and Federal authorities are inadequate to ensure coordinated and comprehensive conservation and management of the area, including resource protection, scientific research, and public education;

(3) Designation of the area as a National Marine Sanctuary will facilitate coordinated and comprehensive conservation and management of the area, including resource protection, scientific research, and public education; and

(4) The area is of a size and nature that will permit comprehensive and coordinated conservation and management. Pursuant to section 303(b) of the Act (16 U.S.C. 1433(b)), NOAA will consider:

(1) The area's natural resource and ecological qualities, including its contribution to biological productivity, maintenance of ecosystem structure, maintenance of ecologically or commercially important or threatened species or species assemblages, and the biographic representation of the site;

(2) The area's historical, cultural, archeological, or paleontological significance;

(3) The present and potential uses of the area that depend on maintenance of the area's resources, including commercial and recreational fishing, subsistence uses, other commercial and recreational activities, and research and education;

(4) The present and potential activities that may adversely affect the factors identified in the # 1-3 listed above;

(5) The existing State and Federal regulatory and management authorities applicable to the area and the adequacy of those authorities to fulfill the purposes and policies of the Act;

(6) The manageability of the area, including such factors as its size, its ability to be identified as a discrete ecological unit with definable boundaries, its accessibility, and its suitability for monitoring and enforcement activities;

(7) The public benefits to be derived from Sancturary status, with emphasis on the benefits of long-term protection of nationally significant resources, vital habitats, and resources which generate tourism;

(8) The negative impacts produced by management restrictions on income-generating activities such as living and non-living resources development; and

(9) The socioeconomic effects of Sanctuary designation. NOAA will also include an assessment of its fiscal capability to manage the area as a National Marine Sanctuary.

In preparing the environmental impact statement and management plan (EIS/MP) to examine the management and regulatory alternatives associated with Sanctuary designation, NOAA will solicit comments from interested persons, groups and organizations, the appropriate congressional committees, heads of interested Federal agencies, the responsible officials of State, local and tribal governments, and the appropriate officials of the affected Regional Fishery Management Council. This will be done during scoping meetings to be held in the State of Washington prior to preparation of the EIS/MP, and during public hearings to receive comments on the draft EIS/MP.

### History

The Western Washington Outer Coast site was first reorganized for its high natural resource potential and human resource values by placement on the National Marine Sanctuaries Program Site Evaluation List (SEL) in August of 1983 (48 FR 35568). In 1988, Congress reauthorized and amended the Act and directed the Secretary, in section 205 of Pub. L. 100-627, to issue a notice of designation with respect to the Western Washington Outer Coast National Marine Sanctuary, as generally described in the **Federal Register** Notice of August 4, 1983, not later than June 30, 1990.

### Natural Resources

*Oceanographic Characteristics*

The Western Washington Outer Coast site is affected by major oceanic currents, and by nearshore currents which are influenced by tide, wind, river discharges, and offshore submarine canyons. The Kuroshio, a principal North Pacific offshore current, splits to form the California current (flowing south) and the Alaska gyre (flowing north). The point of divergence of these two currents migrates north and south seasonally. In the winter months the California current flows south well offshore of the study area and the Davidson current, which originates in southern latitudes, flows north, inshore along the Washington coast. In the summer months, the Davidson current disperses and the California current moves inshore flowing south along the coast. Upwelling, which brings nutrient rich waters to the surface, occurs in the summer months due to prevailing northerly winds.

*Geological Features and Habitat*

Active plate tectonics caused by stresses between the Juan de Fuca, Pacific, Explorer, and American crustal plates provide the geologic setting for the Western Washington Outer Coast study area. Characteristic of the west coast, the continental shelf within the study area is narrow and steep, creating a sharp transition between the continental shelf and the deep abyssal zone. Glacial deposits compose the underlying sediments of the continental shelf. Deposits of sand and gravel, and less significant deposits of gold placers, coal, and gemstones are found along the shoreline and in coastal waters. A number of submarine canyons traverse the shelf at various intervals, although only the Juan de Fuca canyon extends within the boundary of the study area. These submarine canyons enhance upwelling to further enrich the productivity of coastal waters.

The coastline environments include rocky headlands, seastacks and sea arches, exposed beaches, protected bays, and extremely diverse and productive tidepools. Fourteen rivers, which originate in the Olympic Mountains, empty into the study area. The Western Washington Outer Coast is one of the few regions of the U.S. coastline which has remained rustic and undeveloped. The high wave energy and steep rocky cliffs make accessibility difficult, contributing to the lack of development along the shoreline. The abundance of offshore rocks and islands creates an ideal environment for a variety of seabirds and mammal populations.

*Flora and Fauna*

The study area lies within the Columbia biogeographical province. A variety of marine algae contribute significantly to the foodweb which supports the significant fisheries, bird and mammal populations. Lush plankton blooms are characteristic of the northern temperate region and occur periodically in the summer months. Eelgrass beds are important primary producers, serving as a food source and substrate for birds and intertidal species. The tidepools which form around the seastacks and rocky outcrops provide an ideal environment for the extremely complex community of intertidal organisms.

The diverse assemblages of algae and marine invertebrates support commercially and ecologically important

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

species of fish. Salmon, halibut, groundfish, and finfish, as well as numerous species of shellfish are abundant in the study area.

Many species of birds migrate through or permanently reside along the coastline of the study area. Tatoosh Island, Destruction Island, Quillayute Needles and Point Grenville serve as nesting and breeding grounds for a number of bird species. The area supports the primary U.S. nesting area and the highest continental population density of the bald eagle, federally listed as endangered under the Endangered Species Act. Other birds which nest and breed in the study area include: auklets, black oystercatchers, glaucous-winged gulls, pigeon guillemonts, sooty shearwaters, three species of cormorants, common murres, petrels, tufted puffins, peregrine falcons (federally listed as endangered and threatened), osprey, scoters, and grebes.

A variety of marine mammals inhabit the offshore rocks and islands of the study area. Tatoosh Island and the islands of the Quillayute Needles are used as a haul-out for northern and California sea lions. Destruction Island, Point Grenville, and areas off Cape Alava house harbor seals and are important habitats for the southern sea otter, federally listed as threatened. Sea otters have been transferred and released at Point Grenville and the population has successfully extended north along the coast. A variety of cetaceans are present off Washington throughout the year. The grey whale, federally listed as threatened, migrates through the region annually.

**Human Uses**

The waters of the study area are used primarily for commercial (Indian and non-Indian) and recreational fishing. Tribal ceremonial and subsistence fisheries, as well as aquaculture are also dependent on the waters of the region. The Olympic National Park borders a large portion of the study area along the coast. Hiking and wilderness camping are permitted along the Park's shoreline. Of the estimated 3.5 million annual visits to the Park, approximately one third are visits to the shoreline. The coastal area is available to the public for marine educational and scientific research opportunities. University researchers use portions of the study area for field research and the gathering of baseline data.

Four Indian Tribal governments, The Makah, Quileute, Hoh, and Quinault, live along the eastern boundary of the study area. These tribes harvest anadromous fish that pass through their usual and accustomed fishing grounds. These tribes also operate a series of salmon hatcheries, some of which are maintained in cooperation with the Washington Department of Fisheries and the U.S. Fish and Wildlife Service. Extensive archaeological work, oriented toward late prehistoric culture, has been conducted within the study area. A major excavation, considered to be one of the most significant in North America, was conducted near Cape Alava. This excavation began in the later 1960's and spanned approximately 10 years. The archaeological dig uncovered a village that had been buried 400 years. Ozette Historic sites are found along the coast of the Olympic Peninsula, and a record exists of shipwrecks in the nearshore. Some historic sites include: Tatoosh Island Lighthouse, remains of WWII Army bunkers at Shi Shi Beach, and evidence of placer mining.

Commercial vessels sail into the Strait of Juan de Fuca to enter ports along the strait and in Puget Sound. Cargo-carrying vessels traverse the western portion of the study area.

Oil and gas exploration in the study area is being considered by the Minerals Management Service (MMS) of the U.S. Department of Interior. In April of 1992, MMS plans to conduct Lease Sale #132 for offshore oil and gas exploration and development in Federal waters off the Washington and Oregon coasts. Proposed Lease Sale #132 includes a portion of the study area. According to present MMS plans members of the oil and gas industry will be requested to individual their level of interest in Lease Sale #132 in November of 1989. If industry representatives indicates sufficient interest, MMS plans to proceed with the lease sale process.

Navigational projects (dredge and spoil disposal) in waters adjacent to the study area are maintained by the U.S. Army Corps of Engineers, Seattle District. The U.S. Navy conducts defense operations in the study area, and while conducting these activities restricts access to certain parts of the study area including the islands of Copalis, Quoats (Sea Lion Rock). Washington Coastal Warning Area, Submarine Test and Trail Areas 3 and 4, and Cape Flattery Warning Area.

*Existing Protection of Marine Resources*

Several agencies operate programs to protect significant resources within the Western Washington Outer Coast study area and to provide recreational and interpretive opportunities. The Olympic National Park, which includes much of the shoreline, rain forests and mountains of the Olympic Peninsula, is managed by the National Park Service. Commercial and recreational fisheries are managed by the State and Federal fisheries agencies. The U.S. Coast Guard is responsible for vessel traffic within the study area.

The Park has been dedicated as a World Heritage Site and as a Biosphere Reserve. Most of the rocky islands within the study area are divided among three National Wildlife Refuges (Quillayute Needles, Flattery, and Copalis Wildlife Refuges) and are managed by the U.S. Fish and Wildlife Service. All three refuges (excluding Destruction Island), Washington Island, the coastal area bordering the Makah Tribe, and some coastal areas within the Quinault reservation are designated as wilderness area.

*The Designation Process*

The management plan to be prepared for the proposed Sanctuary will specify the goals and objectives of Sanctuary designation and describe programs for resource protection, research and interpretation. The various administrative and regulatory alternatives for Sanctuary management will be analyzed in the environmental impact statement.

Opportunities for public participation in NOAA's development of an environmental impact statement and management plan will be provided through scoping meeting, solicitation of comments on the draft environmental impact statement/management plan and proposed regulations, and public hearings.

The April scoping meetings will identify issues regarding the designation of the Western Washington Outer Coast National Marine Sanctuary and generate suggestions for resolving them. The following are examples of discussion topics: (1) Boundary alternatives, (2) management alternatives, (3) resource protection, (4) research opportunities and (5) interpretive opportunities.

Dated: March 8, 1989.

BILLING CODE 3510-08-M

## Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

**AGENCY:** National Marine Fisheries Service (NMFS), NOAA, Commerce.

**ACTION:** Notice of availability of reports; notice of public meetings and hearings.

**SUMMARY:** The Pacific Fishery Management Council (Council) has begun its annual preseason management process for the 1989 ocean salmon fisheries. As required by the 1984 framework amendment to the Fishery Management Plan for Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon, and California, this notice announces: (1) The availability of Council documents and (2) dates and locations of Council meetings and public hearings which comprise the complete schedule for determining proposed and final ocean salmon management measures for the 1989 fishing season.

**DATES:** See **"SUPPLEMENTARY INFORMATION"** for the dates of the scheduled meetings and public hearings. For the public hearings being held, written comments will be accepted until March 30, 1989, at the Council office. All public hearings begin at 7 p.m. on the dates and at the locations specified below.

**ADDRESS:** Send written comments to Lawrence Six, Executive Director, Pacific Fishery Management Council, Metro Center, Suite 420, 2000 SW. First Avenue, Portland, OR 97201; 503-326-6352.

**FOR FURTHER INFORMATION CONTACT:** Lawrence Six, 503-221-6352.

**SUPPLEMENTARY INFORMATION:** Council meetings are open to the public and public comment on pertinent issues is solicited at specific times during the meetings. Written comments may be addressed to the Council office. Further details of each meeting will be available in Council news releases and the **Federal Register** or by contacting the Council office directly.

The Council's schedule for development of ocean salmon fishery management recommendations for the 1989 season follows:

March 2, 1989—Council reports which summarize the 1988 salmon season and project the expected salmon stock abundance for 1989 are available to the public from the Council office.

March 6-10, 1989—Council and its advisory entities meet at the Clarion Hotel-San Francisco Airport to adopt 1989 regulatory options for public review. On March 6, with assistance from the Salmon Technical Team (STT), the Salmon Advisory Subpanel (SAS) develops coordinated preliminary regulatory options for the 1989 season. On March 7, working from the SAS options and other advisory, tribal, and public input, the Council formulates up to three proposed options for collation by the STT. The STT and staff prepare a draft of the proposed options for Council review and tentative adoption for STT analysis on March 8. On March 10 the Council reviews its advisors analyses and tribal and public comment on the tentative options and adopts final 1989 regulatory options for public hearing.

March 16, 1989—Newsletter describing proposed management options is mailed to the public (includes options and condensed summary of biological and economic impacts).

March 24, 1989—The STT "Preseason Report II, Analysis of Proposed Regulatory Options for 1989 Ocean Salmon Fisheries" will be distributed with the Council briefing book.

March 28-29, 1989—Public hearings are held to receive comments on the proposed 1989 ocean salmon fishery management options adopted by the Council. All public hearings begin at 7 p.m. on the dates and at the locations specified below.

March 28, 1989—Thunderbird Motor Inn, North and South Umpqua Rooms, 1313 North Bayshore Drive, Coos Bay, Oregon

March 28, 1989—Seattle Airport Hilton, 17620 Pacific Highway S., Seattle, Washington

March 28, 1989—Redwood Acres Fairgrounds, Eureka, California

March 29, 1989—Astoria Middle School, 1100 Klaskanine Avenue, Astoria, Oregon

March 29, 1989—California Department of Fish and Game, Resources Building, Room 133, 1416 Ninth Street, Sacramento, California

April 3-7, 1989—Council and its advisory entities meet at the Red Lion Inn—Columbia River, Portland, Oregon, to adopt final 1989 regulatory measures. On April 3, with assistance from the STT, the SAS develops its final recommendations for the 1989 regulatory measures. On April 4, working from the SAS recommendations and other advisory, tribal, and public input, the Council tentatively adopts final 1989 regulatory measures for analysis by the STT and staff economist. On April 6 the Council reviews its advisor analyses and tribal and public comment and adopts the final 1989 regulatory measures.

April 6-7, 1989—The STT completes drafting of "Preseason Report III Analysis of Council Adopted Regulatory Measures for 1989 Ocean Salmon Fisheries."

May 1, 1989—Federal ocean salmon fishery management regulations implemented and "Preseason Report III" available for distribution.

Dated: March 8, 1989.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Indonesia

March 8, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs increasing limits.

**EFFECTIVE DATE:** March 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 535-9480. For information on embargoes and quota re-openings, call (202) 377-3715.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854)

The current limits for Categories 340, 347/348 and 635 are being increased, variously, for swing and carryover.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 24477, published on June 29, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist

VOL 54 ISS 47 MR 13 1989 UMI

only in the implementation of certain of its provisions.

James H. Babb,

*Chairman, Committee for the Implementation of Textile Agreements.*

**Committee for the Implementation of Textile Agreements**

March 8, 1989.

Commissioner of Customs,
*Department of the Treasury,*
*Washington, DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on June 24, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Indonesia and exported during the period which began on July 1, 1988 and extends through June 30, 1989.

Effective on March 15, 1989, the directive of June 24, 1988 is being amended to increase the limits for cotton and man-made fiber in the following categories as provided under the provisions of the current bilateral agreement between the Governments of the United States and Indonesia:

| Category: Levels in Group I— | Adjusted 12-mo limit [1] |
|---|---|
| 340 | 473,804 dozen. |
| 347/348 | 802,071 dozen. |
| 835 | 103,875 dozen. |

[1] The limits have not been adjusted to account for any imports exported after June 30, 1988.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

*Chairman, Committee for the Implementation of Textile Agreements.*

[FR Doc. 89-5706 Filed 3-10-89; 8:45 am]

BILLING CODE 3510-DR-M

## Amendment of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Macau

March 8, 1989.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Issuing a directive to the Commissioner of Customs amending limits.

**EFFECTIVE DATE:** March 15, 1989.

**FOR FURTHER INFORMATION CONTACT:** Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343-6495. For information on embargoes and quota re-openings, call (202) 377-3715.

**SUPPLEMENTARY INFORMATION:**

**Authority:** Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

Based upon the implementation of the Harmonized Commodity Code on January 1, 1989, the Governments of the United States and Macau agreed to amend the current bilateral textile agreement to establish a designated consultation level for Category 631 and to increase the aggregate and Group I limits.

A copy of the agreement is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988). Also see 53 FR 51297, published on December 21, 1988.

James H. Babb,

*Chairman, Committee for the Implementation of Textile Agreements.*

**Committee for the Implementation of Textile Agreements**

March 8, 1989.

Commissioner of Customs,
*Department of the Treasury,*
*Washington, DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 16, 1988 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Macau and exported during the period which began on January 1, 1989 and extends through December 31, 1989.

Effective on March 15, 1989, the directive of December 16, 1988 is being amended to increase the limits for the following categories:

| Category: | 12-mo. limit [1] |
|---|---|
| 200-239, 300-369, 400-469, 600-670 and 800-899, as a group. | 76,580,824 square meters equivalent. |
| Group I: 200-239, 300-369, 600-670 and 800-899 as a group. | 73,759,677 square meters equivalent. |
| Sublevel in Group I: 631 | 231,388 dozen pairs. |

[1] The limits have not been adjusted to account for any imports exported after December 31, 1988.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

*Chairman, Committee for the Implementation of Textile Agreements.*

BILLING CODE 3510-DR-M

## DEPARTMENT OF DEFENSE

## GENERAL SERVICES ADMINISTRATION

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve a revision of a currently approved information collection pertaining to SF 28, Affidavit of Individual Surety.

**ADDRESS:** Send comments to Ms. Eyvette Flynn, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Mr. Edward Loeb, Office of Federal Acquisition and Regulatory Policy, (202) 523-3847.

**SUPPLEMENTARY INFORMATION:**

a. *Purpose:* The Affidavit of Individual Surety (Standard Form (SF) 28) will be used by all executive agencies including the Department of Defense, to obtain information from individuals wishing to serve as sureties of Government bonds. In order to qualify as a surety on a Government bond, the individual must show a net worth not less than the penal amount of the bond on the SF 28. It is an elective decision on the part of the maker to use individual sureties instead of other available sources of surety or sureties for Government bonds. We are not aware if other format exists for the collection of this information. The information on SF 28 will be used to assist the contracting officer in determining the acceptability of individuals proposed as sureties.

b. *Annual reporting burden:* The annual reporting burden is estimated as follows: Respondents, *500*; responses per respondent, *1.43*; hours per response, *.4*; and total burden hours, *286*.

**Obtaining Copies of Proposals**

Requester may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523-4755. Please cite OMB Control No. 9000-0001, SF 28, Affidavit of Individual Surety.

Dated: March 6, 1989.

Margaret A. Willis,

*FAR Secretariat.*

BILLING CODE 6820-JC-M

## DELAWARE RIVER BASIN COMMISSION

### Meeting and Public Hearings

Notice is hereby given that the Delaware River Basin Commission will conduct a series of hearings on March 20 and March 21, 1989. These hearings concern a proposed amendment to the Comprehensive Plan and Water Code relating to water conservation performance standards for plumbing fixtures and fittings; a possible drought emergency declaration; and applications for project approvals.

The subject of the March 20, 1989 hearing will be as follows:

*Proposed Amendment to Comprehensive Plan and Water Code of the Delaware River Basin Relating to Water Conservation Performance Standards for Plumbing Fixtures and Fittings.* Notice was given in the February 6, 1989 **Federal Register**, Vol. 54, No. 23, page 5638, that the Commission would hold a public hearing on March 20, 1989 to receive comments on proposed amendments to the Comprehensive Plan and Water Code in relation to water conservation performance standards for plumbing fixtures and fittings. The proposed amendment would revise a rule adopted by the Commission on January 13, 1988. That rule, Resolution No. 88-2, established Basinwide water conservation performance standards for plumbing fixtures and fittings installed in new construction and renovation. The regulation required that all water conservation performance standards for plumbing fixtures and fittings adopted by the four Basin States or political subdivisions within the Basin comply with specified minimum standards for sink and lavatory faucets, shower heads, water closets, urinals and associated flushing mechanisms. Compliance dates were specified as were certain specialized fixtures and fittings not covered by the regulation. The regulation also required certification by manufacturers that their plumbing fixtures and fittings comply with the water conservation performance standards. In addition, Pennsylvania political subdivisions or their agencies seeking Commission permit approval or renewal must document that water conservation performance regulations consistent with the adopted standards have been adopted within their area of jurisdiction. Finally, periodic review of the performance standards was also required to allow for incorporation of more stringent water conservation performance standards as technology advances.

Subsection 2.1.5(4) of the regulation required the Executive Director to conduct an initial review of the standard within a year to consider modification of the current standard for water closets (a maximum of 3.5 gallons per flush) to require low consumption water closets (a maximum of 1.6 gallons per flush) effective January 1, 1990. A summary report documenting the results of this review was submitted to the Commission in January 1989. Based upon this review, the Commission is now proposing that the regulation be revised to require low consumption water closets effective January 1, 1991. The proposal would also require that all water conservation performance standards for plumbing fixtures and fittings adopted by the Basin States or political subdivisions within the Basin comply with the low consumption water closet requirement by January 1, 1991. In addition, the proposal would modify the schedule for state or local compliance with the performance standards in the Commonwealth of Pennsylvania which does not yet have statewide performance standards for plumbing fixtures and fittings. The other Basin States already have statewide standards.

Accordingly, the proposal encourages the Commonwealth of Pennsylvania to adopt water conservation performance standards for plumbing fixtures and fittings which comply with the Commission's standards by January 1, 1991. In the absence of Pennsylvania standards, the proposal would require the Commission to notify all municipalities within the Pennsylvania portion of the Basin of the requirement to adopt and enforce local regulations which comply with the Commission standards. Upon such notification by the Commission, municipalities would have one year to adopt local regulations.

The public hearing is scheduled for Monday, March 20, 1989. A presentation on the proposed rule revision will begin at 1:30 p.m. and will be followed at 2:00 p.m. by the first of the day's two hearing sessions. The second and final hearing session will begin at 7:00 p.m. Written comments received or postmarked by April 24, 1989 will be included in the hearing record.

Written comments should be submitted to Susan M. Weisman, Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628.

The public hearing will be held at the Holiday Inn King of Prussia, 260 Goddard Boulevard, King of Prussia, Pennsylvania.

The Commission will also hold a public hearing on Tuesday, March 21, 1989 beginning at 1:30 p.m. at the Holiday Inn, 260 Goddard Boulevard, King of Prussia, Pennsylvania. The hearing will be part of the Commission's regular business meeting which is open to the public.

An informal pre-meeting conference among the Commissioners and staff will be open for public observation at about 11:00 a.m. at the same location. Topics scheduled for discussion at the conference session include status reports on the Upper Delaware Ice Jam Project, the Delaware River Striped Bass Restoration Program and Proposed Amendment of Compact Reservation, section 15.1(b) to Fund F. E. Walter Modifications.

The subjects of the 1:30 p.m. hearing will be as follows:

**Possible Drought Emergency Declaration**

Section 10.4 of the Delaware River Basin Compact provides that in the event of a drought or other condition which may cause an actual and immediate shortage of available water supply within the Basin, or within any part thereof, the Commission may, after

VOL 54 ISS 47 MR 13 1989 UMI

public hearing, determine and delineate the area of such shortage and declare a water supply emergency therein. For the duration of such emergency, the Commission could limit the extent to which water users may divert or withdraw water for any purpose. The Commission is considering whether current and developing conditions of water supply and demand require the declaration of a water supply emergency.

The purpose of this hearing is to permit the public to comment on these matters and to make suggestions or recommendations concerning possible Commission actions. The Commission will consider possible drought actions following the hearing.

**Applications for Approval of the Following Projects Pursuant to Article 10.3, Article 11 and/or Section 3.8 of the Compact**

1. *Warwick Township Water & Sewer Authority D–86–80 CP.* An application for approval of a ground water withdrawal project to supply up to 3.72 million gallons (mg)/30 days of water to the applicant's Meyer-Walker Tract from new Well No. 3, and to limit withdrawal from all wells to 8.4 mg/30 days. Well No. 3 is located 1000 feet east southeast of the intersection of Turkey Trot and Land Roads. Well Nos. 2, 5 and 8 will be included in this docket. The project is located in Warwick Township, Bucks County, and is located in the Southeastern Pennsylvania Ground Water Protected Area.

2. *Lehman-Pike Development Corporation D–88–89.* An application to expand a 0.1 million gallon per day (mgd) sewage treatment plant to process a design flow of 0.8 mgd. The plant is located at the Saw Creek/Winona development in southern Lehman Township, Pike County, Pennsylvania. The two-phase project is designed to serve the build-out population of 7,500 people. The existing treatment plant units will be converted to sludge holding tanks. The proposed plant will include six sequencing batch reactor units that are designed for combined carbon oxidation and nitrification. The plant effluent will continue to be discharged to Saw Creek through the existing outfall. The discharge point is less than 0.2 mile upstream from the Delaware Water Gap National Recreation Area, which was included in the Comprehensive Plan by Docket No. D–87–65 CP.

3. *Pinecrest Development Corporation D–89–4.* An application to construct a 0.5 mgd sewage treatment plant to serve the Pinecrest/Locust Lakes Resort located in Tobyhanna Township, Monroe County, Pennsylvania. The plant will be constructed in three phases (Phase I, 0.2 mgd; Phase II, 0.4 mgd; Phase III, 0.5 mgd) to ultimately serve an equivalent population of 5,000 persons. The applicant proposes to construct a sequencing batch reactor process which features carbon oxidation and nitrification. Treatment plant effluent will be discharged to the headwaters of Beaver Creek, which is a tributary of Upper Tunkhannock Creek.

Documents relating to these applications may be examined at the Commission's offices. Preliminary dockets are available in single copies upon request. Please contact George C. Elias concerning docket-related inquiries.

Persons wishing to testify at the March 20 or March 21, 1989 hearings are requested to register with the Secretary prior to the hearing.

**Susan M. Weisman,**

*Secretary.*

March 6, 1989.

BILLING CODE 6360–01–M

## DEPARTMENT OF ENERGY

### Bonneville Power Administration

### Amended Model Conservation Standards Surcharge Policy Extension

**AGENCY:** Bonneville Power Administration (Bonneville), DOE.

**ACTION:** Notice of Bonneville's amended model Conservation Standards (MCS) Surcharge Policy Extension.

**SUMMARY:** Bonneville is releasing its Amended MCS Surcharge Policy Extension (Policy). The Policy is a slightly modified version of Bonneville's Policy Extension adopted November 9, 1988. When the Policy was adopted, Bonneville requested public comment on two proposed amendments to that Policy. One public comment was received. However, it was not related to either of the two proposed amendments. Bonneville is now releasing an amended Policy which contains the two proposed amendments. This amended Policy supersedes all other versions of the Policy.

**DATE:** The Policy is effective immediately.

**FOR FURTHER INFORMATION CONTACT:** Mr. Robert Procter at 503–230–3961, or call Bonneville's Public Involvement office. Telephone numbers, voice/TTY, for the Public Involvement office are: 503–230–3478 in Portland; toll-free 800–452–8429 for Oregon outside of Portland; 800–547–6048 for Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California. Information may also be obtained from:

Mr. George Gwinnutt, Lower Columbia Area Manager, Room 243, 1500 Plaza Building, 1500 NE. Irving Street, Portland, Oregon 97232, 503–230–4552.

Mr. Robert Rasmussen, Acting Eugene District Manager, Room 206, 211 East Seventh Avenue, Eugene, Oregon 97401, 503–687–6952.

Mr. Wayne R. Lee, Upper Columbia Area Manager, Room 561, West 920 Riverside Avenue, Spokane, Washington 99201, 509–456–2516.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406–329–3060.

Mr. Ronald K. Rodewald, Wenatchee District Manager, Room 307, 301 Yakima Street, Wenatchee, Washington 98801, 509–662–4377.

Mr. Terrence G. Esvelt, Puget Sound Area Manager, 201 Queen Anne Avenue North, Suite 400, Seattle, Washington 98109, 206–442–4130.

Mr. Thomas V. W enhoffer, Snake River Area Manager, 101 West Popular, Walla Walla, Washington 99362, 509–522–6228.

Mr. Robert N. Laffel, Idaho Falls District Manager, 1527 Hollipark Drive, Idaho Falls, Idaho 83401, 208–523–2706.

Mr. Thomas H. Blankenship, Boise District Manager, Room 376, Federal Building, 550 W. Fort Street, Boise, Idaho 83724, 208–34–0137.

Appendix 8: Submittal and Implementation Schedule for MCS Surcharge Policy

## I. Background of Policy

### A. Introduction

The Surcharge Policy is a response to recommendations made by the Northwest Power Planning Council (Council) in its 1986 Northwest Conservation and Electrical Power Plan (Plan) and its Model Conservation Standards (MCS) for New Residential and Commercial Construction of March 26, 1987 (Plan Amendment). The purpose of this Policy is to encourage utilities to achieve additional electrical savings through improved residential and commercial building construction which can ultimately result in region-wide adoption of the Council's MCS in building codes. There are two additional policy objectives: (1) To identify the criteria that will be used to evaluate a utility's proposed approach to achieving MCS level electrical savings; and (2) to identify the method for calculating and collecting a surcharge.

As the Council states in its Plan Amendment, "By the end of 1989, the Council expects the region to achieve residential sector savings equivalent to at least 85 percent of those that would be achieved with full implementation of the MCS." One long-run goal is to achieve MCS level savings through code adoption.

### B. Statutory Direction

Section 4(e)(3) of the Pacific Northwest Electric Power Planning and Conservation Act (Act) provides for the development of MCS as part of the Council's Plan. The standards, as described in section 4(f)(1) of the Act, are to include standards applicable to new and existing structures and to utility and government conservation programs. Such standards should reflect geographic and climatic differences and produce all power savings that are cost effective for the region and economically feasible for consumers.

Section 4(f)(2) of the Act provides that the Council may recommend to the Bonneville Administrator the imposition of a surcharge on customers of the Administrator for those portions of their loads within the region that are within States or political subdivisions which have not, or on the Administrator's customers which have not, implemented the standards or other conservation measures that the Administrator determines achieve energy savings comparable to the standards. Finally, section 4(e)(3)(G) of the Act mandates that the Council develop a methodology for calculating the surcharge.

## II. Past and Present Surcharge Policy Development Efforts

Part A of this section summarizes past MCS and surcharge actions undertaken by the Council. Part B summarizes Bonneville's past surcharge-related activities. Part C describes the Council's 1987 surcharge recommendation as contained in its Plan Amendment of January 30, 1987.

### A. Council Activities to Date

On April 27, 1983, the Council adopted its first Plan. As required by the Act, the Council's 1983 Plan contained MCS for newly constructed residential and commercial buildings and for conversion of existing residential and commercial buildings to electric space heating and conditioning.

In the 1983 Two-Year Action Plan (chapter 10 of the 1983 Plan), the Council identified tasks to be undertaken by Bonneville, the Council, and other regional entities. That Plan mandated that Bonneville include in its surcharge policy a consistent procedure for certifying compliance with MCS and a procedure for reviewing and evaluating alternative plans.

In accordance with the 1983 Plan, State governments, local governments, or utilities were to adopt and enforce the MCS as building codes or utility service standards by January 1, 1986. Where such standards were not adopted, an alternative plan to achieve comparable savings should have been in place by January 1, 1986. Where neither action had occurred, the Council recommended that the Administrator impose a surcharge.

The Council voted on October 31, 1984, to adopt an amendment which simplified the surcharge calculation. The Council recommended that a 10-percent surcharge be levied on the customer's power bill for that portion of its loads which were not complying with the standard.

On July 26, 1985, the Council proposed to enter rulemaking to amend the MCS. On December 4, 1985, the Council voted to amend that portion of the 1983 Plan dealing with MCS. The amended MCS thermal performance levels for both new residential and new commercial buildings were equivalent to the MCS set forth and amended by the Council in its 1983 Plan. The Council also recommended that Bonneville develop a surcharge policy based on MCS implementation and performance.

In the 1986 Action Plan, the Council identified specific actions that Bonneville should take towards region-wide implementation of the MCS. Bonneville was to: (1) Have utilities submit to Bonneville a plan declaring how they intended to comply with the MCS, (2) design a process to collect utility-specific data on the savings that would be achieved if all buildings were constructed to MCS levels, (3) continue development and implementation of a procedure to measure compliance with the MCS, (4) review alternative plans for achieving compliance with the MCS and (5) develop a new surcharge policy.

On November 20, 1986, the Council proposed to enter further rulemaking to amend part of its 1986 Plan dealing with MCS and the surcharge. After public comment, the Plan amendment was published on January 30, 1987. Notice of the Plan Amendment, which included the Council's 1987 MCS, was published in the **Federal Register** on March 26, 1987 (52 FR 9738).

### B. Bonneville Activities to Date

Bonneville began the development of a surcharge policy in early 1984 through a series of informal meetings with State government, local government, utility, and Council representatives. Bonneville staff informally discussed the various issues that might surround the development of a policy to implement the Council recommendation to impose a surcharge. These informal discussions formed the basis of a **Federal Register** Notice of Intent to Develop a Policy to Implement the Council Recommended Conservation Surcharge. The notice (49 FR 34891, September 4, 1984) was mailed to the public on August 28, 1984.

Bonneville elected to delay publication of a proposed policy until after final Council action on amendment of the surcharge methodology. Public review and comment on the proposed policy took place between March 13, 1985, and May 17, 1985.

Bonneville suspended action on the surcharge policy when the Council entered rulemaking to amend the MCS in the summer of 1985. After the Council amended its MCS recommendation in December 1985, Bonneville developed a revised proposed policy and received public comment on that proposal during July and August 1986.

As part of the Administrator's decision on whether to finalize the revised proposed surcharge policy, Bonneville undertook an analysis of the cost-effectiveness and consumer

VOL 54 ISS 47 MR 13 1989 UMI

economic feasibility of the MCS contained in the Council's 1986 Plan. Bonneville concluded that some of the recommended measures were not cost effective, and on December 19, 1986, Bonneville's MCS findings were published.

Based in part on that analysis, the Council entered rulemaking to amend its MCS and surcharge recommendations. In turn, Bonneville suspended the development of a final surcharge policy. Following publication of the Council's Plan Amendment on January 30, 1987, Bonneville undertook a second revision of the proposed surcharge policy.

On May 26, 1987, Bonneville released its proposed surcharge policy for public comment. The comment period closed on July 15, 1987. During the comment period there was one public meeting which was held on June 22, 1987. A number of changes were made in the proposed version of that policy, based on the public comment received. That policy, entitled "Model Conservation Standards Surcharge Policy," was Bonneville's response to Council recommendations to develop a surcharge policy.

In response to the 1986 Policy, utilities submitted plans for the residential and commercial sectors within their service areas. Those plans covered calendar year 1988. With the adoption of a Policy extension on November 10, 1988, Bonneville also announced proposed amendments to the Policy to allow for public comment on several issues which arose during comment on the Policy extension. Public comment on the proposed amendments closed on December 16, 1988. While one public comment was received, it did not address the proposed amendments. Bonneville is now publishing an amended Policy which adopts the two proposed amendments.

*C. Council's 1987 Surcharge Recommendation*

The Council's Plan Amendment of January 30, 1987, made several major changes to its 1986 Plan. The most significant change in the surcharge recommendation was a move away from a performance-based surcharge, where utilities could face a surcharge if their performance was poor relative to the performance of other utilities. A summary of the Council's 1987 surcharge recommendation appears below.

1. *Residential Surcharge Recommendation.* The Council recommended that a 10 percent surcharge be imposed on utilities which do not submit, by a deadline set by Bonneville: (1) An initial plan for implementation of the Bonneville/Utility Residential MCS Program; (2) a plan for implementation of an alternative program which is approved by Bonneville as being equivalent; or (3) a declaration, approved by Bonneville, that the MCS for residential buildings will be met by building codes. This surcharge would continue in effect until a utility has filed an initial plan and has obtained the necessary Bonneville approvals.

2. *Commercial Surcharge Recommendation.* The Council recommended that a 10 percent surcharge be imposed on utilities which do not submit, by a date set by Bonneville: (1) An initial plan for implementation of the Bonneville/Utility Commercial MCS Program; (2) a plan for implementation of an alternative program which is approved by Bonneville as equivalent to the Bonneville/utility MCS Program, or (3) a declaration, approved by Bonneville, that the MCS for commercial buildings will be met by building codes at the MCS levels. The Council recommended that the surcharge continue in effect until a utility has filed an initial plan and has obtained the necessary Bonneville approvals.

3. *Conversion Surcharge Recommendation.* The Council's MCS for residential and commercial buildings converting to electric space heating/conditioning stated that State or local governments or utilities should take actions through codes and/or alternative programs to achieve electric power savings from buildings which convert to electric space heating/conditioning. The savings should be comparable to those savings that would be achieved if each building converting to electric space heating/conditioning were upgraded to include all cost-effective electricity conservation measures. The Council recommended this conversion standard, but did not recommend that a surcharge be imposed for failure to adopt the standard.

4. *Combined Commercial/Residential Code.* One provision of the Plan amendment allowed for a combined residential/commercial MCS strategy by a utility. This approach allowed for less than MCS program savings to be achieved in one sector as long as the shortfall is recouped in the other sector. This alternative was to be applicable only to the submission of alternative codes or utility service standards.

5. *Exemptions.* The Council has determined that no exemptions are needed at this time.

6. *Federal Loads and Generic MCS.* The council did not make any surcharge recommendation in these areas.

**III. Surcharge Policy**

*Section 1: Definitions*

A. *Administrator*—Administrator of the Bonneville Power Administration or the Administrator's designated representative.

B. *Alternative Code*—Codes implemented in the residential and commercial sectors which, in aggregate, achieve total electrical savings at least as large as would have been expected had the Council's illustrative MCS been implemented in the residential and commercial sectors. The Council's illustrative MCS are contained in the Council's Plan Amendment (52 FR 9738, March 26, 1987).

C. *Alternative Utility Plan*—Any plan which either partially or wholly relies on an approach to conservation savings discussed in Appendices 2, 4, 5, 6, or 7 of this Policy.

D. *Alternative Utility Program*—For the residential sector, a utility operated MCS support program designed to achieve at least the same level of total expected electrical savings, while complying with the Indoor Air Quality (IAQ) and ventilation goals, of Bonneville's Super GOOD CENTS program. For the commercial sector, a utility MCS support program designed to promote at least the same MCS measures as contained in the Council's commercial MCS of March 26, 1987, and providing comparable design assistance services as contained in the Bonneville/Utility MCS support program as of the effective date of this Policy.

E. *Customer*—For purposes of this policy, a utility existing in the Pacific Northwest region which purchases firm power from Bonneville under a utility Metered or Computed Requirements Contract, or a utility which purchases firm capacity under a pre-Act contract, or a utility which participates in the Residential Purchase and Sales Agreement/Exchange Transmission Credit Agreement, as an active exchanger or deemer.

F. *Equivalent Code*—In either the residential or commercial sectors, a code which is designed to achieve (within 5 percent) the level of total electrical savings that would have been achieved if that jurisdiction had adopted the Council's MCS for that sector.

G. *Jurisdiction*—For purposes of this Policy, any unit of government including Indian Tribes, State and local governments, and municipal corporations.

H. *Region*—The Pacific Northwest Region, region, or regional means the area consisting of Orgeon, Washington, and Idaho, the portion of the State of Montana west of the Continental Divide, and such portions of the States of Nevada, Utah, and Wyoming as are within the Columbia River drainage basin; and any contiguous areas, not in excess of 75 air miles from the area referred to above, which are part of the service area of a rural electric cooperative customer, served by the Administrator on the effective date of the Act, which has a distribution system from which it serves both within and without such region.

I. *Service Area*—The service area of a utility is that portion of its service territory which is both subject to the Surcharge Policy and to which the utility provides electric power service to the residential or commercial sectors.

J. *Total Retail Load*—The number of firm kilowatt hours (kWh's) sold at retail by a customer during the 12-month period prior to the implementation date contained in Appendix 8 or during consecutive billing cycles covering a comparable period of time.

K. *Total Residential Load*—The number of firm kWh's sold at retail by the customer during either the most recent 12-month period prior to implementation data contained in Appendix 8, or during consecutive billing cycles covering a comparable period of time.

L. *Total Commercial Load*—The total number of firm kWh's sold at retail by the customer during the 12-month period prior to the implementation date contained in Appendix 8, or during consecutive billing cycles covering a comparable period of time.

*Section 2: Application of the Surcharge Policy*

For the residential sector, by the plan submission date contained in Appendix 8, customers must submit either: (a) A letter indicating that the approach being used to comply with the Policy in 1988 will be used to comply with the Policy for the plan coverage period indicated in Appendix 8, (b) a plan to implement the Super GOOD CENTS Program, or (c) an alternative utility program, or utility service standard for Bonneville approval, or (d) a plan indicating that jurisdictions within its service area will implement and enforce the MCS via participation in the Northwest Energy Code Program (NEWCP) or adoption of a Bonneville-approved building code. A utility's residential sector plan may contain any combination of these approaches. Except as provided for in section 3(A) of this Policy, the utility's entire service area must be covered by some combination of the conservation strategies described in the appendices to this policy.

A utility's residential sector plan will be evaluated on the basis of the utility's proposed efforts for the residential sector during the plan coverage period indicated in Appendix 8 and its success with the approach(es) currently being used to comply with the Policy.

Customers who do not implement a Bonneville approved residential MCS plan by the plan implementation date indicated in Appendix 8, will be subject to a surcharge as calculated in sector 4 of this Policy. Customers who have been granted a grace period, as provided for either in section 3 or the appendix relevant to the utility's conservation strategy, will not face a surcharge until the end of any such period.

For the commercial sector, by the plan submission date indicated in Appendix 8, customers must submit either (a) a letter indicating that the approach currently being used to comply with the Policy will be used to comply with the Policy for the plan coverage period indicated in Appendix 8, (b) a plan to implement Bonneville's Commercial MCS Program, (c) an alternative utility commercial program or utility service standard in the commercial sector, or (d) a plan indicating that jurisdictions within its service area have met the Council's commercial MCS through codes. A utility's commercial sector plan may contain any combination of these approaches. Except as provided for in section 3(A), the utility's entire service area must be covered by some combination of the conservation strategies described in the appendices to this policy.

Customers who have not implemented a Bonneville-approved commercial MCS plan by the plan implementation date indicated in Appendix 8, are subject to a surcharge, as calculated in section 4 of this Policy. Customers who have been granted a grace period, as provided for in either section 3 or the appendix relevant to the utility's conservation strategy, will not face a surcharge until the end of any such period.

Customers of Bonneville without service areas as defined in this Policy, need only submit evidence of their lack of such a service area by the plan submission data indicated in Appendix 8. This provision exists for those customers who have voluntarily adopted a policy not to serve the residential or commercial sectors, or who are prohibited from serving the residential or commercial sector. If the customer serves one of these two sectors, then this provision will only apply to the one sector not served.

Customers who have neither submitted this information, nor a plan for achieving conservation in these sectors, will be subject to a surcharge after the plan implementation date indicated in Appendix 8 has passed.

Each of the appendices to this Policy represents a different approach to achieve electrical savings from improved construction practices. These appendices contain more specific submission and evaluation criteria for each of the MCS plan options and are part of this Policy. It is very important that customers carefully review this document including the appendices, to understand fully what actions utilities must take to achieve conservation savings in ways which also comply with this Policy.

Once any plan is approved and implemented, Bonneville will assume that the utility and/or jurisdiction(s) within its service areas will carry out that paln in good faith. During the period for which this Policy is in effect, Bonneville reserves the right to revisit any utility's approved plan if Bonneville has reason to believe that the utility has not implemented its plan in good faith. This same provision applies to utilities who rely on jurisdictional adoption and enforcement of codes to comply with this Policy.

With their proposed plan, customers are to submit the following load information to the extent available: (a) Total retail load, and (b) that portion of their total retail load in jurisdictions not covered by one or more of the conservation strategies contained in the appendices to this Policy. If a customer has retail loads in violation of the Policy for both sectors, the portion of their total load not in compliance with the Policy should be reported by sector for each noncomplying jurisdiction.

This Policy is in effect from the date it is signed by the Administrator until it is either amended or rescinded. In future years, Bonneville will announce the submission dates and timeframe which a submittal is to cover.

*Section 3: Evaluation of Alternative Utility Plans*

An alternative utility plan is any plan which relies wholly or in part on an approach to conservation savings presented in Appendix 2, 4, 5, 6, or 7 of this Policy. These plans will be evaluated using three criteria: (1) Expected electrical savings, (2) enforcement, and (3) indoor air quality (IAQ) and ventilation. This section applies to all residential sector alternative plans and those commercial sector alternative plans relying on the adoption of commercial codes or commercial service standards.

VOL 54 ISS 47 MR 13 1989 UMI

If Bonneville concludes that the utility's proposed alternative plan cannot be accepted because of its failure to comply with any of the evaluation criteria described below, Bonneville will allow a grace period lasting at least as long as Bonneville took to evaluate the utility's initial proposal. Any subsequent grace period(s) may be allowed on a case-by-case basis.

A. *Equivalent Electrical Savings.* For the residential sector, if a utility is proposing to achieve electrical savings by implementing an alternative residential utility program, Bonneville will use the prospective total electrical savings of its Super GOOD CENTS Program to determine whether the utility's proposed approach will at least meet the appropriate residential electrical savings level for the period of time covered by a utility's plan. Part of the equivalence determination procedure for an alternative residential utility program will involve a comparison between the utility's proposed marketing program and the marketing program they would have pursued had they enrolled in the Super GOOD CENTS program for the period of time covered by the utility's plan.

Utilities which rely on jurisdictional adoption of residential building codes, or which impose a residential service standard, to achieve additional energy savings in the residential sector, will have to provide evidence supporting the claim that the code (or service standard) can be judged to be an equivalent code, as equivalence is defined in this Policy.

Utilities which rely on jurisdictional adoption of residential *and* commercial codes (or which impose residential and commercial service standards) to achieve additional savings beyond current practice, may "tradeoff" savings achieved in one sector towards a deficit in the other sector. The utility would have to present evidence supporting its claim that the residential and commercial codes, in aggregate, can be expected to achieve at least the same total level of electrical savings as would have been achieved had the jurisdiction adopted the Council's full illustrative commercial and residential MCS for that climate zone. Such sectoral trade-offs are only allowed using enhanced building codes or service standards.

In addition, a utility may obtain equivalent savings by allocating savings achieved by advanced building codes in a jurisdiction (or jurisdictions) within its service area to its entire service area. Such "jurisdictional trade-offs" are only allowed where the utility shows that the full Council MCS level of savings for both sectors are being attained, in aggregate, within the utility's service area.

Finally, those utilities relying on commercial code adoption by a jurisdiction within or covering their service area, or who will impose a commercial service standard, will have to provide evidence supporting their claim that the expected total electrical savings are at least equivalent to what would have been expected had the jurisdiction implemented the Council's illustrative commercial MCS. The only exception to these requirements is for utilities or jurisdictions who adopt a codified version of the Council's MCS, as discussed in Appendices 4 and 8, respectively.

Submittals in future years may be evaluated using different standards in the event that code advancement occurs and/or the MCS are changed. For the plan coverage period indicated in Appendix 8, Bonneville will analyze residential electrical savings from an alternative plan by assuming that, in the absence of MCS, a residence would have been built to one of the following: (a) In Oregon, 1983 energy code; (b) in Washington, 1983 energy code; or (c) in either Idaho or Montana, HUD Minimum Property Standards. Electrical savings in the commercial sector will be evaluated assuming: (a) 1986 code in Oregon and Washington, (b) National Energy code in Montana, and (c) individual jurisdiction codes in Idaho.

All thermal performance evaluations will rely on accepted engineering practices. Bonneville will be guided by the assumptions, process, and housing prototypes contained in Bonneville's Code Equivalency Determination Procedures.

B. *Enforcement.* A utility will have more discretion in proposing an approach which will meet the second evaluation criterion on enforcement. Bonneville is recommending that any customer contemplating submission of an alternative utility plan refer to Bonneville's Super GOOD CENTS, NWECP and Commercial MCS Program descriptions for guidance. Alternative utility plans, excluding an alternative utility commercial program, must contain a requirement for site inspection consistent with the effective date of the surcharge.

Referring to alternative utility programs, a utility will have to provide evidence adequate to assure Bonneville that the energy savings which are being claimed are attributable to the utility's program. Part of that evidence is some enforcement method to assure that the conservation savings the utility is claiming are attributable to the measures they are promoting and inspecting.

C. *Indoor Air Quality and Ventilation.* For residential construction all alternative plans will be examined to determine if the construction practices being promoted or required, when combined with the comparable monitoring, information, and mitigation strategies, are likely to assure that IAQ and ventilation rates are comparable to what is achieved in homes constructed to Super GOOD CENTS standards, which are designed to at least maintain 1983 levels of IAQ and ventilation.

For the commercial sector, IAQ measures designed to at least maintain 1983 levels of IAQ and ventilation are required. The IAQ requirements contained in the Council's Plan Amendment of March 1987 were designed to maintain those levels of IAQ and ventilation. These same standards are contained in Bonneville's Energy Smart Design Program and the codified versions of the Council's commercial MCS.

*Section 4: Calculating a Surcharge*

A. Not less than 30 days prior to a final decision on the imposition of a residential surcharge, the Administrator shall provide written notice to the customer including determination of the amount of a customer's total retail load in jurisdictions not covered by a Bonneville-approved MCS residential plan. The amount of the total retail load in jurisdictions not covered by a Bonneville-approved MCS residential plan shall be based on information submitted by the utility in accordance with the reporting requirements listed in section 2 of this policy. In the event that a utility has not provided that information, the Administrator may rely on the best information available to Bonneville.

B. Not less than 30 days prior to a final decision on the imposition of a commercial surcharge, the Administrator shall provide written notice to the customer including a determination of the amount of a customer's total retail load in jurisdictions not covered by a Bonneville-approved MCS commercial plan. The amount of the total retail load in jurisdictions not covered by a Bonneville-approved MCS commercial plan shall be based on information submitted by the utility in accordance with the reporting requirements listed in section 2 of this policy. In the event that a utility has not provided that information, the Administrator may rely on the best information available to Bonneville.

C. The fraction of a customer's total retail load in jurisdictions *not* covered by a Bonneville-approved MCS plan will be determined by dividing the customer's total retail load in jurisdictions not covered by a Bonneville-approved MCS plan, as determined in sections 4(A) and 4(B), by the customer's total retail load.

D. The level of the surcharge for failure to implement the necessary Bonneville-approved MCS plans is 10 percent multiplied by the fraction of a customer's total retail load in jurisdictions *not* covered by a Bonneville-approved MCS plan, as determined in section 4(C).

E. At no time will a customer simultaneously be assessed a surcharge for failure of a jurisdiction to comply with the requirements in the residential sector and a surcharge for failure of that same jurisdiction to comply with the requirements in the commercial sector.

F. The customer and other interested parties shall be afforded an opportunity to provide comments regarding the determinations made in sections 4(A) to 4(D). Such comments may be made in writing or orally at a public meeting convened by Bonneville at the request of the customer for this purpose. This public meeting will be held between the time of the written Notice of Intent to Surcharge and the final surcharge decision. Included in the Notice of Intent to Surcharge will be an initial determination of the fraction of a customer's retail load subject to the surcharge, based on sections 4(A) to 4(D). Following the receipt and evaluation of comments, the Administrator shall provide written notice to the customer of the final surcharge decision.

G. Beginning with the effective date of a surcharge, the Administrator shall review the findings made in sections 4(A) to 4(D) after the customer, or a jurisdiction served by the customer, has taken an action that affects those findings. Customers may request such review by providing evidence in accordance with this section that the customer or a jurisdiction served by that customer has taken actions subsequent to the effective date of the surcharge.

*Section 5: Collecting a Surcharge*

A. Those customers receiving a final written notice of a load subject to a surcharge shall be billed for the surcharge beginning with the first full billing period following issuance of such notice.

B. Any power purchases or exchanges made on or after the effective date of the surcharge, but before receipt of final notice finding the load subject to a surcharge, may be retroactively billed to the effective date of the surcharge. Such retroactive billing shall collect the retroactive surcharge over a like number of billing periods as elapsed from the effective date of the surcharge to the receipt of final written notice of a surcharge.

C. The level of surcharge is applied to all power purchases and/or exchanges made by the customer under the applicable rate schedules and/or exchanges pursuant to the residential Purchase and Sales Agreement/ Exchange Transmission Credit Agreement, using the Council's surcharge methodology, and is applied subsequent to any other rate adjustment.

1. For firm requirements customers purchasing firm power under the rate schedules subject to the surcharge, the surcharge shall be applied monthly to the billing charges for all power purchased under these rate schedules during the billing period.

2. For customers participating in the residential exchange program, the surcharge shall be applied to the charges for determining the cost to the purchaser of buying firm power from Bonneville under the terms and conditions of the Residential Purchase and Sale Agreement.

3. For those firm requirements customers that both purchase power from Bonneville and participate in the Residential Purchase and Sales Agreement or Exchange Transmission Credit Agreement, the surcharge shall be applied in the following manner to avoid surcharging the same load twice:

a. All power purchases under a utility's Power Sales Contract at rates subject to the surcharge shall include a surcharge, as calculated in the previous section, added to the billing charges for the billing period; and,

b. The surcharge applied to the utility's total exchange load shall be adjusted by multiplying the surcharge level by the percentage of a utility's exchange load served by a utility's own resources. The percentage of exchange load served by a utility's own resources shall be based on the difference between the utility's total retail load and firm power purchases from Bonneville divided by the total retail load and rounded to the nearest one-tenth of a percent. The adjustment surcharge level shall be applied to the charges for determining the cost to the purchaser of buying firm power from Bonneville under the terms and conditions of the Residential Purchase and Sales Agreement or in conformance with Exhibit E of the Exchange Transmission Credit Agreement.

D. If a customer participating in the Residential Exchange is currently in a deemer status, the surcharge shall be accumulated in the account established for this purpose as specified in the respective agreement and shall be included in the obligation a utility must repay prior to receiving a direct payment from Bonneville. If a customer is not in a deemer status, the surcharge shall be included in the determination of the net payment made by Bonneville.

E. The collection of the surcharge shall continue until the Administrator determines that the surcharge is no longer required under the terms of this Policy.

F. Surcharges collected on purchases for periods in which loads are subsequently found to be in compliance with this Policy shall be credited to the customer in the first full billing period following final written notice of such finding. Surcharges on loads which are subsequently found not to have been in compliance with terms of this Policy for specified periods shall be billed to the customer in the first full billing period following final written notice of such findings.

*Appendix 1: Achieving Electrical Savings by Adopting the Bonneville/ Utility MCS Support Program*

A. *Residential Sector.* Bonneville customers opting for this path are assured that enrollment in and subsequent good faith implementation of the Super GOOD CENTS Program throughout their service areas will result in avoidance of a residential surcharge under the current Surcharge Policy. A customer which is considered a Super GOOD CENTS Program participant, but is only operating that program in a portion of its service area subject to the Policy, will have to take actions to assure that those portions of its service territory not covered by Super GOOD CENTS are covered by some combination of the other conservation strategies presented in these appendices. Those customers which implement the MCS measures contained in the Super GOOD CENTS Program, implement incentives equal to Bonneville's Super GOOD CENTS incentive level, and implement an advertising strategy considered by Bonneville to be consistent with the Super GOOD CENTS licensing and grant requirements will be considered a full participant in the Super GOOD CENTS Program for purposes of Surcharge Policy compliance. A Bonneville-approved advertising strategy must include, but is not limited to, use of the Super GOOD CENTS logo

VOL 54 ISS 47 MR 13 1989 UMI

and participation in the regionwide Super GOOD CENTS advertising campaign, in a Bonneville-approved manner. Customers which choose to adopt an advertising strategy and/or incentives which Bonneville concludes are not consistent with Super GOOD CENTS requirements for Policy compliance will be treated as filing an alternative plan. Those customers should refer to Appendix 2 for a discussion of that option.

For customers which on average over the last 3 years have had no more than (a) five site-built housing starts, and (b) 2,000 residential accounts will be considered small utilities for purposes of this policy. These utilities will have the option of enrolling in Bonneville's Super GOOD CENTS Program for small utilities, referred to as the Small Utility Program. If a utility believes it qualifies for this option, the utility is encouraged to contact the nearest Bonneville Area or District Office to obtain more information on this program option.

If a customer is currently relying on Super GOOD CENTS participation to comply with the Policy, the utility's submittal for the plan coverage period indicated in Appendix 8 can consist of a letter indicating that the utility plans to continue participation in Super GOOD CENTS for that period of time.

Otherwise, those customers wishing to enroll in Super GOOD CENTS as a way of avoiding a surcharge must indicate this to Bonneville by the plan submission date indicated in Appendix 8. In addition, the utility shall have signed a Super GOOD CENTS grant agreement by the plan implementation date indicated in Appendix 8. Bonneville will consider Super GOOD CENTS Program implementation to have occurred when the utility is engaging in activities, particularly marketing and promotion activities, which can be considered consistent with the utility's agreement.

Bonneville will consider offering a grace period if Bonneville has not completed the customer's Super GOOD CENTS grant award by the plan implementation date indicated in Appendix 8. Any such grace period will be provided in the event that Bonneville has received a plan by the plan submission date indicated in Appendix 8, and the approval delay is due solely to Bonneville internal delay.

Finally, as is indicated in the Super GOOD CENTS Program, participants are to submit the following data:

1. Total number of new homes (all fuels) constructed in the utility's service area during the past calendar year (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

2. Total number of new electrically heated homes constructed in the utility's service area during the past calendar year (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

3. Total number of new electrically heated homes constructed, in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

To comply with the Policy, customers are to collect and provide that data to Bonneville by January 30 of the following year.

B. *Commercial Sector.* Bonneville customers opting for this path are assured that enrollment in, and subsequent good faith implementation of Bonneville's Smart Design Program throughout the utility's service area will result in avoidance of a commercial surcharge under the current Surcharge Policy. All customers wishing to avoid a surcharge under this path must agree to comply with the IAQ and data reporting requirements and other technical specifications of that program, applicable to the customer.

If a customer is currently relying on Smart Design participation to comply with the Policy, the utility's submittal can consist of a letter indicating that the utility plans to continue participation in Smart Design for the plan coverage period indicated in Appendix 8.

Those new customers electing to participate in Smart Design to comply with the Policy must agree by the plan submission date indicated in Appendix 8 to enroll in the commercial program and must have enrolled in the program no later than the plan implementation date indicated in Appendix 8. Bonneville will consider offering a grace period if Bonneville has not completed the customer's grant award, if applicable, by the plan implementation date indicated in Appendix 8. Any such grace period will be provided in the event that Bonneville had received a plan by the plan submission date indicated in Appendix 8 and the approval delay is due solely to Bonneville internal delay.

*Appendix 2: Achieving Electrical Savings by Adopting an Alternative Utility Program*

If a utility is currently relying on an approved alternative plan to comply with the Policy, for either or both the residential and commercial sectors, the utility can submit a letter indicating its intentions to continue to rely on that approach for the plan coverage period indicated in Appendix 8.

A. *Residential.* An Alternative Utility Residential Program is the customer's proposed approach to meeting the standards of Bonneville's Super GOOD CENTS Program. In order for Bonneville to verify that the proposed program will provide equivalent savings, the information listed below must be submitted.

1. The conservation measures that will be promoted.

2. Analysis of the thermal performance of the conservation measures using Bonneville's input assumptions and Bonneville prototypes. These results will be compared to the Super GOOD CENTS illustrative path for that climate zone, using a WATTSUN analysis. If alternative assumptions or prototypes are used, acceptance of those alternative assumptions or prototypes will depend on the general acceptability of the assumptions and whether the prototypes represent typical dwellings certified in the utility's service area.

3. A list of activities to be undertaken to achieve the targeted penetration, such as: promotion and sales, advertising, incentives (type and level), technical assistance, certification, and any other applicable information. In addition, customers will be required to submit quarterly reports listing the activities undertaken and resources utilized in the marketing effort.

4. A plan showing how the utility will collect and provide the following data to Bonneville by January 30 of the following year:

a. Total number of new homes (all fuels) constructed in the utility's service area during the past calendar year (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

b. Total number of new electrically heated homes constructed in the utility's service area during the past calendar year (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

c. Total number of new electrically heated homes constructed, in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

5. Information on how the utility and/or jurisdiction plans to achieve IAQ and ventilation rates at least comparable to those achieved in Super GOOD CENTS homes, which are designed to at least maintain 1983 levels of IAQ and ventilation.

The Alternative Utility Program path is not generally recommended for utilities without prior experience in operating such programs. An established track record with a well-defined package of measures will be extremely helpful, if not essential, in obtaining Bonneville approval for Alternative Utility Programs. Nonetheless, Bonneville staff will work with customers interested in pursuing this path to help explain the data submission requirements and other complexities involved in this approach.

Because of these complexities, utilities intending to use this path for policy compliance should submit their proposals to Bonneville at the earliest possible data after the final adoption of the Surcharge Policy. An approved program shall be implemented by the plan implementation date indicated in Appendix 8, unless a grace period, as provided for in section 3 of the Policy, has been granted.

B. *Commercial.* An alternative Utility Commercial Program is the customer's proposed approach to meeting the standards of the Bonneville/Utility Commercial MCS Program. A proposed alternative program will be evaluated relative to the: (1) Level and type of activities and services to be offered, (2) method of marketing and performing the services, (3) penetration levels expected for the proposed program activities, and (4) proposed inspection method. The types of design assistance offered in Bonneville's program will be used to evaluate the type of design assistance a utility is proposing to offer in its own commercial MCS design assistance program. The types of design assistance which Bonneville's Commercial MCS Program contains are:

—Promotion of services to commercial customers;
—Screening to determine design assistance needs;
—Depending on the size of the utility and the type of commercial construction, provision of building design handbooks, computer energy modeling, clearinghouse referral, or other building design analysis; and
—Designer recognition for specified levels of energy efficiency

To perform the necessary review, Bonneville will require the following information:

1. A list of activities and services the customer intends to offer (e.g., modeling, design assistance, design handbook, information services, and training opportunities) to achieve the targeted penetration;

2. Management and oversight consistent with Bonneville practices;

3. A proposed method to submit to Bonneville quarterly reports listing the activities undertaken and resources used in the marketing effort;

4. A plan showing how the utility will collect and provide the following data to Bonneville by January 30 of the following year:

a. Total number of new commercial buildings, major remodels, and retrofits (all fuels) constructed in the utility's service area during the past calendar year, listed by Bonneville prototype;

b. Total number of electrically heated newly constructed, major remodels, and retrofit commercial buildings in the utility's service area during the past calendar year, listed by Bonneville prototype; and

c. Total number of electrically heated newly constructed commercial buildings, major remodels, and retrofits, in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan, listed by Bonneville prototype.

Those customers intending to use this path for Surcharge Policy compliance shall submit their proposed plan by the plan implementation date indicated in Appendix 8, and shall have implemented the approved program no later than the plan implementation date indicated in Appendix 8, unless a grace period, provided for in section 3 of the policy has been granted.

*Appendix 3: Achieving Electrical Savings by Participating in the Northwest Energy Code Program (NWECP)*

This is a pre-approved path for avoidance of the surcharge if all the jurisdictions within the customer's service area, subject to the Surcharge Policy, are NWECP (formerly Early Adopter Program) participants. Except for the one exception noted below, if there are jurisdictions within a customer's service area which are not NWECP participants, then the customer will be subject to a surcharge unless those jurisdictions have implemented a Bonneville-approved building code or the utility has implemented a Bonneville-approved utility program or a Bonneville-approved service standard.

Customers serving areas containing jurisdictions that have adopted advanced building codes may seek to allocate savings achieved by those jurisdictional codes to portions of their service areas not covered by another approved option. This will be permitted only if the utility shows that the full Council MCS level of savings for both sectors are being attained, in aggregate, within that utility's service areas. In other words, the utility must achieve at least the same level of total electrical savings as would be achieved had the Council's full commercial and residential MCS been implemented throughout the utility's service areas.

The essential feature of the NWECP is the adoption by a jurisdiction of the MCS contained in the NWECP description. Additional program features include specific activities to ensure that no degradation in IAQ results, some form of enforcement method to assure MCS construction, and some data reporting requirements.

A customer currently relying on jurisdictional participation in the NWECP as at least part of its Policy compliance approach, must submit a letter by the plan implementation date shown in Appendix 8 indicating that it wishes to continue to rely on that program participation to comply with the Policy for the plan coverage period indicated in Appendix 8.

A. *Residential.* 1. Customers with jurisdictions within their service area that are currently participating in the NWECP, must submit a letter indicating: (a) The jurisdictions that are NWECP participants, and (b) the award number for each jurisdiction. In addition, customers must indicate what fraction of its retail residential load lies within NWECP jurisdictions. This information shall be submitted to Bonneville by the plan submission date indicated in Appendix 8.

2. Any jurisdiction considering adoption shall adopt and enforce the code by the plan implementation date indicated in Appendix 8, for the utility to avoid a surcharge, if the utility will not be operating an approved utility MCS program or residential service standard at that time.

3. Bonneville will consider offering a grace period if Bonneville has not completed the NWECP grant award process by the plan implementation date indicated in Appendix 8. Any such grace period will be considered in the event that Bonneville has received a plan by the plan submission date indicated in Appendix 8, and the approval delay is due to Bonneville internal delay alone.

4. Finally, the utility shall collect and provide to Bonneville the following data by January 30 of the following year:

a. Total number of new homes (all fuels) constructed in the utility's service area during the past calendar year (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

b. Total number of new electrically heated homes constructed in the utility's

VOL 54 ISS 47 MR 13 1989 UMI

service area during the past calendar year (single-family broken out by site built, modular, and HUD-code homes, and total multifamily units).

c. Total number of new electrically heated homes constructed, in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan (single-family broken out by site built, modular, and HUD-code homes, and total multi-family units).

Customers who are operating a utility program and/or a utility service standard should take all necessary steps in order to avoid double-counting when reporting the above information.

B. *Commercial.* 1. To avoid a surcharge, customers with jurisdictions within their service area considering enrolling in this program shall notify Bonneville by the plan implementation date indicated in Appendix B, of the jurisdiction's intent to enroll in the program. The jurisdiction shall have officially adopted and be able to enforce the MCS by the plan implementation date indicated in Appendix B, if the utility is not operating an approved Commercial MCS Program or commercial service standard.

2. Customers with jurisdictions within their service area that are currently participating in the NWECP, shall provide a copy of Bonneville's letter of approval or grant award number.

3. Finally, the utility shall collect and provide to Bonneville by January 30 of the following year:

a. Total number of new commercial buildings, major remodels, and retrofits (all fuels) constructed in the utility's service area during the past calendar year.

b. Total number of electrically heated newly constructed, major remodels, and retrofits commercial buildings constructed in the utility's service area during the past calendar year.

c. Total number of newly constructed, major remodels, and retrofit commercial buildings in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan, broken out by Bonneville prototype.

Customers who are operating a utility program and/or a utility service standard should take all necessary steps in order to avoid double-counting when reporting the above information.

Those customers wishing to avoid a surcharge under this path shall agree by the plan submission date indicated in Appendix B, to enroll in the commercial program and shall have enrolled in the program no later than the plan implementation date indicated in Appendix B. Bonneville will consider offering a grace period if Bonneville has not completed its NWECP grant award process by the plan implementation date indicated in Appendix B. Any such grace period will be considered in the event that Bonneville has received a plan by the plan submission date indicated in Appendix B, and the approval delay is due to Bonneville internal delay alone.

NWECP application materials can be obtained by contacting your nearest Bonneville Area or District Office.

*Appendix A: Achieving Electrical Savings by Adopting a Codified Version of the MCS*

A. *Residential.* Several codified versions of the MCS have been developed. These are pre-approved codified versions of the Council's illustrative MCS paths. The options discussed in this appendix pertain to jurisdictions considering adopting, or who have adopted a codified version of the MCS, but are not participating in the NWECP.

Under this alternative, the customer must submit the codified version of the MCS which any jurisdiction in its service area is proposing for adoption or which has been adopted. The enforcement methods should be specified.

The statute or ordinance shall have been adopted and enforced by the plan implementation date indicated in Appendix B, unless a grace period, as provided for in section 3 of the Policy, has been granted.

Finally, the utility shall collect and provide to Bonneville by January 30 of the following year:

a. Total number of new homes (all fuels) constructed in the utility's service area during the past calendar year (broken out by site built, modular, and HUD-code homes, and total multifamily units).

b. Total number of new electrically heated homes constructed in the utility's service area during the past calendar year (broken out by site built, modular, and HUD-code homes, and total multifamily units).

c. Total number of new electrically heated buildings constructed in the utility's service area during the past calendar year to the standard(s) described in the customer's plan (broken out by site built, modular, and HUD-code homes, and total multifamily units).

Customers who are operating a utility program and/or utility service standard should take all necessary steps in order to avoid double-counting when reporting the above information.

B. *Commercial.* Under this alternative, the customer must submit the codified version of the MCS which a jurisdiction in its service area is proposing for adoption or which has been adopted. The enforcement methods must be specified. In addition, the customer must indicate what steps the jurisdiction will will take to address IAQ and ventilation requirements of Bonneville's NWECP.

By the plan submission date indicated to Appendix B, the customer must submit the above information to Bonneville. The statute or ordinance must be operative no later than the plan implementation date indicated in Appendix B, unless a grace period, as provided for in Section 3 of the policy, has been granted.

Finally, the utility shall collect and provide the following data to Bonneville by January 30 of the following year:

1. Total number of newly constructed, major remodels, and retrofitted (all fuels) commercial buildings in the utility's service area during the past calendar year.

2. Total number of electrically heated newly constructed, remodeled, and retrofitted commercial buildings in the utility's service area during the past calendar year.

3. Total number of electrically heated new, remodeled, and retrofitted commercial buildings in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan, broken out by Bonneville prototype.

*Appendix B: Achieving Electrical Savings by Adopting Alternative or Equivalent Building Codes*

An alternative code is designed to achieve total electrical savings which, when both sector's savings are combined, are at least as large as the electrical savings expected had the Council's residential and commercial MCS been implemented. A jurisdiction proposing to adopt an alternative code, in which one sectors' total electrical savings is expected to exceed the target electrical savings level for that sector, can use those excess electrical savings to offset electrical savings below the target in the other sector. The alternative code path may be pursued by a jurisdiction only when the sum of each sectors' savings at least equals the aggregate electrical savings target, which itself is based on the sum of the level of savings for the two sectors calculated using the Council's MCS. Section 3 of this policy discusses how the utility should approach the electrical savings equivalency analysis.

As compared to alternative codes, equivalent codes examine each sector individually. They differ from the pre-approved codified versions mentioned earlier, but provide equivalent savings. For a code to be judged equivalent to the MCS, it must meet the definition of equivalence as used in this Policy.

A customer must submit a copy of the alternative or equivalent code which a jurisdiction has proposed. In addition, the customer must indicate how the jurisdiction plans on maintaining IAQ and ventilation at 1983 levels. Bonneville staff will attempt to assist customers and jurisdictions wishing to formulate improved building codes.

If an alternative code path is pursued, customers are encouraged to submit their alternative codes at the earliest possible date, but no later than the plan submission date indicated in Appendix B. Both codes would have to be implemented and enforced by the plan implementation date indicated in Appendix B.

A customer currently relying on jurisdictional participation in the NWECP as at least part of its Policy compliance approach must submit a letter indicating that it intends to continue to rely on that program participation to comply with the Policy for the plan coverage period indicated in Appendix B.

For either the equivalent or alternative code approaches, the customer must submit its residential and commercial plans by the plan submission date indicated in Appendix B. The codes must be implemented and enforced by the plan implementation date indicated in Appendix B, unless a grace period, as provided for in section 3 of the Policy, has been granted. Finally, the utility shall collect and provide to Bonneville by January 30 of the following year:

A. Total new homes (broken out by site built, modular, HUD-code homes, and total multifamily units) and commercial buildings, (new, major remodels, and retrofits) (all fuels) constructed in the utility's service area during the past calendar year.

B. Total new electrically heated homes (broken out by single-family modular, HUD-code homes, site built, and multifamily) and commercial buildings (new construction, retrofits, and remodels) in the utility's service area during the past calendar year.

C. Total new electrically heated homes (broken out by single-family modular, HUD-code homes, site built, and total multifamily) and commercial buildings (broken out by new construction, major remodels, and retrofits by Bonneville prototye by square footage) in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan.

Customers who are operating a utility program and/or a utility service standard should take all necessary steps in order to avoid double-counting when reporting the above information.

For a more complete discussion of the data required to evaluate an alternative or equivalent code, refer to the latest version of Bonneville's MCS Code Equivalency Determination Procedures. A copy of these procedures can be obtained by contacting your nearest Bonneville Area or District Office.

*Appendix B: Achieving Electrical Savings by Adopting a Codified Version of the MCS as a Utility Service Standard*[1]

If a utility is currently relying on a utility service standard as at least part of its Policy compliance appraoch, all the utility need do is submit a letter indicating that it wishes to continue to rely on that approach to comply with the Policy for the plan coverage period indicated in Appendix B.

A. *Residential.* This path essentially involves adoption of a legal enforceable electric utility hook-up standard for new electrically heated residential buildings. The customer would simply decline to serve new electrically heated buildings not built to the standard's specifications. A grace period would be allowed for buildings considered by Bonneville to be "under construction" at the time the standard was adopted. The adoption of a utility service standard may qualify the utility for participation in Bonneville's NWECP.

Customers wishing to avoid a surcharge with this approach shall submit a residential plan by the plan submission date indicated in Appendix B, and the residential service standard shall be adopted and enforced by the plan implementation date indicated in Appendix B. A plan must contain: (1) A copy of the standard to be imposed, (2) how the customer plans on monitoring compliance with the standard, and (3) what IAQ measures and activities will be pursued to at least achieve IAQ and ventilation levels of Super GOOD CENTS construction, which is designed to at least maintain 1983 levels of IAQ and ventilation.

No surcharge will be imposed on any customer relying on such a service requirement which is subsequently enjoined or invalidated by a court. In such an event, the customer will be given a reasonable period of time to chose and implement another option.

Finally, the customer shall submit to Bonneville the following data by January 30 of the following year:

1. Total new homes (all fuels) constructed in the utility's service area during the past calendar year (broken out by single-family modular, HUD-code homes, site built, and multifamily).

2. Total new electrically heated homes constructed in the utility's service area during the past calendar year (broken out by single-family modular, HUD-code homes, site built, and multifamily).

3. Total new electrically heated homes constructed in the utility's service area during the past calendar year to the standard(s) described in the customer's (broken out by single-family modular, HUD-code homes, site built, and multifamily).

B. *Commercial.* This path essentially involves adoption of a legally enforceable electric utility hook-up standard for new electrically heated commercial buildings at least equal to the Council's commercial MCS. The customer would simply decline to serve new electrically heated buildings not built to the standard's specifications. A grace period would be allowed for buildings considered by Bonneville to be "under construction" at the time the standard was adopted.

Customers wishing to avoid a surcharge with this approach shall submit a commercial plan by the plan submission date indicated in Appendix B, and the commercial service standard shall be adopted and enforced by the plan implementation date indicated in Appendix B, unless a grace period, as provided for in section 3 of the policy, has been granted. A plan must: (1) Contain a copy of the standard to be imposed, and (2) indicate how the customer plans on monitoring compliance with the standard.

No surcharge will be imposed on any customer relying on such a service requirements which is subsequently enjoined or invalidated by a court. In such an event, the customer will be given a reasonable period of time to choose and implement another option.

Finally, the customer shall submit to Bonneville the following data by January 30 of the following year:

1. Total new commercial buildings, major remodels, and retrofits (all fuels)

[1] Many customers have questioned whether they have legal authority, under State laws to impose such a service requirement. Bonneville has examined this question under the State laws of Oregon, Washington, Idaho, and Montana and has reached the tenative conclusion that no clear legal impediments exists in these States to conservation-oriented utility service requirements. While Bonneville does not offer legal advice to customers, particularly on questions of State law, Bonneville legal staff are available to discuss these preliminary conclusions with customers and their legal counsel. Any utility considering such a path should obtain independent legal advice on this question.

VOL 54 ISS 47 MR 13 1989 UMI

constructed in the utility's service area during the past calendar year.

2. Total electrically heated new, remodeled, and retrofitted commercial buildings constructed in the utility's service area during the past calendar year (broken out by Bonneville prototype).

3. Total electrically heated new, remodeled, and retrofitted commercial buildings constructed in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan (broken out by Bonneville prototype).

*Appendix 7: Achieving Electrical Savings by Adopting an Alternative or Equivalent Utility Service Standard*

This path is actually two alternative paths. If an equivalent utility service standard approach is pursued, a customer may choose to adopt a utility service standard which is not one of the codified versions, but which is determined to be equivalent to the Council's MCS, as equivalence is defined in this Policy. Alternatively, the customer may choose to adopt utility service standards for the residential and commercial sectors which when taken together, achieves at least the same level of total electrical savings as would have been achieved had the customer adopted the Council's commercial and residential MCS. This latter option is referred to as an alternative utility service standard.

If a utility is currently relying on a utility service standard as at least part of its Policy compliance approach, all the utility need do is submit a letter indicating that it wishes to continue to rely on that approach to comply with the Policy for the plan coverage period indicated in Appendix 8.

If an alternative or equivalent utility service standard approach is pursued, a customer shall submit to Bonneville: (1) A copy of the proposed service standard(s); (2) a description of the enforcement method(s); (3) a description of the methods used to at least achieve IAQ and ventilation levels of Super GOOD CENTS construction, which is designed to at least maintain 1983 levels of IAQ and ventilation; and (4) a copy of the analysis used to verify that the proposed service standard(s) will achieve the required total electrical savings. This material shall be submitted by the plan submission date indicated in Appendix 8, and both service standards shall be adopted and enforced by the plan implentation date indicated in Appendix 8.

Finally, the customer shall submit to Bonneville the follwing data by January 30 of the following year:

A. Total new homes (broken out by site built, modular, HUD-code homes, and total multifamily units) and commercial buildings (all fuels broken out by new construction, major remodels, and retrofits) in the utility's service area during the past calendar year.

B. Total new electrically heated homes (for single-family, broken out by site built, modular, HUD-code homes, and total multifamily units) and commercial buildings (broken out by new construction, remodel, and retrofits) in the utility's service areas during the past calendar year.

C. Total new electrically heated homes (for single-family, broken out by site built, modular, HUD-code homes, and total multifamily units) and commercial buildings (new construction, remodels, and retrofits) constructed in the utility's service area during the past calendar year, to the standard(s) described in the customer's plan by Bonneville prototype).

For a detailed description of the data required to evaluate an alternative or equivalent code, and the evaluation criteria, the customer and/or jurisdiction is advised to consult the latest version of Bonneville's MCS Code Equivalency Determination Procedures. A copy of these procedures can be obtained by contacting your local Bonneville Area or District Office.

*Appendix 8: Submittal and Implementation Schedule for MCS Surcharge Policy.*

Plan Submission Date: December 16, 1988

Plan Implementation Date: January 16, 1989

Plan Coverage Period: Calendar Year 1989

Issued in Portland, Oregon, on February 28, 1989.

## Federal Energy Regulatory Commission

**[Project No. 10525-001; Washington]**

### White Chuck Water Co.; Surrender of Preliminary Permit

March 9, 1989.

Take notice that the White Chuck Water Company, permittee for the Clear Creek Hydroelectric Project No. 10525, to be located on Clear Creek in Snohomish County, Washington, has requested that its preliminary permit be terminated. The preliminary permit was issued on August 12, 1988, and would have expired on July 31, 1991.

The permittee filed the request on February 1, 1989, and the preliminary permit for Project No. 10525 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday, or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

### Alabama-Tennessee Natural Gas Co.; Proposed PGA Rate Adjustment

March 8, 1989.

Take notice that on March 1, 1989, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama, 35631, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheet:

Twelfth Revised Sheet No. 4

Alabama-Tennessee states that this tariff sheet is to become effective April 1, 1989. Alabama-Tennessee states that the purpose of this filing is to adjust its rates to conform to the rates of its suppliers.

Alabama-Tennessee has requested any necessary waivers of the Commission's Regulations in order to permit the tariff sheets to become effective as proposed.

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with Rule 211 or Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211 and 385.214). All such motions or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party

to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

### ANR Pipeline Co.; Proposed Changes in FERC Gas Tariff

March 7, 1989.

Take notice that ANR Pipeline Company ("ANR"), on February 28, 1989, tendered for filing as part of its F.E.R.C. Gas Tariff, Original Volume No. 1, the following tariff sheet to be effective May 1, 1989.

Twentieth Revised Sheet No. 18

ANR states that the purpose of the instant filing is to implement its Annual PGA rate adjustment pursuant to Section 15 of the General Terms and Conditions of ANR's Tariff.

ANR states that Twentieth Rev. Sheet No. 18 reflects a 32.05¢ per dekatherm (dth) decrease in the gas cost component of the commodity rate of ANR's CD-1/MC-1 Rate Schedules, a decrease of $0.41 in the monthly D-1 demand rate and a reduction of 1.48¢ in the D-2 demand rate applicable to the CD-1/MC-1 Rate Schedules. The instant filing further reflects a decrease in ANR's one-part rate applicable to Rate Schedule SGS-1 of 36.61¢ per dth.

ANR states that copies of the filing were served upon all of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

### Kentucky West Virginia Gas Co.; Proposed Changes in FERC Gas Tariff

March 8, 1989.

Take notice that Kentucky West Virginia Gas Company ("Kentucky West") on March 1, 1989, tendered for filing with the Federal Energy Regulation Commission ("Commission") its annual PGA filing, which includes Eleventh Revised Sheet No. 41 to its FERC Gas Tariff, Second Revised Volume No. 1, to become effective May 1, 1989.

Kentucky West states that Eleventh Revised Sheet No. 41 reflects a deferred gas cost adjustment of $0.0431 and a current adjustment decrease based on an average cost of purchased gas effective May 1, 1989, of $2.0526. This average cost of gas reflects Kentucky West's exercise of contractual provisions, pursuant to its obligations under various gas purchase agreements, so as to provide for a total price of $2.0724 per dth inclusive of all taxes and any other production-related cost add-ons that it would pay under these contracts.

Kentucky West states that, by its filing, or any request or statement made therein, it does not waive any rights to collect amounts, nor the right to collect carrying charges applicable thereto, to which it is entitled pursuant to the mandate of the United States Court of Appeals for the Fifth Circuit issued on March 6, 1986, in *Kentucky West Virginia Gas Co.* v. *FERC*, 780 F.2d 1231 (5th Cir. 1986), or to which it is or becomes entitled pursuant to any other judicial and/or administrative decisions.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in a accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure and 385.214). All such motions or protests should be filed on or before March 28, 1989. Protests will be considered by the commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

### MIGC, Inc.; Proposed Purchased Gas Adjustment Rate Change

March 7, 1989.

Take notice that on February 28, 1989, MIGC, Inc. (MIGC) tendered for filing Fifty-Second Revised Sheet No. 32 to its FERC Gas Tariff Original Volume No. 1. MIGC states that the purpose of this proposed tariff change is to submit its first annual purchased gas cost adjustment (PGA) filing pursuant to the Commission's revised PGA regulations and the revised PGA provisions of MIGC's tariff, as approved in Docket No. RP88-143-000. The revised tariff sheet is proposed to become effective May 1, 1989.

MIGC states that Fifty-Second Revised Sheet No. 32 reflects a PGA increase of $.1141 per MMBtu. MIGC states that the proposed PGA increase of $.1141 reflects a current adjustment of $.0012 per MMBtu to be effective for the three months commencing May 1, 1989, and an annual surcharge adjustment of $.1153 per MMBtu also effective May 1, 1989.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before

VOL 54 ISS 47 MR 13 1989 UMI

March 27, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for the public.

[Docket Nos. TM89-3-16-000 and TM89-3-16-001]

**National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff**

March 7, 1989.

Take notice that on February 28, 1989, National Fuel Gas Supply Corporation ("National") tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets, to be effective on March 1, 1989.

Fifth Revised Sheet No. 71, page 1 of 2
Third Revised Sheet No. 71-A, page 1 of 2
Third Revised Sheet No. 71-B, page 1 of 2
Second Revised Sheet No. 71-C
Fifth Revised Sheet No. 72, page 1 of 2
Fifth Revised Sheet No. 72, page 2 of 2
Third Revised Sheet No. 72-A, page 1 of 4
Third Revised Sheet No. 72-A, page 2 of 4
Third Revised Sheet No. 72-A, page 3 of 4
Third Revised Sheet No. 72-A, page 4 of 4
Third Revised Sheet No. 72-B, page 1 of 3
Third Revised Sheet No. 72-B, page 2 of 3
Third Revised Sheet No. 72-B, page 3 of 3
Second Revised Sheet No. 72-C

National states that the purpose of this filing is to update the amount of take-or-pay charges approved by the Federal Energy Regulatory Commission to be billed to National by its pipeline-suppliers and to be recovered by National by operation of section 20 of the General Terms and Conditions to National's FERC Gas Tariff, First Revised Volume No. 1. National further states that its pipeline-suppliers which have received approval to bill take-or-pay charges to National are: Columbia Gas Transmission Corporation, CNG Transmission Corporation, Texas Eastern Transmission Corporation, Transcontinental Gas Pipeline Company, and Tennessee Gas Pipeline Company.

In addition, on February 28, 1989, National filed Substitute Fifth Revised Sheet No. 71 to correct the amount of take-or-pay costs incurred by Texas Eastern from Southern and passed-through to National. National states that it also filed Substitute Fifth Revised Sheet No. 72 to reflect the correct computation of its customers' total monthly principal amounts.

Copies of National's filings were served on National's jurisdictional customers and on the interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TQ89-2-16-000]

**National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff**

March 8, 1989.

Take notice that on March 1, 1989, National Fuel Gas Supply Corporation ("National") tendered for filing as part of its FERC Gas Tariff First Revised Volume No. 1, Twenty-First Revised Sheet No. 4, proposed to become effective on April 1, 1989.

National states that the purpose of the proposed revised tariff sheet is to reflect the quarterly Purchased Gas Cost Adjustment ("PGA") required under the Commission's Regulations. National further states that the proposed tariff sheet results in a 26.66 cents per dekatherm (Dth) reduction in its commodity gas costs in comparison with its base tariff rates in Docket No. RP89-49-000, which went into effect on January 30, 1989. The proposed quarterly PGA is said to result in a commodity sales rate under National's Rate Schedules RQ and CD equal to $2.6447 per Dth.

National states that the alternative, it submitted Third Revised Seventeenth Revised Sheet No. 4 to reflect the rates filed by National in Docket No. RP86-136-000, which results in a 26.56 cent per Dth negative current adjustment based on the same projected purchased gas costs over the period April through June 1989. National states that this tariff sheet results in a comodity sales rate of $2.6619 per Dth.

National states that copies of this filing were posted in accordance with the Commission's Regulations and served upon the Company's jurisdictional customers and the Regulatory Commissions of the States of New York, Ohio, Pennsylvania, Delaware and New Jersey.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE. Washington, DC 20426, in accordance with Rules 214 or 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions to intervene or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TQ89-2-59-000]

**Northern Natural Gas Co., Division of Enron Corp., Proposed Changes in FERC Gas Tariff**

March 8, 1989.

Take notice that Northern Natural Gas Company, Division of Enron Corp. (Northern), on March 1, 1989, tendered for filing changes in its F.E.R.C. Gas Tariff, Third Revised Volume No. 1 (Volume No. 1 Tariff) and Original Volume No. 2 (Volume No. 2 Tariff).

Northern states that the revised tariff sheets adjust its Base Average Gas Purchase Cost in accordance with the Quarterly PGA filing requirements codified by the Commission's Order Nos. 483 and 483-A. The instant filing reflects a Base Average Gas Purchase Cost of $1.7698 per MMBtu to be effective April 1, 1989, through June 30, 1989. Northern further intends to use its flexible PGA, as necessary, to reflect actual market conditions throughout this time period.

Northern states that this filing establishes new D1 and D2 rates in compliance with the above referenced PGA Rulemaking. Such required Northern to adjust its PGA demand rate components on a quarterly versus annual basis. This filing will establish new D1 and D2 rate components of $.860 and $.0369 per MMBtu, respectively, to be effective April 1, 1989, through June 30, 1989.

Copies of the filing were served upon the company's jurisdictional sales customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. TQ89-3-29-000]

**Transcontinental Gas Pipe Line Corp., Proposed Changes in FERC Gas Tariff**

March 8, 1989.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on March 1, 1989 the following tariff sheets to its FERC Gas Tariff Second Revised Volume No. 1. Such sheets are proposed to be effective April 1, 1989.

Fifty-Sixth Revised Sheet No. 12
Fifth-Third Revised Sheet No. 15
Twelfth Revised Sheet No. 15-A

Transco states these tariff sheets reflect the elimination of the (0.9 cents) per dt surcharge rate under the CD, G, OG, PS, E, ACQ and S-2 Rate Schedules pursuant to the requirements of § 154.310 of the Commission's regulations.

Transco states that copies of the instant filing are being mailed to its jurisdictional customers and interested State Commissions. In accordance with the provisions of § 154.16 of the Commission's Regulations, copies of this filing are available for public inspection during regular business hours, in a convenient form and place at Transco's main office at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 15, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

---

[Docket No. RP89-71-000]

**Pacific Gas Transmission Co., Rate Change**

March 7, 1989.

Take notice that on March 1, 1989, Pacific Gas Transmission Company (PGT) tendered for filing a "Notice of Rate Change to Reflect Increase in the Price of Canadian Gas in Cost of Service Charges and Request for Expedited Consideration."

PGT states that its filing is made in compliance with the Commission's orders in Docket No. RP73-111 which require PGT to make filings pursuant to section 4 of the Natural Gas Act before there is reflected in PGT's cost-of-service charges any increase in the price for gas purchased from Canadian suppliers.

PGT indicates that its filing will only affect increases in rates charged under its PL-1 Rate Schedule for gas sales made by PGT to its only sales customer, Pacific Gas and Electric Company (PG&E).

PGT states that the filed changes in rates will reflect in its cost-of-service charges an increase to $1.90 (U.S.) per MMBtu in the Commodity Rate for gas imported from Canada, commencing April 1, 1989. Under PGT's import arrangements, this new price will remain in effect for eighteen months, through September 30, 1990.

PGT states that the new price is based on competitive conditions in PG&E's market in northern and central California and that PG&E is willing to accept the increase in exchange for the stability of an eighteen-month price which is competitive under current market conditions. PGT presently obtains more than 99% of its gas supply from Canada at the International Boundary.

PGT advises that copies of its filing have been mailed to its customers and to interested state commissions and other interested parties. PGT requests that expedited consideration be given to the instant filing and that the rate change be allowed to become effective, without suspension, on April 1, 1989.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 or 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**Palisades Generating Co.; Filing**

March 6, 1989.

Take notice that Palisades Generating Company (PGC), on February 27, 1989, tendered for filing with the Federal Energy Regulatory Commission (Commission) as an initial rate schedule the Power Purchase Agreement between Consumers Power Company and PGC. The Power Purchase Agreement provides for long-term sales for resale of available energy from the Palisades Nuclear Generation Station. The Power Purchase Agreement, by its terms, is not

VOL 54 ISS 47 MR 13 1989 UMI

effective until it is accepted and approved by the Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 29, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TQ89-3-6-000]

**South Georgia Natural Gas Co.; Proposed Changes to FERC Gas Tariff**

March 7, 1989.

Take notice that on March 1, 1989, South Georgia Natural Gas Company ("South Georgia") tendered for filing Fifty-First Revised Sheet No. 4 to its FERC Gas Tariff, First Revised Volume No. 1. The tariff sheet and supporting information are being filed with a proposed effective date of April 1, 1989, pursuant to the Purchased Gas Cost Adjustments provision set out in section 14 of South Georgia's FERC Gas Tariff.

South Georgia states that Fifty-First Revised Sheet No. 4 reflects a revenue increase of approximately $666,000 in jurisdictional revenues resulting from an increase of $3.081 per MMBtu in the D-1 component of South Georgia's rates, an increase of $.198 per MMBtu in the D-2 component for the G-1/I-1 Rate Schedules, an increase of $.144 per MMBtu in the commodity component, and a decrease in the D-2 component of Rate Schedules G-2/I-2 of $.024 per MMBtu.

South Georgia states that its Current Adjustment reflects an increase in the rates of its primary pipeline supplier, Southern Natural Gas Company, which are proposed to become effective April 1, 1989 in Docket No. TA89-1-7-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (§§ 385.211, 385.214). All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP89-70-000]

**Stingray Pipeline Co.; Change in Tariff**

March 7, 1989.

Take notice that on March 1, 1989 Stingray Pipeline Company (Stingray) tendered for filing, pursuant to the provisions of Order Nos. 509 and 509-A and the applicable provisions of the Federal Energy Regulatory Commission's (Commission) Regulations, the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Second Revised Sheet No. 1
Revised Sixteenth Revised Sheet No. 4
Original Tariff Sheet No. 72
through
Original Tariff Sheet No. 146

The proposed effective date of these revised tariff sheets is April 1, 1989.

In accordance with the provisions of the Commission's Regulations, Stingray states that these tariff sheets reflect establishment of Stingray's initial Rate Schedules for transportation service under 18 CFR Part 284, Subpart K of the Commission's Regulations.

Stingray also respectfully requests that the Commission grant such waivers of the applicable requirements of the Natural Gas Act and the Commission's Regulations thereunder, including Sections 154 and 284 as may be necessary, so that the enclosed tariff sheets may be accepted for filing and made effective on April 1, 1989. Grant of such waivers is reasonable given the nature of this filing, the limited scope of its applicability and the desirability of having the proposed tariff sheets become effective April 1, 1989 in response to Commission Orders 509 and 509-A.

Copies of this letter and enclosures are being served on affected jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules of Practice and Regulations. All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TQ89-2-9-000]

**Tennessee Gas Pipeline Co.; Rate Change Under Tariff Rate Adjustment Provisions**

March 7, 1989.

Take notice that on March 1, 1989, Tennessee Gas Pipeline Company (Tennessee) tendered for filing the following tariff sheets to its FERC Gas Tariff to be effective April 1, 1989:

*Second Revised Volume No. 1*

Item A:
Twelfth Revised Sheet No. 20
Ninth Revised Sheet No. 20A
First Revised Sheet No. 20B
Fourteenth Revised Sheet No. 21

*Original Volume No. 2*

Item B:
Thirteenth Revised Sheet No. 5
Twelfth Revised Sheet No. 6

Tennessee states that the revisions listed as Item A reflect PGA current rate adjustments pursuant to Section 2 of Article XXIII of the General Terms and Conditions of Tennessee's Tariff.

Tennessee states that the revisions listed as Item B adjust transportation rate schedules to reflect changes in the cost of gas used for fuel pursuant to section 5 of Article XXIII of the General Terms and Conditions.

Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions. Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of

Practice and Procedure. All such motions or protests should be filed on or before March 14, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene; provided, however, that any person who had previously filed a motion to intervene in this proceeding is not required to file a further motion. Copies of this filing are on file with the Commisison and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

---

[Docket No. TA89-1-43-000 and RP88-39-001]

**Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff**

March 7, 1989.

Take notice that Williams Natural Gas Company (WNG) on March 1, 1989, tendered for filing Eleventh Revised Sheet No. 6 and Tenth Revised Sheet No. 7 to its FERC Gas Tariff, Original Volume No. 1 WNG states that pursuant to the Purchased Gas Adjustment in Article 21 of its FERC Gas Tariff, it proposes to increase its rates effective May 1, 1989, to reflect:

(1) A $.0033 per Mcf increase in the Cumulative Adjustment due to an increase in WNG's projected gas purchase costs.
(2) A $.5855 per Mcf increase in the Surcharge Adjustment (to a positive $.4496 per Mcf from a negative $1.1359 Mcf) to amortize the Deferred Purchase Gas Cost Subaccount Balance.

WNG states that it is filing First Revised Sheet No. 6A to remove the Standby Charges from its tariff in compliance with Commission Order of Nov. 29, 1988 in Docket No. RP88-39-000.

WNG states that public copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with §§385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before Mar. 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

*Secretary.*

BILLING CODE 6717-01-M

---

**Southwestern Power Administration**

**Tentative Sponsor Selection and Request for Additional Proposals; Proposed Norfork Dam Unit Number 3**

**AGENCY:** Southwestern Power Administration, DOE.

**ACTION:** Notice of Tentative Selection of the City of Conway, Arkansas, as the Financial Sponsor and Preference Customer relating to the Proposed Norfork Dam Unit 3 Hydroelectric Power Project in Arkansas and Request for Additional Proposals.

**SUMMARY:** The Norfork Dam is located near Norfork, Arkansas, on the North Fork River, a major north bank tributary of the White River. The U.S. Army Corps of Engineers (Corps) constructed the project and is responsible for its operation. The project was authorized for flood control by the Flood Control Act approved June 28, 1938 (Pub. L. 761, 75th Congress, 3rd session) and modified to provide facilities for generation of power by the Flood Control Act of August 18, 1941 (Pub. L. 228, 77th Congress, 1st session). Norfork Lake is also a major center for recreation and releases from the project support a "put-and-take" trout fishery downstream on the North Fork and White Rivers.

Provisions were made during design and construction of the project for four hydroelectric power generating units. One unit began generation in June 1944 with a second unit placed in operation in February 1950. Units 3 and 4 have not been installed at the project. Each of the two existing units have an installed capacity of 40,275 kilowatts (kW) for a total installed capacity at the project of 80,550 kW. The units can produce an overload capacity of 92,600 kW. The two units generate an average of 184,000,000 kilowatt-hours (kWh) of energy annually. The hydroelectric power and energy generated at Norfork Dam is marketed by the Southwestern Power Administration (SWPA).

The proposed addition of one hydroelectric power generating unit (Unit 3) is generally described as Plan 1 in the Corps' Little Rock District document entitled "Norfork Lake Additional Hydroelectric Power Units 3 and 4" dated March 1983 and is authorized through the provisions of the original project authorizations. The proposed unit would have a capacity of approximately 42,500 kW and generate additional energy averaging about 5,900,000 kWh. The estimated cost of construction is $46,000,000 (based on October 1987 price levels).

The City of Conway, Arkansas (City), an incorporated city which owns a municipal electric utility system, has proposed to provide financing to the Federal government for the design and construction of Unit 3 at Norfork Dam during the period of design and construction. Upon completion of construction, the City proposes to pay its own debt service and a pro rata share of SWPA's hydroelectric power system's annual operation, maintenance, and replacement (OM&R) and marketing costs. The project would be designed, constructed, owned, and operated by the Corps. The power and energy would be marketed by SWPA.

The sponsor will have two years from the date the final sponsor selection notice is published in the Federal Register to enter into agreements with the Corps and SWPA for construction of the project. Additional time to enter into the agreements may be provided upon the sponsor's request and approval by the Corps and SWPA. If agreements cannot be negotiated within the specified time frame, the sponsorship will be cancelled automatically and new proposals for potential project sponsors will be considered.

In exchange for financing the design and construction of the project and making the required payments for OM&R and marketing costs, the City requests an allocation of approximately 36,000 kW of firm capacity with associated 1200 hours per year of firm energy from the SWPA's Interconnected System, which includes the Norfork Dam project. If the City is selected and successfully sponsors the project, it would receive the above requested allocation in accordance with section II, Part A, paragraph 2 of SWPA's Power Allocation Policy as published in the Federal Register (52 FR 29881) dated August 12, 1987. The proposed arrangement between the City and SWPA would extend for 50 years after Norfork Unit 3 is declared in commercial

BEST COPY AVAILABLE

VOL 54 ISS 47 MR 13 1989 UMI

operation. SWPA has determined that the City qualifies for preference, in accordance with section 5 of the Flood Control Act of 1944, as amended, to receive firm power and energy in accordance with the aforesaid terms, provided the City is the successful sponsor and can make satisfactory wheeling arrangements. Jointly, the Corps and SWPA have tentatively selected the City to be the non-Federal sponsor to provide financing for the proposed Unit 3 at Norfork Dam.

**DATES:** Questions, comments, and/or proposals received prior to (insert date April 12, 1989) will be considered in the final selection process.

*For Further Information About the Proposed Project Financing, Contact:* Colonel Anthony V. Nida, District Engineer, Little Rock District, Corps of Engineers, P.O. Box 867, Little Rock, AR 72203.

*For Further Information About the Proposed Marketing of Power and Energy From the Project, Contact:* Francis R. Gajan, Director, Power Marketing, Southwestern Power Administration, P.O. Box 1619, Tulsa, OK 74101.

Issued at Tulsa, Oklahoma, on January 27, 1989.

**J. M. Shafer,**

*Administrator, Southwestern Power Administration, U.S. Department of Energy.*

BILLING CODE 6450-01-M

## ENVIRONMENTAL PROTECTION AGENCY

**[ER-FRL-3536-1]**

### Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared February 20, 1989 through February 24, 1989 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5074.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 22, 1988 (53 FR 13318).

**Draft EISs**

*ERP No.* D-FHW-K40165-CA, Rating EC2, Cloverdale Bypass Construction on US 101 from North of Hiatt Road to Preston Overhead, Funding and Possible 404 Permit, City of Cloverdale, Sonoma County, CA.

*Summary:* EPA expressed environmental concerns due to project impacts to wetland, riparian and instream habitats, and requested that the final EIS discuss alternative project designs to reduce these impacts. EPA also asked that the final EIS discuss conformity with State and local water quality management plans and water quality standards.

**Final EISs**

*ERP No.* F-COE-K35024-CA, Marathon Industrial/Commercial Business Park Development, Section 10 and 404 Permits, City of Hayward, Alameda County, CA.

*Summary:* EPA found that issuance of permits by the Corps for the proposed project would result in unacceptable environmental impacts. These impacts include the direct loss of 61.5 acres of seasonal wetlands and impacts to another 119 acres of other wetland habitats. Due to the direct and cumulative adverse impacts upon wetlands, EPA strongly recommended that the Corps deny the Section 404 permit for the project. EPA noted that it considers the project a possible candidate for referral to the Council on Environmental Quality and for possible administrative action under Sections 404(q) and/or 404(c) of the Clean Water Act. Specifically, concerns were raised about the alternatives analysis, mitigation, and several other aspects of EPA's 404(b)(1).

*ERP No.* F-COE-L32005-WA, Lummi Bay Navigation Channel Improvements and Marina Construction, Implementation, Lummi Indian Reservation, Whatcom County, WA.

*Summary:* EPA raised concerns in the draft EIS about the need for such a large fill given the non-water dependent nature of the associated marine facilities and about the adequacy of the proposed mitigation. After the review of the final EIS, EPA continues to have the same environmental concerns about this project.

*ERP No.* F-FHW-D40211-MD, Calvert Road Closure and Replacement Crossing Construction, Funding and 404 Permit, Prince Georges County, MD.

*Summary:* EPA's issues of concern in the draft supplemental EIS were addressed in this document. EPA also offers assistance in the formation of a wetland mitigation plan.

Dated: March 8, 1989.

### C.D. Buff Site; Proposed Settlement Agency

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of proposed settlement.

**SUMMARY:** Under section 122h of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), The Environmental protection Agency (EPA) has agreed to settle claims for response costs at the C.D. Buff Site, Una, South Carolina. EPA will consider public comments on the proposed settlement for thirty days. EPA may withdraw from or modify the proposed settlement should such comments disclose facts or considerations which indicate the proposed settlement is inappropriate, improper or inadequate. Copies of the proposed settlement are available from: Ms. Rosalind Brown, Life Scientist, U.S. EPA, Region IV, Investigations and Cost Recovery Unit, Investigation Support Section, Site Investigation Support Branch, Waste Management Division, 345 Courtland Street NE., Atlanta, Georgia 30365, 404/347-5059.

Written comments may be submitted to the person above by April 12, 1989.

Dated: February 15, 1989.

### Anti-Arson Program

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Notice of solicitation for award of cooperative agreement.

Notice of Solicitation is hereby given that the Federal Emergency Management Agency, under the Fire Prevention and Control Act of 1974, will issue a Request for Assistance (RFA) No. EMW-89-S-3052 on or about March 27, 1989, regarding the design and implementation of an anti-arson strategy program. This program is limited to Community-Based Organizations.

The purpose of this assistance is to focus on nationwide efforts to reduce the number of arson related fires that occur every year throughout this country.

Some broad objectives of this program are:

- To encourage neighborhood involvement in reducing arson fires through new and innovative broad spectrum programs.
- To expand the neighborhood involvement to a community-wide participation in fighting arson.
- To make information available to other neighborhoods and communities regarding successful programs.
- To increase the cooperation between neighborhood residents, community groups and public service organizations such as fire, police, building and code departments.
- To build a comprehensive community anti-arson program.

Application for assistance must be requested in writing and addressed as follows: Federal Emergency Management Agency, Office of Acquisition Management, 500 C Street, SW., Room 731, Washington, DC 20472, ATTN: Patricia A. English, Assistance Officer.

Request for Assistance No. EMW-89-S-3052. Please include a self-addressed mailing lable with the request.

Cooperative Agreements are anticipated to be awarded as a result of this request for assistance. It is anticipated that a minimum of five (5) and a maximum of thirty (30) assistance awards will be made. The anticipated funding levels of this program are between $10,000.00 to $15,000.00 based on the criteria that will be outlined in the solicitation package.

**Kenneth J. Brasokas,**

*Director, Office of Acquisition Management.*

## FEDERAL HOME LOAN BANK BOARD

**[No. 89-536]**

### Application for Permission To Establish a Branch Office or Change of Location of an Office

Date: March 6, 1989.

**AGENCY:** Federal Home Loan Bank Board.

**ACTION:** Notice.

**SUMMARY:** The public is advised that the Federal Home Loan Bank Board ("Board") has submitted, with revision, an information collection request, "Application for Permission to Establish a Branch Office of Change of Location of an Office," to the Office of Management and Budget for approval in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

This information is required from Federal Savings and Loan Associations and Federal Savings Banks to determine whether the application meets the Board's criteria for approval for permission to establish a Branch Office or for relocation of existing Branch Offices. We estimate it will take approximately 2 hours per respondent to complete the information collection.

**DATE:** Comments on the information collection request are welcome and should be received on or before March 28, 1989.

**ADDRESS:** Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of

VOL 54 ISS 47 MR 13 1989 UMI

Information and Regulatory Affairs, Washington, DC 20503. *Attention:* Desk Officer of the Federal Home Loan Bank Board.

The Board would appreciate commenters sending copies of their comments to the Board.

Request for copies of the proposed information collection requests and supporting documentation are obtainable at the Board address given below: Director, Information Services Division, Office of Secretariat, Federal Home Loan Bank Board, 801 17th Street, NW, Washington, DC 20552. Phone: 202–653–2751.

**FOR FURTHER INFORMATION CONTACT:** John Wilson, Financial Analyst Office of District Banks, 202–906–7217, Federal Home Loan Bank Board, 1700 G. Street, NW., Washington, DC 20552.

By the Federal Home Loan Bank Board.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control

### National Institute for Occupational Safety and Health; Meetings; Endotoxin Detection in Cotton Dust et al.

The following meetings will be convened by the National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control (CDC), and will be open to the public for observation and participation, limited only by the space available:

*Name:* Endotoxin Detection in Cotton Dust.
*Date:* March 15, 1989.
*Place:* Appalachian Laboratory for Occupational Safety and Health, Room 203, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505–2888.
*Time:* 8:30 a.m.–10:30 a.m.
*Purpose:* To review the project entitled "Endotoxin Detection in Cotton Dust."

Additional information and copies of the research protocol may be obtained from: Stephen A. Olenchock, Ph.D., Division of Respiratory Disease Studies, NIOSH, CDC, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505, Telephone: Commercial: (304) 291–4256, FTS: 923–4256.

*Name:* Pulmonary Response to Cotton Dust: Relationship Between Animal Models and the Human Response
*Date:* March 15, 1989.
*Place:* Appalachian Laboratory for Occupational Safety and Health, Room 203, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505–2888.
*Time:* 10:30 a.m.–12:30 p.m.
*Purpose:* To review the project entitled "Pulmonary Response to Cotton Dust: Relationship Between Animal Models and the Human Response."

Additional information and copies of the research protocol may be obtained from: Vincent Castranova, Ph.D., Division of Respiratory Disease Studies, NIOSH, CDC, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505, Telephone: Commercial: (304) 291–4256, FTS: 923–4256.

*Name:* Where's the Endotoxin? — Environmental Sampling For Airborne Endotoxin.
*Date:* March 15, 1989.
*Place:* Appalachian Laboratory for Occupational Safety and Health, Room 203, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505–2888.
*Time:* 2:00 p.m.–4:00 p.m.
*Purpose:* To review the project entitled "Where's the Endotoxin?—Environmental Sampling for Airborne Endotoxin."

Additional information and copies of the research protocol may be obtained from: William Jones, Ph.D., Division of Respiratory Disease Studies, NIOSH, CDC, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505, Telephone: Commercial: (304) 291–4256, FTS: 923–4256.

Viewpoints and suggestions from industry, organized labor, academia, other governmental agencies, and the public are invited.

**Elvia Hilyer,**

*Associate Director for Policy Coordination, Centers for Disease Control.*

[FR Doc. 89–5625 Filed 3–10–89; 8:45 am]

BILLING CODE 4160–19–M

**[Program Announcement No. 913]**

### Grants for Injury Prevention Research Centers; Availability of Funds for Fiscal Year 1989

#### Introduction

The Centers for Disease Control (CDC) announces that grant applications are being accepted for Injury Prevention Research Centers (IPRCs).

#### Authority

This program is authorized under section 301 of the Public Health Service Act (42 U.S.C. 241). Program regulations are set forth in Title 42 of the Code of Federal Regulations, Part 52.

#### Eligible Applicants

Eligible applicants include all nonprofit and for-profit organizations. Thus, universities, colleges, research institutions, hospitals, and other public and private organizations, State and local health departments and small, minority and/or women-owned businesses are eligible for these grants.

#### Availability of Funds

Approximately $4.5 million is available in Fiscal Year 1989 to fund approximately 9 awards. It is expected that the awards will begin on or about August 1, 1989, and are usually made for a 12 month period within a project period of up to 5 years. Funding estimates may vary and are subject to change. Continuation awards within the project period will be made on the basis of satisfactory progress and the availability of funds.

#### Background and Definitions

*A. Background*

By nearly every measure, injury ranks as one of the nation's most pressing health problems. Injuries are the country's leading cause of years of potential life lost before age 65. They are the leading cause of death and disability in children and young adults. Older Americans also suffer unduly from the severe consequences of injury. Much of the resources of the nation's health care system is devoted to attending to injury victims, who occupy one of every eight hospital beds.

However, opportunities to understand and prevent injuries and reduce their effects are available. Many of these opportunities are discussed in the National Research Council and Institute of Medicine report, *Injury In America* (National Academy Press—ISBN 0–309–03545–7).

*B. Definitions*

1. *Injury* is defined as physical damage to an individual resulting from acute exposure to physical or chemical agents. The major categories of injury are intentional, unintentional and occupational. Intentional injuries result from interpersonal or self-inflicted violence, and include homicide, assaults, suicide and suicide attempts, child abuse, and rape. Unintentional or unintended injuries include those that result from motor vehicle collisions, falls, fires, poisonings, and drownings. Occupational injuries occur at the worksite and include unintentional trauma (for example, work-related motor-vehicle injuries, drownings, and electrocutions) and intentional injuries in the workplace.

2. *An Injury Prevention Research Centers (IPRCs)* is defined as an organizational unit which would as a general rule be established within an academic institution that works toward the development of an interdisciplinary, comprehensive approach to the injury problem involving physicians, epidemiologists, engineers, behavioral scientists, public health workers, and others, and is organized in such a manner that multiple aspects of the injury problem can be addressed by this unit (for example, research in epidemiology, prevention, biomechanics, treatment, and rehabilitation; information gathering and dissemination); the ongoing provision of training opportunities to students, researchers, and public health agency personnel; and projects relating to the development and evaluation of injury prevention, injury surveillance or injury control programs).

#### Purpose

A. To support injury prevention and control research on priority issues as delineated in *Injury In America*, a 1985 report by the National Academy of Sciences.

B. To integrate aspects of the disciplines of engineering, medicine, public health, criminal justice, behavioral and social sciences, and others in order to prevent and control injuries more effectively.

C. To identify and rigorously evaluate current and new interventions for the prevention and control of injuries.

D. To support IPRCs which will develop an in-depth approach to injury control research and training.

E. To bring the knowledge and expertise of IPRCs to bear on the development of effective public and private sector programs for injury prevention and control.

F. To help make available the expertise of academic institutions for the evaluation and improvement of injury prevention, surveillance and control programs instituted and carried out by Federal, state or local government and private sector organizations.

#### Evaluation Criteria

Applications will be evaluated by a dual review process. The first review will be a peer evaluation of the application. The second review will be by senior Federal staff which will consider the results of the first review together with program need and relevance. Awards will be made based on merit and priority score ranking by the Injury Research Grants Review Committee (IRGRC) and program review by Senior Federal staff, availability of funds, and such other factors deemed necessary and appropriate by the Director, CDC.

*A. Review by the Injury Research Grants Review Committee (IRGRC)*

Peer review of center grant applications will be conducted by IRGRC. Site visits may be a part of this process. Factors to be considered by IRGRC include:

1. The degree to which the applicant possesses the following program requirements:

a. New applications to initially show expertise in at least one of the five areas of injury control (surveillance and epidemiology, prevention and health promotion, biomechanics, acute care, and rehabilitation) and specific, time-framed plans to incorporate all five areas into the center during the second year of the applicant's project period. In the case of currently funded centers seeking continuation, plans for the development and support of all five areas of injury control should have been formulated and progress made toward their incorporation at the time of application.

b. Demonstrated involvement in at least medicine, engineering, behavioral and social sciences and public health, with a specific, time-framed plan to expand to include, health policy development and health care administration.

c. Established curricula and graduate training programs in areas relevant to injury control.

d. Ongoing injury-related projects or activities currently supported by other sources of funding.

e. A director who has specific authority and responsibility to carry out the project.

f. Demonstrated experience in successfully conducting, evaluating, and publishing injury-related research and/or designing, implementing, and evaluating injury control programs.

g. Effective and well-defined working relationships with outside agencies and other entities which will ensure implementation of the proposed activities.

h. Mechanisms for linking the injury control research findings with public health and other intervention efforts to facilitate implementation of programs that take into consideration these research findings.

i. An established relationship, manifest by letters of agreement or periodic reports, with injury prevention and control programs or injury surveillance programs being carried out in the state or region wherein the IPRC is located. Such cooperation may be with governmental or private sector programs.

2. The overall match between the applicant's interdisciplinary, comprehensive approach to research and training objectives and the national program priorities as described in *Injury In America*.

3. The scientific and technical merit of the overall application.

4. The adequacy of the methods for coordinating the overall program and its component parts.

5. The extent to which the evaluation plan will allow for the quantitative measurement of progress toward the achievement of stated objectives.

VOL 54 ISS 47 MR 13 1989 UMI

6. Qualifications, adequacy, and appropriateness of personnal to accomplish the proposed activities.

7. The degree of commitment measured in terms of injury control personnel, facilities, and activities supported by other funding sources and the likelihood that this commitment will be sustained or expanded in future years.

8. The degree of commitment and cooperation of other interested parties as evidenced by letters detailing the nature and extent of this commitment and cooperation.

9. The reasonableness of the proposed budget to the proposed program.

10. Progress thus far made, if the applicant is submitting a competitive renewal application.

11. Plans to become self-sustaining.

*B. Review by Senior Federal Staff*

Further review will be conducted by Senior Federal staff. Factors to be considered will be:

1. The results of the peer review.

2. The significance of the proposed activities as they relate to the achievement of the objective in *Injury In America*.

3. National needs and geographic balance.

4. Overall distribution of the approaches of competing applications, keeping in mind the special emphasis areas of biomechanics, acute care, rehabilitation; and the overall balance of the program in addressing the control of injury among populations who are at increased risk, including minority groups, the elderly, children, and residents of farms and rural areas; and the major causes of intentional and unintentional injury.

5. Budgetary considerations.

6. Existing Center may be given priority consideration, if applicant has made satisfactory progress.

7. Plans to become self-sustaining.

*C. Continued Funding*

Continuation awards within the project period will be made on the basis of the availability of funds and the following criteria:

1. The accomplishments of the current budget period show that the applicant is meeting its objectives;

2. The objectives for the new budget period are realistic, specific, and measurable;

3. The methods described will clearly lead to achievement of these objectives;

4. The evaluation plan will allow management to monitor whether the methods are effective; and

5. The budget request is clearly explained, adequately justified, reasonable, and consistent with the intended use of grant funds.

**E. O. 12372 Review**

Applications are not subject to the review requirements of Executive Order 12372, entitled Inter-Governmental Review of Federal Programs.

**CFDA Number**

The Catalog of Federal Domestic Assistance Number is 13.136.

**Application Submission And Deadline**

*A. Applications*

Applications should be submitted on Form PHS 5161-1 for State and local governments. Other applicants should use Form PHS-398 and adhere to the ERRATA Instruction Sheet for PHS-398 contained in the Grant Application Kit. The original and two copies of the application must be submitted to Henry S. Cassell, III, Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Room 300, Mailstop E-14, Atlanta, Georgia 30305 on or before June 9, 1989.

An applicant organization has the option of having specific salary and fringe benefit amounts for individuals omitted from the copies of the application that are made available to outside reviewing groups. If the applicant's organization elects to exercise this option, use asterisks on the original and two copies of the application to indicate those individuals for whom salaries and fringe benefits are being requested; the subtotals must still be shown. In addition, submit an additional copy of page four of Form PHS-398, completed in full with the asterisks requested by the amount of the salary and fringe benefits.

*B. Deadline*

Applications shall be considered as meeting the deadline above if they are either:

1. Received on or before the deadline date, or

2. Sent on or before the deadline date and received in time for submission to the peer review committee. Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.

*C. Late Applications*

Applications which do not meet the criteria in B.1. or B. 2. above are considered late applications and will be returned to the applicant.

**Where to Obtain Additional Information**

A complete program description, information on application procedures and application package may be obtained from Nealean K. Austin, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Room 300, Mailstop E-14, Atlanta, Georgia, 30305, (404) 842-6575 or FTS 236-6575.

Announcement Number 913 entitled "Grants for Injury Prevention Research Centers" must be referenced in all requests for information pertaining to this project.

Technical information may be obtained from James M. Monroe, Grants Manager, Division of Injury Epidemiology and Control, Center for Environmental Health and Injury Control, Centers for Disease Control, 1600 Clifton Road NE., Mailstop F-36, Altanta, Georgia 30333, (404) 488-4690 or FTS 236-4690

Dated: March 7, 1989.

**Robert L. Foster,**

*Acting Director, Office of Program Support, Centers for Disease Control.*

BILLING CODE 4160-18-M

## Advisory Committee for Elimination of Tuberculosis; Meeting

*Action:* Notice of meeting.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. 2), the Centers for Disease Control (CDC) announces the following committee meeting.

*Name:* Advisory Committee for Elimination of Tuberculosis (ACET).

*Time and Date:* 8:30 a.m.-5:00 p.m.-April 4, 1989; 8:00 a.m.-2:30 p.m.-April 5, 1989.

*Place:* Executive II & III Conference Rooms, Lanier Plaza Conference Center, 418 Armour Drive NE., Atlanta, Georgia 30324.

*Status:* Open.

*Purpose:* This Committee advises and makes recommendations to the Secretary, Department of Health and Human Services, the Assistant Secretary for Health, and the Director, CDC, regarding feasible goals for eliminating tuberculosis. Specifically, the Committee makes recommendations regarding policies, strategies, objectives, and priorities, addresses the development of new technologies and their subsequent application, and reviews progress toward elimination.

*Matters to be Discussed:* Tuberculosis control among the foreign-born, tuberculosis and human immunodeficiency virus (HIV) infection, tuberculosis control in nursing homes, and statements on preventive therapy and screening. Agenda items are subject to change as priorities dictate.

*Contact Person for More Information:* Dixie E. Snider, Jr., M.D., Director, Division of Tuberculosis Control, and Executive Secretary, ACET, Center for Prevention Services, CDC, 1600 Clifton Road NE., Mailstop E-10, Atlanta, Georgia 30333, Telephones: FTS: 236-2501; Commercial: 404/639-2501.

Dated: March 7, 1989.

**Elvin Hilyer,**

*Associate Director for Policy Coordination, Centers for Disease Control.*

## Food and Drug Administration

**[Docket No. 89N-0030]**

## Public Meeting; Seafood Safety as Related to Cooked and Processed Seafood

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA), Southeast Region, is announcing a public meeting with the seafood industry and other interested persons to discuss a number of agency concerns relating to public health aspects of cooked and processed seafood.

**DATES:** The meeting will be held on Tuesday, April 18, 1989, from 8:30 a.m. to 5 p.m. Interested persons who will be unable to attend the meeting may submit written comments on the issues outlined in this notice by May 12, 1989.

**ADDRESSES:** The meeting will be held in a conference room at the Holiday Inn, Tampa International Airport, 4500 West Cypress St., Tampa, FL 33622. Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, referencing the docket number found in the heading of this notice.

**FOR FURTHER INFORMATION CONTACT:** Douglas D. Tolen, Food and Drug Administration (HFR-SE200), 7200 Lake Ellenor Dr., Suite 120, Orlando, FL 32809, 407-855-0900.

**SUPPLEMENTARY INFORMATION:** The meeting is being sponsored by FDA's Southeast Regional Office, in accordance with 21 CFR 10.65(b), to discuss with the seafood industry and other interested persons the agency's concerns, raised by its inspectional and analytical findings, relating to cooked and processed seafood.

Issues to be discussed will include:

1. Microbiological contamination of ready-to-eat or heat-and-serve seafood products.

2. Public health concerns relating to these products.

3. Improved processing practices for these products.

4. Strategies for protecting the consumer from associated health risks.

FDA is inviting all interested persons to participate in this meeting. Interested persons who will be unable to attend the meeting may submit to the Dockets Management Branch (address above) written comments that set forth their views on the issues outlined in this notice.

Dated: March 6, 1989.

## Memorandum of Understanding on Good Laboratory Practice; the Federal Republic of Germany Federal Minister of Food, Agriculture and Forestry et al.

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is providing notice of a memorandum of understanding (MOU) among FDA, the U.S. Environmental Protection Agency, the Federal Minister of Food, Agriculture and Forestry, the Federal Minister for Youth, Family Affairs, Women and Health, and the Federal Minister for the Environment, Nature Conservation and Nuclear Safety of the Federal Republic of Germany. The MOU provides, under specified conditions, for (a) reciprocal recognition of each country's good laboratory practice program, (b) acceptance of test data collected in either country for evaluation of safety, and (c) implementation of procedures for continuing cooperation between parties.

**DATE:** The agreement became effective December 23, 1988.

**FOR FURTHER INFORMATION CONTACT:** Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC-50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1583.

**SUPPLEMENTARY INFORMATION:** In accordance with 21 CFR 20.108(c), which states that all agreements and memoranda of understanding between FDA and others shall be published in the **Federal Register**, the agency is publishing this memorandum of understanding.

Dated: March 6, 1989.

**John M. Taylor,**

*Associate Commissioner for Regulatory Affairs.*

**I. Purpose**

This Memorandum reflects the concerns of the Food and Drug Administration and the Environmental Protection Agency of the United States of America and the Federal Ministry of Food, Agriculture and Forestry, the Federal Minister for Youth, Family Affairs, Women and Health, and the Federal Ministry of the Environment, Nature Conservation and Nuclear Safety of the Federal Republic of Germany (hereinafter called "the parties") for assuring the quality and integrity of safety evaluation data that support the approval of applications for research and/or marketing permits and licensing or registration or reregistration of all chemicals for agricultural, industrial, pharmaceutical, cosmetic, or food use to the extent encompassed by national law. The parties share the view that health and environmental safety studies which are required to be submitted to a national authority should be conducted in accordance with the principles of Good Laboratory Practice (GLP) that are internationally recognized, and that laboratories conducting such tests should be monitored by effective national inspection programs. Accordingly, this Memorandum provides, under specified conditions, for:

(a) Reciprocal recognition of each country's GLP program,

(b) Acceptance of test data collected in either country for evaluation of safety, and

(c) Implementation of procedures for continuing cooperation between parties.

**II. Background**

Safety evaluation data submited for consideration to one national authority are frequently based on studies conducted by laboratories located in the other country. Therefore, the standards observed by those laboratories that conduct health and environmental safety studies, the results of which are submitted to authorities of the other country, should be conducted in

VOL 54 ISS 47 MR 13 1989 UMI

accordance with principles of good laboratory practices.

When the safety evaluation data submitted to a national authority originate from a laboratory within the other country, the national authorities of the country of origin should be able to provide the parties in the other country with information that assures that the laboratory is operated in accordance with good laboratory practices.

National programs of inspection should verify the compliance of laboratories with the principles of GLP. These principles and the inspection programs should be in accord with the Decision of the Council of the Organization for Economic Cooperation and Development (OECD) on "The Mutual Acceptance of Data in the Assessment of Chemicals" (May 12, 1981) including Annex 2, "OECD Principles of Good Laboratory Practice." These standards and procedures should be consistent with the July 26, 1983 Recommendation of the OECD Council on "The Mutual Recognition of Compliance with Good Laboratory Practice."

*A. Good Laboratory Practices*

The parties have published comparable standards of good laboratory practice relating to health and environmental studies on safety evaluation experiments.

In evaluating the laboratories and auditing the data from the studies conducted in the United States of America, the inspectors of the Food and Drug Administration (FDA) rely on the regulations relating to Good Laboratory Practice for Nonclinical Laboratory Studies (21 CFR Part 58). The inspectors of the Environmental Protection Agency (EPA) rely on the regulations relating to Pesticide Programs, Good Laboratory Practice Standards (40 CFR Part 160), and Toxic Substances Control Act, Good Laboratory Practice Standards (40 CFR Part 792).

The inspectors of the *länder* of the Federal Republic of Germany rely on the "OCED-Grundsätze der Guten Laborpraxis (GLP)"; [OECD Principles of Good Laboratory Practice (GLP)] published in the *Bundesanzeiger* [Federal Journal] of March 2, 1983 and on the "Durchführung von GLP Inspektionen nach den Grundsätzen der OECD" [Conduct of GLP Inspections under the OECD Principles] adopted May 20, 1987 by the "Arbeitsgemeinschaft der Leitenden Medizinalbeamten des Bundes und der Länder" [Council of the Directors of the Medical Departments of the Federal Government and the *Länder*] in evaluating the laboratories and auditing the data from the studies conducted in the *länder*.

*B. National Inspection Programs*

Inspectional procedures will be mutually consistent among the parties. The parties will assess compliance of a laboratory with the standards of good laboratory practice by having trained government inspectors conduct an inspection approximately once every two years. The inspection programs will permit assessment of current laboratory operations as well as the audit of data from completed studies. Laboratories will generally be notifed in advance. A report of the results of the inspection will be prepared that describe and address laboratory operations and conformity with GLP.

*C. Compliance*

Each of the parties will establish satisfactory procedures to secure the compliance of laboratories with the standards of good laboratory practice. These procedures will include, for example, notifying a laboratory of deficiencies observed, the issuance of corrective and warning notices, and the removal of a laboratory from national GLP compliance programs. These and other actions may lead regulatory authorities to reject specific studies, or to cancel or refuse registration of specific chemicals. In some cases, depending upon the gravity and extent of the violation, more severe penalties may be applied.

**III. Substance of the Understanding**

*A. General Principles*

The parties agree that:

1. Adherence to adequate standards of good laboratory practice is essential to the conduct of high quality safety testing;

2. A national program of periodic inspections conducted by a trained inspectorate is required to monitor adherence to the standards of good laboratory practice;

3. Appropriate compliance procedures are necessary to assure adherence to the standards of good laboratory practice; and

4. Studies conducted in acordance with the respective standards of good laboratory practice promulgated by either country are to be acceptable to the parties in the other country for consideration in the evaluation of safety.

*B. Inspections and Audits: Training and Evaluation*

1. The parties agree that training in inspection and audit techniques shall be conducted for the purpose of promoting consistency of procedures among the parties.

2. The parties agree that such training will begin in the near future.

3. The parties will evaluate each others' inspection and audit procedures periodically.

4. It is expected that all parties will have comparable GLP programs in place by December 31, 1990, in which case the provisions of Article III.C of this Memorandum of Understanding will take full effect at that time.

5. Until the provisions of Article III.C take full effect as provided in Article III.B.4, a party or parties from one country may inspect laboratories or audit studies in the other country, and will duly inform the appropriate party or parties of their intent to inspect a laboratory or audit a study in that country.

*C. Mutual Recognition of GLP Programs*

1. As a routine matter, the parties will carry out inspections of health and environmental testing laboratories and auditing studies in their respective countries. In exceptional situations in which the requesting party of one country can justify a special concern, the requesting party may designate one or more of its scientists to participate in a laboratory inspection or the audit of a study conducted by the authorities in the other country.

2. Each party will inform the other parties of changes in their respective GLP programs.

3. Each party will provide the other parties, regularly, with the names and addresses of health and environmental testing laboratories operating within their country, the dates the laboratories were inspected, and their compliance status.

4. Each party will provide, upon request of one of the other parties, further information regarding whether or not a laboratory or study is in compliance with the GLP.

5. Each party will honor a request by one of the other parties to conduct a GLP inspection or data audit on behalf of the other party at a specified health or environmental laboratory whenever:

(a) There is serious concern about the quality or integrity of the data submitted to a party;

(b) Inspection has not been performed within the last 2 years; or

(c) An approval of an application for a research and/or marketing permit is pending based upon tests performed in a specified laboratory which are important to granting the approval.

6. On occasion, representatives of each party will participate as invited observers in an inspection of a laboratory conducted by another party to maintain a continuing understanding of each country's inspectional procedures. These inspections are to alternate between the two countries.

7. Each party will recognize the need to protect from public disclosure data and information that are exchanged among the parties and that fall within the definition of a trade secret or confidential commercial or financial information. If there is a request from the public for any information obtained from another party, that party will be notified of the request prior to the release of any information and given an opportunity for consultation.

**IV. Participating Parties**

A. Food and Drug Administration, 5600 Fishers Lane, Rockville, Maryland 20857.

B. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

C. Federal Ministry of Food, Agriculture and Forestry (BML), Rochusstr. 1, D–5300 Bonn 1.

D. Federal Ministry for Youth, Family Affairs, Women and Health (BMJFFG), Kennedyallee 105–107, D–5300 Bonn 2.

E. Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU), Kennedyallee 5, D–5300 Bonn 2.

**V. Liaison Officers**

The parties respectively appoint the following officials to serve as liaison officers for all communications regarding matters relative to this Memorandum:

*A. For the United States of America*

Director, Division of Compliance Policy, Office of Regulatory Affairs (HFC–230) (currently: Mr. Ernest L. Brisson), Food and Drug Administration, 5600 Fishers Lane, Rockville, Maryland 20857.

Director, Laboratory Data Integrity Assurance Division, Office of Compliance Monitoring (EN–342) (currently: Mr. John J. Neylan, III), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

*B. For the Federal Republic of Germany*

The Federal Ministry for Food, Agriculture and Forestry, Referat 622 (currently: Regierungsdirektor R. Elsner), Postfach 140270, D–5300 Bonn 1.

The Federal Ministry for Youth, Family Affairs, Women and Health, Referat 355 (currently: Ministerialrat Dr. K. Feiden), Postfach 200220, D–5300 Bonne 2.

The Federal Ministry of Environment, Nature Conservation and Nuclear Safety, Referat IG II 4 (currently: Ministerialrat Dr. U. Schlottman), Postfach 120629, D–5300 Bonn 1.

**VI. Amendment**

This Memorandum may be amended at any time by mutual written agreement of all the parties.

**VII. Duration**

This Memorandum shall become effective on the date of the last signature and shall continue in effect unless terminated by mutual written agreement of all the parties.

**VIII. Withdrawal**

Any party to this Memorandum may withdraw at any time by written notice to the other parties, to take effect not less than ninety (90) days after the date of notification.

**IX. Nature of the Memorandum**

This Memorandum of Understanding states the intent of the parties to cooperate, and shall not be considered a binding international agreement.

Done and signed in Washington DC in the English and German language, both texts being equally authentic.

## Memorandum of Understanding on Good Laboratory Practice; the Pharmaceutical Service Ministry of Health, Republic of Italy

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is providing notice of a memorandum of understanding (MOU) between FDA, U.S. Department of Health and Human Services and the Pharmaceutical Service, Ministry of Health Republic of Italy. This MOU describes the mutual goals of the United States of America and the Republic of Italy to conduct studies on assuring the quality and integrity of safety evaluation data that support the approval of applications for research and/or marketing permits for human and animal drugs. Accordingly, this MOU provides for reciprocal recognition of each country's good laboratory practice program, acceptance of test data in either country for evaluation of safety, and implementation of procedures for continuing cooperation between the countries.

**DATE:** The agreement became effective December 19, 1988.

**FOR FURTHER INFORMATION CONTACT:** Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC–50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–12583.

**SUPPLEMENTARY INFORMATION:** In accordance with 21 CFR 20. 108(c), which states that all agreements and memoranda of understanding between FDA and others shall be published in the **Federal Register**, the agency is publishing this memorandum of understanding.

Dated: March 6, 1989.

**John M. Taylor,**

*Associate Commissioner for Regulatory Affairs.*

**I. Purposes**

The participating parties of the Unites States of America and the Republic of Italy have a concern for assuring the quality and integrity of safety evaluation data that support the approval of applications for research and/or marketing permits for human and animal drugs. The parties recognize that nonclinical safety studies should be conducted in accordance with principles of good laboratory practice (GLP) that are internationally recognized, and that laboratories conducting such studies should be monitored by effective national inspection programs. Accordingly, this Memorandum of Understanding (MOU) provides for: (a) reciprocal recognition of each country's good laboratory practice program (b) acceptance of test data collected in either country for evaluation of safety, and (c) implementation of procedures for continuing cooperative between the countries. Inspections of nonclinical laboratories are to be carried out by the respective national authorities.

VOL 54 ISS 47 MR 13 1989 UMI

**II. Background**

Safety evaluation data submitted for consideration to one national authority are frequently based on studies conducted by laboratories located in another country. Therefore, the standards observed by those laboratories that conduct nonclinical safety studies which are submitted to the authority of the other country should be conducted in accordance with principles of good laboratory practice. When the safety evaluation data submitted to a national authority originate from a laboratory within another country, the national authority of the country of origin should be able to provide the other with information that assures that the laboratory is operated in accordance with good laboratory practices.

Representatives of the parties have met and have agreed to develop standards of good laboratory practice applicable to nonclinical laboratories and to establish national programs of inspection to implement those standards. Authorities in both the Unites States of America and the Republic of Italy have established national programs of inspection to verify the compliance of laboratories with the principles of GLP. These principles and the inspection programs are in accord with the Decision of the Council of the Organization for Economic Cooperation and Development (OECD) on "The Mutual Acceptance of Date in the Assessment of Chemicals" (May 12, 1981) including Annex 2, "OECD Principles of Good Laboratory Practice." These standards and procedures are consistent with the July 26, 1983, recommendation of the OECD Council on the "Mutual Recognition of Compliance with Good Laboratory Practice."

*A. Good Laboratory Practice*

The participating parties of the United States of America and the Republic of Italy have published comparable standards of good laboratory practice relating to nonclinical studies for safety evaluation experiments.

The inspectors of the Food and Drug Administration will rely on regulations relating to Good Laboratory Practice for Nonclinical Laboratory Studies (21 CFR Part 58) in evaluating the laboratories and auditing the data from the studies conducted in the United States of America.

The inspectors of the Ministry of Health will rely on the "Principi Di Buona Practica Di Laboratorio (BPL)" published at *Gazzetta Ufficiale Della Republica Italianato*, August 20, 1986, in evaluating the laboratories and auditing the data from the studies conducted in the Republic of Italy.

*B. National Inspection Programs*

Both of the parties assess compliance of a laboratory with the principles of GLP by having a trained government inspector conduct a laboratory inspection approximately once every two (2) years. The programs permit assessment of current laboratory operations as well as the audit of final reports of completed studies. Laboratories are generally notified in advance and inspection procedures are mutually consistent between the parties. A report of the results of the inspection is prepared that describes laboratory operations and addresses compliance with good laboratory operations and the addrees compliance with good laboratory practice standards.

*C. Compliance*

Both of the parties have established satisfactory procedures to secure the compliance of laboratories with the standards of good laboratory practice. These procedures include, for example, notifying a laboratory of deficiencies observed and requesting corrective action within a specified time frame. Failure to correct deficiencies is dealth with by the Food and Drug Administration in a variety of ways that include the rejection of specific studies or the disqualification of the laboratory. The Ministry of Health rejects specific studies of denies certification of compliance to laboratories that fail to take corrective action when informed of deficiencies.

**III. Substance of Understanding**

A. The parties agree that:

1. Adherence to adequate standards of good laboratory practice is essential to the conduct of high quality safety testing;

2. A national program of periodic inspections conducted by a trained inspectorate is required to monitor adherence to the standards of good laboratory practice;

3. Appropriate compliance procedures are necessary to assure adherence to the standards of good laboratory practice; and

4. Studies conducted in accordance with the respective standards of good laboratory practice promulgated by either country are to be acceptable to both parties for consideration in the evaluation of safety.

B. Each party will:

1. Inform the other party of changes in their good laboratory practice standards and their national inspection program;

2. Provide the other party quarterly, with the names and addresses of nonclinical laboratories operating within their country, the dates, the laboratories where inspected, and their compliance status;

3. Provide upon request of the other party, further information regarding whether or not a specific laboratory or study is in compliance with the GLP standards;

4. Agree to conduct a good laboratory practice inspection or data audit at a specified nonclinical laboratory at the request of the other party, whenever:

(a) There is serious concern about the quality or integrity of the data submitted to either country,

(b) An inspection has not been performed within the last two (2) years, or

(c) An approval of an application for research and/or marketing permit is pending based upon tests performed in a specified testing facility which are important to granting the approval.

In exceptional situations in which the requesting party can justify a special concern, the requesting party may designate one or more of its scientists to participate in the audit of a particular study;

5. Participate as an observer in an inspection of a laboratory conducted by the authorities in the other country each year in order to maintian a continuing understanding of each party's inspection procedures. These inspections are to alternate each year between the United States of America and the Republic of Italy; and

6. Recognize the need to protect from public disclosure, data and information that are exchanged between the parties that fall within the definition of a trade secret, or confidential commercial or financial information. If there is a request from the public for any information obtained from the other party, that party will be notified of the request prior to release of any information and given an opportunity for consultation.

**IV. Participating Parties**

A. Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

B. Ministry of Health, Viale della Civilta Romana, 7, 00144–I Rome, Italy.

**V. Liaison Officers**

The parties respectively appoint the following officials to serve as liaison officers for all communications regarding matters relative to this Memorandum of Understanding.

A. For the Food and Drug Administration: Director, Division of Compliance Policy, Office of Regulatory Affairs, (Currently: Mr. Ernest L. Brisson), 5600 Fishers Lane, Rockville, MD 20857.

B. For the Ministry of Health: Director, Pharmaceutical Serivce, (Currently: Dr. Romano Capasso), Viale della Civilta Romana, 7, 00144–I Rome, Italy.

**VI. Duration of the Memorandum of Understanding**

This MOU shall become effective upon the date of the last signature. It may be terminated at any time by written notice to the other party.

Approved and accepted for the Food and Drug Administration.

By: Frank E. Young, Title: Commissioner of Food and Drugs. Date: December 8, 1988. Place: Rockville, MD, U.S.A.

## Health Resources and Services Administration

### Special Project Grants; Maternal and Child Health Services, Federal Set-Aside Program

**AGENCY:** Health Resources and Services Administration, PHS, DHHS.

**ACTION:** Notice of extension of application due date.

**SUMMARY:** This notice extends the application due date for a separate sub-category of grants under category (5)(c) of the Special Projects Grants—Maternal and Child Health Services, Federal Set-Aside Program, published in the **Federal Register** December 20, 1988 (53 FR 51168). Category (5)(c) relates to child and adolescent health projects under special MCH improvement grants. The separate sub-category of grants has been established to provide funding for a special initiative in preventive health for children at the local community level. The initiative, called "Healthy Tomorrows," would encourage additional support from the private sector and from foundations to form a community based partnership that would coordinate resources to improve the health of pregnant women, infants, children and adults and increase their access to health services. The application due date for this special initiative under category (5)(c) is extended to June 29, 1989. All other aspects of the December 20, 1988 **Federal Register** Notice remain the same.

Dated: March 6, 1989.

**John H. Kelso,**

### Office of Administration

**[Docket No. N–89–1953]**

### Submission of Proposed Information Collections to OMB

**AGENCY:** Office of Administration, HUD.

**ACTION:** Notices.

**SUMMARY:** The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

**ADDRESS:** Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

**SUPPLEMENTARY INFORMATION:** The Department has submitted the proposals for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 27, 1989.

## Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N–89–1917; FR 2606]

## Unutilized and Underutilized Federal Buildings and Real Property Determined by HUD to Be Suitable for Use for Facilities to Assist the Homeless

**AGENCY:** Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

**ACTION:** Notice.

**SUMMARY:** This Notice identifies unutilized and underutilized Federal property determined by HUD to be suitable for possible use for facilities to assist the homeless.

**DATE:** March 13, 1989.

**ADDRESS:** For further information, contact Morris Bourne, Director, Transitional Housing Development Staff, Room 9140, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 755–9075; TDD number for the hearing- and speech-impaired (202) 426–0015. (These telephone numbers are not toll-free.)

**SUPPLEMENTARY INFORMATION:** In accordance with the December 12, 1988, court order in *National Coalition for the Homeless* v. *Veterans Administration*, D.C.D.C. No. 88–2503–CG, HUD publishes a Notice, on a weekly basis, identifying unutilized and underutilized Federal buildings and real property determined by HUD to be suitable for

VOL 54 ISS 47 MR 13 1989 UMI

use for facilities to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable this week.

Dated: March 7, 1989.

**James E. Schoenberger,**

*General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### Preparation of Resource Management Plan Amendments and an Environmental Impact Statement; Northeast Resource Area, et al.

**AGENCY:** Bureau of Land Management (BLM), Department of the Interior.

**ACTION:** Notice of intent to prepare amendments to five Resource Management Plans (RMPs) and an Environmental Impact Statement (EIS) for the Northeast, Kremmling, Little Snake, Glenwood Springs, and San Juan Resource Areas.

**SUMMARY:** The Colorado State Office hereby gives notice of its intent to prepare an EIS and amendments to five RMPs. The five Resource Areas contain approximately five million acres of public lands and public minerals underlying private lands. The primary purpose of the amendments is to incorporate the latest BLM program guidance (BLM Manual section 1624.2) for fluid minerals. This guidance includes the use of a "Reasonably Foreseeable Development" scenario, identification of cumulative impacts, and evaluation of the effectiveness of stipulations.

The proposed planning action will result in a determination as to which public lands and minerals should be made available for oil and gas development through leasing, and what lease stipulations may be necessary to protect other resource values.

The issues anticipated include:

1. Determining if existing lease stipulations are proper and sufficient to protect other resource values.
2. Determining if there is additional federal mineral estate that should be considered for oil and gas leasing.
3. The cumulative impacts of oil and gas development.
4. Clarification of stipulations applied at lease issuance and conditions of approval applied to subsequent development activities.
5. Lease stipulations necessary to protect wildlife, fragile soils, water resources and other resource values.
6. The impact of lease stipulations on oil and gas development.

The proposed planning criteria used to address these issues are summarized below:

1. Consult with appropriate representatives of the oil and gas industry to identify mineral potential.
2. Apply applicable laws and regulations to identify land eligible for leasing.
3. Assess the suitability of the land to incur oil and gas development, and the availability of the resource for development.
4. Compare the public values of oil and gas development with the public values of other alternative uses which may be precluded or impacted.

Alternatives proposed for consideration include:

1. No action defined as a continuation of current management.
2. Standard lease terms only.
3. Preferred alternative—to be defined by management following consultations with staff and the public.

The plan amendments will be prepared using a variety of resource specialists including persons trained in geology, hydrology, soils, air, wildlife, range, recreation, realty, surface protection, and economics.

**DATES:** Public comment on the proposed issues, planning criteria, alternatives and resource disciplines will be accepted for 30 days following publication of this Notice. In addition, public scoping meetings will be scheduled for late March and early April. At least two weeks advance notice of the time and dates of these meetings will be provided. Additional public participation opportunities will be provided through formal public hearings on the draft EIS and requests for written comments.

**ADDRESSES:** Comments should be addressed to Greg Shoop, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado 80215.

**FOR FURTHER INFORMATION CONTACT:** Greg Shoop, CO-922, telephone cml. (303) 236-1787 or FTS 776-1787.

Dated: March 7, 1989.

### Arizona; Exchange of Public and Private Lands in Maricopa and Mohave Counties and Order Providing for Opening of the Reconveyed Land

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of Exchange of Land and Opening of Reconveyed Land.

**SUMMARY:** This action informs the public of the completion of an exchange between the United States and Westwing Associates, an Arizona General Partnership. The United States transferred 756.33 acres in Maricopa County and Westwing Associates conveyed 19,435.60 acres in Mohave County. In addition, the reconveyed land will be opened to the public land laws.

**FOR FURTHER INFORMATION CONTACT:** John Gaudio, BLM, Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011, (602) 241-5534.

**SUPPLEMENTARY INFORMATION:** The Bureau of Land Management transferred the following described 756.33 acres of land in Maricopa County by Patent No. 02-88-0037, pursuant to the Federal Land Policy and Management Act of October 21, 1976:

**Gila and Salt River Meridian**

T. 4N., R. 1E.,
Sec. 3, lots 1, 2, 3, 11, 12, 13, 14, 15, 19, and 20, S½NE¼, NE¼SE¼.
T. 5N., R. 1E.,
Sec. 27, NW¼NW¼NW¼, N½SW¼ NW¼NW¼, SW¼SW¼NW¼NW¼, W½W½SW¼NW¼;
Sec. 34, S½N½NE¼NE¼, S½NE¼NE¼, NW¼NE¼, S¼NE¼, E½SE¼SW¼, SE¼.

In exchange the following described 19,435.60 acres of land in Mohave County were conveyed to the United States:

**Gila and Salt River Meridian**

*Parcel 1 (Surface Only):*

T. 19N., R. 15W.,
Sec. 5, lots 1 to 4, incl., S½N½, S½.
T. 20N., R. 15 W.,
Sec. 5, lots 1 and 3, SE¼NW¼, SW¼;

Sec. 27, SE¼NE¼, NE¼SW¼, S½SW¼ SE¼;
Sec. 28, NE¼, N½SE¼, SE¼SE¼;
Sec. 29, NW¼SW¼;
Sec. 30, lots 1 and 2, NE¼, E½NW¼;
Sec. 35, NW¼NE¼, N½NW¼, SE¼NW¼.
T. 21 N., R. 16 W.
Sec. 24, N½, W½SW¼, E½SE¼;
Sec. 25, all;
Sec. 30, lots 1, 2, and lots 5 to 16, incl., N½NE¼, SW¼NE¼, N½SE¼NE¼, N½S½SE¼NE¼, S½N½NE¼SE¼, S½NE¼SE¼, W½SE¼, SE¼SE¼;
Sec. 34, NE¼NE¼, S½N½, except Hualapai Mtn. Rd.

At 9:00 a.m. on March 13, 1989, the land described in Parcels 1 and 2 will be opened to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 9:00 a.m. on March 13, 1989, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

The purpose of this notice is to inform the public and interested State and local government officials of this exchange of public and private land, and of the opening of the reconveyed land.

The land conveyed to the United States in this exchange will be administered by the Bureau of Land Management.

**Marsha L. Luke,**

*Acting Chief, Branch of Lands Operations.*

## Minerals Management Service

**Pacific Northwest Outer Continental Shelf (OCS) Task Force; Initial Meeting**

This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Pub.L. No. 92–463, 5 U.S.C. Appendix 1, and the Office of Management and Budget's Circular No. A–63, Revised. The Pacific Northwest OCS Task Force will hold its initial meeting during the period 8:30 a.m. to 5 p.m., March 27, 1989, at the Inn at the Quay, 100 Columbia Street, Vancouver, Washington (206–694–8341). The meeting is open to the public.

The purpose of the Pacific Northwest OCS Task Force is to advise the Secretary of the Interior and other officers of the Department of the Interior on issues related to potential OCS oil and gas leasing, exploration and development in the Washington and Oregon OCS Planning Area.

Minutes of the meeting will be available for public inspection and copying at the Minerals Management Service, Pacific OCS Region, Suite 244, 1340 West Sixth Street, Los Angeles, California 90017. For more information contact John Smith at (213) 894–4154.

Dated: March 7, 1989.

Carolita Kallaur,

*Deputy Associate Director for Offshore Leasing.*

BILLING CODE 4310–MR–M

**Development Operations Coordination Document; Texas Producing Inc.**

**AGENCY:** Minerals Management Service, Interior.

**ACTION:** Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

**SUMMARY:** Notice is hereby given that Texaco Producing Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 1953, Block 144, West Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from existing onshore bases located at Cameron and Morgan City, Louisiana.

**DATE:** The subject DOCD was deemed submitted on February 27, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

**ADDRESSES:** A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

**FOR FURTHER INFORMATION CONTACT:** Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2867.

**SUPPLEMENTARY INFORMATION:** The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to Section 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: February 28, 1989.

J. Rogers Pearcy,

*Regional Director, Gulf of Mexico OCS Region.*

BILLING CODE 4310–MR–M

## DEPARTMENT OF JUSTICE

**Lodging of Consent Decree; Flexcon Co.**

In accordance with Department Policy, 28 CFR 50.7, 38 FR.19029, notice is hereby given that a proposed Consent Decree in United States v. Flexcon Co., Civil action No. 88–0016–xx (D. Mass.), was lodged with the United States District court for the district of Massachusetts on March 6, 1989. The proposed Decree, if entered, will resolve the liability of the defendant Flexcon in this action pursuant to the Clean Air Act, 42 U.S.C. 7413. The proposed Decree Requires Flexcon to pay $60,000 in penalties as well as to comply with specified emission limitation and reporting requirements under the Clean Air Act.

The Department of Justice will receive for a period of thirty (30) days from the date of publication of this notice, written comments relating to the proposed Decree. Comments should be addressed to the acting Assistant Attorney General, Land and Natural Resources Division, United States Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Flexcon Co.*, D.J. Ref. No. 90–5–2–1–11–49.

The proposed Decree may be examined at the office of the United States Attorney, 1107 J.W. McCormack Post Office and Courthouse, Boston, Massachusetts 02109; at the Region I office of the United States Environmental Protection Agency, John F. Kennedy Federal Building, Room 2203, Boston, Massachusetts 02203; and at the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, at the above address. In requesting a copy, please enclose a check in the amount of $2.10, payable to the Treasurer of the United States, to cover the costs of reproduction.

Donald A. Carr,

*Acting Assistant Attorney General, Land & Natural Resources Division.*

[FR Doc. 89–5683 Filed 3–10–89; 8:45 am]

BILLING CODE 4410–01–M

**Lodging of Consent Decree; City of Ottumwa, IA**

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on February 27, 1989 a proposed Partial Consent Decree in *United States* v. *City of Ottumwa, Iowa, et al.* (S.D. Iowa), Civil Action No. 88–164–E was lodged with the United States District Court for the Southern District of Iowa, Central Division. The Partial Consent Decree concerns violations of the Asbestos National Emission Standards for Hazardous Air Pollutants ("NESHAP"), 40 CFR Part 61.140, *et seq.*, and the Clean Air Act, 42 U.S.C. 7401, *et seq.* The proposed Partial Consent Decree requires defendants Allen Beachy and Daniel Beachy to give proper notification under the asbestos NESHAP, to comply with all aspects of the asbestos NESHAP, and to attend an EPA asbestos training program if they continue to handle asbestos.

The Department of Justice will receive comments relating to the proposed Partial Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Ottumwa, Iowa, et al.*, D.J. No. 90–5–2–1–1143.

The proposed Partial Consent Decree may be examined at the office of the United States Attorney for the Southern District of Iowa, 115 U.S. Courthouse, Des Moines, Iowa 50309 and the U.S. Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101. The Decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Partial Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Donald A. Carr,

*Acting Assistant Attorney General, Land and Natural Resources Division.*

BILLING CODE 4410–01–M

**Lodging of Consent Decree; Township of Maple Shade, NJ**

In accordance with departmental policy, 28 CFR 50.7, notice is hereby given that on February 14, 1989, a proposed consent decree in *United States of America v. Township of Maple Shade, New Jersey*, Civ. No. 86–689, was lodged with the United States District Court for the District of New Jersey. The proposed consent decree settles the United States' claims against Maple Shade under the Clean Water Act, set forth in a complaint filed on the same date, relating to discharges from two municipal sewage treatment plants in violation of effluent limitations and other applicable permit requirements.

The proposed consent decree requires Maple Shade to upgrade and expand one of its treatment plans to provide advanced wastewater treatment of all of the Township's sewage by December 31, 1991, to convert the second treatment plant into a pumping station, and to cease all discharges from the second treatment plant by December 31, 1991. The decree also requires: (1) Payment of a $75,000 civil penalty to the United States, (2) compliance with interim effluent limitations until the facilities improvements are completed, and (3) various interim operating improvements and repairs to the existing Maple Shade treatment facilities.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Township of Maple Shade*, D.J. Ref. 90–5–1–1–3105.

The proposed consent decree may be examined at the offices of the United States Attorney, Federal Building, 970 Broad Street, Newark, New Jersey 07102, and at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, NY 10278. A copy of the consent decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and

BILLING CODE 4410-01-M

---

**Antitrust Division**

**[Civil No. C88-4253 (N.D. Ohio)]**

**Proposed Final Judgment; TRW Inc.,**

Pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(a) and (b), the United States publishes below the comments it received on the Competitive Impact Statement and proposed Final Judgment in the captioned case, filed in the United States District Court for the Northern District of Ohio, together with the response of the United States to these comments.

Copies of the public comments and response are available on request for inspection and copying in Room 3229, Antitrust Division, Department of Justice, Washington, DC, and for inspection at the Office of the Clerk of the United States District Court for the Northern District of Ohio in Cleveland.

**John W. Clark,**

*Deputy Director of Operations Antitrust Division.*

In the matter of United States of America, Plaintiff, vs. TRW Inc., Defendant, filed in the United States District Court for the Northern District of Ohio Eastern Division.

**Response of the United States to Public Comments and Motion of the United States for Entry of Final Judgment**

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. 16(b)–16(g)) (the "APPA"), the United States of America hereby files its Response to Public Comments and moves for entry of the proposed Final Judgment against TRW Inc. ("TRW") in this civil antitrust proceeding.

*I. Introduction*

This action began on November 17, 1988, when the United States filed a complaint alleging that the proposed acquisition of Chilton Corporation ("Chilton") by TRW would violate section 7 of the Clayton Act, 15 U.S.C. 18. The Complaint alleged that the effect of the acquisition would be substantially to lessen competition in sales of consumer credit reports in sixteen (16) geographic markets. Both companies sell credit reports, either directly through credit bureau offices that they own ("owned offices") or indirectly through affiliated credit bureaus, in each of these markets. The Complaint seeks, among other relief, to enjoin the transaction to prevent its anticompetitive effects in the sixteen relevant markets.

On November 17, 1988, the United States and TRW filed a Stipulation in which they consented to the entry of a proposed Final Judgment designed to eliminate the anticompetitive effects of the acquisition. In accordance with the provisions of the APPA, the United States also filed a Competitive Impact Statement explaining the basis for the Complaint and for the United States' conclusion that entry of the proposed Final Judgment would be in the public interest. The proposed Final Judgment eliminated the anticompetitive effects alleged in the Complaint with respect to the sixteen markets by requiring TRW to consummate contracts to sell copies of the consumer credit files in some markets and to end affiliation agreements with independent credit bureaus in others.

The United States and TRW stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the government withdraws its consent. Entry of the proposed Final Judgment would terminate this action, except that the Court would retain jurisdiction to construe, modify, and enforce the Final Judgment and to punish violations of the Judgment.

*II. Compliance with the APPA*

Upon publication of this Response in the Federal Register, the procedures required by the APPA will have been completed, and the Court may enter the proposed Final Judgment.

A. Stipulation, Proposed Final Judgment and Competitive Impact Statement

The United States has caused the Stipulation between the parties for entry of the proposed Final Judgment, and the Competitive Impact Statement, in the form prescribed by 15 U.S.C. 16(b), to be filed with the Court and to be published in the **Federal Register** (53 FR 48735, December 2, 1988 and 53 FR 49937, December 12, 1988).[1] It also has furnished copies of these documents to all persons who have requested them.

B. Newspaper Notices

The United States has caused newspaper notices of the proposed Final Judgment and the Competitive Impact Statement to be published in *The Washington Post* and the Cleveland *Plain Dealer* in accordance with the procedures set forth in 15 U.S.C. 16(c).[2]

C. Statements Regarding Communications

As required by 15 U.S.C. 16(g), on November 28, 1988, TRW filed with the Court a description of communications, by or on behalf of the defendant, with officers and employees of the United States concerning the proposed Final Judgment.

D. Waiting Period, Comments, and Publication of Comments and Response

The 60-day period provided by 15 U.S.C. 16(d) for submission of public comments expired on February 10, 1989. The United States received comments from Credit Bureau Services of New Hampshire, a credit bureau wholly-owned by CBC Companies ("CBC"), on January 18 and February 10, 1989; from Rochester Credit Center, Inc. ("Rochester") on January 26, 1989; from Credit Data of Hawaii, Inc. ("Hawaii") on February 9, 1989; from Credit Data of Central Massachusetts, Inc. and Credit Data of Rhode Island, Inc. (together "Central Massachusetts") on February 10, 1989; and from Centroplex Credit Reporting & Collections, Inc. ("CCRC") on February 8, 1989. In addition, on February 9, 1989, the Department received a letter from the Honorable Gordon J. Humphrey, United States Senator from the State of New Hampshire, indicating his concern about the impact of the proposed Final Judgment on CBC and asking us to give careful consideration to its comments.[3] In accordance with the APPA, the United States has evaluated the comments, and responds to them below. As required by 15 U.S.C. 16(b), the comments are being filed with this Response, and the comments and this Response will be published in the **Federal Register**. Counsel for the United States will inform the Court when publication has occurred.

---

[1] Copies of the **Federal Register** Notices are attached to this Response as Exhibit A.

[2] Copies of the affidavits of publication are attached to this Response as Exhibit B.

[3] Copies of the comments are attached to the Response as Exhibits C through I.

E. Standards for Review of Consent Decrees

Under the APPA, the primary responsibility for enforcing the antitrust laws and protecting the public interest in competitive markets rests with the Department of Justice.[4] In carrying out its responsibilities, the Department has very broad discretion in prosecuting alleged antitrust violations and determining appropriate relief for the settlement of cases.[5] Before entering a proposed consent decree, the Court must determine that the decree is in the public interest, 15 U.S.C. 16(e),[6] but that test is limited to ensuring that the government has met its public interest responsibilities, that is, determining that the proposed Final Judgment falls within the range of the government's antitrust enforcement discretion. The Ninth Circuit Court of Appeals has explained these respective obligations as follows:

> The balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General * * *. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is "within the reaches of the public interests." * * * More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.[7]

Indeed, the courts repeatedly have held that the purpose of their review of proposed antitrust consent decrees is not to determine "whether this is the best possible settlement that could have been obtained if, say, the government had bargained a little harder" [8] or whether this is the remedy "the Court might have imposed had the matter been litigated." [9] Rather:

> Absent a showing of corrupt failure of the government to discharge its duty, the Court, in making the public interest finding, should * * * carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations are reasonable under the circumstances. The Court must also give appropriate recognition * * * to the fact that every consent judgment normally embodies a compromise, and that the parties each give up something which they might have won had they proceeded to trial.[10]

In this case, the United States carefully considered the matters that are now being raised in the comments when it formulated its position with respect to this transaction. We concluded, for the reasons discussed below and in the Competitive Impact Statement, that the public would be best served by the remedial action set forth in the proposed Final Judgment. If the Court finds that the United States' action represented a reasonable exercise of its antitrust enforcement responsibility and prosecutorial discretion, it may enter the proposed Final Judgment as soon as compliance with APPA is completed by publication of the comments and Response in the **Federal Register**.[11]

F. The Competitive Analysis of the United States

The Department believes that if the proposed Final Judgment is entered, the transaction will no longer violate Section 7 of the Clayton Act. The proposed Final Judgment will ensure that a new vendor will enter each market in which, absent such relief, the transaction would substantially reduce competition. As a result, credit grantors will have as many potential sources of full file consumer credit reports to choose from as in the past and no credit report seller will be able to gain market power. Thus, the United States concludes that entry of the proposed Final Judgment is in the public interest.

1. *The Product Is "Full File" Consumer Credit Reports.* Consumer credit reports are purchased by grantors of credit such as banks, mortgage companies, department stores, and other businesses to determine whether to grant credit to individual consumers. Credit reports include information on a person's background,[12] debts owed,[13] and public record announcements.[14] Debt obligation information is obtained from computer tapes credit grantors prepare each month on the status of their consumer accounts. Public record information is collected manually from public records by local credit bureaus.[15] A data base of credit reports that contains all the types of information demanded by credit grantors, including five years of historical information, is considered a "full file."

Credit grantors purchase credit reports to reduce the risk of granting credit to consumers with whom they are unfamiliar. Obviously, the more information in a credit report, the lower the risk. Those who purchase credit reports generally believe that a four or five year credit history is necessary for prudent risk assessment. As a result, credit grantors do not consider credit reports that contain less than four or five years of debt obligation information and less than seven years of public record information to be adequate substitutes for reports that contain such information.[16]

2. *The Geographic Market for Consumer Credit Report is Local.* The geographic market for credit reports is local because credit grantors demand as much current credit information as they can get about an individual, and the only vendors likely to possess that information are those credit bureaus in the area in which the individual resides. A credit grantor would not consider a credit bureau that does not have full file information on most individuals in a particular geographic area to be an adequate substitute for a credit bureau that possessed such comprehensive

[4] *United States* v. *Waste Management, Inc.*, 1985-2 Trade Cas. (CCH) ¶ 66,651 at page 63,045 (D. D.C. 1985).

[5] *United States* v. *Mid-America Dairymen, Inc.*, 1977-1 Trade Cas. (CCH) ¶ 61,508 at page 71,980 (W.D. Mo. 1977), citing *Sam Fox Publishing Co.* v. *United States*, 366 U.S. 683, 689, 81 S. Ct. 1308, 1312-13 (1961) and *Swift & Co.* v. *United States*, 276 U.S. 311, 331-332, 48 S. Ct. 311, 317 (1928).

[6] This determination can be properly made on the basis of the Competitive Impact Statement and this Response. The procedures of 15 U.S.C. 16(f) are discretionary, and a court need not invoke any of them unless it believes that the comments have raised significant issues and that further proceedings would aid the Court in resolving those issues. *See* H.R. Rep. 93-1463, 93d Cong. 2d Sess. 8-9 *reprinted in* [1974] U.S. CODE CONG. & AD. NEWS 6535, 6538.

[7] *United States* v. *Bechtel Corp.*, 648 F.2d 660, 666 (9th Cir. 1981) (citations omitted).

[9] *United States* v. Alcan Aluminum Ltd., 605 F. Supp. 619, 622 (W.D. Ky. 1985).

[10] *United States* v. *Mid-America Dairymen, Inc.*, *supra*, ¶ 61,508 at page 71,980.

[11] United States respectfully requests that the Court enter the proposed Final Judgment promptly. Congress expected federal courts to adopt "the least complicated and least time-consuming means possible" to determine if entry of a proposed final judgment would be in the public interest. *United States* v. *ARA Services, Inc.*, 1978-2 Trade Cas. (CCH) ¶ 62,201 at page 76,988 (E.D. Mo. 1979).

[12] This normally includes the consumer's name, any aliases, age, marital status, number of dependents, social security number, current and two most recent previous addresses, current and two most recent employers and current salary.

[13] Information about debts owed is gathered from individual, regional, and local credit grantors who are willing to give copies of their computerized records to credit bureaus. The data shows a consumer's outstanding credit accounts, credit balance, current balance, whether any amount is past due, and, if so, for how long.

[14] This includes judgments, liens, and bankruptcy information obtained from the records of federal, state, county or municipal authorities.

[15] In some states, public record information may be purchased from public record information collection firms.

[16] Bureaus sometimes sell credit reports while they are in the process of collecting information. Credit reports that are not full files usually sell for substantially less than full files.

local information. If distant credit bureaus were fully competitive substitutes for local credit bureaus, there would be no variations in local prices based upon the number of local bureaus. In fact, however, prices in particular geographic areas vary widely, depending on the number of credit bureaus offering full file credit reports in that area. That evidence strongly suggests the conclusion that credit bureaus doing business elsewhere are not in the market.

3. *The Structure of the Modern Consumer Credit Reporting Business.* The consumer credit reporting business has changed dramatically in the last twenty years as independent local merchant-owned credit bureaus have been transformed into parts of national computerized networks of consumer credit information. Most credit bureaus were founded by regional or municipal merchants associations. Originally, those bureaus collected information manually. The labor-intensive nature of the business, as well as the fact that most bureaus were owned by their customers, led to a situation where most local bureaus were monopolies. The business changed radically in the late 1960s and early 1970s when five companies (hereinafter referred to as "networks" or "network vendors") (TRW, Chilton, CBI, Trans Union, and ACS) began to store consumer credit files on computers.[17]

Computers greatly reduced the cost of maintaining consumer credit files and allowed firms to enter markets that had previously been monopolized by one firm. Computers also enabled credit bureaus to form regional networks that share information on individual consumers. These networks are of great benefit to credit grantors contemplating extending credit to consumers that reside in other parts of the country or that have recently moved.[18] The increased mobility of many Americans makes it very important that credit grantors be able to obtain information about an individual's credit history throughout the country.

Thus, while credit bureaus once operated as individual entities, they are now pieces of an interlocking network of independent bureaus, known as affiliates, and vendor-owned offices that collect, maintain, and distribute consumer credit information over a large geographic area. Affiliates and owned offices all store their information in a vendor maintained common data base and all of them have access to all the information in the data base. A vendor provides credit bureaus with data processing services and access to all the information in its data base. Affiliates provide vendors with all their data and sell that data to other affiliates and to the vendor (for use in its owned offices).

Affiliates in a network are more partners in the creation, maintenance, and sale of consumer credit data bases than mere customers of data processing services. Indeed, all affiliates and owned offices in a network are usually known to credit grantors by the vendor's tradename, rather than the affiliate's. As a result, affiliates have a big stake in the success or failure of their network vendors. Similarly, vendors rely heavily on the data collection and sales abilities of their affiliates.

In recent years, the importance to credit grantors of a credit bureau's ability to provide information on consumers in other parts of the country has led TRW, Trans Union, and CBI all to announce that they intend to have files on consumers all over the country. These vendors have opened new credit bureau offices or entered into contracts with independent affiliates in many towns previously served by a single, monopoly credit bureau. Indeed, TRW will substantially expand its geographic scope through the acquisition of Chilton. Thus, while the Department concluded that the transaction posed a danger to competition in sixteen local markets, it also recognized that the transaction created the potential for improved consumer credit data bases and thus could be of benefit to credit grantors in many local markets.
